MERCANTILE AGENCY. THE

ESTABLISHED 1841.

DUN. BARLOW & CO. - - - R. G. DUN & CO.

THE DUPDOSO of the MERCANTILE AGENCY is to procure and keep on record such information as will enable parties who grant Credit to decide whom it is safe to trust, and whom it is wise to avoid. It has sought to substitute for the tardy and often insufficient results of individual investigation, a system whereby the labor of vast numbers in gleaning information is centred, and made accessible to all who choose to avail themselves of it. It is not an experiment, but by an existence of over a quarter of a century, during which time it has had the support of two-thirds of the mercantile community in the centres of trade, it has demonstrated its usefulness and general reliability. If it had been an unsafe guide, if its influence had been other than beneficial, it would long ago have ceased from want of support. To-day it is far more extensive, possesses better facilities, and is more complete in its arrangements than ever before. Every fact which is gleaned, every item that is recorded, adds value to the store of information already accumulated; while the characters that men have made for themselves as time has passed are found faithfully daguerrotyped in our records.

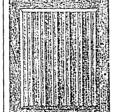

There are many persons who content themselves with a Book of Ratings, and from it too hastily conclude what the Agency can do for them. This is a great mistake. While the Reference Book issued by us is confidently offered to the Public as the most complete, accurate, and useful aid of the kind ever published, it should be understood that we do not by any means intend it as a substitute for the detailed information on our Office Records, which for minuteness, discrimination, and characterization afford an insight into the peculiarities of each case, which a classification or division into groups can never be made to reach. Indeed, the REFERENCE BOOK bears much the same relation to the recorded details that a photograph picture of an assembly of persons bears to portraits taken singly. In the one case the personal identity is but faintly or with difficulty traced; in the other it is a portrait with all the lineaments and peculiarities of the subject, and it cannot be mistaken for any other person. We invite the special attention of all parties to whom this Circular is sent, to the scope, character, and reliability of this information, conscious of its intrinsic value and usefulness to all who give credit. We are glad at all times to submit to any reasonable test as to the accuracy and fulness of our reports, by parties who contemplate subscribing. To that end we invite a call at our office as below.

THE REFERENCE BOOK is issued twice a year—in January and July—and a weekly sheet of corrections sent to each holder of the Book. Six different editions of this work are issued, viz.: The General Book, the Western, Eastern, Southern, Canadian, and a Book of Cities. Pocket Editions of various States, for the use of Commercial Travellers, are also regularly issued. All subscribers to the Agency are entitled to the Reference Book, unless otherwise specially arranged. Terms made known and specimen copies to be seen at any of our offices.

TERMS.

ALL persons are particularly warned, until further notice, against paying any bill or demand due the REAL ESTATE RECORD to any person outside of this office, except our regularly authorized collector, Mr. Henny D. Smith, as under no circumstances will any other signature be recognized.

OUR MARKET REPORTS.

In the regular commercial column of this issue will be found some very interesting statistics of the movements in most of the leading building materials during the past year. The tables of imports and exports have been compiled with great care, and are as near perfect as it is possible to make them. On domestic receipts, finding it simply impossible to arrive at anything like a full aggregate, we have refrained almost entirely from estimates, and given only the figures of which we have a positive account, but such as they are they are worthy of attention, and can be found in no other journal. Of lumber we are enabled to account for 155,050,-000 feet, and this does not include any receipts via North River, except a few direct consignments from Canada, and is also short a great many coastwise cargoes of which no report has been made.

STATEN ISLAND.

Ir has been ascertained at Richmond County Clerk's Office that the deeds recorded from 1st January to 1st December, 1869, amount to 1,156 against 1,113 during the same period in 1868, and the aggregates of consideration for these sales were:

For 11 months, 1868.....\$2,239,349.87

" 1869......\$2,849,069.47

Increase......\$610,719.60 Every one concedes there is nothing speculative or fictitious about the growth of Staten Island. It is notoriously suffering, as it long has suffered. from ignorance, negligence, prejudice, and the almost total absence of those perfectly legitimate, usual, and intelligent processes by which the value of real estate all around New York is most rapidly enhanced. In spite of all this, by the mere operation of its natural advantages, the Island is increasing in population in an equal ratio with New York, and the mere aggregation of individual purchases. without combination, puffing, or speculation, shows an increase of over 21 per cent. in eleven months. Staten Island history, especially of late, is full of such pregnant facts as this, to which, however, we think adequate attention is scarcely paid by those who seek safe and profitable investment. Every enterprise of a public character on the Island thus far seems prosperous just in proportion to the activity and judgment with which it is prosecuted and Put in prompt and satisfactory operation, as the Staten Island Railroad, the Shore Railroad, the People's North Shore Ferry, &c.

It cannot be denied that Staten Island has the most beautiful natural features and advantages of

any district of the same extent within the same distance from New York. Her position requires solid, continuous means of communication with the Continent and with New York. No expense to attain these great objects can bear any comparison to the immense increase of individual wealth and public revenue which would result. The object is not simply local; it is municipal, as respects New York and State, and national, and the time cannot be much longer postponed when intelligent attention and action will be had. The rate of increase of population shows the time for action has arrived.

The people of the Island are singularly lethargic. They do not move with such combined and intelligent efforts for great public improvements as would make capitalists rush in for the purchase of their property, and as in fact their own convenience requires. But certainly our present Legislature, whether asked or not, should do something with Staten Island. A commission to examine and report as to necessary improvements should at least be appointed. The best of men could be found who would act without salary. If Staten Islanders were wise they could lead and control the movement. If they are not wise the movement must nevertheless take place, even if without them or against them.

If nothing better can be done, let the Commissioners of our Central Park be authorized and requested to investigate and report on improvements connected with Staten Island, and especially a plan for laying out all necessary roads and desirable parks on the Island.

STOPPING IMPROVEMENTS.

It is to be regretted that the operations of the Pneumatic Despatch Company have been conducted in such a singular manner as to call for the interference of either the Mayor of our city or the Legislature of the State. What reasons the Company may have for investing their affairs with such an air of secrecy is entirely beyond our comprehension; but we are loth to believe that because they do not choose to throw their work open to the inquisitorial eye of every passer-by, that as a consequence it must be taken for granted that they are undermining the city. Still the Mayor of the city and its chief officers have certainly a right, and not only a right, but it is their duty, to inspect and examine into such a work, and see that it is conducted with a due regard to the safety of the citizens who are compelled to travel above what may be, for aught they know, a regular man-trap; and the officers of the company made a great mistake when they refused the chief officer of the city that privilege. It will be most unfortunate for the public, however, should the work now be stopped by the Legislature, for it may prove the death-knell to any Underground Arcade, or other system of underground communication, if the principle should be established that a company, even after the obtaining of its charter and the necessary power from the Legislature to pursue its work, can be interfered with by a succeeding Legislature, unless it can be positively shown that the work is being conducted in such a manner as to be highly dangerous to the community. No capitalist of_sense will hereafter invest a cent in any such work, and we trust the Legislature will think twice

before passing any bill providing that operations shall be stopped on this improvement.

BROOKLYN MATTERS.

THE Mayor of Brooklyn, in his recent message, says the aggregate debt of the City of Brooklyn is about twenty-seven millions and a half of dollars, eight millions of which have been swallowed up by Prospect Park, which is not yet half finished. The water-works cost eight millions, and have not yet reached a paying basis. The Mayor, in consequence, thinks that unless a reef or two is taken in in the sails of extravagant expenditure for improvements, the city will become bankrupt. Six millions and a half of dollars were borrowed on the credit of the city during the last twelve months, the principal portion of which is charged to the account of the Albany Commissions for local improvements. The Justices of the Peace are charged with misappropriating the fines which should be paid into the city treasury. The Third street Commission is also branded as a swindle, and collusion is hinted at between it and the Park Commission. The expenditures of the city amount to over one million dollars a month. Twenty-seven hundred dwellings (half of which are brown-stone and brick), thirty churches, twenty-five school-houses, and more than one hundred stores and manufactories have been erected, eleven miles of new streets have been graded and paved, and thirty-seven old streets have been in whole or in part repaved during the past

GOSSIP.

The magnificent Boulevard, 150 feet wide, projected by the Central Park Commissioners, will run from the great circle at the junction of Eighth avenue and Fifty-ninth st. to Tubby Hook, a distance of eight miles. Five miles of the track to 155th street have been laid out, and will be completed by the close of next year. Two rows of trees will stand on each of the wide sidewalks, and in time create a grateful shade; and two rows will stand in the centre of the road. The great width of the avenue will afford ample space for these. The plan has been adopted of locating the sewers, gas-pipes, and water-pipes, under the sidewalks. This will obviate the necessity of tearing up the street for a communication upon the building of each new house. From Tubby Hook this boulevard will cross to Harlem river, under Fort George Hill, and run along its border to 155th street. It will connect with the Sixth and Seventh avenues at 145th street. The Sixth and Seventh avenue boulevards are also under operation from the further end of the Park to Harlem river, and will also be ready for travel by the close of next year. The former will run from the Farmer's Gate, and the latter from the Warrior's Gate. Both are to be 150 feet wide, but somewhat varied in plan. Four rows of trees will be planted on that of the Sixth avenue, but only three on that of the other. The Legislature has charged the Park Commissioners with laying out all the streets between 155th street and Kingsbridge. From Houston street to 155th street the city has been laid out on the rectangular system of Philadelphia. The land being very bold and irregular at 155th street, surveys ceased. Various movements have been made within the past fifteen years to lay out this section, but without success. The Commissioners will not adopt the numerical rectangular system. They will cut through rocky hills, at a great expense, or fill hollows, but wind their routes where openings may offer. The Park Commissioners have also laid out Mount Murray Square, covering twenty acres, betw

cost thus far has been \$15,000, which was all that the Legislature had appropriated. Among the improvements going on in the Park is the building of ew conservatory, near Conservatory Lake, which will be completed next year. Its length will be 200 feet, and its width 60 feet. The fountains have been laid. It will be filled with rare tropical trees and plants. The panels of the Terrace are being and plants. The planels of the Terrace are being tilled in marble, and a new observatory is in con-templation. Stone is being prepared for the new Belvidere at the southwest end of the old reservoir. It is to be completed next year, and will he a place of lookout. During the coming year a fine museum will also be built on the east side a me museum will also be built on the east side of the Park, between 79th and \$5th streets. It will be divided into sections, for different departments of natural history, and for art galleries. The old Arsenal and other buildings now used for storing the donations that monthly arrive from all quarters of the world, have become crowded. The former has three hundred animals housed on its first and second floors and in the structures outside of it. The Commissioners hope that the new museum will be filled with donations, and that the neseum will be filled with donations, and that the ne-cessity may be saved of spending public money for any of them. Preparations are now making on Manhattan Square, between Eighth and Ninth ave-nues and 77th and Slst streets, for a great collection of animals and birds, and several bear-pits have been dug. The ground covers twenty acres, but is considered inadounts—Sun considered inadequate. - Sun.

ANSWERS TO CORRESPONDENTS.

" Inquirer."-You will not be prejudiced by the judgment docketed before the mortgage held by you was recorded. If such mortgage was given for part of the purchase-money, it will be preferred to any prior judgment against the mortgagor.

" Married Woman."-A married woman may convey and devise her real property in the same manner, and with like effect, as if she were unmarried; and the same shall not be at the disposal of her husband, or liable for his debts. During life a married woman may hold her real estate, discharged of all power of disposal by her husband, and may convey it in her lifetime or devise it, by will, to take effect on her death, to whomsoever she pleases; her husband's consent is not necessary to render the transfer effectual, nor need her conveyance be acknowledged in the usual manner required by the Revised Statutes respecting acknowledgements by married women.

Subscriber."-Wills concerning real estate must generally be executed according to the laws of the State in (which the land is situated. A will in this State must be subscribed by the testator at the end. 2. Such subscription must be made by the testator in the presence of each of the attesting witnesses, or shall be acknowledged by him to have been so made to each of the attesting witnesses. 3. The testator, at the time of signing, or at the time of acknowledging, must declare the instrument to be his last will and testament. 4. There must be at least two attesting witnesses, each of whom shall sign his name, as a witness, at the end of the will, at the request of the testator, and in his presence. When a will is thus executed it can be revoked by another will, executed subsequently, with the same formalities as required by law for the first will, and declaring its revocation or alteration. 2d. By intentionally burning, tearing, cancelling, or destroying the first will, with intent to revoke the same.

Gentlemen of the Board of Aldermen:

Gentlemen of the Board of Aldermen:

For the unanimity with which you have been pleased to pass the resolution complimenting me, I am, I trust, duly thankful. The kind regards of our fellow-men is always a prize worth great effort to secure, particularly when engaged, as we are, in public life. But one thing more is needed to attain the acme of human happiness—an approving conscience. This we are all sure to obtain by a faithful performance of all our public and private duties. That you enjoy this happiness I do not doubt; that you have carned it, I am certain, and that you may continue to enjoy it, for all time, is the sincerest wish of my heart.

my heart.

Again thanking you, gentlemen, for your expressions and acts of kindness and good-will, and wishing you all prosperity in the future, I now declare the Board of Aldermen for the year 1869 adjourned sine die.

MARKET REVIEW.

MARKET REVIEW.

BRICKS.—Business has been rather slow on city account, and both wholesale and retail dealers complain of the dull condition of the market. Prices, however, have not changed, and there appears to be a disposition on the part of holders to remain quite steady at ruling figures until absolutely forced to yield. The opening of the river did not increase the arrivals beyond a few irregular lots, and though there is a pretty good accumulation of stock here unsold, owners think they will eventually be enabled to dispose of all at full prices. Some relief and encouragement has lately been received by a shipment to Providence of 325,000 bricks, and a call now out for about half a million to go South. There is also little doubt that should the weather continue as favorable as during the portion of the winter now past, many buildings will be commenced and additional supplies required. These circumstances may sustain values, but will hardly increase the outlet sufficiently to permit sellers to insist upon any decided advance. The amount now accumulated here on canalboats and sailing vessels is variously estimated at from three to five million bricks. We quote at \$5@9 per M for North River hard; the latter figure on very choice. New Jersey stock is moderately active and in fair supply, with dealers willing to contract for larger quantities than are now called for. Prices unchanged, and we still quote at \$7@8 per M. Pale brick are very dull, and to some extent nominal, though about \$5 per M may be considered a fair quotation, unless for choice in a small way. Crotons are dull and unchanged, with no cargo sales. The jobbing rates from yard are about \$19@21 per M. Philadelphia fronts quiet, with holders realizing about \$45@48 per M in a retail way from yard.

From figures kindly placed at our disposal by Messrs. in a retail way from yard.

From figures kindly placed at our disposal by Messrs. W. R. Knapp & Son, we are enabled to give the following interesting statement of the production for 1869, and the supply now held by manufacturers.

CEMENT.—The demand continues very good from every quarter, and about all the stock offered finds a market. Since our last report, however, buyers have been enabled to gain considerable advantage on wholesale parcels, the unexpected opening of the river bringing forward fresh supplies, which were sold to dealers at \$2.50, and in a few cases at \$2.25 per bbl, the market now showing an unsettled and somewhat nominal tone. From yard the the business is good, and in a retail way figures may be placed at about \$2.750 \$3 per bbl. We note shipments of 250 bbls to New Granada; 10 bbls to Danish West Indies, and 1,000 bbls to San Francisco.

Comparative prices January 1st:

FIRE BRICK.—The demand is extremely moderate, few dealers reporting more than a small jobbing trade, and the market shows a generally dull and unsatisfactory tone. Prices are nominally the same as during the past two or three months, but cash buyers can operate on easier terms than list rates indicate. The supply is liberal as compared with the outlet, and very well assorted. The only exports from this port during the past year were 33 tons to British N. A. Colonics; 2,800 bricks to Mexico; 13,435 to Cuba; and 100 to China.

Cuba; and 100 to China.

FOREIGN WOODS.—The supply and assortment offered of late have been rather more liberal, and business in consequence increased, as many buyers have been awaiting a desirable opportunity to secure a little stock. The demand, however, is neither active nor general, the continued extreme views of holders retarding buyers, and no purchases were made beyond actual necessities. The retail trade moderate and at irregular figures. The most recent imports were as follows:—From Liverpool, 66 logs mahogany and 600 pes. boxwood; from Port-au-Platt, 666 pes. lignumvitæ, 72 crotches mahohany, and 13 logs satinwood; from Inavana, 18 bundles cedar; from Tobasco. 83 logs mahogany; from London, 484 logs ebony; Minattlan, 206 logs cedars, and 11 log ends mahogany; from Cardenas, 207 logs cedar; from Vern Cruz, 173 logs cedar.

The receipts of foreign woods at this port for the year 1869 were as follows:

GLASS.—Foreign window-glass of all kinds is dull, and though the arrivals have been moderate for some time past there is found to be still enough stock offering to satisfy all wants, and many dealers would be very happy to accommodate a still larger number of customers. Occasionally complaints are made of a reduction in the stock of the smaller sizes, but the outlet will have to be considerably increased to cause any actual scarcity. Prices nominally unchanged, and we still quote at 55@65 per cent. off foreign list on French, and 45@35 per cent. off do. on English. The latest reported imports were 240 do. on English. The latest reported imports were 240 do. glass, valued at \$945; and 39 glass plates, valued at \$5.504. American window-glass is in light request at about former rates, viz., 55@60 and 5 per cent. off domestic list.

LIME.—The general demand does not improve, and the market remains dull, even for this season of the year. Dealers are distributing only small job parcels, and but few of these, making it unnecessary to bring forward from Rockland any stock to replace the falling off of the accumulation here, and the two or three cargoes arriving from week to week are fully equal to the necessities of the wholesale trade. The Northern limes are selling slowly, and the supply holds out fair. Prices have not changed, and the figures may still be placed at \$1.50 per bhl for common, and \$2 do for lump. The number of cargoes reported at this point from Rockland, during the past year, was 331, but we have been unable to ascertain the number of bbls, or the proportion of the different grades.

Comparative prices, January 1st:

-The market has continued in a dull, depressed LATH.—The market has continued in a dull, depressed condition throughout the week and though the arrivals are not heavy, receivers find more stock on hand than they can readily dispose of, and have again reduced prices in order to effect sales, this apparently being considered a safer plan than to pile out cargoes. The concession, however, does not increase the call to any extent, and as we close, the tone is lifeless and unsatisfactory. The business at the yards is also very slow, and in many instances dealers are offering more liberal terms—some close down to costs considering cash preferable to an almost dead stock of goods. The sales during the week, by cargo, embrace about 1,000,000, at \$2.50 per M.

LUMBER.—The yard trade continues very moderate in all grades of lumber, few buyers offering, except through necessity, and then taking nothing beyond immediate and positive wants. Selections of goods appear to be made without difficulty, as the assortment holds out well as yet, though a few dealers begin to notice a slight falling off in the most desirable grades. Prices without quotable change, and as a rule are called steady, though somewhat uncertain on common and slow-selling stoc. In a whole-sale way there is scarcely any regular market at present, very few cargoes coming to hand, and those that do make their appearance being either of undesirable quality or previously contracted for. Exporters are still operating to some extent whenever a choice parcel can be found, and a few purchases are said to have been made in advance of the facilities for shipment, mostly, however, small invoices. Eastern spruce continues rather nominal, very little arriving, and receivers generally managing to fix their rates in such a manner as to give satisfaction to buyers, though the terms, as a rule, would not afford a fair criterion of market values. Dealers are distributing slow-ly, and do not feel the necessity of additional stocks at present. We quote about as before—say, \$18@\$20 per M for inferior to fair, and \$20.50@\$21.50 do for good to prime schedules. White pine is still in very good supply, but selling without sufficient freedom to make a depletion of the stock perceptible and prevent any important advantage accruing to the buying interest. The call is principally for export, in small lots, with an occasional sale on domestic account, principally of the common grades. We quote common box boards at \$20@\$23 per M. and good to prime shippers \$24@\$30 do; with choice selections \$2@\$5 per M. higher. Piling is dull, the supply large, and buyers have the bulk of the advantage, though the extreme figures on the ordinary average of stock still remain at ab

000 feet white pine, at \$26@\$\$0 per M.

We also notice shipments for this week as follows:—
To Liverpool, 38 logs maple valued at \$670; to llayti, 1,200 bundles shingles valued at \$650; to Glasgow, 2,400 staves; to Cadiz, 72,600 do.; to San Francisco, 25,490 do.; 197 per plank, and 255 pes lumber. The receipts reported are as follows:—From Jacksonville, 270,000 feet lumber; from Savannal, 175,000 feet do; from the Maine coast, 4 cargoes of lumber; 1 do lath. The charters are as follows:—A brig, 257 tons, to Brunswick, Ga., R. R. iron, \$3 per ton, thence to Rio with lumber, at \$18 and 5 per cent. primage. A schooner same voyage and terms; a brig to Canary Islands, lumber, and a barque to River Plate, lumber on private terms. Freight to Antwerp has been engaged for 200 loads oak timber at \$9s per cubic foot.

We learn of shipments from Boston to Rio Grande, of 78,437 feet lumber; to Cape Haytien, 5,000 feet boards; to British Provinces, 4.200 feet lumber, 15,486 feet walnut lumber; 8,000 states; and 83,000 shingles; to Hayti, 15,000 feet lumber; to Cuba, 4,462 pes timber; to St. Thomas, 2,000 feet boards; to Madeira, 107,459 feet lumber. From Baltimore to Demerara, 11,000 staves; to London, 10,161 do.

METALS.—Copper sheathing remaining quiet, but former rates are insisted upon and manufacturers appear pretty firm. The supply is liberal: We quote at 32,938c for new, and 20,022c for old, according to quantity Yellow metal still selling at 27,029c in wholes ale and retail parcels. Ingot copper has been less active, and though holders are

not pressing. prices are easier to effect sales quickly. We quote at 21% @22c per lb. Scotch pig fron shows no further change in values, but is very dull, and scarcely count goods change hands to establish a market. We quote at about \$82@34 per ton. American pig fron also quiet, the sales confined mostly to job lots from yard, and prices are again reduced somewhat, closing weak and uncertain. We quote nominally at \$37 per ton for No. 1; \$36 do. for No. 2; and \$33@35 do. for forge. Bar iron from store without demand, and though the lately reduced rates are still current the advantage is almost salely with the buyer: We quote at \$55.67.50 per ton for refined; \$76@80 do. for common; \$120@130 for \$3.60.50 per ton \$

tin; 660 slabs, (47,439 lbs.) tin; and 50,780 lbs. zinc.

NAILS—The inquiry from all quarters has been moderate, and the market closes with a very dull tone. The supplies and offerings are in excess of the outlet. Prices unchanged, but are not over firm, and for cash some favors would be shown. We quote at 43/c.; clinch at 6½,60%-6. Other styles are selling at 386,40c. for copper; 27c. for yellow metal, and 18c. for zinc. The exports for the week are 153 pckgs, valued at \$951. Shipments also of 425 pckgs to San Francisco. The exports during the past year foot up 18-955 pckgs, valued at \$122,104; and we have accounts of shipments to San Francisco during same period of 54,396 pckgs.

pckgs.

PAINTS AND OILS.—In small parcels there has been rather more activity of late, but without greatly improving the general tone of the market, or causing any noticeable change in values. The supply and assortment is liberal, and freely offered by agents and importers. Linseed oil has met with only a moderate demand for immediate delivery, but has attracted the attention of speculators, and considerable sales were made for future delivery. Prices strengthened up somewhat, and close steady. We quote at about 90@92c. in casks, and 92@94c. in blus. The exports for the week are 70 pckgs paint, valued at \$1,178; 126 gallons linseed oil, valued at \$126.

Receipts for week, 3(01) bbls; since January 1st, 101 bbls; same time last year, 375 bbls. Exports for week, 830 bbls; since January 1st, 880 bbls; and for same period last year, 8 bbls.

STONE.—Business at the yards is pretty active, particularly among the flag-stone dealers; but in most cases the supply on hand is equal to the demand, and all calls are met without difficulty. No changes of importance have taken place in prices, and will not probably until spring. The wholesale market is, of course, at a standstill, and nominal, owing to the absence of supplies. But, as an unusual occurrence, we note the forwarding, last

week, of a cargo of flag-stone from the quarries, a vessel caught in the ice last fall taking advantage of the sudden opening of the river to make the run down to the city. Imports of building stone for year ending December 31, 1869, as follows:

The cases of Scannel v. Nesbit, and Reilly v. Haughton, were set down for consideration at 11 A.M. on Friday the 17th; Seger v. Guntzer, and Cooper v. Shelly, for 1 P.M., and the cases of Stemmer v. McGuire, and McGuire v. Stemmler, Murray v. Coulter, and the protest of J. P. Rogers, for 2 P.M., on the same day, in consequence of none of the persons interested being in readiness to proceed with the investigation.

The Committee then took a recess until 11 A.M.

The Committee then took a recess until 11 A.M. Friday, the 17th instant.

At the second session or meeting of your Committee, Friday, Dec. 17, 11 A.M., the parties interested in the case of Scannel v. Nesbit being in readiness, the consideration of the protests of the former was commenced, both parties appearing by Counsel, the protestant being represented by Messrs. Nelson J. Waterbury and John McKeon; and Mr. Nesbit by A. B. Lawrence Eso.

Nesbit by A. R. Lawrence, Esq.

At this stage of the investigation, and after hearing the opening arguments of Counsel, a grave doubt arose in the minds of your Committee as to their jurisdiction in this and similar cases. It is very questionable if the power to investigate alleged frauds is vested in the Board of Aldermen, sitting as a Board of City Canvassers, or in any of its Committees. In the absence of any clear definition of the powers and duties of that body (which was

created by the Charter of 1857 for the express duty of canvassing the votes given at that and all subsequent elections for Charter officers, and long subsequent to the passage of the Election Laws of 1842, governing the proceedings of the several Boards of County Canvassers in the State), there can be scarcely a question but its proceedings must be determined by and in accordance with the laws governing the acts of Suproproposal sitting a real governing the acts of Supervisors sitting as such County Canvassers. Admitting this to be the law, their duty would be simply to record the votes as they are returned in the statements of the District Canvassers, and where errors or discrepancies AP-PEAR, "cause the said statements to be sent by one of the members (who shall be deputed for that purpose) to the Town or Ward Inspectors and Town or Ward Canvassers of the town or ward from which they are received, TO HAVE THE SAME CORRECTED."—Sec. 15, Laws of 1842.

On the other hand, the precedent has been set, and apparently firmly established, that the Board of City Canvassers, as such, may go further than a strict construction of the law would warrant, and whether they have such power or not, they have certainly exercised it, in almost every canvass since the creation of the Board, as will fully appear by reference to the record of its proceedings filed in the office of the Clerk of the Common Council, and notably so in the clerk of the Common Council, and notably so in the cases of McKnight against Ely, in the Eighth Aldermanic Distric, in 1865, Allen against Ward, in 1866, and McVeaney against Cul-kin, in the Ninth Aldermanic District, last year.

Your Committee, after due deliberation, concluded to "follow in the footsteps of their predecessors" in the Board of City Canvassers, clear conviction that at least no evil could result from their investigations, and with the express understanding that, no matter what might be their conclusions, if adopted by the Board of Canvassers, either party to the controversies before them, if aggrieved by their decisions, had a remedy by furaggive to the decisions, and a tenedy by intriber proceedings in a legislative body, if candidates for legislative offices, or in any court of competent jurisdiction.

In order that the Board shall be fully acquainted with the proceedings of the Committee, and to enable each member to judge of the correctness of its recommendations or decisions, all the evidence taken, together with the pleadings and addresses of Counsel, and the rulings of the Committee, have been reported by a competent stenographer, and are herewith submitted in full to the Board (see Appendix W).

The consideration of the case of Scannel against Nesbit, Seger against Guntzer, and Murray against Coulter, occupied the time of the Committee during the whole of Friday, the 17th instant. The first case mentioned being the most important, and the conclusions of your Committee therein being different from that in any other of the many cases brought to its notice, will be contained in the last part of the report.

The protest of John Reilly was withdrawn, by consent, at the close of the case of Florence Scan-

The sitting of the Committee during the whole of Friday morning, and until near one o'clock in the afternoon, was taken up in the consideration of the case of Scannel; the case of Cooper against Shelly was deferred until Saturday, the 18th inst. The Committee took a recess until 1 P.M.

After recess, none of the contestants appearing to After recess, none of the concessants appearing that the investigations should be proceeded with, in order to enable the Committee to complete their labors and report before the adjournment, sine die, of the Board, a further recess was taken until 1½ P.M.

After the second recess taken by the Committee, the case of Seger v. Guntzer was called up, and all the parties being in readiness, was proceeded with; Senator Creamer and Eugene Durnin appearing for contestant Seger; and Nelson J. Waterbury and Max Moses for J. W. Guntzer.

The evidence given by the Canvassers of the Election District in which the fraud was alleged to have been perpetrated (Twenty-ninth District, Seventeenth Ward) was conclusive, to the minds of your Committee, that the allegations were unfounded; the only evidence going to prove the contrary being given by a poll-clerk, and was fully offset by the evidence of the Canvassers of that District. The evidence is reported in full, and is hereto attached. The recommendation of your Committee in this, and all the other cases, will be found in the resolutions appended to this report. found in the resolutions appended to this report.

The case of Henry Murray, in relation to votes given in the Sixth and Ninth Election Districts of

the Nineteenth Ward for "Hugh" Murray for Police Justice of the Seventh District (ninety-one in the former and thirty-seven in the latter), claiming that the votes so given should be allowed to "Henry" Murray, the regular candidate, and also alleging fraud in the canvass of votes in certain Election Dictricts of the Nineteenth and Twenty-second Wards, was next called, and all parties interested being prepared to proceed, the investigation was commenced, John McKeon appearing for James E. Coulter, and N. J. Waterbury for contestant Murray.

Before, however, entering upon the investigation of the case, Counsel for Coulter stated that it appeared that local Canvassers in some of the disputed Election Districts had been served with subpennas purporting to have been signed by "Sam'l B. Garvin, District Attorney," which, upon consultation with that gentleman, were pronounced by him to be spurious, and surreptitiously and illegally issued or furnished by some person in his office without his sanction or authority. He suggested that all persons present in obedience to such illegal summonses should disregard their mandates and retire. The Chairman of your Committee disclaimed all knowledge of such subpœnas, and stated that the Committee did not, for want of jurisdiction, request the issue of such subpœnas.

If any doubt existed in the minds of your Committee as to their power, or the power of the Board of City Canvassers, to disregard returns or statements of local Canvassers, which are fair on their face, without errors or discrepancies, and to look beyond them for evidences of fraud, it was dispelled by the authorities cited by the Counsel opposed to the claim to allow, in this instance, the votes given for "Hugh" to "Henry" Murray. They are so clear and convincing that your Committee call, specially, the attention of the Board to them. They will be found in the evidence reported in this case. It is impossible to read them and come to any other conclusion than that Boards of Canvassers are bodies whose duties are simply ministerial in their character, and that nothing is or can be more foreign to them than the exercise of legislative, executive, or judicial functions. The votes given in this case for Hugh Murray were stated alike on both the Aldermanic return and the return filed with the Clerk of the Common Council, accompanied, in each case, with a printed ballot with the name in full. Neither your Committee, have any option in the premises; the votes so returned must be counted for Hugh Murray. It is fortunate, perhaps, that a contrary course would not alter the result of the election in that Judicial District, as the Board would, in all probability, be reluctant thus to admit of a restriction of its assumed powers that would defeat a friend and elect a political opponent.

The citations of Counsel in the above case also compel your Committee to return the votes given in the Twenty-second Ward, for the office of Register, although that official is a County Officer, and properly elected at the election for State and County Officers in November. They have no option; the returns being fair on their face, cannot be questioned by your Committee, and in their opinion the votes so given for Register, even though simply illegal, and of no practical effect, must be returned as contained in the statements of the local Canvassers.

The time of meeting of the Board of City Canvassers having, at this step of proceedings, arrived, 3 P.M., a recess was taken by your Committee until 3.15 P.M.

After which, resumed:

The investigation of frauds alleged in the protest of Henry Murray, as having been perpetrated in the First Election District of the Twenty-second Ward, against him, was then commenced by your Committee. But one witness (a poll-clerk) appeared and was examined, and he utterly failed to prove the allegations of fraud. His testimony could not be taken as conclusive, in opposition to the returns, regularly signed by both the canvassers of that election district, particularly as he could not testify to the genuineness or falsity of the signatures of the Canvassers, and as no errors or discrepancies were apparent in any part of such returns.

No other evidence was produced before your Committee, relating to this or any other of the election districts in the Nineteenth or Twenty-second Wards, by the protestant, and the case was closed.

The Committee then took a recess until 11 o'clock A.M.; on Saturday, the 18th instant.

Upon the reassembling of the Committee, the protest of John A. Stemmler, against counting certain votes cast in the First Election District of the Twenty-second Ward, for Joseph McGuire, for Civil Justice, was called; frauds or irregularities, it was alleged, had been perpetrated in the canvass of the votes in that election district. The evidence in the case was identical with that given at a former session of the Committee, in the case of Murray v. Coulter; the same witness (Harvey, a poll-clerk) being the only one examined, and no new facts elicited, the Committee arrived at a like conclusion in respect to the disposition of the case.

The argument of counsel (Mr. Vanderpoel) for McGuire is convincing as to the want of jurisdiction of your Committee, and the absence of power or authority in the Board of City Canvassers to originate or investigate alleged frauds in cases where both returns are fair on the face, and without any error or irregularity.

In the cases of the protests of Joseph McGuire and James P. Rogers—the former against counting votes cast for Civil Justice, in the Fourth, Fourteenth, and Sixteenth Election Districts of the Twenty-second Ward, Seventh Judicial District, and the latter against counting votes given for Alderman in the Third, Fourth, Sixth, Seventh, Ninth, Tenth, Nineteenth, Twentieth, Twenty-first, and Twenty-second Election Districts of the Twentieth Ward (Fifteenth Aldermanic District)—were next called, and no response being made to the call the cases were dismissed.

The only case now remaining for the action of your Committee was that of Cooper against Shelly—the protest of Cooper alleging fraud in the canvass of the votes given for Assistant Alderman, in the Thirteenth Election District of the Twelfth Ward (Twenty-first Aldermanic District).

In this, as in nearly all the other cases examined by your Committee, the statements of the Election District Canvassers had been counted and allowed by the Board of City Canvassers before the protest was presented, or at least considered, no errors or discrepancies appearing. During the investigation, it appeared that the return filed in the office of the Clerk of the Common Council had been either mislaid or taken away, as it could not be found when called for. The protestant's counsel produced a return from the Bureau of Elections, which exhibited a discrepancy of one hundred votes between it and the returns previously canvassed, but the only local canvasser present as a witness from that district failed to prove the genuineness, of this statement. The evidence of the poll-clerk (Henry L. Nunns) could not be accepted in the absence of any corroborative testimony, particularly as both returns, when canvassed, did not show any error or irregularity, and the District Canvasser (Henry McDermott) was unable to say, of his own knowledge, that any existed, or that any fraud had either been attempted or perpetrated.

It was decided to allow the vote as heretofore canvassed by the Board.

The counsel for Mr. Cooper asked that a clerical error, by which certain votes alleged to have been given for Charles "E." should be credited and allowed for Charles "H." Cooper, the proper name of the candidate, and was proceeding at length in support of the power, right, and duty of the Committee to recommend, and your Honorable Body to adopt a recommendation in favor of making such correction, when it having been discovered that the votes so cast for Charles "E." Cooper, if any, had been counted and allowed by your Honourable Body to Charles "H." Cooper, the case was declared dismissed, and the Committee was adjourned sine die.

THE CASE OF SCANNEL v. NESBIT.

The evidence elicited in the examination of this case must, your Committee thinks, result in convincing your Honorable Body that there have been irregularities in the canvass of the votes in the Fifteenth and Sixteenth Election Districts of the Eighteenth Ward (Sixteenth Aldermanic District). All the evidence goes to prove that the returns from both the above-named Districts canvassed in the Board of City Canvassers do not agree with the statements of the vote cast as made on the evening of the election. The affidavits of both the poll-clerks in each of the said election Districts, corroborated by the evidence of other persons who were present at the canvass, and who remembered the vote as announced at the close of the counting of the Charter Ticket (which, however, does not agree with the returns filed in the Bureau of Elections), must, in the opinion of your Committee, particularly in the absence of the local Canvassers

of Election, and of any evidence from them, or any other persons, of a rebutting nature, be taken as conclusive that the vote as announced on the evening of election should be taken as the correct vote of the district.

The evidence taken is reported in full, and accompanies this report, together with a statement showing the result of the fraud in the said Fifteenth and Sixteenth Election Districts. To simplify this statement, the following is given, which shows the effect of the alterations made in the returns:

Genuine or Police Returns.

15th District, 18th Ward, 16th District, 18th Ward,	Nesbit. 106 74	Scannel. 93 113	
	180 Fraud	206 ulent Returns	
15th District, 18th Ward, 16th District, 18th Ward,	Nesb 136 113	63	
	249 180		
Taken from Scannel and	 69		

From the evidence, your Committee are clearly of opinion that it is their plain duty to recommend that the votes of the two Districts, given for the Office of Alderman, be entirely omitted from the canvass.

The full proceedings of the Committee, with the evidence, &c., &c., elicited in each case, is herewith, pursuant to the direction of the Board, presented, and a copy prepared for the information and guidance of each member of your honorable body.

In conclusion, your Committee respectfully offer for your adoption the following resolutions:

Resolved, That the Committee on Protests be discharged from any further consideration of the Protests or other papers of the following-named persons, referred at various times during the progress of the Canvass, by the Board of City Canvassers, for the consideration of your Committee, viz.:

F. V. Euring,
Joseph Bopp,
Hugh H. Moore,
Joseph Cudlipp,
M. A. Reed,
William Boeckel,
J. L. Steinhardt,
John Reilly,
Joseph McGuire, and
Jas. P. Rogers,

for the reason that, when called, no persons appeared for or on behalf of the said protestants.

Resolved, That the votes returned in the Sixth and Ninth Election Districts of the Nineteenth Ward for Hugh Murray for the office of Police Justice of the Seventh District, be canvassed by the Board of City Canvassers, as returned by the Canvassers of Election in each of said Election Districts.

Resolved, That the votes returned for the office of Register, in the Third, Fourth, Seventh, Ninth, and Eleventh Election Districts of the Twenty-second Ward, be allowed or counted by the Board of City Canvassers, as returned by the local Canvassers in such Election Districts, but that no declaration be made of any person being elected to such office of Register, which, being a County office, is not legally before the Board of City Canvassers, such votes being as follows:

Ward.	Election Districts.	Thomas Ryan.	Blank.	Scatter'g.	Whole vote.
Twenty-second	3 4 7 9	26 6 5 17 8	1	3 	29 7 5 17 8
Totals		62	1	3	66

Resolved, That in the cases of Seger v. Guntzer, Murray v. Coulter, Stemmler v. McGuire, and Cooper v. Shelly, they be severally dismissed, the evidence submitted in each case being insufficient to warrant any other recommendation, particularly in view of the fact that in each case the returns received from the Election District Canvassers agreed, no errors or discrepancies appearing in the statements furnished from any Election District so disputed.

Resolved. That the returns of votes given for the office of Alderman, in the Fifteenth and Sixteenth Election Districts of the Eighteenth Ward, be en-tirely omitted from the carvass of votes, and that the votes given for the entrass of votes, and that the votes given for the office of Alderman, in the Sixteenth Aldermanic District be computed and counted without the votes given in said Fifteenth and Sixteenth Election Districts of the Eighteenth

Respectfully submitted,
