GILSEY'S NEW HOTEL.

AMONG the many imposing buildings which have recently been erected in this city for hotels, there is perhaps not one which deservedly attracts more attention than the magnificent structure now approaching completion, at the corner of Twenty-ninth street and Broadway, for Mr. PETER GILSEY. To any one coming up or down Broadway, it looms up in such lofty proportions as to completely dwarf all objects in its immediate vicinity, not excepting even its big neighbor, the Grand Hotel. Standing as it does upon an irregularly-shaped and somewhat difficult piece of ground on the N. E. corner of the junction of Twenty-ninth street with Broadway, the architect has very skilfully arranged his plan so as to combine the most artistic effect externally with the most convenient disposition of rooms internally, by cutting off the angle octagonally, and making of it a handsome frontispiece and entrance. The entire length on Twenty-ninth street is 148 feet 8½ inches; but this space is handsomely broken by making the portion nearest Broadway project boldly forward, with an eastern octagonal break corresponding with the one at the junction of the streets—thus leaving the remaining portion on Twenty-ninth street set back, with a bold projecting portico in the centre as a side entrance. This disposition of the building breaks what would have been otherwise a long monotonous frontage, and produces great variety of effect, which is consequently very pleasing. On Broadway the frontage is 64 feet 6½ inches, with a central doorway—making three entrances in all. The building would have been much more improved had this frontage been longer; but the most has been made of it in the design. But the most remarkable feature of this building is its great height. It is five stories high up to the cornice, exclusive of the basement; and besides these there are three more stories in the spacious Mansard-roof—making nine stories in all. To some observers there might seem to be a preponderance of roof; but the fact is, that in a building of such enormous height (125 feet to the roof), to have raised the front walls any higher would have made them appear painfully lofty, while the roof—large as it is—is so diversified in its treatment as to please the eye and take away all sense of superabundance.

The construction of the building throughout is exceedingly massive and perfect, iron and solid masonry being so largely introduced, both

internally as well as externally, as to render it completely fire-proof from basement to roof. The interior, which is calculated to contain some 300 rooms, is admirably arranged as to ease of access, light, ventilation, and all the other features so necessary in buildings of the kind,—the ceilings being of good height and the doors of ample width. The facilities for ascending and descending are such that the upper rooms will be rendered almost as available as the lower. The utmost care seems to have been lavished upon all such internal details as are indispensable to a first-class hotel. One feature in the interior which will be much admired is the grand staircase, which is being constructed entirely of what is called the New York building stone—an artificial material now coming into rapid use, which competes with the best stone not only in all required forms, but in hardness and durability. Some of it can be seen laid down to the sidewalk of this hotel as paving blocks, where unsophisticated passers-by, mistaking it for the ordinary blue-stone used in our paving, are puzzled to think how such enormous blocks of material could have found their way there from the quarry. The grand newel to the staircase—judging from a bold drawing which was shown us—will be quite a rich and elaborate work of art. It is to be of stone, with griffins wrought at the angles in bronze; also festoons of flowers and other ornaments in the same material.

The exterior of the building is an adaptation of the Palladian style of architecture; profusely adorned with little detached double columns—Ionic on the first story, and composite on the others—interspersed with straight and circular or segmental-headed windows, in pleasing variety, and rich in all the ornamentation peculiar to iron buildings. The effect is altogether grand and imposing, and reflects high credit on its author. It was designed and superintended by Mr. S. D. HATCH; the masonry is some of the finest work of HULL & CONOLLY; the carpenters' work was executed by JOHN S. MYERS, and the iron work by the Architectural Iron-works. The building will, we understand, cost altogether about \$350,000, and is expected to be opened some time in January next. If the furnishing is carried out—as no doubt it will be—on the same scale of grandeur as the building itself, this hotel will certainly at once take its rank as one of the most splendid and complete ever yet erected in New York.

REAL ESTATE MARKET.

No business of importance either at the auction-room or at private sale has been transacted during the past week, no offerings of any kind having been made. The coming week will be rather more lively and will test still further the temper of the market, which at present is rather fickle. Our record of real estate transactions below will be found interesting, notwithstanding it appears rather late, having been crowded out of our two previous issues.

PROCEEDINGS OF THE COMMON COUNCIL

AFFECTING REAL ESTATE.

IN BOARD OF ALDERMEN, THURSDAY, Nov. 17, 1870.

BANK STREET.

Resolved, that opposite Nos. 52 and 54 Bank street the curb and gutter stones be set and reset, and the sidewalks be flagged and reflagged full width, under the direction of the Commissioner of Public Works; and that the accompanying ordinance therefor be adopted.

Called up by Alderman Schlichting, and adopted by the following vote (three-fourths of all the members elected voting in favor thereof):

Affirmative—The President, Aldermen Charlock, Cuddy, Dimond, Hart, McKiever, Mitchell, O'Neill, Plunkitt, Kelly, Schlichting, Welch, and Wolman—13.

And sent to the Board of Assistant Aldermen for concurrence.

BAYARD STREET.

LEONARD STREET.

Petition of owners and occupants of property on Leonard street, from Broadway to Centre street, to have said portion of said street paved with Hamar wood preserved pavement.

In connection therewith, the following resolution:

Resolved, That the Commissioner of Public Works be and he is hereby authorized and directed to advertise for bids, and contract for paving Leonard street, from Broadway to Centre street (excepting the space between rail-tracks), with the pavement known as the Hamar wood preserved pavement, in accordance with the specifications for said pavement now on file in the office of the Clerk of the Common Council, and that at the several intersecting streets and avenues crosswalks in said streets, and in such other intersecting streets and avenues, be laid where not now laid, and relaid where those now laid are, in the opinion of the Commissioner of Public Works, not in good repair, or are not upon a grade adapted to the grade of the proposed new pavement, under the direction of the Commissioner of Public Works; and that the accompanying ordinance therefor be adopted.

Called up by Alderman Reilly and adopted by the following vote (three-fourths of all the members elected voting in favor thereof):

Affirmative—The President, Aldermen Charlock, Cuddy, Dimond, Hart, Irving, McKiever, Mitchell, O'Neill, Plunkitt, Reilly, Schlichting, Welch, and Woltman—14.
And sent to the Board of Assistant Aldermen for concurrence.

LEXINGTON AVENUE.

REPORT.

Report of the Committee on Public Works, in favor of adopting resolution and ordinance to fence in vacant lots east side of Lexington avenue, between Forty-sixth and Forty-seventh streets as follows:

Resolved, That the vacant lots on the east side of Lexington avenue, between Forty-sixth and Forty-seventh streets, and on the south side of Forty-seventh street, between Lexington and Third avenues, be fenced in, under the direction of the Commissioner of Public Works, and that the accompanying ordinance therefor be adopted.

BE IT IT ORDAINED, By the Mayor, Aldermen, and Commonalty of the City of New York, in Common Council convened:

That the vacant lots on the east side of Lexington avenue, between Forty-sixth and Forty-seventh streets, and on the south side of Forty-seventh street, between Lexington and Third avenues, be fenced in, under such directions as shall be given by the Commissioner of Public Works, who may appoint an Inspector thereon and one of the City Surveyors.

And whereas, the said Mayor, Aldermen, and Commonalty deem it necessary, for the more speedy execution of the said ordinance, to cause the work necessary for the purpose above specified to be executed and done at their own expense, on account of the persons respectively upon whom the same might be assessed;

THEREFORE, BE IT FURTHER ORDAINED, That the Board of Assessors be and they are hereby directed to make a just and equitable assessment of the expense of conforming to the provisions of this ordinance amongst the owners or occupants of all the houses and lots intended to be benefitted thereby, in proportion, as nearly as may be, to the advantages which each may be deemed to acquire.

Which was laid over.

MANHATTAN STREET.

Resolved, That a crosswalk be laid across Manhattan street, at the easterly side or intersection of Broadway, under the direction of the Commissioner of Public Works; and that the accompanying ordinance therefor be adopted.

MARKET REVIEW.

BRICKS.—The market for North River hard continues pretty generally active, and business has quite a brisk tone, though the movement obtains the appearance of considerable more life than it really possesses, from the fact that the supplies still run small and are nearly or quite all taken upon arrival. Manufacturers and their agents adhere pretty well to the combination recently formed, and by this means the stock is so manipulated that only small quantities reach the market at once, and nervous buyers are kept in a continued state of doubt as to the probabilities of their getting such lots as they may want. There is, however, a good many makers of first-class who are not in the "ring," and though they of course take advantage of and insist upon the increased price, they at the same time keep sending cargoes forward as opportunity may offer, and from this source a fair supply is constantly available. It is also noticeable that most of the dealers and a considerable proportion of builders are rather backward about accepting the situation, purchasing slowly and cautiously, some, indeed, not beyond their most positive immediate wants, hoping by thus holding off to obtain easier terms. It is doubtful, however, if this policy will prove successful at this late season, particularly as the production has now been stopped nearly three weeks, and recent cold snaps give warning of a possible early closing of communication with the sources of supply by the freezing of the river. Taken as a whole, the market favors the seller, as the bulk of the goods is under control, and both jobbers and builders must lay in winter stock to a greater or less extent. At the present writing the market is almost entirely sold up, and the general position quite firm with extreme prices insisted upon in all cases. We quote at \$7.50@8.25 per M for inferior to good; \$8.50@8.75 for prime and \$9.00 quick for the best grades in the ordinary way, with selections proportionately higher. New Jersey hard continues rather scarce, and are selling well at full prices, though not many lots are likely to be drawn out in view of the diminished production for the season. Pale brick are in demand, prices generally well sustained, and the market for the few parcels offered has a strong uniform tone, with a quick sale. We quote at \$5@5.50 per M. Philadelphia fronts are in fair demand, and prices rule pretty steady at about \$28@30 per M on pier. Croton fronts are dull and nominal as a rule, the demand amounting to almost nothing, and sellers fixing rates according to temporary influences, though in a general way the quotations are still placed at \$10@15 per M.

DRAIN AND SEWER PIPE.—The market for vitrified pipe does not appear to have undergone any very important change during the past five or six weeks. No one dealer or manufacturer is doing a large or quick business, and the reports given are mostly of a dull character; yet taken altogether, the movement is fair, and probably all that could be expected, considering the slow and uncertain progress of building operations. The prevailing call is principally from regular sources, either local or from points near by, with an occasional order for coastwise shipment. Most manufacturers have been working to a greater or less extent during the past summer, and the accumulation is now not only pretty large, but well assorted, and any selection can be made without difficulty. The large sizes of domestic are least sought after, imported stock having the preference, though at the best, the work now doing is not of the kind to require many extra sized pipe. Most of the wholesale dealers retain their old price lists as a basis, but are allow-

ing all sorts of discounts according to circumstances. The average is about 30@40 per cent. off, with variations frequently made still more in buyer's favor in order to secure a quick or large sale. Cement pipe has also been rather dull this season, but quite a number of very fair-sized contracts were filled, and manufacturers generally were kept at work.

LATH.—We do not find that any particularly new points are presented by either buyers or sellers this week, and the market as a whole is nominally unchanged. Receivers still appear confident that they will not be burdened with supplies sufficiently large to compel them to force sales and accept any materially lower terms, and a number can be found who are predicting a sure advance from present figures. Dealers on the other hand, though now finding it necessary to purchase with somewhat greater freedom, and to look to it that they do not miss a winter stock, and not by any means free operators, and wherever it is at all safe so to do, are holding off, and taking the chances of a turn in their favor. There is a fair stock in yard, nearly enough altogether to carry over the best part of the winter, but it is unevenly distributed. The arrivals have been fair, but included a few parcels already sold, and the balance were disposed of without much difficulty. As we close, business is a little slow and uncertain, but sellers not urging matters at all, and the market appears reasonably steady at \$2.50 per M. Sales for the week of about 2,100,000 lath, including a parcel to arrive.

LIME.—"No change" again salutes us in reply to all questions for information upon this market, and so we must continue to report the position of affairs. Receivers are neither hurrying nor attempting to retard business, but appear to be meeting all calls steadily as they may happen to arise, and gradually stocking up dealers for their winter wants without insisting upon advanced values. Indeed higher figures just now would probably bring in an immense supply and overburden the market to an extent sufficient to cause an immediate reaction, from which there would be no hopes of recovery for the balance of the season. The arrivals have been fair, and we are told a few cargoes merely passed through here en route to fill near by out-of-town orders. The State stock continues to come to hand in quantities quite sufficient for the prevailing call, and as before shows a somewhat irregular and nominal tone, though the advantage when figured out, is found to be entirely in buyer's favor. The general market as we close is lightly supplied, but there is enough stock here for the demand, and prices are kept at about the former range, viz.: \$1.15 per bbl for common, and \$1.75 do for lump.

LUMBER.—A holiday week, and the already extensively dull condition of affairs have together kept business in a retail way down to a very low aggregate, and there is simply nothing to report from the yards since our last, except a few jobbing sales, and an unsettled nominal tone to prices generally, with the turn rather in buyers' favor. Odd parcels continue to arrive on previous contract, and are being piled away for future use, though some dealers have their yards so full already that they can scarcely find storage. Great stress is laid upon the fact that the Albany lumber market is active and firm by certain papers with a pretension to a lumber report, but this has none of the effect upon our trade, here noticeable in former years, in fact is a matter of the most supreme indifference to the great bulk of our dealers as they operated independent of that point.

Our wholesale market is also without any important change, values generally remaining steady, and the current arrivals finding a fair market, though buyers are not over anxious, and in some cases a little particular as to quality, and inclined to find fault with prices asked. Good choice lengths of all kinds of timber and lumber are difficult to obtain, particularly at this season of the year, and some buyers who must have them, if possible bid extravagant rates, but these are no criterion of the market, and should not be quoted. The export movement continues slow and uncertain, and has been further interfered with by the fluctuations in gold and the cost of freight-room; but still shippers hold a fair number of orders which must ultimately be filled. The United States Government has advertised for 203,000 cubic feet of live-oak timber of the best quality to be delivered at each of the Navy Yards at Charlestown, Mass., and Brooklyn, N. Y.

The 203,000 cubic feet to be delivered in each yard will be in the following proportions: Say 33,000 cubic feet of pieces suitable for Stems, Sternposts, Deadwoods, Aprons, Sternpost Knees, Keelsons and Hooks, all sliding from 17 to 20 inches, and the Hooks siding 14 and 16 inches. These pieces to be in the proportions in which they enter into the

From Galveston we have the annexed:—

The lack of shipping facilities to the interior continues to be felt in this branch of trade, dealers being unable to fill considerable portions of their orders for want of the necessary transportation. Receipts continuing to come to hand liberally, stocks in yards are now unusually heavy, notwithstanding the fact that there is still a fair local demand. Prices for all descriptions have been steady, and we continue quotations in another column.

METALS.—The demand for manufactured copper continues quite light, and it is difficult to induce buyers to make bids for parcels likely to extend their stocks beyond the consumption of a week or two. All calls are met without any great hesitation by holders, but there is no pressure whatever to realize, and full prices are most positively insisted upon in all cases. We quote at 30@31c for new sheeting; 22@23c for yellow metal; and 19@19½c for old sheeting cleaned. Ingot copper has been less active since our last, the recent liberal purchases having pretty well stocked up the trade, and speculators finding stock enough to meet all their calls, and prices improving slowly, feeling rather inclined to withdraw. Still prices rule pretty firm, and few if any invoices could be made up except at full former figures on all grades. We continue to quote at 22¼@22½ per lb. Scotch pig iron continues in demand, but is from necessity quiet, as dealers have no supplies to offer. It is thought there are not now two hundred tons available in the city, and buyers will be obliged to await further arrivals. In the absence of sales there is no basis for figures, and prices may be considered nominal, though we continue to quote at about \$34@36 per ton according to quality. American pig iron is in good supply and the demand only moderate, giving the market a generally slow and unsatisfactory tone, and causing a trifling weakness on values, though as yet no further concessions of importance have been granted. Holders are looking for customers for their stocks, but do not want to sell any cheaper. We quote at \$31 per ton for No. 1; \$30 do for No. 2, and \$27@29 do for forge. Bar iron from store is jobbing out in remarkably small and unimportant parcels, and prices continue quite easy on all grades, with full offerings from the pretty large stock here. We quote at about \$80@85 for refined; \$75@80 for common; \$110 for Swedes, ordinary sizes; \$97.50@130 for scroll; \$100@125 for ovals and half-round; \$95 for band; \$95 for horse shoe; \$105@150 for hoop; \$85@130 for rods (5-8 and 3-16 inch); and \$7¼ per lb for nail rod, all cash. Common Sheet Iron is seldom inquired after except in a jobbing way to fill a special order, etc., and the market has a slow uncertain tone, with prices nominally no lower, though apparently weak. We quote at 4½c@6c for singles, doubles, and trebles. Galvanized sheet quiet, with former figures current, and the market void of interesting features. We quote at 10c for 14@20; 11c for 22@24; and 12c for 25@26; and 13@14c for 27@29, all net cash. Russia Sheet still very dull, the stock, though not large, fully equal to all wants and values nominally as before. We quote at 11@11½ gold according to number. Pig Lead is meeting with only a light uncertain demand, but the stock here is very small and holders generally very firm at full former rates. We continue to quote at 6¼@6½c gold for common to prime foreign. Manufactured fairly active and somewhat irregular, though most manufacturers are asking 7½c for bar and pipe, and 8c for sheet net cash to the trade. Pig Tin has further declined somewhat, but the reduction appears to have reached a point more in accord with the views of buyers, and there has been a little more business doing. The tone, however, is still somewhat unsettled, and sellers appear willing to operate. We quote in coin at 30¼@30½ for English, 30¼@30½ for Straits, and 35¼@35½ for Banca. Tin Plate in moderate demand without new features to advise. Zinc still dull at 9¼c@10c from store.

NAILS.—There has been a little better demand but no general activity, and the market cannot be said to have greatly improved. Holders are offering stocks with a fair amount of freedom, and as the accumulation is good, selections are made without difficulty, with former prices in most cases willingly accepted. Shipping orders offer a very fair outlet for the season, and the local demand is slack. We quote cut at 4¼@4½c for 4d and 6d. Clinch, 5½@6c. Other metals are selling as follows: Copper, 37c per lb; yellow metal, 22c do; zinc, 16c do. The exports for the week are 343 pkgs, valued at \$1,814, and since January 1st 9,633 pkgs valued at \$113,877. Shipments also to San Francisco of 1,912 pkgs.

PAINTS AND OILS.—There has been a little better demand for a few of the leading styles from jobbers to fill out assortments, but no great amount of activity, and the general condition of the market is still quite slow and unsatisfactory. Arrivals in the mean time have been pretty fair, and further additions made to the accumulation; keeping values rather depressed, but there does not appear to have been any serious decline, figures having already reached about as low a point as it would be possible for sellers to submit without entailing serious loss. The fluctuations in gold have had a slightly unsettling effect, but nothing of a serious character. The distribution in a retail way was comparatively large at one time, but the market has again become dull, and the movement confined to the ordinary inquiry for standard goods from regular customers. Prices irregular without any decided gain for either the buyer or seller up to the close. Lined Oil has been in very moderate demand from all quarters, and with stock freely offered

prices have receded, closing with a slack, uncertain tone. The supply here is now pretty large; seed is plenty, and with no prospect of an early increase of the consumption, holders generally are inclined to sell out at once when buyers appear. We quote at 81@85c in casks, and 85@86 in bbls. Exports for the week 247 pkgs paint valued at \$3,817, and 200 bbls oxide zinc valued at \$2,080.

PITCH.—As usual at this season of the year the market for this product is quiet, the consumption being very light. There is, however, a little doing to supply the few wants of the trade. We quote at \$2.25@2.35 for city; \$2.25@2.40 for Southern, and small lots very choice, in a jobbing way from store, at \$2.50@2.62½. Receipts for the week, 50 bbls; since January 1st, 2,342 bbls; same time last year, 6,668 bbls. Exports for week, 25 bbls; since January 1st, 3,550 bbls; same time last year, 4,654 bbls.

SPIRITS TURPENTINE.—During the most part of the past week this market was very quiet, but prices supported by the very light receipts. Later in the week, however, business revived, but owing to the large increase in the supply, prices fell off ½c. There has been a fair business for export. The market closes weak at the decline, with a good business doing. We quote at 45@45½c for merchantable and shipping order, and 45¼@46c for New York bbl, small lots at 46@46½c, and retail lots from store 46¼@47c. Receipts for the week, 1,991 bbls; since January 1st, 63,472 bbls; and for the same period last year, 59,612 bbls. Exports for the week, 303 bbls; since January 1st, 15,639 bbls; and for the same period last year, 17,167.

TAR.—There is no new feature to note. Prices have remained firm with only moderate receipts, but business on the whole has again been quiet, though at one time there was a very good business in the Wilmington brand, at full, if not rather better prices, but North County has been neglected, but still firm. The market closed quiet but firm. We quote at \$2.25@2.35 per bbl for North County, as it runs; \$2.35@2.75 per bbl for Wilmington, and \$3.25 for rope, and occasionally \$3.50 for something very choice in a small way. Receipts for the week 100 bbls; since January 1st, 46,493 bbls; for corresponding period last year, 69,911 bbls. Exports for week, 70 bbls; since January 1st, 14,589 bbls, and for corresponding period last year, 30,805 bbls.
