REAL ESTATE RECORD

AND BUILDERS' GUIDE.

Vol. VI.

NEW YORK, SATURDAY, DECEMBER 24, 1870.

No. 145.

Published Weekly by

THE REAL ESTATE RECORD ASSOCIATION

TERMS.

One year, in advance...........\$6 00

All communications should be addressed to

C. W. SWEET,

106 BROADWAY, COR. OF PINE STREET.

THE RECORD is regularly mailed to subscribers every Friday night at eleven o'clock, and should be delivered by the Post Office authorities on Saturday morning early. Any subscriber not receiving his paper in due season may rely upon it that the fault is entirely with the carrier, and a complaint lodged either with the Post Office authorities or at the RECORD office will remedy the irregularity. Any carrier delivering the RECORD later than Saturday morning is remiss in his duty.

GOOD WORKS,

THE year 1870 is about to be laid upon the shelf, to take its place alongside of the many thousands which have preceded it. The time is at hand when the reflection forces itself upon the mind of every thinking man, of how much good he may have done during its passage, and to lay up plans for the coming of 1871. In this connection we cannot but think how much pleasure our friend Dr. Otto Fullgraff must take when he reviews the fact that during the year 1870 the Bond Street Homœopathic Dispensary, of which he is the founder and manager, has treated nearly 32,000 cases of diseases, including over 74,000 prescriptions furnished, and about 8,500 out-door visits. This is certainly a proud record, and shows how much misery may be alleviated by the well-directed efforts of one man; for, although there are now many able physicians who work in connection with Dr. FULLGRAFF, to him solely is due the credit of originating and carrying on this good work.

Probably the most successful classes of diseases treated at this Institution are those of the throat and lungs, to the study of which Dr. FULLGRAFF has expended much time and money, and has succeeded in inventing a series of delicately constructed instruments, by means of which a medicated spray may be thrown with unerring certainty directly upon the parts affected. The old method of using a probang indiscriminately, has been consigned by Dr. Full-GRAFF to the dark ages. It is exceedingly interesting to witness a patient when inhaling the medicated vapors from these delicate instruments, which require great skill upon the part of the operator, and a thorough knowledge of the construction of the vocal organs. By means of diverse reflectors, the whole interior of the throat can be plainly seen, and the patient, under the direction of the Doctor, being

called upon to utter different sounds which call into play the different parts of the throat, and so dilate the vocal cords that the instruments can be plainly seen passing between them directly to the diseased parts. The Doctor pursues a similar method in his treatment of nasal catarrh, and has achieved signal success in relieving and curing many cases. We do not know of any more instructive and interesting experiments to witness than those of the Doctor in connection with the throat and lungs.

BRYANT'S NEW OPERA HOUSE.

FEW portions of the city have recently undergone more rapid improvement than Sixth avenue, in the immediate neighborhood of Twentythird street. Besides Booth's fine theatre, which was in itself enough to make a grand landmark, the new Masonic Temple is slowly rearing its large proportions directly opposite, and very recently, with unusual rapidity, Bryant's New Opera House has been erected close by, but a few doors west of Sixth avenue, and was opened to the public some four or five weeks ago.

Although built on a comparatively small scale, this pretty little theatre may be considered one of the best things of the kind yet erected in New York. It occupies a frontage of 50 feet on Twenty-third street, running back 100 feet, and is capable of seating about 500 people. The interior consists of a handsome parterre, with gallery above, the latter quite unobstructed by columns, being so constructed as to be suspended by the strong roofframing above. The whole arrangement is extremely simple, but most pleasing in effect, and exhibits everywhere the proofs of good and sensible design. The entrances, lobbies, staircases, etc., are all spacious and most conveniently arranged for egress and ingress; the seats roomy and comfortable, and so disposed that everybody can have a perfect view of the stage; the ventilation excellent, and precautions have been taken, through abundant water supply, to avoid all danger from fire, in cases of sudden emergency. Unlike the generality of theatres, which depend so much for effect upon gaudy ornamentation, the merit of the one in question rests in its extreme simplicity; and yet the impression created is very satisfactory. The exterior is equally successful. It presents a fourstory Italian façade, with Mansart roof of modest but pleasing design, the whole length of the front on first floor being occupied by a Corinthian colonnade, which forms a very imposing and convenient entrance to the building. This theatre was erected by A. B. DARLING. Esq., one of the proprietors of the Fifth Avenue Hotel, from the designs of Mr. S. D. HATCH.

CORRECTION.

In an article on Park affairs, published in last week's Record, a typographical error made us state that the Park Commissioners had in contemplation the widening of Fifth avenue, from Twenty-third to Seventy-sixth street. What we intended to state was, that the Commissioners proposed widening Fifth avenue on the east side, from Broadway to Twenty-sixth street.

SECOND AVENUE.

ECOND AVENUE.

Resolved, That Second avenue, from Nineteenth street to Forty-second street, be paved with Belgian or trapblock pavement, and that at the several intersecting streets and avenues crosswalks be laid where not now laid, and relaid where those now laid are, in the opinion of the Commissioner of Public Works, not in good repair, or are not upon a grade adapted to the grade of the proposed new pavement, under the direction of the Commissioner of Public Works; and that the accompanying ordinance therefor be adopted.

Called up by Assistant Alderman Garrer.

therefor be anoped.

Called up by Assistant Alderman Garry.

Assistant Alderman Robinson moved that said resolution be referred to the Committee on Street Pavements.

Which was agreed to.

And the same was committed to the Committee on Street Pavements.

SIXTH AVENUE

Resolved, That a crosswalk be laid across Sixth avenue, at each side of the intersections of streets from the Sixteenth to the Twenty-seventh, inclusive, under the direction of the Commissioner of Public Works; and that the accompanying ordinance therefor be adopted. Called up by Assistant Alderman Barker, and adopted by the following vote (three-fourths of all the members elected voting in favor thereof):

Affirmative — Assistant Aldermen Terence Duffy, Lysaght, O'Brien, the President, Assistant Aldermen Robinson, Healy, Hampson, Odell, Mulligan, Costello, Barker, Reilly, Feitner, Garry, McDonald, Thomas Duffy, and McCarthy—17.

And sent to the Board of Aldermen for concurrence.

TWENTIETH STREET.

Resolved, That Twentieth street, from Sixth avenue to the North river, be paved with Belgian or trapblock pavement, and that at the several intersecting streets and avenues crosswalks be laid where not now laid, and relaid where those now laid are, in the opinion of the Com-

missioner of Public Works, not in good repair, or are not upon a grade adapted to the grade of the proposed new pavement, under the direction of the Commissioner of Public Works; and that the accompanying ordinance therefor be adopted.

Introduced by Assistant Alderman Barker, and laid

THIRTY-SIXTH STREET.

HIRTY-SIXTH STRIET.

Resolved, That Thirty-sixth street, from Third avenue to the East river, be paved with Belgian or trapblock pavement, and that at the several intersecting streets and avenues crosswalks be laid where not now laid, and relaid where those now laid are, in the opinion of the Commissioner of Public Works, not in good repair, or are not upon a grade adapted to the grade of the proposed new pavement, under the direction of the Commissioner of Public Works; and that the accompanying ordinance therefor be adopted.

Introduced by Assistant Alderman Garry, and laid over.

MESSAGE FROM THE MAYOR.

The President laid before the Board a message from the Mayor, returning without his approval resolutions and ordinances for paving with Stow foundation pavement First avenue, from One Hundred and Tenth street to One Hundred and Twenty-fourth street; Avenue A, from Eighty-fifth street to Ninety-second street; One Hundred and Twelfth street, from Fourth avenue to First avenue; One Hundred and Fourteenth street, from Fourth avenue to East river; One Hundred and Fifteenth street, from Fourth avenue to East river; One Hundred and Eighteenth street, from Fourth avenue to East river; One Hundred and Eighteenth street, from Fourth avenue to East river; One Hundred and Twenty-first street, from Fourth avenue to East river; One Hundred and Twenty-first street, from Fourth avenue to East river; One Hundred and Twenty-third street, from Second avenue to East river; One Hundred and Twenty-third street, from Second avenue to East river—the message being as follows: The President laid before the Board a message from being as follows:

being as follows:

MAYOR'S OFFICE,
December 14. 1870. {

The Mayor returns, unapproved and with objections, eleven resolutions that provide for the paving with a patent wooden pavement (called the Stow foundation), eleven avenues or streets of the Twelfth Ward. They comprise together an area of fifty ward blocks—some of which being between avenues have extensive frontage—and the streets in question taken together would extend about three miles. The Mayor has caused a canvass to be made among all the property-holders who are to be assessed for this so-called improvement, and has been unable to find one who desires it. In one street (One Hundred and Eighteenth street, from East river to Fourth avenue), property-holders who own three thousand nine hundred and sixty feet of land fronting thereon emphatically remonstrate by petition and signatures against the measure. The reasons for remonstrance will apply to most of the other streets, and it is appended as a schedule.

Upon each of the enumerated streets and avenues are vacant lots. In nearly all of these streets the number of vacant lots exceeds that of erected buildings. In twenty of the blocks no sewers have as yet been constructed. In several of the streets no gas-mains have yet been laid or made ready for operation. But a fuller description of these particulars will appear from another schedule hereto amended.

these particulars will appear from another schedule hereto appended.

The policy of paving unimproved or partially improved
streets is at all times a dubious one, because of the continuous necessity of taking up the pavement whenever
gas, or sewer, or water connections have to be made by
parties who from time to time erect buildings on the line
of the street. Frequent tearing up of stone pavement
makes inequalities, but frequent tearing up of wooden
pavements disarranges the plane of foundation and exposes the wood to attrition and decay.

The Mayor calls your attention to a veto message sent
to your predecessors last spring in relation to the same
kind of pavement is the one now in question. In that
message were specified objections also to the manner of
pavement contemplated and which objections the Mayor
still believes.

A. OAKEY HALL, Mayor.

REASONS FOR REMONSTRANCE.

We, the undersigned, owners of property on One Hundred and Eighteenth street, from Fourth avenue to Harlem river, do hereby respectfully protest and remonstrate against paving said street with the Stow foundation pavement, agreeably to a resolution and ordinance adopted by the Board of Assasant Aldermen on December 1, 1270 and which is accounted.

pavement, agreeably to a resolution and ordinance adopted by the Board of Assastant Aldermen on December 1, 1870, and which is now pending in your Board, for the following reasons:

First.—Your remonstrants object to any wooden pavement being laid in said street, on account of the difficulty in making connections with sewer, gas, and water pipes, without either rendering isseless or virtually destroying so much of such pavement as may be contiguous thereto; and as said One Hundred and Eighteenth street is but partially built upon, these several connections alluded to remain yet to be made, and therefore your remonstrants are of opinion the said paving should be delayed for the present, which objection must appear equally apparent and forcible to your honorable body.

Second.—Your remonstrants further object to said improvement by reason of the want of durability of the Stow pavement, and as said One Hundred and Eighteenth street is not now a thoroughfare, and therefore requires no paving whatever for the present; yet, as the said street may become such when the same shall have been opened to the Eighth avenue, your remonstrants prefer that when it is necessary and requisite to pave said street it be done with a pavement more durable, and less easily injured by making sundry connections, than the Stow pavement; and being decidedly opposed to all and every kind of avoiden pavement.

block pavement, and that the resolution and ordinance heretofore adopted to pave the same with the Stow pave-

heretofore adopted to pave the same with the Stow pavement be repealed.

Lustin.—Your remonstrants trust that, inasmuch as said paving has not been petitioned for by any of the owners of property on the line of said street from Fourth avenue to Harlem river, your honorable body will accede to their wishes, by either repeating the ordinance adopted in relation to the Stow pavement, or adopting an ordinance to pave the same with the Belgian or trapblock pavement. pavement

Signed by Henry Brewster and others.

SCHEDULE A.

Signed by Henry Brewster and others.

SCHEDULE A.

FIRST AVENUE, ONE HUNDRED AND TENTH TO ONE HUNDRED AND TWENTY-FOURTH STREET—Curbed and guttered; has Croton mains; not sewered from One Hundred and Twenty-second to One Hundred and Twenty-fourth street; gas-mains iaid; and only partially built. And sent to the Mayor for approval.

WILLIAM H. MOLONEY,

Cerk.

MARKET REVIEW.

BRICKS .- It has come! The long looked for, and, in some cases, the almost prayed for north-west wind has come, a great many vessels have been left aground at the docks by the low tides, navigation is somewhat impeded by ice on the Hudson, and about the last tows are said to be at hand from "up river." We do not see, however, that the selling interest have gained any imnortant advantage: in fact, the market is without improvement of any kind, and former prices are still current, with outside figures only reached by the very best lots. The demand continues fair, certainly, but so has the supply, and the most anxious buyer experienced no great difficulty in obtaining either the quantity or quality desired, and found sellers, as a rule, inclined to sell whenever an outlet presented itself. Some of our dealers are still buying for stock, and builders want a cargo now and then, keeping the demand pretty general, but there is no indication that the call from any source is likely to greatly increase, if it does at all. We continue to quote at \$8@8.50 per M, for common to prime; and \$9 do for very choice, the latter figure seldom reached, however. From the New Jersey yards the receipts are light and unimportant, and do not attract much attention, though selling at about former figures when the quality is at all desirable. We continue to quote at \$7@ 7.50 per M. Pale Brick appear to hold their own rather better than other grades, fully as well certainly, and are commanding full former rates. The supply is really small and comes to hand in an irregular manner, and with a great many of the present buildings consuming this class of

stock, receivers find their cargoes moving off with ease and rapidity. We continue to quote at about \$5.50 per M, with seldom a sale lower, but occasionally something choice a little higher. Philadelphia Fronts by the cargo are out of season, but from yard a fair amount of stock is going out, and prices generally are steady at about \$32@35 per M according to quantity, delivery, etc. Croton Fronts remain in a dull, uncertain condition, and prices nominal, within the wide range of \$10@15 per M, the latter extreme except for very small parcels. We notice exports of 24,000 bricks, valued at \$660, to Cuba.

CEMENT .- The demand continues good, fully equal, in fact, to all the stock that can now be obtained, and the market has a most decidedly strong tone throughout. There is no quotable advance in a wholesale way, but many dealers are insisting upon rather higher figures, particularly for choice and generally desirable brands. Some of the companies are said to have withdrawn entirely as sellers, and are now engaged merely in completing contracts. etc. The jobbing trade have secured a fair supply for the winter, in the majority of cases, but a few dealers have been so busily engaged in delivering to consumers during the past fall and early winter that their accumulations have grown slowly, and they now find less stock in yard than they desire, even for prospective dull trade. This paturally makes all holders quite firm, and the tendency in values is now likely to be upward until spring. The great bulk of the late business has been with dealers, or the large contractors, but some parcels were taken for shipment, and the pipe manufacturers were also buyers, as work in this line is continued to some extent during the winter in warmed buildings, etc. We quote still at \$1.90 per bbl, but this is an inside rate. Shipments of 46 bbls to Danish West Indies, and 1,500 bbls to San Francisco.

FIRE BRICK .-- The market occasionally shows some little animation, but the demand is not general or lasting, and manufacturers and wholesale dealers do not appear to be very favorably impressed with the condition of trade. The position, however, is no worse than upon hundreds of other articles of merchandise this season, and, with an absence of really disastrous results, the trade have no great cause for complaint. On the domestic production values are lower than last spring, but this has been offset by a corresponding reduction in the cost of labor, coal, and other expenses, and though the consumers gain considerably, the producer loses nothing to speak of. There has been a fair amount of stock turned out this year, and the accumulation now available is not only large but well assorted, making all selections a very easy matter, particularly as sellers are willing and anxious to operate. About the extremes on wholesale and retail lots may be given at \$45@55 per M for No. 1 arch, wedge, key, etc.; and \$35@45 do for No. 2 splits and soap, but there is now and then some departure from these figures, generally in buyers' favor. The call prevailing, such as it is, is mainly on local account, and from the towns and villages near-by, with a few coastwise orders being filled though the shipping demand, both domestic and foreign, is extremely dull, and has been all the season. For foreign Fire Brick there has been a good steady demand, and in some cases considerable activity, with full prices obtained quite easily, and the market at the moment firm in view of interior buyers insisting that orders be hurried through at once before navigation entirely closes. The stocks of desirable quality are somewhat smal, but common sorts are plenty, and many parcels have been held some time awaiting a market. We quote at \$55@60 per M for Scotch and English white; \$70 for Lee-Moor; \$70 for Welsh; and \$75 for Starbridge. We note exports to Cuba of a lot of Fire Brick Clay, valued at

LATH.—The offerings from first hands have been moderate, the demand more than equal to the supply, and the market in a generally firm and encouraging condition for the selling interest, though, were buyers as plenty and as anxious as in former years, we might see prices run up to a much higher level. A good many lath have been used of late, and for the season of the year the consumption has been pretty large, but from stringency in the money market and one or two other causes building operations do not appear to go forward quite so vigorously as some two or three weeks ago. There is not much stock to come forward, but still a little left, and, until the ice entirely shuts off communication with the leading ports, shipments will be made to some extent. We understand that the mills, both water and steam, will cut during the winter as opportunity may admit, but it is to be hoped that greater attention will be paid to quality, in order to save us from a subsequent overcrowded market with short and inferior grades as was the case last spring. As we close our report the market is dull but quoted firmly at \$2.75 per M.

but quoted firmly at \$2.75 per M.

LIME.—In our last report we referred to existing doubts as to the probability of current prices being long sustained, and these doubts it appears were well grounded, values showing a falling off on both grades, and not much strength or regularity at the decline. The alteration in figures was in reality made a day or two before our last report was published, but our reporter, upon !application at the proper place, was informed that there was "no change," and wrote accordingly. The supply in the hands of the trade at present is very fair, and the arrivals, though moderate, are all that can be disposed of. Rumor has it that the recent advance in the rate of common started a considerable amount of lime from the kilns toward this point, but we only give it as a rumor, the impossibitity of obtaining any positive information on the lime market having become proverbial. At the close the supply is moderate and the market is called firm at \$1.30 per bbl for commen, and \$1.65 per bbl for lump. The State lumes appear to be a little mixed according to accounts from those who are buying or solicited to buy, and the market may be considered as somewhat nominal, though the reports from headquarters call the position steady at the above rates and everything in a most encouraging condition generally. most encouraging condition generally.

LUMBER.—Our retail market may still be called fairly active, as a great many builders have got their work in such shape that timbers, etc. are an absolute necessity at once, and this keeps up a demand for a certain class of stock. All other goods are neglected however, and even that most sought after, does not, upon close investigation, move out with the rapidity appearances would seem to indicate, in view of the fact that a portion of the builders are thought to be a little uncertain by the trade, and they are compelled to shop around somewhat before they can secure invoices on the terms sought. The additions to the supply are, of course, now quite moderate, and any respectable sale would be felt on the accumulation, though there is plenty of lumber here yet, and the bulk of it available. Our table of quotations shows the figures current as near as may be, but there is some irregularity, with a tendency to allow quick cash buyers casier terms. The expenses of carrying lumber are enormous, in view of the high rate of insurance, the large space necessary for storage, and consequent heavy rents, and \$1.00@2.00 per M is nothing on LUMBER .- Our retail market may still be called fairly

carrying lumber are enormous, in view of the high rate of insurance, the large space necessary for storage, and consequent heavy rents, and \$1.00@2.00 per M is nothing on a liberal invoice on which an early settlement is sure. The wholesale market continues to be confined mostly to such parcels as may arrive coastwise, and, with these not over plenty, business has been rather dull. The general feeling of sellers, however, appeared to be quite firm, as there is little danger of an uncomfortable accumulation taking place and buyers appear to be found for short all the there is little danger of an uncomfortable accumulation taking place, and buyers appear to be found for about all the goods coming to hand. The export movement still slow, though an improvement is hoped for, and by some dealers predicted, after the first of the new year. We do not hear of any contracts being made for next season's production as yet, in fact there has been little or nothing said in regard to it, as the desire now is to adjust the business of the past year.

The exports of lumber have been as follows:-

Bastern Spruce has been less plenty for general competition, though some arrivals took place on orders, in a few instances two or three months old, and now just completed. Receivers as a rule report the market pretty quick, particularly if they have a prime schedule to offer, and nothing to warrant, any change in prices, certainly not downward. Advices from the points of supply indicate that there is still some little stock to come forward, but nothing of magnitude or calculated to have any very depressing influence upon the market, as the trade are consuming daily a quantity in excess of the arrivals. As we close the general features are steady tone with light offerings, and prices ranging at about \$18@20 per M for inferior to prime; and \$21 i@21.50 do for choice. White Pine has been a little dull, the demand covering only an occasional small parcel want-

ed to fill special shir ping orders, or some unexpected outlet on domestic account. Holders in nine cases out of ten are offering stocks willingly, and do not refuse full bids, yet there is a more confident tone than during the fall, and an entire absence of anything looking like pressure to realize. The assortment holds out fairly as yet, though with some dealers there is a little complaint of scarcity on prime stock. We quote at \$18@20 per M for inferior to fair; \$21@23 do for good: \$24@25 do for prine to choice shipping stock; and \$26@30 do for selections. Yellow Pine on contract and occasionally in the way of a random cargo has arrived to a fair extent, and receivers have been kept reasonably busy during the period under review, the demand proving about equal to the supply, and buyers operating without great hesitation when stock suited them, quality rather than price appearing the main object. From the mills reports come to hand of a generally favorable character as regards the production, though there appears no probability of excessive amounts being turned out. We quote at \$29 per M for fair; \$30@21 do for good; and \$32 do for choice. Piling is still in moderate demand and to a great extent nominal, though dealers continue to quote about as before—viz., 5½@7c for foot, according to size of stock. We also notice experts as follows: To Antwerp, 19,200 staves; to London, 6.960 do; to Gibralter, 20,500; to Cadiz, 217,080 do; to Cuba, 55 spars, value, §1,220; to Danish West Indies, 2,0000 hoops, and 100 shooks; to British West Indies, 2,0000 hoops, and 100 shooks; to British West Indies, 2,000 teet do; from Sananha, 200,000 feet do; from Charleston, 150,000 feet do; from Manne coast, 2 cargoes lumber; from St. John, N. B., 179,000 feet deals, 5,000 feet scantling, and 23,000 lath. Charters as follows: A schooner, 149 tons, to Jacksonville and back, lumber, §13; none 230 tons, from Satilla River to Havana, lumber, \$4; a Brig, 385 tons, same voyage and rate; schooner 304 tons to Barbadoes for orders, cooperage

lows:
There has been some little demand for tonnage for Cuba, but no improvement in rates. The rates are about 18c. for sugar boxes out, or \$4.50 for molasses the round trip. The engagements for the week have been brig Sudurus, out to North side Cuba and back North side Hatteras at \$4.50 for molasses; schr. Mary Louise, out to North side Cuba and back North of Hatteras, terms not transpired; brig Mary C. Marriner, hence to Martinique, 25c. for hhd, shooks without heads; brig Ella Maria, out to North side Cuba, \$1,000; brig Mechanic, out to Sagua, \$950; brigs J. B. Brown and San Carlos, hence to Matanzas, 18c. for sugar boxes; brig Daring, out to North side Cuba, on private terms. Coastwise freights are dull and unchanged. Two or three vessels have been taken for New York at \$3 for lumber. Offers are made of \$5 for hay at 9c. per bbl, to Savannah, and some inquiries are made for Charleston and Mobile.

There is nothing of interest from Chicago this week, and

From the Saginaw Courier we obtain the following: From the Saginaw Counier we obtain the following:—
Lumbering operations have fairly commenced. Extensive arrangements have been made, but we have every reason to believe that the season's crop of logs is over-estimated. From what we learn, more logs will the put in on "The Shore," but there will be a deficiency on some of the lower streams, the Cass and Bad Rivers particularly, while on the Tittabawassee and its tributaries about the same stock will be put in as last year. In case the winter is long and favorable a larger stock may be got out than is now estimated. In reference to lumbering on the Pine, Chippewa, Salt and Tobacco, we clip the following from the Isabella County Enterprise:

County Enterprise:
"A slight fall of snow occurred on Wednesday night, but County Enterprise:

"A slight fall of snow occurred on Wednesday night, but hardly sufficient to be available for lumbering operations. From all parts of the country we learn that preparations have been made for putting in a large amount of logs, large quantities of which are already cut and skidded ready for the first available snow. More activity is manifested among lumbermen than we remember to have seen before, and among buyers the contest for the purchase of small lots of good logs is animated, with fair prices offering. The forests of Chippewa, Pine, Salt and Tobacco will lose a vast amount of timber this winter, which, in the spring, will go to feed the mills of Saginaw and Bay City. Indeed, could the timber taken from Isabella county lands during the last five years have been manufactured here instead of going to swell the wealth of those cities, and the lumber transported by rail, the profits derived from the business would have gone very far toward building a railroad to this point."

The Muskegon lumbermen will receive a large proportion of their supplies from and through Saginaw, over the Flint and Pere Marquette Railway, which has advanced far toward, and next season will penetrate the Muskegon pineries. The Muskegon News and Reporter, speaking of lumbering in that locality, says:

"The lumbermen on Muskegon and White River are

"The lumbermen on Muskegon and White River are swarming in that locality, says:

"The lumbermen on Muskegon and White River are swarming in the pinories. We can find them at every turn extremely anxious for pine. A large number of sales have been made, and we have heard of some as high as \$9 for No. 1s, and some at \$6 as they run. All seems to be eager, and the prevailing opinion seems to be that the price of logs will rise as the season advances. Most of the large lots of course are owned by moneyed men and cannot be had, consequently mill owners with but little timber begin to look wornied and embarrassed. The time is not far distant when the lumber on these rivers will be almost entirely controlled by the heavy manufacturers and dealers in Muskegon county, for they have already procured mostly the whole stock of pine. To-day both rivers are not only cleared of logs, but nearly every foot of merchantable lumber has left the docks, and the booms are empty for the first time for years past. This must also have a tendency to advance the price of lumber. The average price paid for logs on the Muskegon now is \$7; on White River \$6. It may now be safely calculated that a full stock of logs will be put in, unless we should have an unfavorable winter—say 400,000,000 feer in the county. feet in the county.

The following is also from the Saginaw Courier of recent

The following is also from the Sagman Courrer of recent date:

The unusual activity in the lumber market the past week, during which 20,000,000 or 20,000,000 feet have changed hands, is something unprecedented for this season of the year. It is not usual to see buyers in the market much earlier than February, but during the past week there has been a large number here from Ohio ports, all buying large-ly. A number of mil firms have sold out their stock entire. Saylor & Co., for 400 M feet to Cleveland parties, and 700 M to Toledo parties, obtained \$5 50@11@32, which is better than the season's quotations. A large number of lots have sold at higher figures, and none, so far as we have learned, for lower. One gentleman who bought a lot for these figures was yesterday offered \$6@12@35 for the same, which was refused. At the present indications the market will open in the spring higher than it has been for several years, with an excellent demand. It is probable there will be no lumber for sale, on the opening of navigation, of this season's cut. of this season's cut.

tion, of this season's cut.

The Newaygo Republican, published at Newaygo, an important point on the projected line of the Detroit, Howell and Lansing Reilroad, publishes our article of last week on the subject of that railroad, and adds:

"The completion of a railroad on the line suggested in the article quoted above, may be deemed a certainty. Two years at farthest will accomplish the work, and when finished, beside traversing a rich farming portion of the State, west of Greenville, will pass through heavy pineries, cross the Muskegon river here, where now 20,000,000 of lumber is manufactured yearly, and where the amount can be easily increased to 100,000,000. We can hold the logs here easily and safely, and have all the water power desired for that purpose. Indeed, we are assured by several wealthy lumbermen, who own large bodies of pine above us, that as soon as the road reaches us, here will they erect their mills, and here manufacture their lumber and us, that as soon as the road reaches us, here will they erect their mills, and here manufacture their lumber and shingles

our Muskegon friends are anxious that this road should "Our Muskegon friends are anxious that this road should run from Greenville west to them. There is no danger of that, as Moses Taylor, Wm. B. Astor, and others, of New York, who are largely interested in the proposed road, owning most of the stock and bonds of the same, are also owners of the road from Sheboygan, Wis., to St. Paul. Beside, two roads south of Muskegon already are amply sufficient to do all the business of that place, with lake navigation added, without a third road to divide the traffic. With a prospective railroad, and one in fact, the counties of Muskegon only number 7,780 by the census. The population of this county alone is 7,200. Who doubts but a railroad here, or the certainty of one soon, would double our present population within the next three years? The lumber shipped alone would pay the interest on the cost of the road without doubt, and a large passenger traffic would be secured—superior by far to that of the G. R. and I. R. R."

The following comes from Detroit, under date of 17th inst. :

The statement of the lumber business of this city for 1870, shows 57,000,000 feet cut, against 46,000,000 in 1869, and 48,000,000 in 1868. The total amount of lumber handled here this year is 119,000,000 feet. The number of shingles cut here, 22,000,000; staves shipped, 2,000,000.

From Savannah, we have the following:

LUMBER.—The demand for Lumber the past week has been fair, several orders having been placed. The mills are generally at work.

We quote Lumber:-

Ordinary sizes	\$20	00@21	.00
Difficult sizes	21	00@25	00
Flooring beards	21	00@22	00
Ship stuff	20	00@22	00

Quite a large lot of Timber has been received this week a full supply can now be relied on, as there is plenty of water in the rivers.

The Boston lumber market is reported as follows by the Commercial Bulletin:

The demand for lumber is beginning to slack up a little, and, as cold weather comes on, building operations are being brought to a close, and the market closes not so strong as last week. There are not many cargoes now offering for sale, though the yards are generally busy in taking them in. During the early part of the week, with favorable winds, nearly a hundred sail of lumbermen arrived here, the cargoes consisting mostly of spruce, which was previously sold to arrive. The stock now on hand, as compared with former years, is light, and the principal demand is for coarse pine for covering boards, flooring, etc., the price of which holds steady. Some parties are now ordering stocks for early delivery next spring, and the mills, as a general thing, East, have shut down. There is no quotable changes in prices, which remain firm at last week's figures.

for early delivery next spring, and the mills, as a general thing, East, have shut down. There is no quotable changes in prices, which remain firm at last week's figures.

METALS. — Manufactured Copper continues to meet with a noderate and somewhat uncertain demand, but this is nothing unusual for the season of the year, and as there is enough doing to give trade some vitality, the market in a general way is firm and uniform. A recent meeting of manufacturers is said to have been held and a fresh combination formed to preserve former rates. We quote at 30@31e per M for new sheathing: 22@32s do for yellow metal, and 19@19½ for old sheathing cleaned. Ingot Copper has shown a better tone than at the date of our last, buyers appearing to stand ready for all the cheap lots, and taking the bulk of the offerings. The supply of Copper during 1870 was about 40,750,000 lbs, leaving a stock on hand of 10,000,000 bls against 1,000,000 bls, same time last year. As we close, the market is quite firm, and certain movements indicate a desire on the part of leading operators to concentrate the stock if possible. We quote at 22½@22½ oper bl. Scotch Pig Iron has been quiet, in fact very dull, the demand calling for simply job lots on pressing orders for immediate use. The arrivals in the meantime proved very liberal and the stock has accumulated, but as most of the parcels were placed in bond, values were not greatly depressed, and we continue to quote at \$34,036 per ton, according to quality. American Pig Iron hack with rather more inquiry, but the market did not reach a condition of activity and with more than enough stock available, for the outlet prices remained about as before. We quote at \$31 per ton for No. 1; \$30 do for No. 2, and \$25,027 do for forge. Bar Iron fron store finds few buyers, and though the supply does not increase with any rapidity there is more on hand than holders desire, and some disposition is shown to shade prices a trifle in order to insure quick sales if possible. We quote at 10½ for 102. Sp 31. Sp 3

NAILS.—The demand has been fair and the market firm during the greater portion of the period under review, but the movement does not appear quite so active as at the date of our last. Most of the export orders have been filled, and are awaiting an opportunity for shipment, while the local buyers are withdrawing for the present. The stocks, however, continue small, and agents and holders generally are confident. We quote cut at 4%@4%c for 4d and 6d. Clinch, 5%@6c. Other styles are selling as follows: Coppet, 37c per 10; yellow metal, 22c do; zinc, 16c do. The exports for the week are 278 pckgs, valued at \$1,631 and since January 1st, 11,775 pckgs, valued at \$123,947.

since January 1st, 11,775 pckgs, valued at \$123,947.

PAINTS AND OILS.—There is scarcely anything new or interesting in this market at present, business from day to day footing up small, and never in excess of the most urgent wants of local jobbers. The necessity to hurry goods into the interior has cea-ed with the closing of the canals, and except as above noted buyers generally appear inclined to postpone operations until after the 1st prox., particularly on goods affected by the new tariff. Not many additions have been made to the accumulation of late, but the supply is likely to prove ample both in quantity and quality for all calls during the next thirty days at least. From jobbers we also hear complaints of dull slow movement, and a gradual contraction of business as the end of the year approaches, with hardly enough stock changing hands to establish a basis of values, though quotations in a general way remaining about as before. A few export orders have of late been filled, some of long standing, awaiting proper freight accommodations. Linseed Oil has undergone no very decided change in value, and has met with a fair trade demand, but there was plenty of stock offering for the call, and sellers generally seem quite as much disposed to operate, as buyers. Shippers are not doing much at present. We quote at 82@ \$3c in casks, and 83@84c in bbls. Exports for the week, 54 pckgs paint, valued at \$1,964.

PITCH.—The demand is still only to supply the present wants of the local trade, and these being light, (as the consumption at this season of the year is small,) business is consequently quiet. Holders retain former prices, however, with firmness, and buyers on taking stock are obliged to pay full previous rates. We quote at \$2.25@2.35 for city; \$2.25@2.36 for southern, and small lots very choice, in a jobbing way from store, at \$2.50@2.62%. Receipts for the week, nothing; since January 1st, 2.342 bbls; same time last year, 7,630 bbls. Exports for week, 70 bbls; since January 1st, 3,685 bbls; same time last year, 4,981 bbls.

SPIRITS TURPENTINE.—For the most part of the past week business has been very dull. Early, the market was pretty steady under light receipts, with a fair amount of trade, but subsequently with larger receipts, and no demand whatever, except for small lots to supply immediate trade wants, the feeling naturally became weak, and holders were forced to lower, prices closing heavy at the decline. The outward movement has been fair, but almost entirely of stock bought some time since. We quote at 46@46½ of for merchantable and shipping order, and 46½ of 75 for New York bbl, small lots at 47@47½c, and retail lots from store 47½@48c. Receipt for the week, 2,102 bbls; since January 1st, 69,255 bbls; and for the same period last year, 64,857 bbls. Exports for the week, 1,072 bbls; since January 1st, 17,216 bbls; and for the same period last year, 17,576.

TAR.—This market is devold of new or interesting features. Business, in a legitimate way, remains as last noted—quiet. Prices are still very firm and the supply of Wilmington, rather light, especially the better grades, while of North County there is but little, if any, here. There has been no export movement as yet. We quote at \$2.25@2.35 per bbl for North county, as it runs; \$2.35@2.25 per bbl for Wilmington, and \$2.50@2.75 for rope, and occasionally \$3.00 for something very choice in a small way. Receipts for the week 30 bbls; since January 1st, 46,973 bbls; for corresponding period last year, 73,205 bbls. Exports for week,30 bbls; since January 1st, 14,940 bbls, and for corresponding period last year, 32,036 bbls.
