ONE YEAR, in advance - - "- - - \$6.00

Communications should be addressed to

C. W. SWEET, 137 Broadway.

J. T. LINDSEY, Business Manager.

The talk about Manhattan Company borrowing money to pay dividends is nothing but twaddle. The Manhattan Company pays no dividends, never has, and if the present direction is kept in power, never will. The Manhattan Company has a lease of the New York and Metropolitan Elevated Railway Companies, and their property, for which it pays a rental equivalent to 10 per cent on the respective capital stocks of the two companies, and after this is paid, the New York and Metropolitan companies declare their dividends.

The Manhattan has as clearly a right to borrow money, if it can find people willing to lend it to pay these rents as any company or individual, and there is no law against it.

One of the indications of the remarkable interest in real estate, is the large additions which have recently been made to the subscription list of the REAL ESTATE RECORD. With very little soliciting the number of our subscribers has greatly increased within three months time. This, in part, was no doubt due to the reduction in the price of the paper. But quite apart from that, it is evident that thousands of people are interested in real estate doings, who formerly paid no attention to prices or properties. Notwithstanding the few and unimportant offerings, the Real Estate Exchange is crowded whenever there is a sale. The list of conveyances is surprisingly large for this time of the year and the official plans for new buildings tell their own story of the wonderful activity in the construction of new and costly houses. Stocks may be dull, general markets inactive, but real estate transactions continue large. While there is no boom or excitement prices steadily tend upward.

On Fourteenth street, just east of the Union Square theatre, some candy stores, stables and barber shops have been changed into stores suitable for first-class retail business. It is wonderful that property holders were so long in finding out the value of Union Square and Fourteenth street for retail trade. The great majority of the street cars from east and west, as well as from north and south, pass by Union Square. If the calculation could be made, we think it could be shown that there are more people passing through Fourteenth street from Sixth avenue to the Bowery, than on any other street of equal length in New York. The crowd embraces more women than men and are nearly all of the buying class. No doubt, the time is coming when every house on Fourteenth street between Sixth avenue

and the Bowery, will be either a store or place of refreshment, for no city improvement is likely to diminish the crowds that throng on that 'horoughfare.

The application for a portion of the Park to accommodate the Brooklyn Bridge approaches, is having one good result. It emphasizes the necessity for a new Hall of Records. The present building is in every way inadequate for the storing of the records which are so vitally important to property holders in this city. Real estate transactions are now so large that the records are becoming voluminous, and require a large, roomy, incombustible structure in which to store them. It should not only be fireproof but mob proof. By all means let the Brooklyn Bridge people have what they want, for if it involves the removal of the Hall of Records, so much the better for the real estate interest.

RAPID TRANSIT ON TERRA FIRMA.

The approval by the Governor of the amendments to the Beach charter for an underground road, makes it possible that in addition to its elevated road system, New York may soon have underground transit from the Battery to the Forty-second street depot. The Central underground road may be considered as a "dead cock in the pit." It has done nothing but publish extravagant programmes in the newspapers, for the last seven years. Even if it could raise the money to construct the work, it would be objectionable from every point of view. After the pleasant open air traveling on the elevated roads, our city people would not be willing to ride in a dark underground tunnel. But as we understand it, the amendments to the Beach charter admit of the building of an underground street, the traveling on which will be as pleasant as in the open air. It is, in fact, the old Arcade plan revived, and if constructed, would give the city a new Broadway under the pavement of the present avenue. There will be room for through as well as way trains; baggage and freight could be transported without difficulty. It will admit of sidewalks for pedestrians, and ordinary vehicles can travel it, thus relieving the present Broadway surface of its swollen traffic.

Admirable as is our system of elevated roads, it does not give us rapid transit. The time from South Ferry to the Harlem River, on the east side elevated, is forty-five minutes. From Forty-second street to One Hundred and Twenty-ninth street is twenty-seven minutes. Contrast this with the sunken track of the Harlem road, from Forty-second street to Morrisiania, making all the stops, the time is only eighteen minutes. On the Hudson River road, from Forty-second street to Morris dock, just this side of Kingsbridge, the time is seventeen minutes, making all the stops on the so-called Dolly Varden trains. In other words, steam traveling on terra firma is about three times as

for the annexed district, therefore, is some communication to the lower parts of the city on a surface underground track, with a roadbed that would accommodate freight and packages as well as passengers. The proper persons to build the Arcade road below Forty-second street, would be the Vanderbilt family or some of the leading stockholders in the Central and Hudson River road. It would be an indisputable benefit to New York were this work undertaken, and would not interfere with the elevated roads, which would have an abundance of work to do in conveying passengers on the east and west sides of the city. But so long as the trains make numerous stoppages, it will not be possible to give the district north of the Harlem River the rapid transit demanded by those who wish to reside in the upper wards and to do business on the lower part of New York island. It ought to be possible for a passenger to take an underground car at the corner of Broadway and Wall street and be carried five miles beyond the Harlem River, by way of the Forty second street depot, within thirty-five minutes. When this can be done, the annexed district will fill rapidly with population at the expense of Brooklyn and New Jersey.

But a tunnel is not to be thought of. A well lighted and ventilated underground street, which would make Broadway the most valuable property on earth, is what is needed. It would pay the Broadway property holders five times over were they to construct such a sub-street. But they have shown such extraordinary blindness as to their own interests in times past, that this work is not likely to be done by them. Nor is it probable that the Vanderbilt's will undertake the work, although it is clearly in their interest so to do. We fear the Arcade scheme will not be realized right away, from the difficulty of getting the necessary capital.

THE CROP QUESTION.

Colonel Grosvenor, of the Public, has given a good deal of consideration to the wheat crop, and his conclusion is that it can not be much, if any, less than last year. He admits there will be some deficiency in the winter wheat crop of the Middle States, but the spring wheat of the northwest will more than make up for this deficiency. He shows very conclusively, that the National Miller's Association, whose prediction that the crop will be 150,000,000 bushels short, has been widely published, made similar statements last year and the year before at this time, and that they unconsciously work in the interest of the bulls in wheat. Foreign crops, it is admitted, will be good, so wheat is destined to rule low whether we have a large or only a moderate harvest.

Kingsbridge, the time is seventeen minutes, making all the stops on the so-called Dolly Varden trains. In other words, steam traveling on terra firma is about three times as fast as the elevated roads. What is needed uigh figures in the northwestern stocks, for

the immigration is very large to that region, and the railroads will do a very good business, quite apart from the carrying of grain.

The corn crop at date does not look promising, but a warm July and August may change all that. We are now assured of a large grass and hay crop and an abundance of oats.

We make those observations on the crops, because a short or an abundant yield has its effect upon New York and upon real estate values. Nothing can prevent an advance, but an immense crop would help our real estate, as it would all of the business interests of the metropolis.

ELEVATED ROAD FINANCES.

The *Evening Mail*, under the inspiration of Cyrus W. Field, publishes the following figures:

Deficiency three months...... \$128,4

\$1,300,308

\$1,472,838

If to this amount is added a proper charge for passengers transferred at Chatham square, improperly credited to the Metropolitan road, the actual deficiency is increased to \$206,472, or but \$16,028 in excess of the interest on their funded debt, an amount more than absorbed by damages, legal expenses, and other incidentals.

Deficiency combined roads..... \$172,530
For the six months ending June 30, this deficit
will amount to \$377,000, the increase being
attributed to the lessened traffic of June and
additional issue of second mortgage Metropolitan

bonds.

Adding the deficiency existing January I, the total amount to be provided July I will aggregate upwards of \$622,000, exclusive of all taxes, damages and legal expenses. It may reasonably be expected that the ordinary increase of business on the united lines will fully offset the percentage of decrease natural to the summer months, and the net earnings of the coming six months will equal those of the past. This, in the absence of any extraordinary expense or accident, would leave a deficit

This is not a very good showing, but it should be remembered is from a hostile, if well-informed, insider. Mr. Field wishes to discredit the same securities which, a little over a year ago, he sold as a great bargain on our stock market. We believe in the elevated system, and are informed that the business of the roads is largely increasing. At the present ratio of increase, it will not be long before the elevated roads can meet all their fixed charges. These present troubles will possibly result in the issuing of an income bond to tide over the next couple of years, and, in the meantime, the roads will doubtless advance the fares to the legal limits, so as to realize all that their property is capable of producing. present extravagant taxation must be lightened and the expenses of litigation cut down. It is not to the interest of New York that the elevated roads should be crippled or made unprofitable. The benefits they have conferred on the city have been incalculable.

They have added largely to the taxable property of the metropolis, and have added thirty per cent. to the value of property above the lower line of Central Park. A road on terra firma, from the Battery to Forty-second street depot, is needed to give us rapid transit to the other side of the Harlem, and also to afford a railway avenue, so that freight, trunks and parcels can be delivered along the route from the Grand Central depot to the lower end of the island. For many years to come, the inter-mural travel of New York will be monopolized by the elevated railroad system, and every wellwisher of the city must hope to see the time when the Manhattan Company will be out of its troubles, and the stockholders making reasonable profits.

SPECULATION ABROAD.

Louis J. Jennings, formerly editor of the New York *Times*, writes an interesting letter to the New York *World* about the speculation now so prevalent in England. John Bull has a speculative fit just now, and he is dealing in securities which are very dangerous. The newspapers are particularly profited by the vast number of new companies which are asking the public support. Mining shares are once more popular on the London market, but of course, American securities are the prime favorites.

There can be but one end to this mania; there will be an explosion and investors will make heavy losses. When this shrinkage occurs, prices on this side will be seriously affected, for a great many American securities will be sent back for sale. It does not seem likely, however, that the speculative bubbles are to be pricked right away, and so our bulls need not fear an immediate flood of stocks from abroad. But prudent people will take warning and not be heavily in debt when the time comes for realization.

By all means let us have another aqueduct. We cannot have too much pure, good water. We are indebted to "Boss" Tweed for the splendid water supply now available for the use of the city. But this excessive water is now wasted by running over the dam into the Hudson River. It is quite true that New York at present has a great advantage over other cities, in the supply of available water. But as this is becoming a city of tall houses and vast hotels, we need all the water we can get, for manufacturing and domestic purposes. What if an aqueduct should cost a good deal of money? It would save in another way, had we more water. Now families are forced to have hydraulic pumps, tanks and other apparatus to force water into the upper stories and provide against fires. These outlays in the aggregate amount to a very large sum, and are an enormous as well as a needless tax upon householders. New Yorkers are the cleanest people on earth. In no other city is there so much convenience for bathing and washing. Even our humblest residences have bath tubs. With another aqueduct we can be lavish of water and get rid of meters and water cutoffs. Then, cheap water is of vital importance to manufacturers. Some of our large lager beer establishments are now forced to depend upon deep well borings for their water supply. But another aqueduct would render such expense unnecessary hereafter. There is plenty of water this year, on account of the excessive snows and rains of aqueduct is constructed, we will doubtless have a return of dry seasons. By all means let us have the new aqueduct.

Cyrus W. Field does not appear to advantage in his present crusade against the elevated railroad securities. He made his millions out of our elevated railway system, and through his representations Manhattan and elevated road stocks were purchased by credulous investors at very high figures. Ever since Mr. Field sold out his Manhattan, at between 60 and 70, he has striven, in season and out of season, to make that stock valueless. He has been using the Evening Mail lately, to injure the financial reputation of the elevated roads, and has gone so far as to attack the motives of certain bankers, who have been trying to tide over the difficulties of the companies and save some of the money of Mr. Field's victims. Cyrus ought to be called Shark Field.

The World is now the avowed organ of Jay Gould. That great operator is erecting a building for the World and is known to be the owner and inspirer of its financial articles. Yet only a few years ago the financial columns of that paper were worked to discredit Jay Gould and all his financial operations. Mr. McDonald, the then financial editor, seemed to have a mania for discrediting the operations of the great bear speculator. Duncan and Sherman were supposed to be behind the World at that time. The panic of 1873 found them long of stocks and engaged in enterprises which required large sums of money and a buoyant market to carry through. They were bulls all through the years 1873, '74, '75, '76. During this time Gould was attacking the market and the World was denouncing him and his methods. But the great little speculator was wiser than his critics and those who followed the World lost their money. It would be curious to read some of Mr. Mc-Donald's old articles in the World, side by side with those which now appear.

Commissioner Thompson, of the Department of Public Works, calls the attention of the Board of Aldermen to the unprecedented demand for the extension of the water service in the upper part of the city. This means that building is phenomenally heavy up-town, which makes a constant demand upon our supply of water, and which is another reason why we should have a new aqueduct. He also points out the urgent necessity for larger mains down town, in order to help put out fires in the immense stores, warehouses and factories recently constructed and under way. Why not erect towers to draw water from the rivers, so as to extinguish fires in tall buildings. It seems Commissioner Thompson has still \$176,000 to spend on laying croton water pipes this year, but he wants it all, and more, to meet the public necessities.

With another aqueduct we can be lavish of water and get rid of meters and water cutoffs. Then, cheap water is of vital importance to manufacturers. Some of our large lager beer establishments are now forced to depend upon deep well borings for their water supply. But another aqueduct would render such expense unnecessary hereafter. There is plenty of water this year, on account of the excessive snows and rains of last winter and spring, but before the new is for the elevated roads to declare and offer to pay a dividend, and for the bondholders to stop the payment by an injunction, it follows there can be no formal default, and litigation can be kept up until such time as the properties become self-supporting or arrangements are made for reducing the interest. If Manhattan had defaulted, then the charter would have expired within ninety days; but the legal proceedings will stop the payment of dividends on

these lines, and keep alive the charter of the Manhattan company. We have never believed that the Manhattan would cease to exist. The formation of that company was an admirable device for working all the elevated lines under one organization, and we believe that company will exist as long as the elevated roads themselves.

REAL ESTATE AGENTS' CONVENTION.

The following has been published:

The following has been published:

I would be pleased to hear from all real estate brokers and agents in New York State relative to the calling of a Real Estate Convention for the purpose of organizing an alliance or union, stating their ideas in regard to the matter, and their choice of time and place of said convention, in order that a call may be issued.

Address.

C. F. Barlow,
Canastota, N. Y.

We do not know that this call amounts to

We do not know that this call amounts to anything or that it will result in any united action. It will be just as well, perhaps, for the rural real estate agents to meet with a view of establishing rates and putting the commission business on a more business-like basis. How would it do for city real estate brokers to hold a meeting, so as to put a stop to commission cutting, and to provide for the very active market which every one expects next fall and winter. Why not a Delmonico dinner to commence with?

THE PROSPECT FOR JULY.

[Conversation between a Bull and a Bear.] Bear-I have been telling you all along that prices were too high. The figures asked for what Sam. Ward calls the "demi-monde" stocks were out of all proportion to their prospective value,

Bull-I don't see the crash. There has been a natural hesitancy in the market after a strong upward movement; but I see no evidence of a stampede, but every assurance that after the holidays there will be a decided upward movement.

and a crash seems to me inevitable.

Bear-Now don't tell us the old story of large immigration, cheap money and the \$90,000,000 that is to be reinvested between July 1 and September 1. We have heard all this a thousand times, and the effects expected have been discounted in prices. Then, keep in mind the crop question.

Bull-Well, what have you to say about the crops?

Bear-This much. For the last three years we have had very abundant crops, and if we should have an average yield this year it will seem small in comparison, hence there is certain to be disappointment and lower prices. Then there is sure to be an immense crop abroad, while some circumstances point to a serious deficiency throughout this country. The season has been backward and tempestuous, and while the abundant rains have secured us a good grass and hay crop, it may give us a poor yield of wheat and is almost certain to reduce our corn crop to an unusually small proportion.

Bull-What else have you to urge?

Bear-General business is so active; there is so much building going on, that I apprehend the spare money of the country will be turned in directions than in stock speculations. Money has been cheap because it was unemployed, and there was no speculative demand for it in anything else than stocks; but the stimulus given to house building, land buying and the opening of manufactures, as well as the large sums required for the wages of labor, will withdraw it from Wall street and will cripple the stock manipulators, hence I look for a rising money mar-

Bull-If your prognostications turn out to be correct, then I assert that the whole market is a buy. Crop or no crop, if the general business of the country is good our railways will have all they can do in moving passengers and products. Their receipts will be swollen, their dividends larger and prices must advance. You say all the

bull arguments are old, but they are none the less potent for all that. In addition to the 600,000 immigrants who will land here this year, there is the large natural increase of our own population This alone insures an added return to all the railway traffic of the country. It is true that between \$85,000,000 and \$100,000,000 will be disbursed by the Government between July 1 and August 12. This cannot but advance the price of stocks. Every new supply of money to the street means higher prices. I am willing to admit that there may be some disappointment about the crops; but wet seasons generally give us good crops, for our country is generally too warm and dry in summer time. I willingly grant the corn crop may not be extensive, but we have a large surplus left over, and, at the very worst, we produce vastly more than we can There will doubtless be good crops abroad, and this will insure cheap food, which will in turn stimulate all other industries.

Bear-Go ahead, it is the old story; have you nothing new?

Bull-What do you think of this point? It is conceded that a great deal of our bonds and stocks are held in England. Now it is a peculiarity of the English investor, and one which can be depended upon, that whenever he makes a profit or draws a dividend from a particular stock or line of stocks, he always reinvests in those same securities. Exchange has been weak recently, because of the large sums which it is known will be used in England to purchase stocks immediately upon the opening of the new fiscal year. The first of July will see a vast amount of money released both in England and in this country. It belongs to an investing class who will not let it lie idle. Hence I look for a heavy investment movement early in July.

Bear-But you forget the doubt about the crops. If there should be a serious disappointment we cannot keep up the present prices.

Bull.-Now, as to the crop question. Good harvests abroad mean prosperous times: having less money to pay for food, the people of Europe will buy more of our cotton, petroleum, and miscellaneous articles. More than that, they will keep on buying our stocks, because they have proved profitable and will continue to do so. America is the promised land to the European; westward the star of empire, as well as prosperity holds its course. No, I insist that good crops abroad eventually mean better times there, and heavier purchases of our securities.

Bear.—Another point. To sustain a bull market there must be a constant supply of precious metals from abroad. Whenever we were in receipt of gold from Europe our stock market advanced; as soon as it ceased, our stock market declined. I cannot find a financier whose judgment is worth anything, who anticipates the United States drawing gold from Europe during the coming fiscal year. Europe will not need so much of our wheat and flour, and we will import much more largely next year than we did last. As a consequence, bullion may leave our shores instead of coming this way.

Bull-Well, Mr. Bear, say what you will, I propose to buy stocks. I am long and propose to stay long of the market. This is a bull country and we live in a bull age. The chronic bear is sure to lose money in the long run, for our securities are getting more valuable daily, due to the increase of the country in population, trade and wealth. An American railway that pays 6 per per cent., is better than one in Europe that pays 6 per cent., because an American road has a margin for an advance, which that of Europe has not, because of the small relative gain in wealth and population. On one point, I think we will both agree, and that is that poverty will not haunt the door of whoever buys real estate at present prices, in New York and its vicinity.

Bear-Yes, we agree on that point. Real estate and land generally is all right, but stocks are a sale, and don't you forget it. (Exeunt.)

On Monday next, July 4, the Board of Aldermen will convene to receive the tax levy for the year 1881.

MINING INFORMATION.

The price of Standard has gone off, upon the discovery that all the large holders have sold out. We know nothing against this property, and have been assured by the officers that it has two year's dividends of seventy-five cents a month, in sight, with every prospect of discovering other valuable ore bodies within that period. But the awkward fact remains that Lent and all the leading officers of the company own few or no shares. The stock is in the hands of women, and investors who know nothing of its merits, and then so much has been taken out of the mine, that it is in order for conservative people to ask if much more remains. The bulk of the rich ore has been taken out above the 500 foot level, and it is barely possible the mine may prove productive 3,000 feet down. The cross cutting is now from the 1,000 foot level. peculiarity of the mine is that all the very rich ore, which pays the dividends, is taken from one body of rich rock on the 385 foot level.

Bechtel is rising in price, and, with reason. Some of the Standard ore ledges run into it, but it may never pay dividends. At last accounts, the Noonday mill was crushing some of the Bechtel rock; the ore is believed to be low-grade.

Whoever buys Oro, Mono, Bodie, must expect to pay assessments, but there is a chance for an advance in all these mines, as well as for Addenda.

Clark & Bothwell are very lucky and successful with the mines they put on this market. The Hite mine is a very remarkable one, and has already paid out \$3,000,000. It is a great body of low-grade ore, which may be good for ten vears to come. The Star Grove mines, belonging to the same firm, have proved very successful. So far they have treated their customers well. They also own the Stormont, but we doubt whether they will ever succeed in inspiring permanent public confidence in that propertv.

The officers of the Bull Domingo still insist that the mine looks well and will yet pay dividends. They admit there was barren ground on the 250 foot level, which created a bad impression, but they declare the 350 foot level is all right. have published what large owners of this company have told us, and their stories have generally been pleasant ones. But, as the information we got last week, outside of official sources, is authentic, we incline to the belief that the Bull Domingo is a disappointment, and may never pay a dividend.

The Silver King mine of Arizona shows how some of the best experts can be mistaken. A syndicate of mining capitalists sent Colonel John F. Boyd to examine this mine. He did report against its purchase. He is one of the most conscientious and careful of experts. But the mine has turned out to be a wonderful one; its stock is over 20, and the promise of the mine is as great as any on the Pacific coast. Its only danger is that rascals may be able to control the management of the mine. That is generally the case when the mine is a good one. Of course, we don't know anything about the present officers, but about the mine itself there is no mistake

The Park County Reduction Company offers to sell 400,060 shares at \$1.50 per share. By the terms of the advertisement it looks like an attempt to sell the mills and other property of Moose Mining Company at a very high figure The Moose mine has always been managed to skin the public; the stock has sold as high as \$9, and as low as 40 cents. Its officers have been prolific of promises, but it has paid very few dividends. We should say the shares of the Park County Reduction Company would be a very good thing to leave alone.

The Bank of California will soon open a transfer office for the celebrated Eureka mine of Névada. This property is a great bullion producer, and will, no doubt, pay dividends for a good many years to come. It adjoins the Richmond, the richest mine in the world, owned by Englishmen. The Eureka has paid as high as \$3 a month dividends, but is now paying but 50 cents. But those who know say it will pay dividends for many long years.

There is a great deal of swearing at the chief manipulator in Hibernia. He is known to be a common fellow, who by the merest accident became rich. Hadn't he been an operator in mining stocks, he would probably have been in State prison long since. But a man can do in railway and mining shares with impunity, what, if done in other business, would promptly get him into prison as a common thief. Even the Tribune mining column, in which every swindling mining scheme is practically endorsed, if they advertise, is forced to denounce the Hibernia operator.

There is a great depression in the mining mar-The outside public are discouraged, for everything they subscribe for or deal in is sure to go down. It is loss, loss, loss, all the time. manipulators are killing the goose that laid golden eggs. The public are not allowed any show; they The history of are swindled from first to last. mining ventures in this market is one of unbroken disaster to those who put in their money on the faith of representations made. We have an abiding faith that mining will prove to be one of our most permanent national industries. the territory, the skill and the capital which will insure an enormous bullion production for centuries ahead. But this legitimate business is being discredited by the swindlers, who are deceiving the public through our mining boards. are some few properties which have proved very satisfactory, Ontario, Homestake, Standard and But nineteen out of Green Mountain properties. every twenty schemes seem to be pure swindles.

The first evidence that we have seen of any value to the State Line mines is the letter of Captain H. J. Hall to the New York Tribune. Hall was once a very large holder of Standard, but he sold out some time since. He is very cautious in his investments, and when he says that State Line is a "grand, good mine," and requires only water, his testimony is of value. But it should be understood it is only Two and Three that are of any value; Oriental and Miller are mere prospects. But the manipulators of these State Line mines are a dangerous lot, and then sufficient depth has not been achieved to make the mines a certain thing. Water has to be brought for fourteen miles through a pipe, and the country is almost inaccessible.

The Mining Board people are very blue over the failure or postponement of a boom in Bradshaw and Washington. These are Keene's properties, and it was supposed he would get up a splendid deal in them, but so far he has failed to come to time, and there is a great loss of prestige in consequence. Had he succeeded in making Bradshaw profitable, he could have floated any property on the New York market. But during the last two years Keene has shown an astonishing faculty for blundering or worse.

The annual report for the Bodie mine is in this city in manuscript. Over 5,600 tons of rock have been taken out of that mine, which produced some \$440,000 in bullion, mostly gold. This was merely the workings of the old levels, without attempting to open new ones. The Lent shaft is down some 630 feet, and when cross-cuts are being run to the ore body, there will be violent fluctuations in Bodie stock. It is a good stock to leave alone for several months yet, ditto Mono, but they will be a purchase some day.

The Tower Consolidated is the name of a new company, the stock of which is being placed in this city by William M. Lent. It embraces two mines, and has a 10-stamp mill, but needs money to sink a shaft. It has 200,000 shares.

Colonel Robert Ingersoll, the well-known antitheological lecturer and political speaker, is one of eleven persons who have purchased the Ivanhoe mine of New Mexico. At a depth of some 80 feet some very rich mineral has been found, and the Colonel and his friends think they have got the greatest bonanza on earth. The eleven co-partners could sell their purchase at an enormous advance, but, as old mining men know, there are ninety-nine chances in a hundred that Ingersoll and his friends will be disappointed. Specimen mines, as they are called, rarely amount to much. Nature is rarely lavish, and the discovery of very rich rock is a warning that very little of it is to be found. The great productive and valuable mines are low grade, such as the Homestake, Father de Smet, Deadwood Terra, Richmond, Eureka, and the like. No doubt other Comstocks will be discovered in the course of a few years, and Colonel Ingersoll's party may have found one of them, but they had better commence to develop their mine and get their mill to work before indulging in jubilations.

ABOUT COPPER.

This metal is selling for 16½ cents a pound, within one of the lowest point it ever reached. In 1874 it sold as low as 15½ cents a pound; in 1863 copper was quoted at one time as high as 46 cents a pound, and in February, 1880, it was strong at 25 cents a pound. It is hard to say why copper should just now be so cheap. The consumption is estimated at 60,000,000 pounds per annum. In 1878 48,000,000 pounds was considered a high estimate. The production of copper is falling off in Chili and Australia, but has largely increased in Spain.

In some quarters it is supposed that the production of Arizona copper accounts for the fall in price. But in Arizona there is more promise than performance. That territory produces today about 5,000,000 pounds per annum, which is a drop in the bucket. The extraordinary performances of some of the Arizona mines are so far mostly on paper and are intended to market the stocks of the companies having shares to sell. The coke to smelt the Arizona copper has to be brought from San Francisco at a a cost of \$27 a ton.

Not only is the demand for copper greater than ever before, but the prospective demand, both here and in Europe, growing out of the electric light, promises to be incalculably large. In a little while an effort will be made to light all the great cities of the world simultaneously and large quantities of copper will necessarily be used. Then it seems likely that all products, both crude and manufactured, will be marked higher next fall.

IN FAVOR OF THE THIRD AVENUE ROUTE.

At a meeting held Thursday evening by the citizens of the Twenty-third and Twenty-fourth wards there was upwards of \$3,000,000 worth of property represented, according to the statement of S. S. Randall. The following gentlemen conducted the business of the meeting: James L. Parshall acted as President, Sidwell S. Randall as Secretary and John Kerby as Treasurer. The speakers were generally in favor of an elevated road from Harlem Bridge along Third avenue to One Hundred and Seventieth street, the northerly line of the Twenty-third ward, thence to connect with the West Side elevated lines by a surface or elevated road and by a surface branch from Tremont to the village of West Farms. It is about twelve miles from the City Hall to Fordham, and the speakers claimed that they have been neglected to their detriment. About four and a quarter miles, including the surface road, will have to be built. It is claimed that the road can be built for \$350,000 a mile.

Only a short time ago it could have been constructed for \$109,000 a mile. It is thought that the road can be completed in eighteen months. Fifty-three citizens have taken oath before the Judge of the Supreme Court that such a road is necessary. One speaker said unless this road was built that on the completion of the Brooklyn Bridge Brooklyn will get 50,000 people that this district ought to have. This whole region was laid out with special reference to people of moderate means. It is destined to be the home of the middle class. Hon. John B. Haskins argued that an elevated road would benefit a surface road. This ought to have the more weight, as he is a stockholder in the present surface road. He claimed that the Third avenue line was the most feasible and natural route that could be had. For his part he was willing to subscribe \$25,000 towards building an elevated road.

THE ASSESSMENT COMMISSION.

The Commission met on Thursday last and transacted the following business:

In the matter of the application of James W. Pinchot to have the assessment removed for the laying of the Nicholson pavement on Forty-third street, between Third and Fourth avenues. evidence showed that the wood pavement laid in 1870, at a cost of about \$6 per square yard, became rotten in a few years, and that a stone pavement had to be substituted; the attorney for the petitioners endeavored to introduce testimony showing the actual cost of the wood pavement laid, but the corporation counsel objected on the ground that it was irrelevant and immaterial. which objection was sustained. It was understood that the witness would have testified that the pavement could have been laid at a cost of \$2.75 per square yard with a profit.

The matter of Charles Loughran, as to the assessment for regulating, etc., Fifty-first street, from Sixth to Seventh avenues, was next considered. The petition showed that before any of the work was done by the city, he had laid at his own expense the curb gutter, and flagging in front of the four lots owned by him, on the northeast corner of Fifty-first street and Seventh avenue. The contractors claimed to have done the same work. The expense was included in the assessment charged against the property, thus making a double charge for the same work. The petitioner asked to be relieved from this portion of the work.

In the matter of August Belmont as to the assessment for regulating, paving, etc., of Seventh avenue, from One Hundred and Tenth street to Harlem River, the testimony taken in the matter of Sherwood was made applicable, the same questions being involved.

In the matter of Orlando B. Potter relating to the assessment for paving Eighth avenue, from Fifty-ninth to One Hundred and Twenty-fifty street, the petition asked for reduction of the assessment on the ground that a portion of the expense should have been charged upon the property owned by the city, namely Central Park, and also upon the Eighth Avenue Railroad Company, for the pavement laid in and about their tracks. Without finishing this case the Commission adjourned to 2 P. M., July 7th, 1881.

Judge Lawrence has made an order extending the time for the receiving of evidence before the Assessment Commission until February 1st, 1882, and the time for rendering decisions until May 1st, 1882.

ABOUT UP-TOWN STABLES.

If the owners of fine turnouts who reside in the handsome mansions, between Fiftieth street and the Park, were aware how scarce desirable stable property was getting in that locality, it would not be long before the few stable lots and vacant stables would be purchased. The price as well as the rental of this class of reality is advancing and in fact already commands what to most people would seem extravagant prices. The one built by the Lynd Brothers in Fifty-fourth street, 25x 97x100.5, being held at \$30,000. A stable was recently sold in Sixty-third street, between Fourth and Lexington avenues, for \$22,500.

The rental for stables in this vicinity varies from \$1,000 to \$1,800, the ones to be obtained at the lower figure afford but the poorest accommodations.

The bulk of the vacant property on Fifty-fifth street, between Sixth and Seventh avenues, is held by parties who will not sell, but build stables and lease them at a figure that yields a large return upon the money invested.

What remains of the Jumel estate has been ordered sold by Judge Barrett. This estate has been in litigation since 1865, when Eliza Jumel died. The lawyers have judgments against the property amounting to about \$250,000. Charles O'Connor had \$75,000 and James G. Carter \$100,000. The estate embraces three lots on the northeast corner of Broadway and Liberty street, several hundred lots on One Hundred Land Six-

tieth street, between the Hudson and Harlem rivers, and several lots in Saratoga County. One of them is within a stone's throw of Broadway in Saratoga. All the encumbrances, taxes, assessments and liens amount to nearly \$500,000. The sale of this property will create a great deal of interest, due to the historical associations connected with it, and the length and notoriety of the litigations.

A resclution passed by the Common Council sometime since looking to the filling in of the low and sunken lands between 143d and 155th streets and 8th and 9th Avenues, may soon take shape as City Surveyor William V. Smith has filed, at the Department of Public Works, maps and plans for the work. Fifty years ago this property was all under water, but of late years, it has assumed a marshy and muckey form. The resolution calls for the filling in to the extent of five to seven feet above high water, and will make, not only the property so filled in available for business pur poses, but will relieve the surrounding premises from malarial influences.

The new building to be erected at Nos. 14, 16, 18 and 20 Broadway, and running through to Nos. 5 and 7 Beaver street, will cost \$550,000. It will be 90x80x150 feet, with an "L" on Beaver street 50x100 feet, and 10 stories in height, with Mansard roof. It will be constructed of brick laid in concrete. H. H. Hunnewell, of Boston, is the owner, and W. Pell Anderson, of New York, the supervising architect. The first notice of this building appeared in The Real Estate Record of April 16.

It seems there were 4,565 meters in use in this city on the 1st of June last. The Worthington water meter, which people are required to use, is not now a patented article. Until we have a new aqueduct it is essential that some measure should be taken to put a stop to the waste of water which has been so common during the last ten

From the Public, June 30. A SHAM FIGHT.

But, in any case, the so-called war of rates. But, in any case, the so-called war of rates, whether it is arrested now, or prolonged in order to cause a greater depression later in the season, must be regarded as essentially a stock-jobbing operation. It had no adequate cause in the competition between rail and water rontes. It would have been a piece of folly, if designed to recover for the Vanderbilt roads traffic which they were being. It recover for the Vanderbilt roads traffic which they were losing. It was a struggle between railroads which are, and for some time have been, substantially controlled by the same men. Mr. Gould and Mr. Vanderbilt have common interests in too many railroads to be engaging just at present in any other than a sham fight. They visit each other quite too often for deadly foes. But if the dear public chooses to be cheated once more, that is its affair.

NEW MAPS.

Messrs. Spielmann & Brush have succeeded admira bly in the re-production of perfect copies of filed maps, to each of which is affixed the signature of the Register of New York City and County, vouching for their accuracy in line, figure and color. Such a publication is invaluable to real estate agents, lawyers capitalists and land holders. The aim has been to publish only the most important maps, a fact which real estate lawyers have not been slow in acknowledging and appreciating. These are the only certified copies of the valuable maps which are gradually going to ruin in the Register's office. Much valuable time and trouble will be saved, as the lawyer can now make searches at his own desk and readily advise his client in regard to the purchase of property or the placing of loans. It is claimed, by persons most familiar with the Register's office, that the selection has been most judiciously made. Appended to the publications are exhaustive notes, edited by Leonard A. Bradley. The high reputation of Mr. Bradley, and his recognized authority on New York real estate, is amply sustained in this unexcelled work. These notes, touching upon each of the sixty-four maps published, will furnish information relative to the early charters and acts defining properties, and the dates of the early surveys and transfers up to a comparatively recent date. After July 1, the price of these valuable maps will be \$50. In publishing these maps, Spielmann & Brush have conferred a lasting and public benefit.

NEW YORK REALTY AT ALBANY.

[From our own Correspondent.]

ALBANY, June 30,

The bill to provide for the construction of a dock on the battery, between Castle Garlen and pier one, of the North River, for the exclusive use of the Police department, has had a curious career and to-day received its final quietus, by a veto from the Governor and a failure to pass it over the veto in the Senate. This bill as brought here, provided for the construction of a pier at the battery by the Dock Department and when completed, for its transfer to the Police Department for the exclusive use and control of the latter department. When it was under consideration in the Senate, Jacob Sharpe turned up and in the interest of the Twenty-third street railroad, secured the insertion of an additional section providing for the construction of a pier for that company at the foot of West Twenty-third street, on the plea that it was necessary for local commerce and for the landing of excursion boats. With that amendment it passed the Senate. Previous to this an arrangement was made between the Dock Department, the representatives of the Twenty-third street railroad, and the Erie railroad company, which has the lease of ferry slips at West Twenty-third street, whereby certain dock room was to be set apart in that vicinity for local commerce and the landing of excursion boats, the location of the pier for that purpose agreed upon and its construction included in the plans of the Dock Department for that section. While it was being constructed a temporary arrangement was agreed upon for the accomodation of that traffic.

When the bill reached the Assembly, it was found that it had located this pier at West Twenty third street, lower down than that agreed upon by the Dock Department in the conference with the two interests named, and had actually provided for its being constructed on a line that took in one-half of the upper slip leased to the Erie Railroad for ferry purposes The Eric Company sent a representative here to oppose the bill, while the Dock Department sent a vigorous protest, charging that the Twenty-third Street Railroad parties were acting in bad faith. It was delayed in the Assembly for a month or more, until Jacob Sharpe discovered that he could not pass it in that form, when he consented to a compromise, and the bill was amended so as to locate the pier provided for in the bill, on the same line embraced in the original agreement between him and the Dock Department. With this change the bill, in due course of time, was passed and sent to the Governor. When it reached the Executive, he pointed out that the title referring to the pier at the Battery, taken in connection with its provision for a pier there and at Twenty-third street, made it unconstitutional. A resolution was at once passed recalling it from the Governor, when it was reconsidered, the title changed to comply with the body of the bill, re-passed and returned to the Executive, and the parties interested left for home. The Governor, in examining it, found other objections, vetoed the bill, and to-day sent to the Senate his reasons for

objecting to it, which are as follows:

Two separate propositions are embraced in this bill; both relating to the duties of the Dock Department in the city of New York. The first authorizes and directs that department to construct a pier for the use of the Police Department, to be located between the new pier, number one, North River, and Castle Garden: and when completed, to be set apart for the exclusive use and control of the Police Department. What necessity or justification there may be for the expenditure requisite for this purpose is unknown to me, beyond the representation of the Police Department in its favor. The second proposition is embraced in the fourth section of the bill, prohibiting the Dock Department from proceeding with contemplated improvements on the water front between Twenty-second and Twenty-fourth streets, North River. Against this provision the Dock Department makes emphatic protest, sustained by what appear good and substantial reasous.

The commissioners of the Dock Department

reasons.

The commissioners of the Dock Department represent that "the permanent improvement of the water front between Twenty second and Twenty-eighth streets is in rapid progress of construction, providing for the two hundred and fifty feet River street and six new piers greatly increased in length and width, four of which are now building. The contract for another is to be awarded to-morrow; while the location for the other near Twenty-third street has been agreed upon with the parties interested, and the lines been approved by the Commissioners of the Sinking Fund, as required by law. If this bill becomes a law, the city would loose one pier at Twenty-third street, the rental value of which would be thirty thousand dollars per annum. The most unfortunate leature of the bill, however, is, that it will absolutely stop the construction of the new bulkhead between the points named, a distance of about six hundred feet, thus interrupting an elaborate and well considered plan for the improvement of the North river water front, which, under the sanction of previous legislation, has for years been progressing at an expenditure already incurred of several millions of dollars. One of the most important features of this improvement is the uniform River street two hundred and fifty feet wide, upon which large expenditures have been made both above and below the locality in question. To stop the work, as now proposed, would reduce the whole plan to an absurdity and nullify its main object.

In view of expression of this character from officials The commissioners of the Dock Department repre

upon whom rests the responsibility of this great public improvement, it would be manifestly unwise to interfere with its development by arbitrary legislation of the kind proposed. The commissioners, it must be presumed, are competent to form a correct, judgment of the proper course to be pursued under the circumstances; and until it is demonstrated their position is wrong, those having less opportunity of informing themselves as to the merits of the question at issue should heed their advice.

An effort was made to pass it over the veto but

An effort was made to pass it over the veto, but failed, and the bill is dead.

There is another bill that has traveled a crooked road. Early in the session, Mr. Thielman, of New York, introduced a bill relative to sureties of contractors, which was short and simple, and provides that when a contractor, after commencing work under a contract with the city, failed, his sureties in lieu of payment of the bond, might elect to go on and complete the work contracted for, under the terms and conditions of the contract. This passed the Assembly, but was manipulated by the committee on cities in the Senate, and changed to a bill in relation to certain improvements in New York, and in the body of the bill provided in addition to allowing sureties of contractors to go on and complete unfinished work, for the settlement of certain claims on work on First avenue, above Ninety second street, also for the adjustment of a claim on work on West street, which amounted to a considerable sum. As thus changed it was passed by the Senate, but an exposure called attention to it, and Mr. Thielman had it sent to a conference committee, when it was announced in the The conference com-Assembly for concurrence. mittee struck out the West street claim, but retained that on the First avenue work, and in that form both houses concurred, and the bill was sent to the Governor. Representatives of the departments in New York appeared before the Governor in opposition to the bill even in that form, and John H. Strahan presented an agreement for its approval, but the Governor declined to sign it. A resolution was passed recalling it from the Governor. It was yesterday reconsidered, amended and repassed. It now provides as follows:

"The Commissioner of Public Works of the city of New York, the Counsel to the Corporation and the Chief Engineer of the Croton Aqueduct Department are hereby authorized and directed within four months after the passage of this act to ascertain and determine the amount of the work heretofore performed on or in connection with the regulating and grading of First avenue from Ninety-second to One Hundred and Ninth street, the proportion thereof performed by the city and the proportion otherwise performed, together with the fair, just and reasonable value of the work otherwise found by them to have been performed, with whatever interest they consider in fairness and equity should be paid thereon. And it shall be the duty of said Commissioners to certify the proceedings to the Comptroller, who shall on such certification pay to Charles G. Waterbury, his heirs or assignees, on obtaining a release as against all claims arising on or in relation to the contract for the performance of the work. It then shall be the duty of the Commissioner of Public Works to proceed to complete the regulating, grading, curbing and flagging of said First avenue from Ninety-second to One Hundred and Ninth street."

It remains to be seen whether the Governor will or not approve this compromise bill.

An act introduced early in March by Mr. Andrews to amend the law of last year in relation to opening of streets, avenues and public places in New York, which was once report d, subsequently recommitted to the Cities Committee, has been extensively amended and yesterday reported again. The session is being so prolonged that its passage is yet probable. Its principal provisions are as follows:

being so prolonged that its passage is yet probable. Its principal provisions are as follows:

"It shall be the duty of the department or board of the city of New York, having the direction or charge of the opening of any street, avenues or public park or place, to furnish to the commissioners of est mate and assessment that may be appointed in any proceeding to open any street, avenue or public park or place in said city, such surveys and maps as may be required by them in such proceedings. The expense of preparing and furnishing such surveys and maps shall be paid from the street improvement fund, and the amount thereof shall be included in the expense of the opening of such street, avenue or public park or place, and together with the other expenses thereof, shall be assessed upon the parties and persons, lands and tenements benefited by such improvement. The fees of such commissioners of estimate and assessment, exclusive of necessary disbursments hereinafter mentioned, shall not exceed, in the aggregate, the sum of thirty cents a foot for the lineal extent of the street or avenue or the portion thereof so to be opened or altered. The clerk appointed by such commissioners shall receive a reasonable compensation to be allowed by the court, in the manner now provided by law. No costs, charges or expenses of any description shall be allowed in such proceeding, or charged on any lands affected thereby except the expense of the maps and surveys, the compensation of the clerk and commissioners aforesaid, the necessary disbursements of such commission: s for room rent actually paid, but in no case to exceed one dollar per day; and for advertising, printing or posting any

notices required by law, and for any other necessary incidental expense not exceeding one hundred dollars. The provisions of the act are not to apply to the

The provisions of the act are not to apply to the improvement in the Twenty-third and Twenty-fourth Wards.

Engineers from the Department of Public Works have been before the Governor urging the approval of the bill for an aditional supply of pure and wholesome water for the city, which gives all the power necessary for the construction of an additional aqueduct along side of the present aqueduct to carry a supply of water from the Croton Water shed to the city. They presented letters from the special committee of the Board of Fire Underwriters showing its necessity for the better protection of property, and from the Mayor and Health beard urging the approval of the bill as a measure required for the wants of the city, the cleanliness and health of the inhabitants.

The Governor has signed the bill amending chapter 367, of the laws of 1880, for the better laying out and improvement of that part of the city of New York, between Tenth avenue and Avenue St. Nicholas, and One Hundred and Thirty-eighth street continued, and the lands of the Academy of Sacred Heart and One Hundred and Thirty-fifth street continued; and extend the provisions of that act to One Hundred and Thirty-third street on the north, and One Hundred and Thirty-third street on the south.

REAL ESTATE IN THE ORANGES.

Property-owners in Orange and the adjacent localities thereto were fortunate during the commencement of the recent depression in realty that prevailed throughout the greater portion of the United States to find that but little building had been done in the advance of actual demand, and that they were free from the long rows of stores and dwellings often unoccupied, that had been erected in other cities by speculative and reckless builders, and that about the same time the opening of the new tunnel through Bergen Hill by the D., L. & W. R. R. brought the realty of this region within less than one hour's ride of the metropolis, including the crossing of the Barclay street ferry, thus affording a place of residence. healthy, and with almost the conveniencies of our own city, to those who by the panic were driven to seek more moderate rents than could be found in New Vork

From what has been said it will be easy to understand that the rise in the price of realty has as yet been small, as the decline was not disastrous, yet there exists a firm feeling and buyers, this spring, have not been slow in meeting the views of sellers without creating any boom, however.

Building has been going on to a considerable extent among rich men, who were desirous of having homes in either the Oranges or the beautful Llewellyn Park, adjoining its borders. Among those who have recently completed or about to complete their homes are Gardiner R. Colby, whose residence is on Harrison street, and is in the Colonial style, built of Philadelphia brick, with quaint stepped gables.

Mr. Alexander Hudnut, of soda water fame, has erected a magnificent mansion in the Queen Anne style, and the architects, Messrs. Lamb & Wheeler, have excelled themselves in this magnificent example of the now most popular style of architecture. It is stated that the cost of this palatial place was \$130,000. Charles F. Lindes, on Centre street, is a beautiful residence in the modified Queen Anne style, from designs by H. Hudson Holly, who is also making considerable improvements on the residence of Mr. Edward Winslow, of Winslow, Lanier & Co.

In the matter of rentals there has been a slight advance for medium sized houses, those that rent for \$50 to \$75 a month, while large places do not command any increase. Furnished houses are in excess of the demand, caused, it is said, by the backward and inclement season. In West Orange, the reopening of the New York & Greenwood Lake Railroad through to Main street, where has been erected a beautiful little depot in the Queen Anne style, finished throughout in two kinds of hardwood, by the company, who are using every endeavor to meet the comfort and convenience, not only of their commuters, but of the general public, which must soon increase the value of realty both in West Orange and Llewellyn Park, in fact two sales of property in the Park may already be attributed to this fact.

Many reasons combine to make Orange a desirable place of residence, its healtfullness, accessibility, and comparative low rate of taxation, which, though nom-nally \$2.65 per thousand, is really not 1 per cent, owing to the exceedingly low valuations on property placed by the assessors. The macadamized streets, of which there are nearly fifty miles, have all been paid for by the adjacent property owners, to which the small debt of Orange is attributable, it being said that the sale of the Poor House property alone would pay the whole outstanding debt of the corporation.

Mr. Edward P. Hamilton, the well-known dealer in realty in this locality, remarked to the writer that taking everything into consideration he looked for a rapid appreciation of real estate. Nothing written about the Oranges would be complete without some allusion to Llewellyn Park, which immediately adjoins West Orange.

This charming spot was the creation of Llewellyn Haskell, and contains 750 acres laid out in beautiful drives, collections of rare trees, plants, and flowers. It is now a private park, owned by about fifty families, who have erected some of the most magnificent residences in this or any other country. All persons, however, are permitted to drive or walk through here at will, except on Sundays. About three weeks since the owners were compelled to instruct their lodge keepers to shut the gates on the first day of the week, as a number of rowdy persons were in the habit of abusing the privileges that were extended, and now only those wishing to visit friends are admitted.

One of the best known residences in the Park is that belonging to O. D. Munn, the former editor of the Scientific American. But by far the handsomest residence is that now nearing completion, by H. C. Pedder, Esq., of Arnold, Constable & Co. It would occupy a full column of the valuable space of The Real Estate Record to give a detailed description of this palatial home, so we must confine our selves to the principal points of interest. It will be in the Queen Anne, bordering on the Georgian, or Colonial styles, and on the ground floor \$3x56. The basement will be of Connecticut blue stone, the first story of Baltimore brick, the second story and attic in the half timber style.

The first floor contains the reception room, parlor, library, dining room, kitchen, servants' hall and laundry. The upper story contains twelve bed-rooms, billiard room, etc. The rooms are all very elaborately finished in hard wood with bold carving in harmony with the general character of the building, As you enter a spacious carriage porch and advance up the entrance composed of freestone tiles and terra cotta, you approach the main hall, which is finished in oak and will present a very picturesque appearance, it being the special feature of the structure. It will be 25 feet in length, and the distance from alcove back to the staircase window will be 34 feet. The ceiling and wainscoting will be of oak paneling, with an elaborate mantel-piece running entirely to the ceiling. The quaint staircase opposite the main entrance is of mahogany. It is of a rambling character, having several landings, the main one of which is very spacious, containing a clock, newel light and stained glass window, seen alike from the first and second story. The stained glass window is by Payne & Pine, of Orange, and of a very ancient and mythological character. being a master-piece of its kind. The entire building is being erected under Fairchild & Todd, also of Orange, who are executing the hardwood and cabinet It is said that this building has already advanced the value of realty in Llewellyn Park not a little, and its cost when completed will be over \$60,000. Mr. H. Hudson Holly is the architect of this, the finest private residence ever built in New Jersey, and the original style of the building speaks the highest praise for his ingenuity.

OUT AMONG THE BUILDERS.

R. S. Anderson has prepared plans for remodelling the building owned by W. G. Langdon, at 39 Broadway, into offices. It is 26 feet 6 inches on Broadway, running through 200 feet to Church street, and having a frontage of 32 feet on that street. It is to be heated by steam and have steam elevators. The first and second floors will be of iron, and the windows of plate glass. Cost, 30,000.

Work will commence at once on the new Harlem church at the corner of Madison avenue and One Hundred and Twenty-fourth street. It will be 75x105 feet, two stories high and constructed of granite. In connection with the church a chapel will be built. The estimated cost is \$60,000.

On the northwest corner of Ninetieth street and Third avenue, W. H. Browning is going to build three brown stone stores and flats from designs of A. B. Ogden. Two will be 28x60 feet, and one 20x60 feet. They will be four stories high, and will cost \$42,000. Mr. Browning will also erect a four story brown stone apartment house, 28x°0 feet, on the north side of Ninetieth street, seventy feet west of Third avenue, A. B. Ogden is the architect, and the cost \$15,000.

Mr. Ogden has completed plans for two buildings to be put up on the north side of Eighty-third street, 300 feet east of First avenue. The main building will be 25x60 feet, with extension 10x14.8, and four stories in height. The fronts will be of brown stone. Francis McQuade is the owner and the cost \$30,000.

Brooklyn.

On the site of the Elm Place Congregational Church, which was burned down over a year ago, near Fulton street Benjamin Lewis, Wm. Barry, and H. Fay are about to erect a new theatre, 65x137 feet, from designs by Aneuren Jones, of 21 Park Row, New York. It will have two galleries and an auditorium, and cost from \$60,000 to \$100,000.

Mr. Cornelius Donnellen is going to erect stores and flats on the property recently purchased of Charles A. Seymour & Co., on the southeast corner of Fulton street and Grand avenue.

HOUSES COMPLETED AND UNDER WAY. BROOKLYN.

On Jefferson street, between Nostrand and Bedford avenues, twenty-seven flats have been recently completed. They are 20x60 feet, four stories in height, and constructed of brick and brown stone. Each flat will accommodate four families. George W. Brown is the owner, architect and builder.

He also has thirteen more houses on Carroll street corner of Sixth avenue. They are to be 20x55 feet, and four-stories high. They will be built of brick, with brown stone fronts. These houses will rent readily for \$1,200 apiece.

MARKET REVIEW.

REAL ESTATE.

For list of lots and houses for sale see pages vI and vii of advertisements.

There is no abatement in the local demand for real estate. Real estate lawyers, brokers, agents, builders and money lenders, are all actively employed. The Register's office is thronged with lawyers searching titles. The searchers and clerks were never more busy. Day by day sees large additions to the records of sales and there are no signs of any cessation of the activity as yet. On the surface there does not seem to be much doing; there are no large offerings, no partition sales, no speculative cutting up of large parcels for those who want one or two lots, but there is a quiet and heavy absorption of reality of all kinds, which involves real estate, improved and unimproved. on every part of this island. So far, the buying movement has not reached the other side of the Harlem River, nor is it likely to begin there until the suburban rapid transit people commence actual work. But nothing like the present activity has been seen in New York since 1869, '70, and '71. It is true, prices have not advanced to the old figures; but then, those were paper money times. But there is every reason to believe the time can not be distant, when what seem the extravagant quotations of '70 and '71 will appear moderate to purchasers in the near future. In our list of conveyances will be found one transaction which shows how prices advance. On January 27th, F. Heerlein bought a lot on 59th street, 200 feet east of 9th avenue for \$7,550. On June 13th the same gentleman sold five lots on the same street for \$55,000. On June 14th the property was resold to Mr. Charles Van Fleet of Brooklyn for \$86,000. Of course this transaction was complicated with a building loan; but there is no doubt but that the views of holders of property are steadily advancing. A great deal of money is being loaned by trustees at 41% and 5 per cent. It is remarkable how many women's names appear as lenders of money.

There is not much doing on the Exchange this week, but a notable circumstance is the large attendance and spirited bidding in nearly every case.

Bargains may still be obtained at the Exchange salesroom in out of town properties. During the present week Bernard Smyth sold a three-story dwelling, stable and other out-buildings on half an acre of ground, in Plainfield, N, J., for \$1,900, and a desirable residence with ample grounds, located in Jamaica, L. I., the buildings of which were said to have cost \$6,500 to erect. was sold to Mr. A. J. Lynch for \$2,370.

A. H. Muller & Son will sell on Thursday next the three-story brick house No. 70 Jane street.

E. F. Raymond will sell on Wednesday four lots on the south side of Twenty-ninth street, east of First avenue.

E. H. Ludlow & Co. will sell on Wednesday the three-story brick dwellings Nos. 56, 58 and 60 West Eleventh street.

Gossip of the Week.

Mr. John Davidson has sold the front on the east side of Fourth avenue, between One Hundred and Twenty-first and One Hundred and Twenty-second streets, 202x90, to Mr. Pritchard, of Cohoes, for \$50,000. A day or two after signing the contract, Mr. Davidson was offered \$60,000 for the same plot.

Mr. Pritchard will immediately proceed to erect on the above property ten fine flat houses, to be built of Philadelphia brick, trimmed with Ohio and brown stone in different colors.

It was incorrectly stated last week that Messrs

Riker & Co. had sold a lot and stable in Fifty-sixth street, between Sixth and Seventh avenues, for \$10,500. It should have read a stable lot, 25x69.8, without any stable.

Mr. Bernard Smyth has sold the northwest corner of Avenue D and Eleventh street, 103x145, for \$27,500.

Messrs. Rasines & Power and Crasto & Son have sold the plot of ground at the southwest corner of Fifth avenue and One Hundred and Twenty-sixth street, 29.11x120, for \$60,000, cash, to Mr. Morganthaul.

Messrs. Crasto & Son have sold the front on the east side of Sixth avenue, between One Hundred and Twenty-second and One Hundred and Twenty-third streets, comprising eight lots, to John H. Sherwood, for \$60,000.

Mr. J. Augustus Page has sold to Mr. Stokes a lot on Fiftieth street running through to Fifty-first street, between Madison and Fourth avenues, for \$55,000.

R. V. Harnett has sold the five-story brick house and store, No. 450 Sixth avenue, 20x60x100, to Charles H. Woodbury, for \$27,000.

Messrs. Butler & Matheson have sold, for the Woods estate, the five-story white marble building on the south side of Chambers street, known as No. 126, 25x75, for \$40,000, to Charles H. Woodbury

Messrs. Lespinasse & Friedman have sold the plot of ground on Fifty-eighth stree*, running through to Fifty-ninth street, 125 feet west of Sixth avenue, 75x200, for \$85,000.

This property and the plot comprising the whole front on Seventh avenue, and running back 400 feet on Fifty-eighth and Fifty-ninth streets, has now passed into the hands of Mr. Jose F. De Navarro, for \$1,150,000, and verifies the report of purchase of the Seventh avenue front by Mr. Navarro published exclusively in this column some weeks ago.

Mr. Navarro intends to erect on this property, said to be the highest south of the Park, six of the most magnificent apartment houses in the world. On the plot last mentioned, four of these houses will be erected, being divided by two streets, the one running from east to west will be 25 feet in width, while that running north and south will be 121/2 feet. At the junction of these streets there will be an extensive courtyard, containing four beautiful fountains and a great variety of the most rare and costly plants and flowers. Between these houses and the Hawthorne Apartment House, there will be another street 121/2 feet wide, running through from Fifty-eighth to Fifty-ninth street, and at the point where it intersects with the street running east and west, there will also be an extensive fountain and tropical plants, etc. On the plot between the Hawthorne Apartment House and Charlier's Institute, two more apartment houses are to be erected.

These houses are all to be erected of iron, brick, and stone and to be thoroughly fire proof. The courtyard, streets, and houses are all to be lighted by electricity. The apartments are to be 50 and 100 feet front.

The location selected for this magnificent improve ment is the finest in the city, opposite Central Park, surrounded by five different lines of horse cars leading direct to all the ferries, unequalled drainage and sewerage, the grade from 6th to 7th avenues being 25 feet wide, all combine to make this the most healthy as well as fashionable locality for wealthy citiizens who desire to live in regal apartments, the total cost of the six buildings including the ground will reach \$5,000,000.

Two lots on the north side of One Hundred and Forty-sixth street, 275 west of the Boulevard, have been sold for \$3,000.

Mr. J. V. D Wyckoff has sold the three-story and basement brown stone house No. 1000 Lexington avenue, 17.6x50x73, to Mrs. Gaylord for \$13,000; a fourstory high stoep brown stone dwelling, on the south side of Thirty-second street, west of Fifth avenue, for about \$40,000, and the three-story and basement brick dwelling, 17.11x52x92, No. 142 East Seventeenth street, for about \$12,000.

Mr. Max Danzinger has sold the whole front on the north side of Sixty-ninth street, between Second and Third avenues, 430x half the block, with a builder's loan of \$105,000, to Mr. John Hodge, for \$111,500. The purchaser will at once erect twenty single flats 20 feet front, and one double flat 30 feet front, with all modern improvements.

Mr. Danzinger has bought three lots on First avenue, 29 south of Eighty-sixth street, and one lot on Eighty-sixth street, 75 west of First avenue, for \$21,000, cash.

Brooklyn.

George W. Brown recently sold 11 houses on Bed ford avenue, between Hancock and Fulton streets, for \$132,000. They are 20x55x100 feet. He has also sold two houses on Prospect place, near sixth avenue, to Lewis V. Sone for \$35,000.

The following are the sales at the Exchange Sales room for the week ending July 1:

Bids will be received at the office of the Department of Public Works for furnishing materials and per-forming the work of building one floating swimming bath, until July 12th, at 12 M.

bath, until July 12th, at 12 M.

Estimates will be received at the Central office of the Department of Police until Friday. July 8th, at 10 A. M., for building a station-house, lodging house and prison on Elizabeth street.

The Couny issoner of Public Works asks for bids until July 12th, for laying Croton mains in St. Ann's, Union, Locust, Elton, and Franklin avenues, Cliff, 138th, 143d, 153d, 160th and 170th streets, in the annexed district; and 68th, 72d, 73d, 79th, and 821 streets; Lexington, Madison and 4th avs, and Avenue A calso for the erection of sewers and paving a number of streets throughout the city.

Blank forms of bids or estimates may be had at 31

Blank forms of bids or estimates may be had at 31 Chambers street, room 10.

Proposals will be received at the Board of Education until the 12th day of July, at 930 a.m., for the erection of a school house on the south side of Thirty-eighth street, between Second and Third avenues.

BUILDING MATERIAL MARKET.

BRICKS.-For Common Hards the position of the market has continued almost solely in sellers' favor, market has continuou almost solely in sellers' favor, prices still creeping steadily upward with a strange confident feeling extant at the close. As before noted, the addition to cost induced some buyers to pause and consider, but, if any concluded to withdraw, others have come forward to fill their place, and there was no abatement whatever to the demand. Indeed, if anything, the outlet for stock has increased, and appears likely to have even more rapid growth with anything like favorable weather for the progress of out door operations. Naturally this tends to stimulate preduction, and manufacturers relax no effort to turn out stock with all the speed within their power, but, through slelays, before noted, and the difficulty experenced in securing transportation when most needed, the offering is still a great way behind the demand, and until the gap is bridged over it is hardly to be expected that any reaction on values cen take place. Some irregularity has developed on the condition of the offerings, but the quality keeps up prefly we'l to the ordinary average. "Up River" stock has sold at \$7 25@7.62\%, closing with little available below \$7.50 per M. and Haverstraws ranged at \$7.62\% also per M. the latter quite generally asked for all really good brands. For Pales the outlet offered has been very fair at all times, and no accumulation of stock took place with prices stiffening up, and \$3 00 per M, is now about as low as anything respectable can be reached. A few "lammies" came forward, but they have an irregular price according to momentary influences. For Fronts the market is stiff with the product generally sold ahead on all grades.

CEMENT.—There does not appear to be much change in the general features of the report on the prices still creeping steadily upward with a strange

CEMENT.-There does not appear to be much change in the general features of the report on the market for domestic grades. There is the same free change in the general features of the report on the market for domestic grades. There is the same free distribution of the product as rapidly as it becomes ready for handling, with an ample supply of back orders on hand, and the mills well assured of all the business they can attend to for months. Shipments are making in all directions, dependent upon this base of supplies, and agents say they still have a steady flow of orders from the East. West, South and North. Local consumption is also good, and improving every day, notwithstanding the amusing reports to the contrary in some of the "latest and most reliable" reviews of certain pretending commercial journals. Under the circumstances, prices very naturally find ample support, and the regular monthly advance proposed by the combination is now in force bring the rate up to \$1.20 per bbl. for Rosendale delivered here. Foreign cements are also doing well. As shown by the figures below, the imports for the first six months of the year have been liberal, and there is known to be considerable amounts still affoat, but receivers manage to handle the stock without much apparent difficulty, and thus far have preserved a pretty steady tone. Many of the most popular brands, are, to a large extent sold before arrival, and start tow rd the interior soon after landing, and even comparatively unknown goods have received attention. The latter, however, frequently had to offer a little "off" as an attraction for first operations and in some cases buyers did not return for a second installment of supplies even at the concession.

The following is a comparison of imports of Cement at this port for the first six months of a series of years:

years.					
-	1877.	1879.	1879.	1880.	1881.
Jan. bbls	240	4,770	3,616	4.406	5.134

May "	9.550	9,555	12,620	22,708	26,904
June "	5,983	6,883	11,823	22,687	27,805
Total bbls	27,380	36,065	38,789	75,968	88,677

HARDWARF.-Buyers in general are moving with caution, and an evident intention to handle nothing beyond immediate and well-assured wants, a great many of the leading descriptions of stock finding many of the leading descriptions of stock finding positive neglect. Builders hardware, however, commences to move with somewhat greater freedom, and it is likely the call will further expand both on interior and local orders, as work is now progressing toward a point where the consumption of many kinds of hardware must, of necessity, increase. Values generally remain nominally unchanged though it is expected that recent conferences of manufacturers will lead to some announcements of changes on lists during the present month. Offerings, as a rule, are fair in quantity and assortment. There has been a slight advance in the price of Files.

The recent addition to the cost of files and rasps will amount to about 6 per cent. The manufacturers of wood screws announce the following discount under date of July 1st. Flat head iron wood screws, 4°c; round head iron wood screws, 35c; flat head brass wood screws, 40c; round head brass wood screws, 30c.

LIME.—There is nothing positively new on this market. The demand continues good and general with an exhaust fund for pretty much all stocks with an exhause tund for pretry finite an stocks either on spot or affoat and sellers can obtain full former rates without difficulty. Indeed an advance is considered probable at any moment and dealers do not hesitate to add to their supplies when opportunity offans

LATH .-- There has been some irregularity since our last report. At one time the accumulation of stock was quite full and one or two holders appeared to bewas quite for an one or two noners appeared to co-come a little alarmed, leading to a hasty offering and sales at a sha ting from former rates. This stock out of the way, however, the was an immediate recov-ery and at the present writing about former prices are ruling and \$1.75 the asking figures. It is claimed that the shipmen's from both St. John and the Maine coast are now onlie small. coast are now quite small.

LUMBER-Business generally remains in good shape, all descriptions of stock finding demand and commanding full former rates readily. The various out lets for stock are also well represented, local manufac-

turing in its various forms, requiring a full assortment; the consumption for building purposes rather tending to increase; a great many suburban dealers, who cannot handle full cargoes, etc., to advantage, coming to this market for such assortments as they require, and the export, though showing some fluctuation, keeping up to a fair average. At the ruling cost of goods, buyers are naturally somewhat particular over the grading, and do not accept "off" quoting unless prices are made to correspond. From about all sources of supply, the advices are firm with apparent indications that manufacturers are not likely to modify their views to any extent as yet. One or two points East ventilate the stereotyped story about searcity of logs; but there is no probability, from the present outlook, of a lumber famine this season, notwithstanding the full consun-prion.

Spruce continues to receive attention. The call is of a somewhat irregular character, and many buyers, under information or expectation of larger arrivals, are in a position to stand off, but there is no doubt that stock is wanted, and receivers assert that they have nothing to fear except accumulations afloat at this point by the simultaneous arrival of many vessels, through which temporary depression is not unlikely. About \$14 continues the average inside rate on random, though there is now and then a drop below this on interior cargoes; and for the top, \$1 may be quoteen for \$15 math and the attention of all regular buyers, and reports generally are of a cheerful, hopeful character. At the base of supplies, desirable goods are scarce, and what there is available has a full 1 mit of valuation, with owners somewhat incifferent amout selling, and it is therefore not an easy matter to add to the accumulation here. In the meanime, the demand continues good, and the distribution is of a liberal character. A large percentage is wanted for building purposes and the manufactures connected therewith; there is quite a good home trade with a global purpose and the man

From among the lumber charters and engagements recently reported, we select the following:

From among the lumber charters and engagements recently reported, we select the following:

GENERAL LUMBER NOTES. STATE

Albany Lumber Market, as reported by the Argus. FOR THE WEEK ENDED JUNE 28, 1881.

FOR THE WEEK ENDED JUNE 28, 1881.

We have not any change to make in quotations; they are steadily maintained. We have a good market to report, the sales, among other items, covering 2,000,000 feet shipping box taken on Friday last by the Export Lumber Company, mainly at our outside quotation for that article, and 500,000 do. do. on p. t., said to be for shipment to Trinidad, W. 1. The receipts by canal have been fair, and the market is supplied with a well assorted stock. From the Saginaw and from Canada the reports are an active and firmly held market; from the Saginaw the trading in super stock is very brisk and the quotation therefor show an advancing tendency Freights from the Saginaw to Tonawanda it will be seen show a decline at 50c. per M.

per M.

The recepts of Lumber by lake at Buffalo for the week ending June 27th were 4,161,000 feet and by rail 100 cars. The receipts by lake at Oswego for the week were 6,723,000 feet.

The receipts by canal at Albany from the opening of navigation to June 23d were:

Bds.&Sctl.,ft. Shgles,m. Timber, ft. Staves.lbs.

Bds.&Sctl.,ft. Shgles,m. Timber, ft. Staves.lbs.

1881....76,534,001 48 459,000

1880....102,202,400 200

The receipts of Lumber at Chicago from January 1st to June 20th were 511,804,000 feet, against 488,295,000 feet for corresponding period in 1880; the shipments 390,707,000 feet 3gainst 281,027,000 feet.

The shipments from the Saginaw from the opening of navigation to June 22d are 64,830,000 feet against 211,050,000 feet in 1880.

Freights from Bay City to Buffalo and Tonawanda 121,050,000 feet m. from Saginaw, \$2.75. From Buffalo to Albany, \$2.50 per M. from Tonawanda to Albany, \$2.15. Lake Ontaria freights to Oswego, 90c. from Port Hope; \$1.15 from Toronto; from Oswego to Albany, \$1.60,01.65. From Ottawa to Albany, by boats, \$3.00,03.50 per M. feet.

River freights are:

THE WEST. SAGINAW VALLEY.

THE WEST.

SAGINAW VALLEY.

LUMBERMAN'S GAZETTE,
Bay City, Mich.

The market continues firm and active. The past week has been a very satisfactory one, being marked by the sale of a large amount of stock and a change in freights which will favor the maintenance of existing prices for lumber. The cost of getting the product to market has been an element threatening the stability of prices. Not only have lake freights fallen off 50 cents, but canal freights from Buffalo and Tonawanda have dropped 25 cents the past week. These events will prove advantageous to the lumber trade, however they may be regarded by the carriers. The price of stock and the cost of transportation were bringing lumber up to a figure which made the consumer think more than twice before buving. The difference caused by the drop in freights is not very great on a single thousand feet, but it is something in the aggregate. There seems to be no slacking in the demand thus far, but a perceptible increase has been apparent the past week. There have been a number of buyers in the valley, and the receipt of orders has increased. The prices paid mark the existence of a feeling of confidence in the future of the trade. Among the sales of the week we note the following: 2,000,000 feet at \$6.50, \$13.50, \$30 and \$7, \$15.50, \$32.400,000 feet at \$6.50, \$13.50, \$30 and \$7, \$15.50, \$33.50 and \$35; 500,000 feet at \$6.55, \$13.50 and \$32; 200,000 feet at \$7.50, \$15 and \$35; 500,000 feet at \$14, \$33 and \$32; \$7.50, \$14, \$35; \$7.50, \$15 and \$35; 500,000 feet at \$14, \$33 and \$32; \$7.50, \$14, \$35; \$7.50, \$15 and \$30; 500,000 feet at \$7.50,

The Northwestern Lumberman as follows:

The Northwestern Lumberman as follows:

News from the Northwest during the last week, but they have been light, as a general thing, and probably have produced but little effect upon the logging streams. There appears to have been no especial change in the situation, and none in the outlook for hung-up logs. It is probable now that there will be some of the latter on streams that are sometimes driven clean, but it is also possible that they may yet be secured. With the aid of dams and reservoirs, a little water may sometimes be made to do work that would ordinarily require a much greater quantity, and every one may rest assured that all the rain that falls will be utilized to the last drop. The result is, therefore, something of a problem as yet, though logs enough have already reached safe water to make it certain that no material shortage can occur from the failure of the drives.

Chicago.

of a problem as yet, though logs enough have already reached safe water to make it certain that no material shortage can occur from the failure of the drives.

There has been a larger supply of lumber at the dock this week, but, though it moved rather slowly at first, at this writing it is about all sold. The commission men claim that it sells readily, and attribute the slowness of the market the early part of the week to the fact that the yard docks were so well filled that there were few buyers who could find room for any more vessels. The fleet is nearly all in now, and will probably unload and clear again in time to get back Sunday or Monday, so that the probabilities are that a pretty good supply will be on sale at the beginning of next week.

We fancy that most interior dealers, after looking over the situation, find it more profitable to buy what they want at the yards. They can get just what they need there, and, making allowance for the cost of docking and shipping, and difference in the condition of the stock, can probably buy it about as reasonably. The city dealers buy freely when they are able to give the vessel a dock.

The market appeared a shade weaker in respect to prices on Monday, but we have not learned of any sales below last week's quotations, and this morning the market is as firm as it has been. Inferior piece stuff brings \$10, and standard is said by some to be quotable at \$10 50, but there seems to be considerable doubt about this. Probably anything of ordinary length would not sell above \$10.25, though an admixture of longer lengths would easily raise the price. We think that \$10@10.25 is as fair a quotation as could be made. Inch lumber is steady, and without quotable change in price. Good lumber is in demand, and choice cargoes, which are occasionally offered, sell easily on their merits. Shingles are quoted higher this week than they have previously been, standards selling at \$2.50@2.60, and extra A's at \$2.70 22.75. There were more cargoes than usual on the market to-day, in conse

a lively effort to secure the walnut that grows in the surrounding country. At present they are paying from \$40 to \$50, log run.

LUMBERMAN AND MANUFACTURER, MINNEAPOLIS, MINN.

MINNEAPOLIS, MINN. \{\}

Taking into account the supply, demand and prices the lumber trade was never in a more satisfactory condition than it is now in the West. The volume of b siness seems to be increasing daily, and the tendency is toward better prices on all standard goods. There are some manifest discrepancies which should be adjusted, for instance, when common logs are worth \$10@11 at Stillwater, and ordinary mill run lumber in rafts bring \$15@16, yard prices for first common boards and dimension should not stand at \$12@13, nor 26-foot heavy stuff at \$18. There are some proprieties and proportions which some men can never see.

common boards and dimension should not stand at \$12\text{Q}13\$, nor 26-foot heavy stuff at \$18\$. There are some proprieties and proportions which some men can never see.

The fight at Chicago over prices is keeping the bulk of the lumber away from the auction docks and sends it to the yards or keeps it at the mills. So far there has been no material break there from spring prices. The manufacturers are talking up an advance, and a few have issued new lists 50 cents better. Advices from there this week assure us that the rumors of serious cuttings on list prices are without foundation. St. Lauis is selling more lumber than ever before, the trade now reaches nearly 10,000,000 feet per week. Some of the leading houses have been forced to Muchigan and Chicago for dry sorts to fil up the yards and prices are very firm. Heavy winds and st rms during the last two weeks have kept back rafts and made receipts light. Davenport and Rock Island have more than they can do, orders for August delivery are being put on the books. The "boom" at Dubuque is fully reported elsewhere.

The table of shipments from St. Paul and Minneap lis shows the flourishing condition of trade in the northwest. The Northern Pacific line reports a great scarcity of cars on that line, but with more orders than they could fill if they had cars. There is now all over this region a strong disposition to advance prices from \$1 to \$2.

Telegraphic advices this week as follows:

Telegraphic advices this week as follows:

Telegraphic advices this week as follows:

Chicago, June 28.—The Lumber Dealer's Exchange yesterday advanced prices all along the line from 50 cents to \$1 per thousand, the latter advance being on thick clears and selects, 10 and 12 inch stock boards, near y all kinds of flooring timber, and scantling and flooring strips. The advance of 50 cents is or sided, beaded, ceiling, and common and all boards. Fencing battens advanced 4 cents, and shingles 25 cents.

FOREIGN.

The London Timber Trades Journal, of June 28th, as follows:

unless a very limited importation takes place during the present summer.

* * * * * * *

Now let us turn and look at the aspect of affa'rs regarding the timber trade in London at the present era, in comparison of the same period last year. At that time the stocks in Liverpool were considerably less than they had been in 1879, while those in London were in excess. As an instance, we may refer to the conspicuously large item of prepared flooring boards, which stood at the following figures: On the 31st of May, 1879, 3,980.601 pieces, and in 1880, at the concurrent date, 5,480,947 pieces. The former was said to be the greatest stock ever recorded up to that time in the London timber docks, and when that of 1880 came to be contrasted with it, the importers were filled with dismay at the accumulation, and almost despaired of getting their money back again. But what do we see now? Why, that, despite the whole of last summer's great importation, we have about 1,500,000 less of pieces in stock of this kind than we had last year, and of Baltic deals and battens only 230.000 pieces more.

In London we do not count by cubic feet and standards in taking stock of the supplies in dock, as they do at Liverpool, but by loads of square timber, and by numbers of pieces in sawn goods. The stock of the year, was greatly in excess of last year's stock, is now reduced to about the same level, and of timber, viz.; yellow pine, red pine, pitch pine and Baltic, we are 18,000 loads, out of the 30,000 in stock at that time, below the mark. Of birch and teak, two woods which were over-speculated in last year, when we began with a small stock which disappeared rapidly, there is now a plentiful supply in London—of teak 5,983 loads against 1,419; but in hardwoods generally a very moderate stock scarcely exceeding that of the previous year, though the importation altogether was 25 per cent.

The following review of the Liverpool market in Timber Trades Journal of June 18th, fairly embodies

The following review of the Liverpool market in Timber Trades Journal of June 18th, fairly embodies

the tone of reports from all other points in the United

the tone of reports from all other points in the United Kingdom:

The resumption of work after the Whitsuntide holidays has not yet had any appreciable effect on the business done this week, which, like its predecessor, has been a very dull one.

The import has been very small, as will be seen from the list of arrivals in another column, and hence the quays and wharves have worn a very quiet aspect. Perhaps some of this quietuie may be attributable to the fact that, as the railways and other carrying companies are not pressed with an undue amount of forwarding, they are better able to cope with the demands of the trade, and by a regular employment of their rolling stock forward a larger quantity of deals, &c., up the country than is the case when later on in the season large accumulations accrue at the stations owing to the blocks which occasionally occur and impede business for some days if not weeks.

There have been no auction sales during the past week, and we may take it generally that prices remain without change.

Several auction sales are announced for the latter end of this week, and for the following one, and these will doubtless form centres of interest not only for the local but for the country buyers.

This week's mail from Rio Janeiro has the follow-

local but for the country buyers.

This week's mail from Rio Janeiro has the follow-

This week's mail from Rio Janeiro has the following:

Pitch Pine Deals—Owing to the bad quality of the arrivals for some time past, as also of the limited sup ply expected, prices have become higher and we quote Rs. 41\$000 per dozen 3x9x14 for good cargoes. We have to note the arrivals of the J. W. from Pensacola with 342,089 feet sold at Rs. 41\$000, and the "Thomas Fletcher" from St. Mary's, Ga., with 450,-416 feet, still unsold.

Spruce Pine Deals—There have been no arrivals of this quality of pine, which is actually needed here and would be worth to-day Rs. 369000 per dozen.

White Pine Lumber—The only arrival we can report is that of the "Solario" from New York, with 96,228 feet, sold at 115 reis per foot, at which figure the market closes exceedingly firm, and we quote the article at from 115 to 120 reis per foot.

Latest Havana advices report:

Latest Havana advices report:

Moderate demand for white pine, of which a cargo, ex "Elba," St. John was disposed of at \$32½ per mille. feet, pitch pine continues scarce and more wanted at from \$35@37 per mille, feet, do, as to class and conditions of sale.

NAILS.-Demand fluctuates in volume and there keeps a disturbing element upon the market. Sellers however, appear to have a fair amount of faith and stocks are offered only to the extent of the call with about former rates generally asked on small parcels. Large invoices, however, could probably be reached at a shading.

about former rates generally asked of the large invoices, however, could probably be reached at a shading.

We quote at 10d to 60d, common fence and sheathing per keg. \$3,5073.15: 8d and 9d, common do, per keg. \$3.30@3.40: 6d and 7d, common do, per keg. \$3.50@3.60: 4d and 5d, common do, per keg. \$3.50@3.60: 4d and 5d, common do, per keg. \$3,50@3.60: 4d, fine, per keg. \$4.50.465; 3d, fine, per keg. \$5.30@5.40.

Cut spikes, all sizes, \$3.30.3.40: floor, casing and box, \$3.80@4.60; flnishing, \$4.05@4.90.

CLINCH NAILS.

1½ inch, \$5.50@5.60; 1¾ inch, \$5.25@5.35; 2 inch \$5.00@5.10; 2½@2¾ inch, \$4.75@4.85; 3 inch and longer \$4.50@4.65

PAINTS AND OILS .- Demand moderate and uncertain with the market, showing no very noticeable features for the week. Stocks are fair and holders seem to think altogether too full in some instances. though there has been no evidences of direct or serious pressure to realize as yet. Linseed oil is not very active and shows some irregularity with outside lots occasionally to be found below the ruling line of valuations. We quote at about 50%51c. for city, and 58% 59c. for Calcutta from first hands.

PITCH.-A moderate demand has been readily met, and at about former rates, the market showing no new features. City, delivered. We quote at \$2.20@2.25 per bbl. for

SPIRITS TURPENTINE.—There has been scarcely any demand for consumption, the cost in a measure tending to retard operations, though at the best, current wants are small. On the general market, however, considerable stock changed hands at an irregular line of prices, the market still being subject to speculative manifestation. Foreign advices are as a rule strong and an increased export movement is hoped for. As this report is closed the quotations stand at about 43 45c. per gallon, according to the quantity of stock handled.

TAR.-Holders remain in a pretty steady mood and offer little or nothing except at full rates. The demand somewhat irregular, but stocks under control and carried confidently in expectation that they will all be wanted. We quote \$3,75@4.00 for Newberne and Washington, and \$3.75@4.00 for Wilmington, according to size of invoice.

MORTGAGES.

Note.—The arrangement of this list is as follows: The first name is that of the mortgager, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given, and the amount. The general dates used as headings are the dates when the mort-gage was handed into the Register's office to be re-corded.

Whenever the letters "P. M." occur, preceded by the name of a street in these lists of mortgages, they mean that it is a Parchase Money Mortgage, and for fuller particulars see the list of transfers under the corres ponding date.

NOTES AND ITEMS.

Mr. George I. Seney, of New York, has just given \$20,000 to the Weslevan Female College of Macon, Ga. This makes \$90,000 he has donated in the past two months; \$45,000 will be used to erect a new college building.

The leading British and American insurance companies charge extra rates for night work. Only the small companies permit night work without charge.

The Board of Aldermen have directed the Dock Commissioners to reserve the new pier at the foot of Leroy street for the public benefit.

same period in 1880, there were 203 failures, with aggregate liabilities of \$7,511,600, and assets \$2,740,000. This year, therefore, gives a better showing than last year. More than half the failures were for liabilities less than \$10,000, and the largest number of failures were nu the largest number of failures was among the liquor and beer dealers

THE LIMITED CO-PARTNERSHIP HERETOFORE existing under the firm name of DANIEL F. COONEY, between the undersigned, expires this day by its oan limitation.

Dated New York, 30 June, 1881.

JAMES H. HOLDANE, Special partner.

DANIEL F. COONEY, General partner.

DANIEL F. COONEY, General partner.

This is to certify that James H. Holdane, who resides in the village of Cold Spring, in the county of Putnam, and the state of New York, as special partner, and Daniel F. Cooney, who resides in Jersey City, in the county of Hudson, and state of New Jersey, as general partner, have formed a limited partnership, pursuant to the statutes of the state of New York, under the firm name of DAN'EL F. COONEY, that being the name of a former limited partnership, of which they were partners, to transact in the city of New York a general Iron and Metal business, and the manufacture thereof, on account of said partnership and on commission.

That the said James H. Holdane, as special partner, has contributed to the capital stock of the partnership the sum of Twenty-five Thousand Dollars.

That the said partnership is to commence on the first day of July, 1881, and terminate on the thirtieth day of July, 1881, and terminate on the thirtieth day of July, 1881.

Dated New York, 1 July, 1881.

Dated New York, 1 July, 1881.

On this first day of July, 1881, before me personally cannet the above ment of the said of the partnership cannet by a second of the partnership.

s. s.:
On this first day of July, 1881, before me personally came the above named James H. Holdane and Daniel F. Cooney, to me known to be the individuals described in and who executed the above certificate, and severally acknowledged to me that they respectively signed said certificate.

J. ALEX. STITT,

me that f. ALEX STITT, Notary Public (257), New York Co. and New York, TL. S.1 State of New York, City and County of New

s. s.:
Daniel F. Cooney, being duly sworn, deposes and says that he is the general partner named in the annexed certificate, and that the sum specified in said certificate to have been contibuted by the special partner in sail certificate named, to the common stock of said partnership, has been actually and in good faith paid in cash.

good faith paid in cash.
