REAL ESTATE RECORD

AND BUILDERS' GUIDE.

Vol. X.

NEW YORK, SATURDAY, NOVEMBER 30, 1872.

No. 246.

Published Weekly by

THE REAL ESPATE RECORD ASSOCIATION.

TERMS

All communications should be addressed to

C. W. SWEET.

7 AND 9 WARREN STREET.

NO receipt for money due the REAL ESTATE RECORD will be acknowledged unless signed by one of our regular collectors, HENRY D. SMITH or THOMAS F. CUMMINGS. All bills for collection will be sent from the office on a regularly printed form.

SPECIAL NOTICE.

Our Brooklyn readers are directed to the card of Messis. Oth Brooklyn readers are directed to the card of Messis. Burnett & Sawkins, who have recently started in business for themselves as Plumbers and Gas Fitters after having worked as such, in responsible positions, for more than ten years with the leading house in that line in Brooklyn.

REAL ESTATE MARKET.

IMPROVED AND UNIMPROVED PROPERTY.

THE market for improved property shows no upward tendencies. A few weeks ago the general quietude of the market was attributed to the excitement consequent on the political can paign. Just at present the stagnation is said to be one of the effects of the fire at Boston, which has created a general feeling of insecurity in the stability of an investment in improved property. Dealers say also that the distrust which has been excited as to the efficiency of the New York Fire Department, or rather in regard to the water supply and the power of our steamers, serves in a very great degree to deteriorate the market, and drives out the speculators. Two years ago, when the furor for improved property was raging to such an extent, men would buy one day at a high rate, and if dissatisfied with their purchase were morally certain to be able to sell out at an advance. During this time men could contract for property, and sell the contracts at a profit, without having a proof-title of the estate. Of course such a state of things could not last, and ultimately there was a revulsion, of which the present quiet state of the market is the continuation.

The demand just now seems to be for rather low-priced houses, and the buyers are confined almost exclusively to would-be occupants. It would seem from the demand that the only part of New York in which human beings can dwell is confined within the boundary lines of Fifth and Sixth avenues, Twenty-third street and Central Park. Men rush to real estate brokers, and while announcing that they do not desire to pay more than \$25,000, or less, for a house, name a location where the lot alone would equal, and in the majority of instances exceed, that figure. This is so marked a fea- stand the modus operandi, as carried out in this contracts given to the lowest bidder.

matter for a standing joke among brokers and dealers. Occasionally, however, fancy prices are realized from those gentlemen, of plethoric purses, whose only object is to be suited. Several important sales of down-town buildings are said to be in course of negotiation at prices that will be a surprise to experts as well as novices.

The features of the market for unimproved real estate is in direct opposition to that of improved property. Speculators in this branch have nothing to fear from fire, and where they are able to forego the use of their capital they are morally sure to realize a desirable profit. The activity of the market is also due to a great extent to the inactivity of improved property. The prices realized are fully up to the expectations of the most sanguine; and should they increase in like ratio for the time to come, when the property shall be designated as improved, none but our millionaires can indulge in the luxury of buying or selling. The upper end of the island, comprising the Dyckman estate and Washington Heights, includes the most valuable property on the market. Here the sales are very numerous, and latterly comprise the lands situate on the extreme end of the Heights. A new impetus has been given the market by the discovery that those capitalists known to have an "inside track" on the Rapid Transit question, are investing freely. Plots that commanded from \$800 to \$1,000 á few months ago have now a largely increased value; and should the predictions of the success of the rapid-transit scheme prove true, they will rival in price those situate miles nearer Wall street. On the other hand, however, if the quick transit plans under promulgation meet with the baulks that have deadened former enterprises of a similar nature, there must be a depreciation in value of the lots now deemed so desirable.

The title to the property sold by Potter Bros. to the Columbia College directory were taken out this week. The price realized, \$375,000, for the 91 acres covered by the deed, is very indicative of the fanciful values placed on property at this end of the island, even when bought for occupancy, and not for speculative purposes. Since the announcement of this sale the same firm have sold nearly 300 lots in this vicinity, and the same can be said of other holders. Most of the property sold outside of the Columbia College purchase comprised plots from the Dyckman estate.

THE MANNER OF OPENING STREETS.

OF the many thousands of property-owners who pay taxes for the cost of street openings. there are comparatively few who really under-

ture of the present market that it has become city. The subject is the more interesting from the recent exposures of the frauds that have been permitted in this branch of city government by the Tammany Ring dictators, who have now, with one exception, retired to the shades of private life. Indeed one or two of these personages have withdrawn to a privacy that it would much please the investigators of their official corruption and nefarious practices

> The law under which our street openings are now carried out is by no means of so recent date as is generally supposed. The Act was passed by the State Legislature as far back as April, 1807. This Act has received innumerable additions and amendments by the more recent Legislative bodies, and is made subservient to the General Act of Revision passed in 1813, which is now in force, and all street openings are conducted in conformity with its provisions. The supplementary and amendatory Acts of later years have mainly been in regard to titles.

By this Act the control of this work is invested entirely with the Department of Parks. An application is made to the Courts by this Department for the appointment of three Commissioners. The request is made by a petition setting forth the general nature of the improvement. The next step is the appointment of the Commissioners by the Court. The Commissioners meet and organize by the selection of a chairman and clerk. Their first duty is to select a surveyor to ascertain the names of the owners of the property covered by the proposed improvement in order to determine the area of the assessment, and decide whether or not any and what part of the cost shall be charged to the city at large. Notice is then given to the land-owners to produce their deeds and prove their titles to the property. The Commissioners must then hold public sessions and give everybody who desires a hearing on the questions of law or individual rights that may arise. After they have done this they must decide the points of difference raised, and make up their report, which is to fix the amount of awards to each property-owner, in order that the distribution may be determined upon. This report is filed, and advertised, and notice given that any objections to the report will be heard. The period for this hearing is ten days. After the objections have been heard by the Commissioners their report is revised and presented to the Court for confirmation. Here, all parties who are dissatisfied at the decisions of the Commissioners have an opportunity of presenting their objections, and the questions of law are finally settled. If the decision is against the Commissioners, the report goes back to them for correction. When at last the report is confirmed by the Court, the work is advertised and the The legal compensation allowed to the Commissioners is thirty cents a lineal foct for the length of the street or avenue opened, but, through connivance with officials and corrupt Judges, the amount has been increased to indefinite amount's, and in scores of instances the men appointed as Commissioners have reaped immense fortunes at the expense of the unprotected tax-payers.

The opportunity for fraud is very apparent from the synopsis we have given of the method of conducting the work. The fault, however, lies not in the law, but in its abuse. Incompetent and ignorant men have been appointed through political favoritism to act as Commissioners, and their reports have been confirmed by such Judges as Barnard and Cardozo, notwithstanding the costs as set forth in the reports were manifestly exorbitant and illegal.

The successful practice of fraud is now obviated in two ways. Comptroller Green, exercising the power vested in him, declines to pay exorbitant and illegal charges, and should there appear to be error, intentional or otherwise, insists upon opening and reviewing the reports, and upon a readjustment of the costs and awards. Again our Courts are, happily, now presided over by honest and incorruptible Judges, which precludes favoritism and fraud on the part of the Commissioners.

INSURANCE BY THE GOVERNMENT.

Entries strange, in view of the uselessness of fire insurance companies when a great conflagration takes place, that no one has thought of government undertaking that business. This matter has been discussed abroad, and Napoleon, before his fall, had in view the adoption of a system which would in time have made government insurance the only one permitted in France. The main advantage of government undertaking this business is the certainty of reimbursement, no matter how large the fire. The whole nation would scarcely feel a fire like that of Boston or Chicago, while the insured would be sure that all legitimate losses would be paid.

The great objection to the present system is its wastefulness. In the account between the community and the fire insurance companies the former pays \$2.50 for every \$1.00 it gets back in losses. Dividends, officers' salaries, rents, etc., eats up nearly three-fourths of the moneys received. Now, a business which uses up \$250 in handling \$100 may be a good thing for those who conduct it, but it is a poor one for those who patronize it. Notwithstanding this enormous profit it becomes bankrupt when the loss is excessive. In other words, our present fire insurance system is at once wasteful and unsafe.

Government could reduce premium to a minimum. It could easily pay back \$100 for every \$110 it received, and the insured would be sure of their money. The companies are hard at work putting up their rates, and the business community is to be heavily taxed because this wretched, wasteful system has broken down when it was most needed. The whole life insurance system is one of the most stupendous swindles of the age, as insurers will yet find to their cost, and fire insurance par-

takes of its deceitful and wasteful character. By all means let government begin this busi-

THE EROADWAY T. BERNACLE.

This celebrated place of worship, which became so conspicuous under the pastorship of the Rev. Dr. J. P. Thompson, lately retired. and is now under the pastorship of the Rev. Dr. W. M. Taylor, was on Sunday last reopened for divine services, after having been closed since the month of June last, for undergoing alterations. A more complete transformation was perhaps never before effected in any building. The whole interior has been cleared of all impediments. The solid stone piers which formerly divided the nave from the aisles, and supported the groined arched roof above, have been removed, and in their places left nothing but empty space. In lieu of the support which the roof formerly had upon these pillars, strong wrought-iron ties have been introduced to resist the thrust, and the only impediments to be now met through the whole interior are the slender iron shafts which support the galleries on each side. Where the groining formerly impinged upon the supporting columns it has been cut abruptly short, and the ends ornamented with elaborately carved bosses, very ingeniously managed, but still, owing to the peculiar conformation of the old roof, showing that it is at best a contrivance and an afterthought. Arches crosing and intermingling, and abutting at last upon nothing but air, is a pretty piece of architectural legerdemain, but cannot be called architecture; and therefore, however much we may palliate this arrangement as an ingenious make-shift in altering an old building, it is by no means such as any one would follow in designing a new one.

And yet upon the whole, despite its incongruity and manifest attempt at overcoming difficulties, the interior of this church is pleasing, and a decided improvement upon its former conditions-such is the force of commonsense and availability, as elements in Architecture, over mere pleasing forms of decoration without any manifestly appropriate purpose. Nothing can more clearly illustrate the coming of that Revolution in Church Architecture, to which we alluded in our last, than the changes which this structure has undergone. That a leading congregation, after having erected an expensive and solidly-contructed church upon the old models, should have decided to take away all the massive stone columns of the interior and all but rebuild the edifice, to make it-what it should have been from the firstan immense hall, conveniently adapted to seeing and hearing, is but a type of what is going to occur elsewhere. Four-fifths of our large Protestant churches are built upon the same inconvenient old Roman-Catholic-Gothic model which had been originally adopted at the Tabernacle, and when they have learnt, from this example. how to overcome their difficulties, it is not at all unlikely that very many of them will follow suit. But it is not alone in the old churches to be altered that the change will be seen; it will affect also the form of churches to be built in future. Congregations when they see, as in this case, that the absence of internal columns vastly increases the convenience while

not interfering with the beauty of an interior, will instruct their architects to give them interiors without columns. Architects, with their task put clearly before them, will then set earnestly to-work to see how they can design interiors in every way adapted to the new order of things. They will so arrange their roofs, galleries and other prominent features as to produce the largest amount of artistic effect compatible with the means at their disposal. It is to be feared, however, that these means will be so limited in point of form, that the artist will have to depend far more than heretofore upon the aid of color. Large blank surfaces, which in Gothic treatment are so rare, owing to the frequent introduction of arches, recesses, columns, and other pleasing breaks, will now be compelled to hide their nakedness by polychromy. This has been largely the case at the Tabernacle. Had the interior, in its present stages, been left to depend upon its form alone, it would have been painfully monotonous; but decorated as it is by colorand this portion of the work is very meritorious-the effect is not only artistically pleasing, but solemn and impressive. The ground color on walls is a pale and very delicate drab, with the front of the galleries, the ribs of the groined arches of roof, the pulpit, organ, and other salient points picked out with the positive colors of red, blue, and gold, very delicately treated and yet producing altogether a somewhat gorgeous effect. Taken in connection with the rich stained-glass windows, there is quite enough of that "dim religious light" which many consider so essential an ingredient in devotion, and all who are not totally wedded to precedent and the stereotyped forms of Gothic interiors must conscientiously allow that whatever the Tabernacle may have lost by the removal of its internal columns has been more than compensated by the additional comfort and convenience assured to the congregation.

UNION SQUARE IMPROVEMENTS.

THE improvements now going on in Union square are less liable to objection than anything which has yet been accomplished by the Department of Parks in the other open spaces of the City. It is true it has the one same vital error which is visible in all the others, the perpetual use of curved walks instead of straight ones, by which the pedestrian is constantly compelled to go in the very opposite direction to the one he wishes, and to take a graceful detour far out of his way when a bee-line would bring him straight to his destination. These meandering pathways may be pleasant enough in a summer garden, or among shady groves, where whispering lovers have no particular regard to time; but in the centre of a large city, where men are hurrying to turn every instant to account, such vagaries in an open public square are altogether misplaced and unmeaning. We do not wish to say anything spiteful of the landscape artist, but the man who could deliberately put upon paper such curved, inconvenient arrangements, must be certainly very much addicted to crooked ways.

But apart from this blemish, which it bears in common with all the others, Union square will really be, when completed, a very beautiful and imposing feature in the city. Wisely avoiding the obstruction to travel which has always resulted in the southern end of the square, upon all occasions of large public meet-. ings, the architects have concluded to use the upper and less frequented portion of the square for such crowded occasions, and have designed their arrangements accordingly. At this end a large piece has been cut off, and Seventeenth street widened proportionately to admit of an open broad sweep extending all the way from Broadway to Fourth avenue, and capable of containing many thousands of people. Here it is that all public meetings will be held and all parades go through their evolutions in future. Near it has been erected a pretty little Swiss cottage, intended to be used as a refreshment saloon, lodge for park-keepers, committee rooms when necessary, and other purposes, and in front of it is a public rostrum from which meetings can be addressed, processions reviewed, etc. Along the whole line of this end of the park it is intended to place a balustrade flanked at each end by lofty flag-staffs for the flag of the United States, and between these will be a row of oxyhydric lamps, surmounted by the flags of all nations in times of public rejoi-The new fountain, which is to stand on the site of the old one, will be a very handsome although simple affair, made jointly of plain and polished Quincy and Westerly granite, surmounted by a bronze Corona sending forth fifty jets of water. The general scope of the design being a grand one, we may be sure that all else in the hands of such masters of detail as Messrs. VAUX and MOULD will render the whole, when completed, one of the most striking and beautiful additions to the city.

BORROWED LIGHT.

In the London Building News of the 4th inst. appears the following paragraph:—

On Tuesday evening, by direction of the Metropolitan Board of Works, the lamps on the river wall of the Victoria Embankment were lighted for the first time. The standards for the lamps have been cast from designs furnished by Mr Vulliamy, the architect to the Board. The United States Government have determined to erect lamps of the same pattern in front of the Treasury at Washington. The original drawings, the castings, and core-boxes of the lamp standards have been lent by the Board to the American Government, in order that the work might be facilitated.

It seems strange that we should have to go all the way to England to borrow the pattern of a lamp-post. Is there not invention enough among the shining lights of the profession at home, that we must go abroad for lamps and posts to supply them?

GREEK AND GOTHIC.

In the Græco-gothic war which is being waged among the architects of England, each party is as usual stoutly defending its own pet theory. A disinterested observer of the fight thus replies to an ultra-Greek:—

I am far from believing that "human genius exhausted itself when it produced the Parthenon." As "there is one glory of the sun, and another glory of the moon, and another glory of the stars—for one star different from another in glory," so, in like manner, there is genius and genius—genius differing in alike kind and degree. There may be genius in a Gothic cathedral, but it is very different from that in a Greek temple, as the idealistic beauty.

of a Greek Juno is very different from the realistic of the British women of the nineteenth century—

. . . finer women, ripe and real.

Than all the nonsense of their stone ideal.

If human genius had exhausted itself when it produced the Iliad, there would have been neither the Æneid nor the Paradise Lost, but the Iliad remains as unsurpassed as does the Parthenon.

CONCRETE BUILDINGS.

At the recent quarterly meeting of the Northern Architectural Association held at Newcastle-on-Tyne, the President, Mr. M. Thompson, read a very excellent and practical paper upon the use of Concrete for stone in the erection of buildings. Among other things he said:—

He had tried concrete in two or three instances in Newcastle, and had found it very much cheaper than either brick or stone. They also attained another object, and that was securing a wall, where space was limited, of great strength, with less thickness than would be necessary if it were built of brick or stone. It was a very admirable substitute where great heaps of gravel or slag were accumulated; for while such refuse was available for scarcely any other purpose, it afforded an excellent material for the formation of concrete buildings. Mr. Thompson here referred to a photograph of a large seed warehouse, which had stood the test of grain, an article that produced a greater strain upon the walls than almost any other class of goods that could be stored. He then gave details of various experiments which had been adopted to test the strength of concrete as compared with brick, the result being greatly in favor of the concrete, especially when built with brick and stone bondings. It was, therefore, very important to know that such rough materials as broken bricks and stones could be put together and run in with grouting, and produce a wall of such great strength and cheapness. In preparing foundations, he believed it was quite competent, instead of digging out the soft stuff and putting in concrete, to force down the soft substance and make it a perfectly solid mass, thus securing one of the best of foundations. In laying down concrete floors, he thought there was an advantage in covering them with water, because they set better under such a condition, and became harder and stronger than if they were allowed to dry under the influence of the ordinary air. At Cullercoats a great deal of concrete building was going on. The walls were generally formed of iron slag and sandstone, with grouting; and when dry, if struck with a hanimer, they sounded like the ring of a piece of metal. The inner walls of a three-story building need not be more than 6 in, and the outer walls 9 in thick. Concrete houses were, of course, exceedingly dry and comfortable. The inside required simply a finishing coat of plaster, and the saving in that department more than covered the cost of the outside stucco, which did not peel off the concrete as it did off stone and brick walls. Buildings, constructed with concrete walls, floors, and staircases were perfectly fire-proof, the windows and door-frames being alone capable of burning.

SETTING A DRAWING.—If a drawing is worth anything, it surely is worth setting, that is fixing the lead or chalk with which it is drawn, so that, under ordinary treatment, it cannot injure by rubbing. For highly-finished drawings, or where the chalk or pencil has been very liberally applied, it will be better to proceed in this way:—Nearly fill a shallow dish or tray, somewhat larger than the drawing, with a weak solution of gum-water, or—which may sometimes be more convenient—a mixture of milk and water, half of each; pass the drawing earefully through the mixture (face uppermost)

backwards and forwards; then fix it up on the wall by a corner to drip and dry; or the drawing may be pinned down to a board, held on an incline over a dish, and the milk and water poured over it with a spoon, beginning at the top; it is necessary to see that all parts of the drawing have been passed over. If the drawings are merely outlines, or having very little shading over them, then the fixing medium may be passed over the volole paper with a broad, flat camel's hair brush. With careful treatment, this method of preserving drawings will be found to be quite satisfactory.—Cassell's Popular Educator.

AN INTERESTING DISCOVERY .-- The President of the Royal Institute of British Architects, in the course of his recent inaugural address said he had been informed by one well qualified to speak on such a topic, that amongst the recent additions to our knowledge of ancient architectural art one of the most important has been the discovery of a Sassanian palace, in the desert behind the Dead Sea, by the Rev. Mr. Tristram in the spring of the present year. This palace, which dates from the first year of the seventh century, is the only speci-men of the decorative style of that age which is known to exist, and supplies, in part at least, the missing link that was wanted to connect the styles of the West with those of India, and enables us to understand much in the Saracenic architecture of Persia and India which has hitherto been wrapped in mystery. The details of the building, which are of extreme beauty and delicacy, will probably soon be published by the discoverer, and will no doubt prove a most interesting addition to our knowledge of the thousand and one styles in which mankind has expressed the idea of beauty and fitness in architecture. At some later period in the session it is probable that Mr. Fergusson will be able to give some further information on this interesting discovery.

THE LACUSTRINE ERA IN EUROPE—Lacustral dwellings have been found in several of the Polish lakes which are now being drained; urns containing ashes have been discovered in them, ogether with various skulls, declared to be Asiatic and African; all of which circumstances tend to prove an antiquity extending beyond the historical times; and go to corroborate the idea that Africa aboriginally contributed, in an essential degree, along with Asia, to the peopling of Europe.

BUILDINGS.

Jr., to William Matthews.....exchange

PROJECTED.

The following plans embrace all that have been considered by the Superintendent of Buildings since our last report :-

EIGHTY-FOURTH ST., S. W. COR. 1ST AV., THREE four-story brown stone tenements, 27x52; owner, W. R. JOHNSTON; builders, COOT & HIGGINS.

EIGHTY-SIXTH ST., N. S., 206 E. 1ST AV., ONE three-story brick building, 25x46; owner, MARY A. SIMONSON; architect. J. H. VALENTINE; builders, J. M. and E. A. THORP.

FORTY-THIRD ST., N. S., 116 E. 2D AV., ONE TWO-story brick store and dwelling, 13.5x25 and 35; owner, Timothy Brennen; builder, Jas. Hamel.

FIFTY-SIXTH ST., N. S., 60 E. 10TH AV., ONE four-story brick tenement, 19x50; owners, BLAKE & MAHONEY; architect, J. M. GRENELL; builder, JOHN SHANNON.

FIFTY-THIRD ST., S. S., 300 W. 5TH AV., FOUR four-story brick first-class dwellings, 25x60; owner, John C. Donnelly; architect, J. E. Ware; builder, J. C. Donnelly.

FIRST AV., E. S., 25 S. 26TH ST, ONE ONE-STORY brick coal yard office, 12x14.8; owner, Charles Schwedler; builder, John Weber.

ONE HUNDRED AND TWENTY-FIRST ST. 228 E.), one four-story brick tenement, 25x48; owner, M. Mulkein; architects, W. T. Beer & Son; builder, L. Daly.

ONE HUNDRED AND TWENTY-SIXTH ST., S. 90 w. 4th av., two three-story brown stone first-class dwellings, 20x47; owner, F. A. Thurston.

TWENTY-FIFTH ST. (No. 321 W.), ONE FIVE-story brick tenement, 25x47; owner, architect, and builder, Hugh McMahan.

STANTON ST. S. E. COR. ESSEX ST., ONE FIVE and a-half story brick tenement, 25.6x45; owner, FREDERICK ROLLWAGER; architect, THEODORE J. BIER.

SIXTEENTH ST., N. S., 238 E. Av. B, ONE FIVE-story brick second class dwelling, 25x60; owners and architects, Messrs. KLEIN BROS.

TENTH AV., E. S., 21 N. 56TH ST., TWO FOUR-story brick store and tenement, 19.6x50 owners, BLAKE & MAHONEY; architect, J. M. GRENELL; builder, John Shannon.

TENTH AV. N. E. COR. 56TH ST., ONE FOUR-STORY brick-store and tenement, 21x50; owners, Blake & MAHONEY; architect, J. M. Grenell; builder, JOHN SHANNON.

ALTERATIONS.

Broadway (No. 599), extension 16x16; cost; \$400; owner, T. W. Strong; builder, Jas. D. Buchanan.

Bowery, e. s., 75 n. 4th st., extension 18.6x32; cost, \$1,500; owners, Breitwieser & Mayfarth; architect, Julius Boekell; builders, Obernauzer &

Lexington av., w. s., 58 s. 87th st., building altered for two families; cost, \$1,500; owner, N. Gray, Admx.; architects & builders, Heller & Schiffer.

MARKETS.

BRICK .- Considering the uncertainty of the weather, and the opening of the holiday season, which is virtually inaugurated with the arrival of Thanksgiving, the market for brick has presented a favorable aspect for the week. As noted for the past two or three weeks, the boats have not been rushing their trips, but plying steadily to market with their cargoes, which continue to be taken up just about as fast as they arrive here. If there is a preponderating demand for any quality of brick it is for pale, but, taken all in all, the market is fairly active for all grades. We make no changes at present in our quotations, which stand thus:—Haverstraw Bay brick at \$8@9.75 per M Up rivers and Jer.eys, \$7.75@8.50 do.; Pale, \$5.25@ 5.75 do.: Croton Fronts, \$12@16 do; and Philadelphias, from yard, \$40@45 do.

LATH.—There continues to be a strong demand for lath, and the supply is very short. Such invoices as are arriving are no relief to the market, as they are speedily absorbed, leaving no surplus to lay in as stock, and when the arrivals become scarcer it will become next to impossible to secure sufficient for common uses. We quote Eastern at \$2.50 per M. with a strong tendency to advance.

LIME.-Although recent arrivals of Rockland have somewhat relieved the market, they have not been sufficiently numerous to fill the demand, and consequently the market is quick at our quotations as follows:-Fort Anns, Glenn's Falls, Bald Mountain, and Rockland, at \$1.50 per bbl for common and \$1.75 do for finishing.

LUMBER.-The New York market is in a quiet state, and there will hardly be any marked revival in business for some little time now. We hear of continued operations from the great lumber marts which are only rendered possbile by the favorable weather we are having. Shipping is going on freely, and further receipts of stock are increasing the supply on hand. Withal, freights hold fairly to recent quotations, having advanced at most not more than twenty-five cents.

It was thought possible that the Boston burning would somewhat affect that market, if its effect was felt no further, but it would seem not, from the following paragraph clipped from the Journal of Commerce of that city:-

"Altogether the market is but little changed since the fire. It was presumed that after the presidential election, a healthy condition of the trade would naturally follow, and aside from the few slight effects of the fire, this will doubtless be the result. The business will not be exceedingly lively, for the dull season is approaching, but taking all existing circumstances into consideration, the demands in the market will be fair and steady."

Eastern spruce is coming more into demand here. Stocks are somewhat depleted and some anxiety exists that supplies may not be large enough in the future to restore the market's equilibrium. Quotations at present range from \$16 to \$18.50, including the range.

The exports of lumber are as follows:-

This	week S	ince Ian 1	. Same time

Venezuela	5,000	88,573	934870
Total			14,999,534
Value		\$614,975	\$494,992

Additional exports as follows:-

To Glasgow, 1 case vencers, value \$236; Porto Rico, 38 pckgs, value \$796; Hayti, 10,000 shingles, value \$130; Rotterdam, 2,400 staves; Liverpool, 18,559 do; London, 14,520 do; Glasgow, 11,400 do; Corrunna, 21,600 do; Almeira, 34,560 do; Malaga, 1,600 do; Valentia, 11,928 do; British West Indies, 2,000 box shooks and 900 shooks; British Guiana, 500 do; Cuba, 24 bdls box shooks and 1,991 shooks; Porto Rico, 5,000 shooks and heads; New Grenada, 21 bdls shooks; Brazil, 522 shooks; British Hon-

duras, 50 M T kegs; Cuba, 4,000 hoops; Porto Rico, 5,000 hoops; Glasgow, 1,260 oars.

Vessels suitable for short foreign and constwise business are scarce and in demand. Coal and lumber rates tend upward. Vessels in the latter trade are particularly wanted to lead at the South for Bo-ton, rebuilding of the burnt district having already commenced.

Charters as follows

Charters as follows:— Aschr, 176 tons, to Galveston, general cargo, \$2,160, and from Pascagoula to Barbadoes, lumber, \$13; one, 234 tons, to Jamaica, 67½c gold per bbl, and back with logwood, \$5,25 currency; one, 335 tons, from Apalachicola to Cardenas, lumber, \$12; a brig, 404 tons, from Pensacola to Boston, lumber, \$16; a Br brig, 355 tons, from Pensacola to north side Cuba, lumber, \$11; a schr, 156,000 lumber, from Fernandina to New York, \$12; one, from Jackson-ville to Boston, resawed lumber, \$14,50, another on private terms: one, 101 tons, to Aux Cayes and back, and one, \$3 tons, to Point Petre, on private terms.

From the Chicago Interoceanic, Nov. 20:—
Very few vessels have left this port for the lumber regions during the week, the season being now about over. Vessel owners have enjoyed big paying rates all season, and the freights now current do not warrant them in making any more trips this season. A few charters have been made, but at irregular rates, the party chartering offering extra inducements in the way of a load of supplies to the mills, or so much for the round trip. The demand is not urgent. The market closed quiet and nominal at the following rates to the points named:—

Munictor, \$450. Undirector, \$435. Decreater, 644.

Manistee, \$4.50; Ludington. \$4.25; Pentwater, \$4; Menomonee, \$4; Muskegon, \$3.25@3.50; White Lake, \$4; Green Bay, \$5: Grand River, \$3.25@3.50; Grand Haven, \$3.25@3.50; Oconto, \$5; Snamico, \$4.50; Alpena,

Haven, \$3.25@3.50; Oconto, \$5; Suamico, \$4.50; Alpena, \$4.75.

The present week will about close up the lumber market for the season of 1872. The receipts for the last six or seven days have been light, and, with the exception of a few vessels due from Muskegon and other East Shore points, there are but few vessels expected to arrive. Prices throughout the past week were a little better than nominal, although sellers were decidedly firmer in their views, and at the close sales could probably be effected at an advance of about 5i c per M on the figures current one week ago. The demand was by no means urgent, there being only a light attendance of buyers, most of the dealers throughout the country and city having purchased their stocks some few weeks since. The retail demand has reduced the stock considerably, however, and some few parties were on the market, intending to purchase a cargo or two to replenish with. Joists and scantling have sold at \$10,50@11, although at the close \$11 was the current price. Strips and boards have sold at irregular prices, ranging all the way from \$12 for coarse to \$10 for really choice mill-run cargoes. Shingles were in fair request, and several sales were made, but prices were not made public. Quotations, however, range at \$3.10@3.15 for fair to choice "A" sawed. Lath has sold to the extent of the offerings at \$3.25. Posts and pickets quiet at \$\$8@9. To-day there were but one or two cargoes on sale. The market was inactive, and prices ruled entirely nominal at the above range of values.

In the yards, trade has only been fairly active, but at the same time prices were firm and steady. The only changes to note in our quotations since last week are an advance of \$3 on 1st and 2d clear flooring, and \$2 on common siding. Sawed shingles were a shade easier, sales being made at \$3.75@4. Lath firm at \$3.50@4. Hardwood lumber met with a good demand on local account, the inquiry being chiefly for oak and walnut; prices were firm, but without quotable change.

From the St. Louis Globe. Nov

From the St. Louis Globe, Nov. 21:-

Trade the past week shows no change whatever, and dealers generally report a dull feeling, with light transactions. From indications it is not probable much will be done before next spring, as the rafting season is now closed, and business at the yards does not promise any particular activity.

We quote the range of the market, on bank and in water,

White Pine.—Chippewa, \$17@18; Wisconsin, \$18@26; shingles, \$3.60; lath, \$2.65@3.
Yellow Pine.—1st and 2d rates, \$26@29; 3d rate, \$14@15; mill run dimensions, \$15.
Poplar.—Strips, \$22.50@25; wide boards, 1st quality, \$22.50@26; 2d do, \$18@20.
Black, valnut, \$42.56@47.50; good. \$27.50@40; fair, \$30@25; common, \$22.50@25; oak, \$20@25; hickory, \$25@30; ash, \$25.6030.
Cedar.—Hewn, \$22.50@24; sawed, \$23@27; posts, \$25; sycamore, \$18.
Car load rates.—"A" shingles, \$4: lath, \$4.

Car load rates,—"A" shingles, \$4: lath, \$4.

From the Dubuque Herald, Nov. 19;—
Going into winter quarters engrosses lumber dealers' attention. The sudden change in the weather finds some of them in bad condition to receive the frost king with rafts frozen in, that two more weeks of mild weather would have seen pulled out and piled up in good shape. Carson & Rand have a 12 string raft frozen in at Boat Yard Hollow. Fleets have been caught all along the river; five are reported frozen in at the mouth of the Wis.; also others above and below that point. Knapp, Stout and Co. have a large raft that passed here two weeks ago, hard on the rocks on the Rapids, with poor prospects of getting it off this cold freezing weather. A steamer has been ordered to assist in the work. This firm has wintered a fleet near La Claire too late to make the run to St. Louis. The Annie Girdon reached this port Sunday, and went on the ways, where five other steamers will go into winter quarters. Weston, Burch & Co. were caught with a fleet half pulled out and have ceased operations, leaving \$200,000 to remain in the ice all winter, offering the same for sale. A fleet of \$200,000, consigned to S. M. Langworthy, is also frozen in and for sale. Ingram, Kennedy & Day have all their fleets in, and pulled out. The Clyde laid up at Reed's Landing, and everything in good shape for winter. Pelan & Randall have closed up

their mill until next spring. Other manufacturers will soon be forced to follow.

Sales afloat last week were small; 600,000 feet of Shaw's

Sales affort last week were small, overview of Sales a lumber to various parties at a uniform rate of \$15.

Trade is dull, generally speaking, with decreased rail shipments and wagon sales. Dealers look for dull times until February, when the spring demand usually opens.

all taken up on arrival at about our quotations. An active inquiry still exists for vessels for South America and constwise. We quote:—

Mill timber, \$760!: shipping do, 600 ft average, \$8@9; 700 ft average, \$9@11; 800 ft average, \$1.050@11.50; 900 ft average, \$11@13; 1,000 ft average, \$14@15. Lumber active.

Exports of lumber from the port of Savannah from Sept. 1 to Nov. 14, 1872:—

Exported coastwise:—New York, \$,010,395; Phi'adelphia, \$51.021: Boston, 531,000: Baltimore, 1.246,700; Providence, 536,000; Portland, 210,000; Wilmington, Del., 176,715. Total coastwise, 5,660,851.

Vessels are in demand for lumber cargoes, and none are disensaged. Lumber to Philadelphia, \$10.50@11; New York and Sound ports, \$110.213: Boston and Eastern ports, \$12@13: Baltimore, \$16. Cuba, \$16@13; River Plate, \$24 and 5 per cent primage. Bio, \$12 and 5 per cent primage. Bio, \$12 and 5 per cent primage. By steam to New York, \$12.

Timber freights are \$160.50 higher than lumber rates. From the Chicago Tribune, Nov. 23:—

There were no receipts in the wholesale lumber market on Saturday. A large fleet is expected on Monday from Manistee.

The New Orleans Price Current, Nov. 16, says:—
We note no improvement in this market; though the arrivals are light they are fully equal to the limited demand.
Shipments to foreign ports are being made direct from the

milis. We note the following vessels loading at Pascagoula, to wit:—Brigs Sarah and Emma, for Providence, with 225 M feet; brig Lizzie Bell, for Boston, with 225 M; schr Island City, with 280 M; brig Ocean Engle, with 250 M, and schr Ralph Carlton, with 235 M for New York; French bark Lorraine, with 230 M, and brig Ida McHenry, with 225 M for Havana.

Lorraine, with 50 M, and brig 10a Mettenry, with 220 m for Havana.

Cargo lots are quoted at \$14@15 per M for inch boards; \$12@14 for rough weatherb-ards and \$16@18 for dressed. Mough flooring is selling at \$15@18, and dressed, \$22@25.50; dressed ceiling, \$18@20; Cypress, \$20@25; common shingles, \$3.50@4, and laths, \$2.50 for lake and \$2.75 for Pensacola. General orders for rough and dressed lumber are filled at \$4 per M on cargo mirces.

F METALS.—Ingot copper is perfectly dead, but is held at 31c. Manufactured unchanged at 45c for new sheathing, 45c for bolts and braziers; 27c for yellow metal sheathing, and 32c for yellow metal bolts, net cash. Pig lead has met with but a limited demand and has remained stationary in pice, notwithstanding advances abroad. at 65@66%c for ordinary foreign. Manufactured steady as follows:—Bur, 9%c; sheet and pipe, 11c, and tin-lined pipe, 16%c, all less 10 per cent to the trade. Pig tin remains without transactions, and prices continue to fall away. We quote (nominally) Banca, 55c per lb, and Straits and English, 3dc do., all gold. Zine dull at 10c per lb. all gold. Zinc dull at 10c per lb.

NAILS.—There was a meeting of the trade early this week, but no alterations were made in the price list, which remains as before for cut. We quote 10d to 60d common, per keg, \$6: 8@.9d, \$6.25 do; 6@.7d, \$6.50 do; 4@.5d, \$6.55 do; 3d, \$7.50 do; 2@.3d, fne, \$8.25: 4@.4&d, stuearbox, \$7: cut spikes all sizes, \$6:25: horse-shoe, forged, No. 10 to 5, per lb. 21@.33c. Copper, 45c per lb: Yellow Metal Sheathing and Slating, 20@.32c. Pencing and sheathing same as common. Finishing, flooring, box, coopers, ca-ing, slating, trunk, and tobacco, as follows: 3d, \$8, 4@.5d. \$7.25: 6d, \$7: 8d, \$6.75: 10d and larger, \$6.50 per keg. Clinch nails, 2 and 2½ inch, \$8.00; 2½ and 2½ inch, \$7.75: 3 inch and longer, \$7.50 per keg. In half kegs 50 cents per 100 lb. more than above.

We note exports as follows:—

Since Jun. 1.

Since Jan. 1. 5.000 \$79,178 . Past week. Packages. 377
Value. \$3,020

OILS.—For large lots the market is poor, but in a jobbing way the call has been fair. Generally the prices tend to a decline and are weak at our quotations. We qurte linseed crushers, per gallon, in casks, \$2c; do, in bbls, do, \$3c; linseed, boiled and refined, \$8c. We note exports for the week of 180 gallons.

We note exports of 1,455 gallons, valued at \$401.

PAINTS .- If the market shows any change from the con-PAINTS.—If the market snows any change from the condition of last week it is perhaps for the worse that is—in reference to the business done. The whole-ale line is getting gradually more quiet, and there is not so much doing even in a jobbing way perhaps as last noted. But as some of the articles have become very scarce, particularly of foreign make, quotations range firm.

We note exports as follows :-

Past week. Since Jan. 1. 4.017 \$758,91 Packages..... Value \$4,275

PITCH.—Without any change to remark the demand has grown stronger, resins having advanced, at 4.37% @ 4.90 per bbl for city.

SPIRITS TURPENTIFE.—The showing of transactions for the week have been small and a slight falling off in prices has ensued. We quote merchantable at 62c per gall.; hipping order, 63c do; from store, 64c do.

TAR—Has been in better demand, and with a cramped supply has advanced to \$4.75@5; per bbl for Newberne, Washington and Wilmington.

ALBANY LUMBER MARKET.

ALBANY LUMBER MARKET.

The Albany Argas, for the week ending November 28, 1872, reports as follows:—

A cont mance of the present open weather for two weeks longer would enable the boats now on the canals to get through safely, and also give time to complete the shipments from the District for the season. Shipments are now very active and only limited by the supply of barges and canal boats. River freights have advanced one to two shillings per M feet in consequence. Shipments by canal still continue at Oswego, taking the risk of being caught by the ice. Lumber now going across the lakes will be piled up at shipping points. About this time the last year the canals were suddenly closed, but those who place relame con the changes of the moon look for mild weather till December 10.

There have been large sales during the week chiefly to New York dealers; some Boston men have been here, without making purchases, there being no margin between Albany and Boston markets. Ash and wahnut are most needed at Boston; the former being largely used for counters in the dry goods establishments, and walnut (which in the rebuilding of Chicaco has been largely used in the finishing of first-class boxes and buildings) has become scarce and in demand, and higher rates are asked. An active demand for these and other kinds of lumber is expected in Boston before next spring.

From present appearances and at the rate shipments are

for these and other kinds of lumber is expected in Boston before next spring.

From present appearances and at the rate shipments are being made, stocks in the district to be wintered over will not be so large as anticipated. Prices remain without change. The receipts by canal are now up to those for the entire season of 1871.

The receipts at Chicago so far this season are 1,146,000,000 feet.

The receipts at Oswego during the week were 3,427,000 feet; at Buffalo 2,147,000 feet.
The receipts at A.bany by the Erie and Champlain conals for the third week of November were:—

Bils. & Sc'ti'g, ft. Shingles, M. Tim'r, c.ft. Staves, lbs. 1872... 13,007.800 129 129 1871... 11,514,000 10

Of the boards and scantling received, 7,4!9,100 feet were by the Erie, and 5,558,700 feet by the Champiain canal.

canal.

The receipts at Albany by the Eric and Champlain canals, from the opening of navigation to November 23d, Bds. & Setl'g, ft. Shingles, M. Tim'r, c. ft. Staves, lbs.
