# REAL ESTATE RECORD

### AND BUILDERS' GUIDE.

Vol. VII.

NEW YORK, SATURDAY, MAY 27, 1871.

No. 167.

Published Weekly by

### THE REAL ESTATE RECORD ASSOCIATION.

One year, in advance......\$6 00 All communications should be addressed to

C. W. SWEET.

7 AND 9 WARREN STREET.

Entered according to Act of Congress, in the year 1871, by C. W. SWEET,

In the Office of the Librarian of Congress, at Washington.

NO receipt for money due the REAL ESTATE RECORD will be acknowledged unless signed by one of our regular collectors, HENRY D. SMITH OF THOMAS F. CUMMINGS. All bills for collection will be sent from the office on a regularly printed form.

A RUMOR to the effect that the Department of Parks had decided upon the abolition of the system of Riverside Parks, was put into circulation about three weeks since, and has obtained considerable credence with many persons. We are enabled to state authoritatively that there is no truth whatever in the report, but, on the contrary, the Department of Parks intend immediately to commence active operations on the Riverside Parks, and will push the work vigorously to its completion.

We are sure that property holders along that line will hail this intention of the Park Board with pleasure, for if ever a body of men have waited patiently to see something for their money, the owners of Riverside Park property may be set down among the number.

THE following are among the laws affecting New York City, passed at the late session of the Legislature:

#### CHAPTER 570.

AN ACT in relation to changing the present grades and establishing new grades for certain streets in the city of New York.

Passed April 18, 1871; three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as

SECTION 1. The commissioner of public works shall have power, within six months from and after the passage of this act, to change the present grades, and establish new grades for the streets embraced within the area bounded by Chambers, Bleecker, and Chatham streets, Broadway, and the Bowery, in the city of New York, and a map or profile showing such grades as so changed and established, certified by the said commissioner, shall, within the said six months, be filed in his office, and a duplicate thereof in the office of the comptroller of the said city, and the commissioner of public works shall immediately thereafter proceed in such manner as he may deem best to regulate and grade such streets in accordance with the grades so established. The board of assessors in the city of New York are hereby authorized and di-

rected to assess upon the property intended to be benefited in the manner provided by law for making assessments for local improvements, theexpenses of which shall be actually incurred by the mayor, aldermen, and commonalty of the city of New York for such regulating and grading, which sums so assessed shall be a lien upon such property, and all provisions of law relative to the collection of assessments for local improvements in said city shall apply thereto. The necessary expenses incurred by said commissioner of public works, in and about the altering and fixing the grade as before men-tioned, for preparing the necessary maps and profiles, and for other services to the amount of not exceeding twenty thousand dollars, shall be paid by the comptroller of the city of New. York on the requisition of the said commissioner of public works; and the supervisors of the county of New York are hereby authorized and required, as soon as conveniently may be after the passage of this act, to order and cause said sum for such purpose to be levied and raised by tax upon the estates by law, subject to taxation within said county, and to be collected according to law.

§ 2. This act shall take effect immediately.

#### CHAPTER 566.

AN ACT to provide for the proper drainage of lands within the corporate limits of the city and county of New York.

Passed April 18, 1871; three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Whenever it shall appear to be necessary for the protection of the public health that any part or parcel of land within the corporate limits of the city and county of New York needs to be drained by other means than by sewers, and it shall be so certified by the city sanitary inspector, and said certificate is filed among the records of the board of health of the health department of said city, the said board shall direct that the same be done by and under the direction of the depart-

ment of public works of said city and county. § 2. All parts and parcels of land lying below the levels of the sewers adjacent thereto, upon which surface water remains stagnant, or through which water courses have, or at present do run, may be so drained by a properly constructed blind drain, which shall be carried along such natural watercourse until it can be made to enter any sewer at its proper level, or if such sewer cannot be reached, it shall be carried to the adjacent river.

§ 3. All lands benefited by said drain directly or indirectly for a distance from said drain included between the adjacent streets and avenues thereto, shall be liable to assessment thereon pro rata in proportion to the direct or indirect benefit derived from the construction of said drain. The assessments to be made and collected as other assessments for the public

benefit are provided for. The assessments to become a lien upon the property assessed as in like cases provided.

#### REAL ESTATE MARKET.

THE prospects for an active real estate market for the remainder of the year are decidedly encouraging, and real estate is fast again becoming a popular as well as a desirable investment. For the last two years it has been the fashion to decry real estate, and ninety-nine people in a hundred have been ready to give it a cuff or a kick, and have laughed at what they considered to be the high prices asked by holders. Matters in this respect are gradually changing, and the seller of desirable property is now as much sought for as the buyer. Brokers report considerable inquiry for up-town unimproved lots.

A most novel mode of disposing of suburban property is announced on our second page. The Oceanview Land Improvement Co. is regularly incorporated under the laws of the State of New York, the President, Mr. Harry Allen, being a member of the firm of Barton & Allen, bankers. Mr, Samuel Barton, one of the trustees of the enterprise, is a member of the present Board of Quarantine Commissioners, and would not allow his name to be connected with any enterprise not of a first-class order. We can assure our readers, from a personal acquaintance with the originators of the sale, that everything will be conducted in the fairest manner, and that all statements in regard to the enterprise are correct. The opportunity of realizing \$20,000 cash from the purchase of a lot is one not to be had every day. Let any one before investing procure a pass from the office of the Company, and see for himself. Real estate agents are particularly requested to call on Messrs. Barton & Allen.

#### MARKET REVIEW.

BRICKS.—The market for North River Hards has retained the previously noted tone of extreme firmness, and full prices were obtained on all sales, with about everything coming to hand disposed of as soon as offered; indeed many cargoes were engaged previous to arrival; and it is not improbable that, if so disposed, wholesale dealers could in all probability have obtained a further advance. While thus taking all the available stock, however, and in some cases not obtaining as much as they required, buyers have shown an evident feeling of caution, and it is probable that anything like a full supply would have had a weakening effect. Building operations are pushed forward with a show of vigor whenever the weather will admit, but the apprehended strike of the bricklayers for an increase of wages, and of the boatmen for additional freight, induces both builders and dealers to operate in a manner to insure safety. Should the strikes prove successful, especially in regard to the cost of transportation, the price of brick is likely to be enhanced; but should the demands of the boatmen and laborers be resisted for any length of time, accumulation of stock is probable, and to realize, receivers may concede somewhat in value. Again, in any case, the supply must soon be larger, in fact, is already increasing as we close our reports, and a greater scarcity than has prevailed for the past week or two is hardly to be anticipated. Some of the manufacturers are still troubled in regard to workmen; in one instance over 100 men deserted to work on railroads, after having been brought in from Canada to work in the brickyards; but during May the production was large, and owing to the favorable weather the quality all that could be desired, and there is enough brick available on the "River" for all present outlets. The shipping demand continues fair, but the local trade is, of course, using the largest quantities. About \$10.50 per M may be considered as the top wholesale quotation, with a range from this down to \$9.50 per M, according

condition, without any decided market rate, though \$10@ 13 per M, according to grade, are given as nominal figures.

CEMENT.—For Rosendale the demand has been very good, and the market, as a rule, exhibited a fair degree of activity since our last report, but still, on the whole, the movement does not appear to come up to the expectations of manufacturers, and at many of the mills a much larger number of orders could be filled without difficulty. The hull in business however is probably a natural one now that the first rush of spring wants are about all met, and with a causion that has become habitual among all classes of buyers, it is difficult to induce the taking of invoices in any case beyond almost certain early necessities. This is probably a little more noticeable among local distributive dealers than in any other direction, but the Eastern call is not quick or positive, and foreign shippers are comparatively indifferent. For manufacturing purposes there has been a fair amount taken, though the contracts were not for such large aggregrates as it was thought would be wanted. The Coplay cement has been doing very fairly thus far this season, but other outside styles of domestic production have not met with much favor; and though only sparingly offered were difficult to dispose of. About \$1.75 per bl. delivered here is current quotation, but special contracts for large lines have been made at \$1.65 per bl. Foreign Cement has been somewhat irregular, and without any remarkably active movement. The supply of "Keenes" was not large, and manufacturers of imitation marble-work, tiles, etc., took the bulk of the offering, but Roman and Portland brands have been attracted here in large quantities, and not meeting with the demand expected they were from necessity sold comparatively low. We quote Keenes at \$11 per bbl. for coarse, and \$26 bls. Cement to Danish West Indies; 200 do. to China; and 1,500 do. to San Francisco.

LATH.—The fine weather during the middle of the present most number of the present month numbe

do. to China; and 1,500 do. to San Francisco.

LATH.—The fine weather during the middle of the present month pushed forward building operations to such an extent that a large proportion of the supply accumulated in yard and on pier was distributed for consumption. Dealers therefore were obliged to replenish, and coming into a market which wholesale dealers and manufacturers had by good management and closer concert of action kept very lightly supplied, the result was an advance in values. Sales, however, were always made on bids up to the current figures of the hour, no idea of holding back stock appearing to be entertained, and it was quite certain that neither the prospect of an advance or of a decline could induce buyers to take in a supply beyond their early wants. The amount now in transit is said to be somewhat larger than for some time, the recent advance having in all probability stimulated shipments from the points of production. As we close the offerings are not very extensive, but the demand appears to have been fairly supplied and buyers display little anxiety. The rates current are somewhat irregular, but \$2.60 per M is an average quotation.

LIME.—Since the reduction in cost recently made, there has been a pretty fair demand, and all the arrivals of Eastern have found a market, and we are told that dealers think the cost low, and are quite willing to lay in a liberal supply. On the other hand, however, we find a great many dealers who think the above statement a piece of news of which they were not before fully cognizant, and assert that, while prepared to take enough stock for known or pretty certain wants for a few weeks ahead, they are unwilling to fill their yards, or make what might be

called free purchases until the probable distribution is more clearly developed, especially as the natural tendency of most articles of merchandise this year is towards a lower range, and all desire to be in a position to meet a further decline, should it take place. The State limes are in very fair supply, and, as usual, irregular in prices, with sales, however, at something under the Eastern stock, which, with the pretty strong competition prevailing, rather affects the sale of the latter, as consumers find that for some purposes certain brands of State are just as good as Eastern, except so far as a prejudice in favor of name and reputation may go. As we close our report the quoted rate for Rockland is \$1.10 for common, and \$1.50 for lump, with the market presumed to be steady on both grades. The State limes are also quoted at the above figures; but buyers would do well to try a slightly reduced bid before operating.

ating.

LUMBER.—There is as usual very little if anything really new among the retail yards, except probably that the aggregate volume of business may have somewhat increased since our last. Builders are ordering in a rather more extensive manner, and the call for goods on manufacturing account occasionally requires a pretty good-sized invoice, while parties who have a regular shipping-trade have been getting off fair amounts on mail orders. The movements of buyers, however, are characterized by the same cautious spirit so long noticeable, and it is probable that no goods were at any time taken for which there was not a positive and early use. The assortments, though a little broken naturally, still hold out very well, and it does not require a very close or difficult search to make up any reasonable selection. Prices do not appear to have varied greatly, and, taken altogether, may be called reasonably steady; and buyers, understanding that there will hardly be any further concessions allowed, accept the situation and operate to the extent of their wants without much shopping around.

steady; and buyers, understanding that there will hardly be any further concessions allowed, accept the situation and operate to the extent of their wants without much shopping around.

In the wholesale market business on the whole is fair, but varies somewhat according to the amount of goods offering. The current supplies are in the main from coastwise sources, and since the 15th inst. have been pretty free, but by good management receivers have been enabled to distribute most of the cargoes among the dealers here and at the neighboring cities, and prevent any uncomfortable accumulation, though pretty hard work was necessary on goods not first-class in every particular. The yard dealers still refuse to contract ahead, and are buying about as they are selling, taking merely enough to last them for a few days, or possibly a week or two, and displaying a very nice discrimination when making selections. Some few exports are now and then made, but this branch of the trade is sluggish, and shows few signs of an early revival. From a gentleman who has recently returned from a trip through a portion of the lumber regions, we learn that the Canadian manufacturers are now pretty busy cutting and shipping deals on English account, and seem to be very well satisfied with the general condition of trade. Scarcely anything was selling for New York City; in fact, one of the leading transportation companies reported no lumber freights whatever engaged, but this call is considered as merely postponed for a few months, and a good fall business is looked for. Among the Eastern lumbermen business was good, and the feeling firm, with z generally indifferent feeling as to the future. The amount of logs available was said to be small, and many of the mills claimed to already have secured orders enough to keep them working to their full capacity until August. Still there was no danger of an actual scarcity, and unless the outlet increases much beyond present indications, we are likely to get all the stock wanted.

The exports of lumber are as follows:-

For Eastern spruce the general position of the market has undergone no decided variation. When a receiver had a very fine cargo to offer, he generally found that it was wanted, and that the competition to secure it kept prices up very well, but a poor specification placed on the market found few friends and had to be shopped around to a considerable extent before sold, and then parted with on easy terms. The supply since our last has been very fair, the market closung with rather an irregular tone current. We quote at \$15@17 for inferior to fair, and \$18@20 per M for good to prime. White Pine has continued to sell slowly on home account, with a few shipping calls, and taking the the extreme range prices are without quotable alteration.

The stock holds out well and the assortment is fair constitution.

the extreme range prices are without quotable alteration. The stock holds out well and the assortment is fair, empracing a few first-class lots and some very inferior lots. Dealers have not engaged any fresh supplies of consequence, and thus far no purchases of paving stock known to have been made. We quote at \$18@20 per M for inferior to fair, mostly culls; \$21@23 do for good stock; \$24@26 do for prime to choice shipping grades; and \$27@30 do for selections. Yellow Pine is moderately inquired after, and most demands met by agents without great difficulty, and at about former prices. Southern advices, however, are pretty strong, and the tendency is rather in sellers' than in buyers' favor, especially for obdice lengths. We quote at \$29@30 per M for fair to good, and \$31@33 do for prime to choice. There is a little inquiry for Black walnut logs, on German account, at about \$55 per M. Piling not very plenty, the demand fair, and the market firm at 6@7c per foot.

We notice additional exports as follows:—To Hamburg

and the market firm at 6@Te per foot.

We notice additional exports as follows:—To Hamburg, 25 logs walnut, valued at \$1,142; to British North American Colonies, 280 pekgs walnut, valued at \$1,142; to British North American Colonies, 280 pekgs walnut, valued at \$1,001; to British West Indies, 1 spar; to Porto Rico, 40 bundles lath; to Hayti, 240 bundles shingles; to London, 3,900 staves; to Glasgow, 5.082 do; to Havre, 3,000 do; to Peru, 15,300 do; to Danish West Indies, 1872 shooks; to British Guiana, 1,200 shooks; to Cuba, 1,000 shooks, and 55,000 hoops; to Porto Rico, 4,065 shooks; to Brazil, 500 shooks; to Peru, 410 shooks. The Receipts reported are as follows:—From Jacksonville, 300,000 feet lumber; from Pensacola,165,000 feet do; from Savannah, 275,000 feet do; from Brunswick, Ga., 140,000 feet do; from Charleston, 150,000 feet do; from New Berne, 8,673 feet do; from the Maine coast, 41 cargoes lumber, 5 do lath; from St. John, N. B., 150,727 feet lumber; from Etang, 495 pes piling; from St. Georges, N. B., 212, 299 feet lumber, 243,900 lath, 675 pes piling; from Shulee, 2,000 spars, 1,050 poles. Charters as follows:—A schr from Jacksonville to New York, lumber, \$11,50, or if to Providence or Fall River, \$12; a Br. brig from the coast of Mexico to New York, with mahogany, \$10 currency; and two or three schrs from Southern to Northern ports, yellow pine, on private terms.

ports, yellow line, on private terms.

Havana dates for the close of last week report lumber steady. Cooperage neglected. Freights closed flat: box sugar to Northern and Southern ports in United States, \$1; hogshead sugar do, \$4.50(3.50; hogshead molasses do, \$3@4; per ton to Fallmouth and orders, 25s.

Mail advices from Rio Janeiro, report—
PITCH PINE DEALS—No arrivals; value 44|300.

ONE-INCH LUMBER—Market stocked; very dull at 75 reis per foot, to not G, \$25 40 per 1,000 feet. We have the following Saginaw, Michigan, items from journals published in that vicinity:

LOGS WANTED.—The Rochester Salt and Lumber Company advertise for a few thousand feet of log to saw during the last week in May and first week in June. This mill does first-class work.

CHARTERS.—The following charters are reported by C. H. Weeks: Barges Waiter Oades, Saginaw to Cleveland, dry humber, at \$2.50; Hercules, Bay City to Toledo, dry lumber, at \$1.78; Seminole, Bay City to Cleveland, dry lumber, at \$2.00.

GOVERNMENT LANDS.—A notice has just been issued from the Land Office in this city, from which it appears that such odd sections and parts of odd sections as are within the six and fifteen mile limits of the Jackson, Lansing, and Saginaw Railroad grant have been withdrawn from market. The even numbered sections within the six mile of said railroad grant will be increased to the double minimum price of \$2.50 per acre, and the lands outside the railroad limits, and those within the fifteen mile limits, will remain at the minimum price of \$1.25 per acre. remain at the minimum price of \$1.25 per acre.

The following is a statement of the shipment of lumber

,

Surfaced lumber, wide	14.00
" 6 to 10 inches	12.00

We noted some time ago the passage by the Michigan Legislature of a new Lumber Inspection Bill, and below we give all the salient points of the Act, which will be found quite interesting to all lumbermen:

Section one provides that each organized county shall constitute a lumber inspection district, except Bay and Saginaw, which are one; but any two or more counties can combine if they so desire.

The next section provides for the appointment of an Inspector General of Lumber for each district, to hold office

during the pleasure of the Governor, but who is not to be during the pleasure of the Governor, but who is not to be removed unless for cause; but no appointment is to be made, except in Saginaw and Bay, unless by request of the Boards of Supervisors of any county. Each Inspector General is to file a bond of fifteen thousand dollars.

Each Inspector General must reside within the district for which he is appointed. The Saginaw Inspector is to open an office in Saginaw, East Saginaw, and Bay City, and appeared to the county for each

an office in Sagniaw, East Sagnaw, and Bay City, and appoint a Geptuty for each.

Each Inspector General can appoint as many deputies as he sees fit, but he and his surethies are responsible for the official acts and misdemeanors of his subordinates.

All Inspectors General shall be men of experience in lumber, and none of them is to be interested in the business of buying and selling of lumber, either for himself or other parties; and; they are only to receive the legal compensation for inspection, the law aiming to prohibit the offering of

bribes or gratuities—but laying no penalties for so doing.

Any bills for inspection are payable on delivery of the certificates, with an additional charge of four cents a thousand over the inspection fee, to pay for office-rent, sta-

tionery, etc.

The Inspector-General is to transmit to the Governor a full report of all the lumber inspected in his district before

full report of all the lumber inspected in his district before New Year's day in each year.

The Saginaw Inspector-General and each of his deputies are to receive respectively a salary of \$3,500; in Muskegon and other districts organizing under this act. the salaries are to be fixed by the Board of Supervisors, on application of two-thirds of the lumber manufacturers.

All merchantable white pine lumber is classified as follows, for the purpose of inspection: First clear, second clear, third clear, common and shipping culls; and boards six inches wice shall be known as strips. Norway pine is classified as common and shipping culls, except as hereinafter provided: after provided:

First Clear Lumber.—Shall not be less than eight inches width, twelve feet long and one inch thick, and at such width and up to ten inches wide, shall be free from all imperfections. If the width is twelve inches, defects shall be allowed that will equal knots in the aggregate of one inch in diameter, or sup that will be equal to one and one-half inches on one surface. If the width is sixteen inches, defects shall be allowed that will be equal to knots in the aggregate to two inches in diameter, or sap that will be equal to two inches on one surface. If the width is twenty inches defects shall be allowed that will be equal to two inches on one surface. If the width is twenty inches defects shall be allowed that will be equal to knots in the aggregate of two and one half inches in diameter, or sap that will be equal to three inches in width on one surface. The inspector shall take particular, notice and shall allow a duproportion of defects for all pieces of widths between or above the given standard: also, shall allow additional defects as the lengths increase above twelve feet long, in proportion to such increased dimensions. He shall also allow as follows, in each of the three grades of clear lumber, viz., for each additional half inch in thickness additional defects in proportion that shall be equal to knots in the aggregate of each additional half inch in thickness additional defects in proportion that shall be equal to knots in the aggregate to two inches with properties against the aggregate of two and the properties and the properties and the properties and the properties and the properties and the properties and the properties are accurately and the properties and the properties and the properties and the properties and the properties and the properties are accurately and the properties and the properties and the properties and the properties and the properties and the properties and the properties and the properties and the properties and the properties and the properties and the properties and the pro First Clear Lumber .- Shall not be less than eight inche defects in proportion that shall be equal to knots in the ag-gregate of one quarter of an inch more in diameter, or sap that will be equal to one quarter of an inch more in width. All the pieces shall be well manufactured and of full thick-All the pieces shall be well manufactured and or full thickness (all knots to-be sound), and all sap to be free from black stain, that is of such character that cannot be removed by dressing. And no piece shall be allowed with more than one straight split, and that to be not over one-fifth the length of the piece, which shall be counted as one

defect.

Second Clear Lumber—Shall not be less than eight inches wide, twelve feet long, and one inch thick, and at such width and up to ten inches wide, defects shall be allowed that will be equal to knots in the aggregate of three quarters of an inch in diameter, or sap that will be equal to three-quarters of an inch in width on one surface. If the width is twelve inches, defects shall be allowed that will be equal to knots in the aggregate of one and one-half inches in diameter, or sap that will be equal to three inches in width on the edges. If the width is sixteen inches, defects shall be allowed that will be equal to four inches in width on the edges. If the width is twenty inches, defects shall be allowed that will be equal to knots in the aggregate of three inches in diameter, or sap that will be equal to five inches on the edges. A straight spiit shall be allowed in this quality, as before provided in boards of the width of twelve inches and over, and counted as one defect.

Third Clear Lumber—Shall not be less than seven inches

Third Clear Lumber—Shall not be less than seven inches in diameter, twelve feet long, and one inch thick, and at such width and up to ten inches defects shall be allowed that with and up to the include detects said of a nower time will be equal in injury to a knot one and one-half inches in diameter, or sap that will be equal to one and one-half inches in width on the best side. If the width is twelve inches defects shall be allowed that will be equal in injury to a knot of two and a half inches in diameter, or sap that will be equal to two inches wide on the best side. If the to a knot of two and a half inches in diameter, or sap that will be equal to two inches wide on the best side. If the width is sixteen inches defects shall be allowed that will be equal in injury to a knot of four inches, or sap that will be equal to four inches on the best side. If the width is twenty inches defects shall be allowed that will be equal to four inches on the best side. If the width is twenty inches defects shall be allowed that will be equal in injury to a knot of five inches in diameter, or sap that will be equal to six inches on the best side; but sap in no case to exceed one-half the surface on the poorest side. In this quality shall be included pieces ten feet long, and not to have more than a due proportion of defects; also all pieces six inches wide and more than one inch thick, with no more than two small sound knots, or sap not more than one inch in width on one side.

than two small sound knots, or sap not more than one inch in width on one side.

First Cear Strips—Shall be six inches wide, one inch thick, and not less than twelve feet in length, and free from from all imperfections.

Second Clear Strips—Shall be the length, width, and thickness of first clear, and may have two small sound knots, or if no knots, then sap equal to one inch in width on one edge of one side.

Third Clear Strips—Shall be of the width and thickness of first clear strips, and may have three (3) small sound knots, with sap one inch on one side; but if no more than three small sound knots, then sap equal to two inches on one side may be allowed, to be free from rot, split, and shake. First and second clear Norway strips of full width and thickness, and first and second clear white pine strips,

ten feet in length, also first and second clear strips rejected on account of thickness, and not less than five inches in width, shall be classed in this quality.

Common Lumber—Shall include all boards, scantling, strips, joists and timber, and lumber not otherwise defined, which is not as good as third clear, but is generally of a sound character, well manufactured, of full thickness, and free from large loose knots and bad shakes, that show on both sides of the piece. Scantling, joist and timber must be free from imperfections which so weaken the piece that it cannot be used for substantial building purposes. Scantling, posts and timber made from worm-caten logs, and pieces with a small streak of rot, when not so badly damaged as to render the same unfit for ordinary uses of common lumber, shall belong to this quality. One straight split shall be allowed, provided it does not exceed one-quarter the length of the piece. Pieces that have not more than two auger-loies which are placed near the end of the piece, shall be allowed in this quality, provided they are measured in lengths of even numbers of feet between said auger-holes, and conform in all other respects to the requirements of this in longuist of even numbers of feet between said auger-noies, and conform in all other respects to the requirements of this quality. No lumber under ten feet in length shall be con-

in lengths of even numbers of feet between said auger-noies, and conform in all other respects to the requirements of this quality. No lamber under ten feet in length shall be considered as merchantable.

Shipping Culls—Shall constitute the lowest grade of mercantile lumber, and shall include all lumber not as good as common, which can be used for ordinary purposes, with a waste of more than one-half.

Mul Culls—Shall include not as good as shipping culls. All boards or plank over twelve inches in width, of which one end shall be wider than the other, shall be measured at a point one-third its length from the narrow end, to determine its width, and all such boards and planks less than twelve inches in width shall be measured at the narrow end. All lumber over ten feet, up to and including twenty feet long, shall be measured in length of even number of feet, and all over twenty feet long, each additional foot in length shall be counted, unless it shall be otherwise agreed by the buyer and seller. No fractional part of a square foot shall be counted, except in the measurement of joists, scantling or timber.

shall be counted, except in the measurement of joines, scantling or timber.

Section eleven ordains that merchantable lumber may be inspected in three classes: The first to be in the five qualities aforesaid, the fees for which are to be twenty-five cents. inspected in three classes: The first to be in the five qualities aforesaid, the fees for which are to be twenty-five cents per thousand feet. The second class an inspection in three qualities, of which first, second, and third clears are to be denominated uppers, and the other two common and shipping culls, the fees to be the same as first class. The third class shall be in one quality, and include the first five qualities mentioned, to be denominated "straight measure," the fee for "measurement" being fifteen cents, and the four cents extra all through the three classes for office rent, stationery, printing, and other incidentals of the Inspector General. The payment of the fees is divided equally between buyer and seller.

Whenever required, the inspectors are to mark the quantity and quality on each piece of lumber, using such marks and tokens as the Inspector General may devise and authorize. But the individual who wants business done up in this way must pay five cents extra per thousand feet. Orders for inspection must be filed in the office most convenient to the seller.

The inspector's record and certificate shall show the names of the buyer and seller, and if for shipment by water, the name of the boat and the sub-inspector's name.

No pine lumber sold by quality shall be inspected in any district having an Inspector General by any inspector outside of it. Nor shall it be inspected in any other quality unless sawed to order in size above two inches.

If any person is dissatisfied with the inspection, he has the privilege of hunting up the Inspector General and complaining to him, and he is to inquire into the matter and order another inspector to do the work over again if the change is asked for.

Every person who shall violate any provision of this act that conflict with this, or contravene, it are repealed.

change is asked for.

Every person who shall violate any provision of this act is to be fined—but not above one thousand dollars. All acts that conflict with this, or contravene, it are repealed.,

The St. Paul Press says of the prospects of the lumber business in the Northwest thit season: Our lumbermen are just beginning to realize from their annual harvest, which we believe will prove to have been, all things considered, as good as the average for several years past, so far as the amount of money returns is concerned, and the consequent profit to operators. Owing to the shortness and mildness of the season a smaller amount of logs in the aggregate was cut this winter than for several seasons past, and it was at one time feared that lack of water would prevent a successful "drive." But so far as we can learn the logs are nearly all out of the lateral branches, and the drives in the main streams—the St. Crox, Mississippl, Run, Apple and Willow Rivers—are unusually "clean." Logs are held at Stillwater at an advance over last year's prices, which in several cases has been paid by buyers from below. On the Mississippi we have heard of no reliable quotations—in fact, on this river, there are no quotations for logs, except for the settlement of balances between lumbermen or to raise money to meet an emergency, as the entire cut is intended to be manufactured at the Falls and points above, and not for exportation in the log. It is expected that the demand from the vastly increased area of country which is being constantly opened to the reach of our Minnesota lumber manufacturers by the rapidly extending system of railways, will keep present prices firm at the quotations, and work a material advance before the close of the season.

The St. Louis lumber market is reported as follows:—The only sale of raft lumber reported was a lot of Wisconsin at \$19 in the water. The stock (mainly Wisconsin) now on the market unsold is estimated at 3,000,600 feet.

The receipts were quite liberal, but mainly on manufacturers' account

4.40. The Lumbermen's Association has adopted rules for the inspection of lumber, which will govern future transactions—these rules have not yet been made public.

We have no new features to note in trade on the levee and at the depots. The market has ruled very dull throughout, and the better grades only salable; poplar strips lower. We continue our quotations for depot and levee lots: Yellow pine flooring at \$20@22 to \$23@25 for common to fair and choice green; \$25@29 for common to

choice dry; mill-run dimension \$15@16. Poplar at \$15 to \$17@19 for boards and strips. Black walnut at \$20@25 for inferior, \$30@35@40 for fair to good and choice green; strictly choice at \$42.50@45. Oak at \$18@25. Ash at \$20@25 to \$27.50, latter for strictly choice. Sycamore at \$18@20. Cedar at \$20@25 for hewn, and \$25@30 for sawed. Cedar posts at \$30.

We extact the following from an article in the Ottawa (Can.) Times:—
"The timber resources of the Province are enormous, the

(Can.) Times:—

"The timber resources of the Province are enormous, the timber being of the most superior description, and the forests covering an area which is estimated at 100,000 square miles. The 'Douglas pine abounds here, which has of late years quite taken the place of Riga spars for ship building. Dr. Forbes, alluding to the pine timber of British Columbia, says:—

"The extraordinary size, straightness, and uniform thickness of the trees, their flexibility, the regularity and beauty of their grain, their durability, freeness from knots and sapwood, place them almost beyond competition in point of quality, and especially fit them for the masting of large vessels. These pines often rise to the height of 300 feet, and often for two-thirds of the way up there is not a limb or branch. The cedars are not so tall, but they are larger in circumference, some of them measuring forty feet at the base. Of these monarchs of the forest the cedar is the king tree, and the fir the queen tree. On our way from New Westminster to Burrard's Inlet we passed through nine miles of forest, and such a forest! There was a thick jungle-like undergrowth which made the forest all but impenetrable, and shut out the sun. Every now and then we came to a fir that sent up its trunk straight, massive, and symmetrical for 300 feet. Imagine a tree with a trunk fifty feet higher than the cross that glitters at the top of the spire of St. Michael's Cathedral! Again, a great celar would measure off 40 or 45 feet. Some of these forest kings are too gigantic to be cut into timber. In such woodlands the timber will yield from 70,000 to 120,000 feet per acre."

The Boston market as follows .-

The Boston market as follows.—
The market for lumber is buoyant, and the demand increases as the season advances. With favorable winds early in the week several cargoes arrived from the Eastward, and all consignments are taken as fast as they arrive. The recent heavy rains have swept in all the logs which were kept back for want of water, and the saw mills are now all well supplied and running up to their full capacity. The mills which were obliged to shut down on account of freshets, which interfered with the handling of rafts, have again resumed work, the interruption only being temporary, and much life and general activity are visible all through the lumber regions.

again resumed work, the interruption only being temporary, and much life and general activity are visible all through the lumber regions.

Building operations continue active, and all kinds of lumber used in framing, boarding, &c., are now in lively request, and for short lumber, such as shingles, laths, and clapboards, the market is unusually active. With this excessive demand on the retail yards, stocks have been much reduced and are now light for the season. There seems to be no let up in contracts, and builders are busy in negotiating and making their specifications for work which will extend far into the Summer; while carpenters, masons, &c., have about all they can attend to in filling orders to complete contracts. The season will be an unusually active one for the lumber trade, which is not without its beneficial effects upon all other kinds of business.

The stock of dry Canada lumber is limited, being very much less than it was last season at the corresponding time, and the demand is brisk. Considerable quantities of last year's sawings are now being received, and with a good supply of logs the mills are now running on full time. Prices are steady and firm.

The market for Southern pine lumber is active, with no quotable change in prices. Several cargoes have arrived since our last.

The following are the surveys for the week:-

Domestic Lumber. Pine	,088,556 677,171 292,521	Domestic Lumber. Spruce	,329,514 147,201 78,886
Total.		- •	S79 050

The Savannah market continues very fairly active at full former figures. We quote: Mill timber \$7.00@9.00; Shipping do; 600 feet average, \$8.00@9.00; 700 feet average, \$10.00@12.00; 900 feet average, \$13.00@14.00; 1.000 feet average, \$14.50@16.00. LUMBER.—The mills in the city and country are all at work. Orders are being offered freely. We quote: Ordinary sizes \$20@31: difficult sizes \$24@25; flooring boards \$21@22; ship stuff \$21@22. according to sizes. To Matanzas, lumber, \$8, gold. Timber to Liverpool, 35s.; to Queenstown, for orders, 37s. 6d. Resawed lumber to Baltimore, \$7.50; to New York, \$8.50; to Boston, \$9; to Philadelphia, \$8.50; to Providence, \$8.75; Philadelphia timber, \$10; New York, \$9.50@10.00.

The following is from a correspondent at Williamsport,

The following is from a correspondent at Williamsport, Penn.:—
The "White Pine" article is producing quite a sensation, and is looked upon as understating the facts rather than the opposite. Lumber is advancing at this point, and it is likely to be put up \$1.50 to \$2.00 more within 30 days; all the dry lumber of the cutting of 1870 is sold, and green lumber is being shipped already at this early period of the year—six weeks in advance of being done in any ordinary season, and the demand for and consumption of lumber is beyond procedent, even in the face of the disturbance of industry in the coal regions, where they are ordinary large consumers of lumber, and where the demand, as a natural consequence must be affected in a greater or less degree during its continuance, only to be renewed as soon as coal mining is resumed with increased activity to supply the wants for domestic use, manufacturing, steam navigation, and railroad use, which will stimulate the demands for Immber in turn. Landowners are already feeling the influence, and the value of the forests, in their productive capacity reduced to dollars by practical results in manufacturing, will speedily be realized by those who have heretofore believed and assumed that the bountiful provisions of Providence were inexhaustable and only to be measured by the reckless extravagance of man in its use. The Hemlock forests are soon also to take their proper place relatively to their productive value for use, in their two-fold capacity of sulue—the hemlock bark for tanning—and the timber to be manufactured into lumber for many purposes in building. When it is not exposed to the sun, hemlock is as good or better than white pine.

-The demand continues fair, but not active, with NAILS.—The demand continues fair, but not active, with a steady tone on most grades. Some brands of cut are a little scarce, but the general stock and assortment good, and all other descriptions are in sufficient supply to meet any reasonable demand. We note a continued cull for the California market and some export movement, though shippeas to have filled their most urgent orders and are operating with greater caution. The distribution to the interior is fair, but mainly in small odd lots, consumers feeling that they can obtain a supply at almost any time, and refusing to operate beyond early wants. As we close the general feeling is rather dull.

We quote per 100 lb.; cut 10d@20d, \$4.75; cut, 8d@9d, \$5.00; cut, 6d@7d, \$5.25; cut. 4d@5d, \$5.50; cut, 3d, \$6.25; cut. 2d@3d, fine, \$7.00; cut spikes, all sizes, \$5.00; cut finishing, casing, box, etc., \$5.25; clinch, \$6.25@6.75; horseshoe, forged, No. 10 to 5, per lb.; 19@31c. Other styles are selling as follows:—Copper 36@38c per lb.; yellow metal, 22c. do. The exports for the week are 251 pckgs, valued at \$1,340; and since January 1st, 7,870 pckgs, valued at \$46,631. We also notice shipments of 5,215 pckgs to San Francisco.

5,215 pckgs to San Francisco.

PAINTS AND OILS.—The demand in a wholesale way continues very good, and though business does not move quite so sharp as heretofore, sellers feel strong and confident generally. The anxiety of jobbers during the past few weeks has been sufficient to take about everything available on spot and to arrive, and even engaged many parcels aliead of production, and until these orders are fully met it will of course be extremely difficult to satisfy fresh buyers, no matter how small their wants. Our manufacturers, however, are urging matters with all the expedition possible, and foreign accounts represent the shipments as free as circumstances will admit, and unless the demand again very decidely improves, there is some hopes of early relief being obtained. Most of the jobbers are still pretty busy in part, on a daily demand, but including the filling out and completing of several back orders. Some of the leading houses are fairly stocked, but small dealers can show only broken assortments. Linseed Oil has been rather dull during the week under review, the local wants proving moderate, and most of the interior orders being filled, while exporters appear to be quiet. The leading crushers still work well together, and the price is retained at 94c, per gallon in casks, with a steady tone quoted. Still there is some signs of weakness, and buyers think that on large quantities slight concessions might be obtained. obtained.

Exports as follows:

	This week.	Since Jan. 1. 1871.
Paintpckgs,	89 value \$1,177	4,297 value \$61,018
	"	2,799 " 2,730
Oxide zinc, pckgs,		879 " 9,760

PITCH.—There continues a very light trade demand, mostly for home use. There has not been any export demand of importance, but still, with a small stock, prices rule firm as last quoted. We quote at \$2.72½@2.77½ for city; \$2.75@3 for Southern; and small lots, very choice, in jobbing way from store, at \$3@3.25. Receipts for the week, 77 bbls: since January 1st, 297 bbls; same time last year, 1,792. Exports for week, 275 bbls; since January 1st, 1,372 bbls; same time last year, 2,039 bbls.

SPIRITS TURPENTINE.—The demand for home use SPIRITS TURPENTINE.—The demand for home use is good for this season of the year, and prices have advanced from the closing quotation last week 2½,@3e per gallon. Receipts are very light for this season of the year, owing to the unusually cold weather in the South, and a small run in consequence. There has been nothing done for export, excepting a sale of some 2,000 bbls f, o. b, at Wilmington for future delivery. Lots to arrive are offering below our quotations, which are for spot delivery. We quote at 52½,@53½c for merchantable and shipping order, and 53@546 for N. Y. bbls; small lots at 54@55c, and retail lots from store, 55@56c. Receipts for the week, 1,132 bbls; since January 1st, 18,163 bbls; and for the same period last year, 23,227 bbls. Exports for the week, 193 bbls; since January 1st, 5,026 bbls; and for the same period last year, 6,213 bbls.

TAR.—There is a fair demand for both Washington an Wilmington; and very firm prices rule. The home trade e still the principal buyers, but there is some trade oing for exports. We quote as follows:—\$2.45@2.55

per bbl for North County, as it runs; \$2.60@2.65 per bbl for Wilmington, and \$2.75@3 for rope, and occasionally \$3@3.25 for something very choice in a small way. Receipts for the week, 68 bbls; since January 1st, 11,228 bbls; for corresponding period last year, 40,700 bbls. Exports for week, 620 bbls; since January 1st, 3,235 bbls, and corresp onding period last year, 12,785 bbls.

#### ALBANY LUMBER MARKET.

The Argus report for the week ending May 16, 1871, is

The Argus report for the week ending May 16, 1871, is as follows:—

We have some receipts by the Eric canal, yet most of the houses are without a sufficient supply of Michigan Pine, and the assortment is not so full as is desirable. Yet the business since our last report has been good and at full prices. The early opening of the Canals has brought forward more lumber than we had at this time last year—our present receipts being about equal to what had come forward to June 7th. The market for dry lumber is reported as very firm at all points, and manufacturers at the leading points in Canada, Michigan, Pennsylvania, etc., hold their stocks at high and advancing rates. Stocks at the retail yards are reported as running low.

The receipts at Buffalo during the week by Lake and Rail are reported at 7,332,600, and at Oswego, by Lake, 7,571,700 feet.

The Chicago Daily Tribune reports the receipts and shipments of lumber for the seasons of 1871 and 1870 as follows:—

1871 1870		Received. 123,427,000 feet. 100.808.000 "	Shipped. 161,128,000 feet 150,529,000 "
	Increase	<del></del>	10,599,000 "

The receipts at Albany by the Eric and Champlain canals for the third week of May were:
Bds. & Sciling, ft. Singles, M. Timber, c. ft. Staves, lbs.
1871.15,041,900 1,975.
1870.10.51 320. 1870..10,051,350 90

Of the boards and scanting received this week, 8,060,400 feet were by the Erie, and 6,981,500 feet by the Champlain canal.

The receipts at Albany by the Erie and Champlain canals from the opening of navigation to May 23d, were: Bds. & Sc'ti'g, ft. Shingles, M. Timber, c. ft. Staves, lbs. 1871..42,260,100 1,937 ..... 1900.....

River and Eastern freights are unchanged. We quote:-

#### MECHES SE

# Patent Spiral Cutter Head & Cutters

#### For WOODWORTH

And other Planing Machines. Patent dated Aug. 4, 1870.

Ist. It will finish Door Panels, or other plain work of hardwood or pine, ready for sandpapering. 2d. It makes far superior work, as will be seen by a trial at DUKE & MORE'S Mill, 304 West 54th Street, any time selected. 3d. It has been in constant use since June, 1870, and requires to be sharpened only about half as often as the common or Straight Cutter does, it having a shearing, instead of the old chopping cut, and can be easily kept in order by any ordinary mechanic or mill hand. 4th. It sends the shavings all one side, showing its work clean as it leaves the machine. 5th. It can be made Right or Left Twist, so as to put the shavings towards the shoot, or receptacle, on either side. 6th. It is nearly noise-less. 7th. It makes a saving of more than one-half the cutting power required by the straight cutters, or old system, and can be applied to any Planing Machine now in use.

The Conter Head and Planer can be seen in operation daily, at DUKE & MORE'S Mill, No. 304 West 54th, New York City.

For Machines having the Improved Heads and Cutters, or for the improved parts, ready to apply to machines already constructed, or for rights under the Patent, apply to HUNTINGTON MACHINE WORKS, Newark, N. J., or THOS. D. STETSON, Solicitor, No. 5 Tryon Row, New York City, or JORN MORE, Patentee, 304 West 54th St., New York City.

MORE'S PATENTY VENEERING PRESS can be seen in operation at the same place, No. 304 West 54th St., where orders will be received, or rights granted to manufacture.
