Published Weekly by

THE REAL ESTATE RECORD ASSOCIATION.

TERMS. .

One year, in advance......\$6 00 All communications should be addressed to

C. W. SWEET.

106 BROADWAY, COR. OF PINE STREET.

No receipt for money due the REAL ESTATE RECORD will be acknowledged unless signed by one of our regular collectors, HENRY D. SMITH or THOMAS F. CUMMINGS. All bills for collection will be sent from the office on a regularly printed form.

PATENT binders for preserving the RECORD can be had at the office, or will be sent to any address in the city upon the receipt of one dollar.

THE INSURANCE OF TITLES TO REAL ESTATE.

A PAMPHLET by Theodore Aub, entitled "A Plan for the Insurance of Titles and Mortgages," and showing real estate transactions as they are and as they might be, has just been issued by the law-publishing firm of Baker, Voorhis

The author in his preface states that the plan of a Title Warranty Company had been written and communicated to a small circle of friends, when the discovery was made by one of them of the charter of a Title Insurance Company among the acts of the legislative session of 1869, and he therefore does not come before the public claiming originality for the idea. What Mr. Aub does claim, and is certainly entitled to, is the credit of being the first one to put the idea of a Title Warranty Company into a practical shape, and to demonstrate its necessity and feasibility.

The tendency of everything in this country is towards consolidation; and the manner of transacting the business of real estate bids fair to be no exception. The vast and cumbersome machinery now in use, and which one is compelled to bring into requisition for the purpose of driving through a single real estate transaction, must give place to something more simple ane effective. A grand stride in this direction will be the organization and successful workings of a company, organized on some plan similar to the scheme of Mr. Aub.

Of course any plan of this kind will involve the opposition of gentlemen of the legal profession; but with that we have nothing to do. The real estate interest demands that many of the disabilities under which it now labors, in the shape of the embargo which lawyers and searchers place on every change of ownership, shall be removed. With the rising importance of real estate as an article in our daily markets, it becomes a great question to solve whether

it cannot be placed in a more convenient and marketable form than it at present occupies.

That an Insurance Company which would insure a title to real estate, and guarantee the security of a loan thereon, would be highly successful, scarce admits of a doubt. Capital which now dreads anything in the shape of real estate, because of the want of knowledge of its value, would be attracted immediately, were it secured by the guarantee of a corporation of recognized standing. We trust that the matter will receive attention from our real estate ope-

THE DOCK BOARD.

A WRITER in the Evening Post of a recent date reviews very fully the labors of the Dock Commission, since the formation of the Board to the present time, from which we condense the following, as being of interest:-

The act passed a year ago creating the new Dock Board was a part of the new city charter. It provided for the appointment of five commissioners, who have exclusive charge and control of all wharf property belonging to the city -wharves, piers, bulkheads, slips, basins, waterfronts, land under water, appurtenances, uses and rights of all the city now owns or may hereafter acquire. From this the Commissioners of the Sinking Fund except the twenty-five ferry

slips, which are held as a city franchise.
For this Board Mayor Hall selected five men of the highest ability and integrity and of great experience in business and public affairs, and above all suspicion, it is believed, of partisan ambition. He deserves credit for its high character-a Board which is to devise, construct, and control the most important work, in many of its aspects, on the continent. T. Agnew, its president, is one of our solid citizens, for over thirty years a merchant in the export tobacco trade with foreign countries; Wilson G. Hunt, long known as an able and high-toned merchant in commission dry goods; William Wood, for a long period of the firm of Dennistoun & Wood, bankers, and one of the most competent men in our Board of Education; Hugh Smith, proprietor of the Madison avenue line of stages, a man of superior capacity and judgment in business; and Richard M. Henry, a lawyer of ability and good standing. Mr. Smith, from pressure of private affairs, was compelled to resign, and is succeeded by Mr. Henry A. Smith, a man of high integrity and excellent business character. The Board appointed Major-General George B. M'Clellan its chief engineer, who is devoting all his time and eminent talents to the work.

WHAT IT HAS DONE.

In eight months after the organization, since May, 1870, it has collected rents and dockage, and paid over to the Commissioners of the Sinking Fund \$261,361. It has issued dock bonds to the amount of \$500,000. It began active work about the 15th of August last, and has expended since then \$250,000. A new system of piers could not be begun at once, but only after the most careful surveys and well-matured plans. But to provide for our shipping adequate facilities, while it continues under the old system, it has made thorough examina-

tion of every pier and slip on both sides of the city; it has made thorough repairs of forty-five piers and bulkheads, in many cases entirely rebuilding them; it has expended \$40,000 to \$50,000 in dredging around docks and in slips most seriously obstructed; it has made six lines of soundings, from Ninety-second street on the East River around to Sixtieth street on the Hudson River, and for two months past has had two steam machines boring through the mud to measure the depth of the hardpan, along the entire water front of the city. these soundings and surveys the most intricate points connected with the channels and currents of the rivers have received careful study.

The most difficult problems have been solved, a complete map of the water-front has been made, and the plans of the Board are rapidly maturing. These plans cannot yet be made public; but the solidity of piers and the method of construction, and the breadth of the river street, as foreshadowed in a recent speech of the Mayor, will be adequate to the transportation of freight and passengers around the whole island. The piers will have an average length of about five hundred feet. They will be connected with the bulkhead by solid iron bridges, leaving an open space along its entire front for the free flow and ebb of the tide, and the piers will be specially adapted to the business for which they are to be used. The large steamers will have piers from eighty to one hundred feet in width, with all the facilities needed for landing goods rapidly; and passenger steamers will have perfect protection for passengers from

It proposes to give a certain section of waterfront to the grain trade, and also a certain section to the coal trade, where every facility will be given, in elevators and other machinery, for quick receipt and despatch of cargo.

The system of hydraulic machinery and power used in London, or its like, will probably be adopted. In Liverpool and London the rise and fall of the tide is from twenty to twentyfive feet, whereas in New York the average rise and fall is only four to five feet. Hence our system will be far less expensive. We need no such provision to float large vessels and steamers into our docks at high water.

Under our old system of piers the new Board have no power to alter the wharfage, but of the new piers they will have entire control of They hold the opinion that ships should pay a dockage as low as possible, and that goods should pay a moderate wharfage, as in Boston, and thus equalize the burden.

MECHANICS' LIENS AGAINST BUILDINGS IN NEW YORK CITY.

NOTE.—The dates 24, 25, 27, and 28, placed before the liens, are for Feb. The others are for March.

REAL ESTATE MARKET.

THE attendance at the Exchange sales-room during the past week has been larger than at any time since the spring of 1869, and there is every indication of an active market for the season. At private sale brokers report a good inquiry with sellers disposed to meet the views of buyers. There is no question but that the present time offers opporsunities for judiciously investing in real estate, at prices which will certainly in time show a handsome profit to the purchaser. With a revival of business, which is sure to follow the return of peace abroad, and cheap money, the tide of speculation is certain to soon set in, and when it does turn it is certain to rise rapidly.

Broadway, No. 566, Giles Blaque, Jr., owner; front and rear walls cracked. Thomas street, (rear), No. 46, Gabriel Aiguier, owner; front wall cracked.

MARKET REVIEW.

BRICKS.—The supply of cargoes has been rather larger from all points, but not enough to make any unusual aggregate, and the demand proved sufficient to take about everything offered, no accumulation of unsold stock taking place, and full prices being obtained without difficulty, the market showing a strong uniform tone. This position can undoubtedly be maintained so long as the receipts keep down to a fair total and come in slowly; but recent developments seem to indicate that the outlet will not prove quite so large as was anticipated a week or two ago, and undoubtedly be maintained so long as the receipts keep down to a fair total and come in slowly; but recent developments seem to indicate that the outlet will not prove quite so large as was anticipated a week or two ago, and should a rush of supplies take place, receivers will undoubtedly experience considerable trouble in selling of their stock, unless they are willing to modify their views. The demand from both dealers and the trade, in all likelihood, will prove very fair, but not as sharp as hoped for, while it is now found that deliveries on back orders leave a large amount unsold that previous reports led the trade to believe, while manufacturers are evidently determined to get their bricks into market as fast äs possible. The New Jersey and Long Island holders are already using every effort to make shipments in order to realize before the North River yards commence forwarding, while from the latter the movement depends entirely upon the resumption of navigation, and just as soon as the condition of the ice will permit, sailing vessels and barges will be loaded and sent down to the full extent of facilities, not only to make good the delay occasioned by the suspension of water communication with the city during the winter, but to clean up and get ready for the production of the next crop. Several lots have come in from the "Bay" and sold at \$9.50@10 per M.; parceis from New Jersey brought \$8@8.50 per M, one lot \$9; a few good brick from Long Island \$9@9.50 per M, but the bulk of the receipts were poor and undestrable, and sold at about \$8@.8.50 on. For Pale Brick the market is somewhat doubtful in the absence of important sales, but there is thought to be a pretty good outlet for supplies, were they here, at fully \$6@6.50 per M, and probably \$7 for very choice. Taken altogether, the prospects are a little foggy, and both buyers and sellers are rather inclined to move cautiously in all operations. Philadelphia fronts continue in fair demand, and holders of the gradually receding supplies retain the advanta

CEMENT.—The demand in reality is not very active; but in view of the small and rapidly diminishing supply the calls made from day to day assume considerable magnitude, and the position remains strong and uniform. On full bids, however, holders are inclined to operate, as a sudden change in the weather is likely to occur at any moment at this season of the year, and should the river open and navigation be resumed, buyers must of course immediately obtain the advantage, as manufacturers are ready to ship supplies as soon as an opportunity presents inself. Values vary according to quantity, delivery, etc., but about \$2.25 per bbl is an average wholesale figure. We learn of nothing shipping this week, the trade being almost entirely on city account for immediate consumption.

LATH.—There has been a little more doing, owing to in-

account for immediate consumption.

LATH.—There has been a little more doing, owing to increased arrivals, and the sales were made at full former rates, the market showing a steady tone, with receivers still confident in an ultimate farther improvement. We learn, however, that the supply held by dealers upon close inspection proves to be larger than was supposed, and that the indications of a good spring demand are not quite so favorable. Should this prove true the prospects for an upward turn are lessened somewhat, though much will depend upon the arrivals, and in the event of slow moderate offerings sellers may still be enabled to gain the advantage sought after. The sales reported embrace 780,000 at \$8 per M.

The sales reported embrace 780,000 at \$3 per M.

LIME.—Some few cargoes have come to hand, but were mostly sold previously, and the offerings on the market continue too small to fairly test the position. Sellers claim strength, and say they will have no difficulty in advancing prices, while buyers as confidently assert that no higher figures can be obtained, or, if they are, the improvement will only be temporary, as the distribution is small, and dealers at this season will take no more stock than can be resold to immediate advantage. Of the State lime there is said to be a little left, but is held firmly at full rates, and owners are not seeking ontlet beyond the wants of their regular customers. Cargo rates about \$1.30@1.65 per bbf for common and lump.

Mon and lump.

LUMBER — Most of the dealers having been successful in delivering up on back orders are now enabled to give greater attention to the fresh demand, and as a rule there appears to be a considerable amount of satisfaction shown at the general condition of trade. The movement certainly is not heavy, and all calls are met without trouble or difficulty; but yet there is a comparatively steady outlet for stock, which keeps business on the go, and infuses a very fair amount of spirit into the market. Prices as before are regulated a great deal by circumstances, and though steady in a general way a fair margin may be allowed on quotations to cover governing influences. The breaking up of assortments has not yet commenced that we can discover, and fair selections will undoubtedly be possible until well on toward spring. A few dealers report a slight increase in shipping orders, but the main demand is still local, embracing the ordinary, wants of builders, manufacturers, etc.

by The wholesale market has been somewhat unsettled owing to variable supplies, but without any radical change or generally interesting features, buyers and sellers meeting on a basis of about former rates, and each apparently satisfied that it would be impossible to gain any decided advantage. The increased movement for export referred to in our last is

sustained, in fact a little better if anything, though the aggregate sales are not remarkably large, and the outward movement still shows a falling off as compared with last year. This is the season when our dealers who make a specialty in lumber adapted to the foreign markets would be doing the best business, and the present indications are far from favorable for many sales beyond the job lost taken on West India account, with an occasional South American or Australian order. The probable prices of lumber for the coming season are doubtful, as on the few contracts made the terms are kept strictly private; but this, in connection with the immense crop of logs, and the favorable indications for securing the harvest, looks like former rates at least, if not a decline, though some of the journals published in the lumber regions talk differently, as it is their interest to do, and it is quite amusing to see the efforts made to cover up the fact of a successful winter in the woods.

Eastern Spruce has been offered to some extent on spot and to arrive, but hardly in sufficient quantities to give the market a fair test, and the position is still more, or less nominal. We think, however, there is a slight undertone of weakness which may eventually develop into a decline. Dealers are buying, or at least offering to buy, very choice lengths, but wantaothing else, and as the probable offerings for some time are likely to be second-class, sellers must concede somewhat in order to realize. Still the supply at the best cannot be large, and even should the break take place—receivers say it is impossible—it must be a light one. We quote at \$19.50@20.50 per M for inferior to prime; and \$21@22 per M for choice. White Pine has again met with a very fair export demand, but with plenty of stock here, and holders generally not only willing but anxious to meet the outlet, prices remain easy, and most orders were soon filled. The home call fair, but spasmodic and uncertain. Crop indications first rate notwithstanding the croakings of

sawed lumber, dry boards, \$9; a Br. brig, 220 tons, to Cardenas, empty hhds, 70c on, and 80c under deck; a brig from Satilla River to Matanzas, lumber, \$9; a schr. from Jacksonville to Philadelphia, dry boards, \$9.25.

From Rio Janeiro we have the following later advices:

DEALS.—We have nothing new to report, no cargoes of merican having arrived. Pitch Pine is very much wanted by our dealers.

LUMBER.—We note arrivals of 145,000 feet, per "Jeremiah Simonson," still on the market, and of 36,000 feet per "John Boulton," on order. Market well supplied and sales very difficult to effect.

"John Boulton," on order. Market well supplied and sales very difficult to effect.

The Saginaw Daily Courier publishes a long statement of the business of the Saginaw Valley and shore, from which we make the following extracts:—

"The tables giving the product of lumber and shingles manufactured at the various points on the bay and lake coast between the mouth of Saginaw river and Cheborgan, indicate a considerable increase in both of these items as compared with the previous year." The number of saws run was 76, including 18 mulay, 41 circular, and 17 gang. Capital invested, \$1,370,000. Lumber manufactured in 1370 was 127,723,555 feet; \$500k on hand January 1, 22,275, 900; number of men employed, 944. Lath cut, 20,663,350; stock on hand, 2,075,000; jogs in boom, 5,750,000.

"The shingle business of the shore is one of considerable importance. A large number of shingle mills are being erected at various points, and the prospects are that the manufacture of shingles on the shore during 1871, will be conducted on a more extensive scale than ever before. The capital invested in 1870 was \$80,000; men employed, 274; the production, 89,800,000; stock on hand, 1,250,000.

"The change in the mode of transportation of lumber to market on account of improved railway facilities has had the effect to stimulate the manufacture of dressed lumber in various forms, from that complete for the joiner in form of sash, blinds, doors, etc., down through the grades of mouldings, ceiling, and flooring, to lumber dressed on both sides. A. G. Bissell & Co., at the junction of the F. & P. M. and J. L. & S. Railways have an extensive planing mill, where, with the most complete for the joiner in form of sash, blinds, doors, etc., down through the grades of mouldings, ceiling, and flooring, to lumber dressed on both sides. A. G. Bissell & Co., at the junction of the F. & P. M. and J. L. & S. Railways have an extensive planing mill, where, with the most complete motheninery inserted, they manufacture immense quantaties of boxes for the eas

Of the stock run out of the Tittabawassee, 80,000,000 feet were old logs of the stock of 1869.

Genesee county, although technically not part of the Saginaw Valley, lies contiguous to, and the interests of both districts are identical. In the manufacture of lumber, Genesee county shows but a slight increase. The principal mills are at Flint, although there are a large number of mills scattered over the country, a portion of which supply a local trade. Aside from Flint, the shipping points are Clio, Grand Blanc, and Mt. Morris. From returns received, with a careful estimate by experienced lumbermen, we place the total lumber manufacture in 1870 (with a comparative statement with 1869) as follows:

	1869.	1870.
Lumber, feet	91,127,213	94,500,000
Shingles	58,320,000	64,500,000
Lath	14,636,150	13,000,000

	Lumber, ft.	Lath. pcs.
Howard & Son	3,500,000	2,600,000

Total manufactured in 1870		21,600,000
Total manufactured in 1869	46,150,000	15,300,000
Total manufactured in 1868	47,950,000	17,950,000

THE WEST SHORE.

THE WEST SHORE.

The product on the west shore of the State, for the season just closed, as near as the figures can be had from the best-informed channels, is 758,329,673 feet, which at an average price of \$15 per thousand brings the value of manufactured lumber at \$11,874,945.

The counties on the western coast of this State may be safely put down, from the figures at hand, as having cut the following amount respectively during the years of 1869 and 1870.

County.	1869.	1870.

rom Boston we have the following:-

From Boston we have the following:—
The Lumber market continues steady, and for all season able grades there is a fair demand. As the season advances and Spring is now close at hand, builders are beginning to prepare for the campaign, and are laying out considerable work to estimate upon, and indications point strongly to a more than usually brisk building season. In view of this the lumber market is buoyant, and amongst lumbermen generally a good feeling exists, and business in this line promises well. For low, coarse grades of pine, spruce, and hemlock, there is a strong demand and a light stock, and indications are that the month of May will find Boston as clean of this description of lumber as at any time during the past twenty-five years. The common grades of finishing lumber are in fair request, and prices have an advancing tendency. The arrivals are light, and but few cargoes have arrived since our last, these having been a leng time on the way. The market for Canada lumber has ruled very quiet, and transactions have been light during the week. Prices are firm and stocks moderate for the season.

METALS.—Manufactured copper has continued quiet beyond the ordinary retail call, and the very fair stock available remains almost intact. Up to the close of this report prices show no variation, but a meeting of manufacturers is in session, and a revision of figures will probably be made. We therefore quote only nominally at 32@33 c. for new sheathing; 22@32 c. for yellow metal, and 19@20 c. for old sheathing cleaned. Ingot copper has moved with less freedom, and merely in small lots, and though there is nothing to warrant a reduction in figures the tone is soft, with the advantage mostly in buyers' favor. We quote at 21%@20 c. per 10. Soctoh Pig Iron is dull, but this is owing mainly to the small and easily controlled supply, buyers refusing to submit to the extreme views of holders, and taking nothing except through actual force of necessity. The prospective arrivals are said to be moderate. We quote at \$30@34 per ton. American Pig Iron is also in small stock and meeting with a very good demand, which gives the selling interest considerable advantage and values have again increased somewhat, with rather indifferent offerings at the improvement, as but few arrivals are looked for during the next week or two. We quote at \$33@32 do. for forge. Bar Iron from store does not sell with much greater freedom as yet; but dealers appear to anticipate an increased call, and the tone of the market is rather firmer, with some lots held at an advance. We quote from store at about \$75@85 for refined; \$70@70.50 for common; \$110 for Swedes, ordinary sizes; \$97.50@125 for scotl; \$97.50@35 for rods (58 and 3-16 inch); and 63/4 per 1b for nail rod, all cash. Common Sheet has been moderately active in small lots as wanted by the regular trade, without any essential change in values though the feeling does not appear to be very scrops. We quote at 44@66 for singles, doubles, and trelles. Galvanized Sheet steady, and meeting with a fair call from the local trade. We quote the

cided change, prices, in the absence of leading sales, are nominal. We quote in coin at about 33c for English; 33@ 33½c for Straits; and 38½@39c for Banca. Tin Plates less active, the business embracing job lots principally, but prices unchanged. Zinc dull, but nominally steady at 8½ @9c from store.

NAILS.—The general demand does not prove very active, and business on the whole is slow and uncertain. The regular home trade, both local and out-of-town, is confined mainly to such lots as are required immediately by absolute necessity, and on export account the orders coming to hand are small. The supplies are fairly assorted, and though not large at present, prove ample for current wants, with a prospect of further additions. Prices are sustained and show greater strength, as the combination of agents and manufacturers are working more harmoniously and perfecting a combination to keep values up. We agents and manufacturers are working more narmoniously and perfecting a combination to keep values up. We quote cut at 4%@4%c for 4d. and 6d. Clinch 5%@6c. Other styles are selling as follows: Copper, 37c per lb; yellow metal, 22c do; zinc, 16c do. The exports for the week are 626 pekgs, valued at \$3,494; and since January 1st, 2,145 pekgs, valued at \$14,636.

or the week are 020 pokgs, valued at \$14,636.

PAINTS AND OILS.—In a general way the demand continues comparatively moderate, and mainly for small parcels, with invoices made upon a close calculation to actual wants. Still this movement is a pretty steady one from day to day, and taking the aggregate for the week a very respectable amount of goods have gone out. Indeed, in some instances there is a complaint of scarcity; foreign white lead in particular being mentioned as in short stock. The arrivals have not been very large of late, but there is said to be a fair amount on the way, and with the peaceful aspect of affairs in Europe hopes are entertained of a full aspect of affairs in Europe hopes are entertained of a full aspect of affairs to Europe hopes are entertained of a full assortment. Among the jobbers business is very fair and pretty general, but stocks hold out equal to the demand, and sellers gain no advantage. Prices on the majority of goods may be called steady, with no present indications of a change up or down, though a slight pressure to realize would be likely to give buyers an advantage, than a considerable increase of the demand would be likely to cause an advance. Linseed oil has not met with a very active demand, the movement still embracing merely the small lots required by the ordinary wants of the regular trade. Holders, however, appear to have the position pretty well under control, and refuse to negotiate except at full figures, while the offerings of stock, almost without exception, are moderate. We quote from crushers' hands at 84c in casks, and 85c in bbls.

Exports as follows:

PLASTER PARIS.—For lump the market is quite dull and uninteresting, though probably not any more so than usual at this season of the year, when deliveries at the best are uncertain, and the regular buyers have little use for stock. Some few cargoes of white have recently come to hand on contract, and one or two not being wanted were sold out to manufacturers at about \$3.50@3.75 per ton; but hand on contract, and one or two not being wanted were sold out to manufacturers at about \$3.50@3.75 per ton; but some parcels of blue received are a source of much trouble, and could probably be bought very cheap, somewhere in the neighborhood of \$2.25@2.50 per ton. The trouble with the last-named class of stock is, that it is only used for a land-plaster, and as the vessels cannot get up the river to the grinding mills on account of the ice, owners would prefer selling out cheap in order to save the expenses of holding until spring. There is a prospect, however, that with the reopening of navigation a very considerable quantity of common stock can be sold. The receipts for two or three weeks embrace 2,470 tons. For Calcined there has been rather a light demand on local account of late, owing in part to the heavy condition of the streets and the difficult carting; but still on the whole the call was fair, and with some shipping orders at hand, manufacturers have been reasonably busy. An average rate may be placed at about \$2 per bul, but there appears to be much irregularity in consequence of strong competition, and sales range from \$1.90 up to \$2.25, according to circumstances, and superfine stock reaches \$2.37½@2.50 per bbl. As we close carting is better, and deliveries are making on back orders, though the fresh demand continues light. We note exports to Cuba of 950 bbls, valued at \$1,970; and to Cisplatine Republic 100 bbls, valued at \$200.

PITCH.—As the season advances there is more feeling in the market, but as yet no business has been done, and former quotations are nominally steady. We quote \$2.65@.80 for city; \$2.75@3 for Southern; and small lots, very choice, in a jobbing way from store, at \$3@3.15. Receipts for the week, —; since January 1st, 150 bbls; same time last year, 951. Exports for week, —; since January 1st, 225 bbls; same time last year, 414 bbls.

SPIRITS TURPENTINE.—The business since our last SPIRITS TURPENTINE.—The business since our last report has been large, and prices have ruled very steady at 54e for merchantable, although a few lots have been disposed of at a concession of ½c; but at the close 54e is the close to fince for lots from wharf. Exporters are still the chief purchasers, but home buyers are taking more freely. We quote at 54e for merchantable and shipping order, and 55@55½ for N. Y. bbl; small lots at 55@57e, and retail lots from store 56½@57½c. Receipts for the week, — bbls; since January 1st, 6,43l bbls; and for the same period last year, 10,56l bbls. Exports for the week, — bbls; since January 1st, 1,560 bbls; and for the same period last year, 2,962. last year, 2,962.

TAR.—A moderate trade has been done since our last for export and home consumption, and prices rule very firm in anticination of an increased business shortly We quote as follows:—\$2.40@2.45 per bbl for North County, as it runs; \$2.50@2.55 per bbl for Wilmington, and \$2.55@2.75 for rope, and occasionally \$2.75@3 for something very choice in a small way. Receipts for the week, — bbls; since January 1st, 1,112 bbls; for corresponding period last year, 11,097 bbls. Exports for week—bbls; since January 1st, 689 bbls; and corresponding period last year, 1,077 bbls.
