

NEW YORK, FEBRUARY 14, 1914

BILLBOARD ORDINANCE NOT RETROACTIVE

Backyard Fences Hereafter Erected to Be Limited to Seven Feet in Height, Billboards to Ten Feet-No Signs Will Be Allowed Opposite Public Buildings.

THE income sometimes derived from vacant lots through renting the fences for billboards will be lessened should Alderman Curran's ordinance prohibiting billboards more than ten feet high pass the board and obtain the Mayor's signature. By the terms of the measure all ten-foot billboards must have openings at intervals and must be built of fireproof materials. This latter provision will cause much reconstruction, which of course the billboard firms will have to course the billboard firms will have to pay for, if they decide to continue the use of the medium. Ordinary fences less than seven feet high are left unregulated, but all ten-foot fences, whether used as billboards or not, must be built fireproof. Any skysign or billboard that injures the value of adjacent real estate, as many unquestionably do, or presents an ob-stacle to the use of fire apparatus, is pro-hibited under the ordinance. The ordinance, which is not retroac-tive, will prohibit billboards from being

is not an unheard of annual rental for an owner to exact for the privilege of put-ting a double-deck billboard around his lot or a huge electric skysign on top of lot or a huge electric skysign on top of his building.

Billboard Rental Rates.

Bill-posting and advertising companies guard with great secrecy from the public the sums they pay in any particular case, in order that the owners of other choice locations may not know too much, but it locations may not know too much, but it is a fact that at least one enterprising concern pays as high as twenty thousand dollars' rental in more than one case. Ten thousand dollars is the annual rental paid in a number of instances. There is no average price for billboard space, but in a general way it is known that the best locations are considered to be those where the most people pass. Thus, Riverside Drive is rated higher than upper Fifth avenue, and Broadway in the neighborhood of 42d street highest of all. If you see a vacant lot in a high class neighborhood with double-decker billboards on two sides, the owner is get-

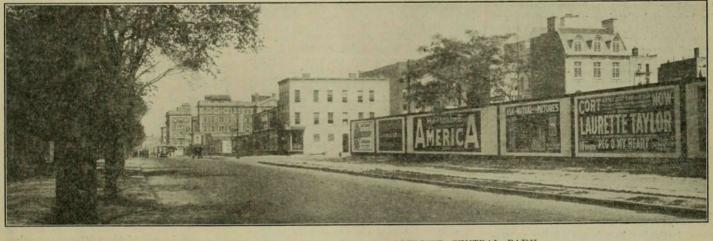

billboards on two sides, the owner is get-

but no open-work section (which every fence over seven feet high must have) shall be covered.

Limit for Roof Signs.

Limit for Roof Signs. A structure having a tight or closed surface erected upon or above a roof shall not exceed ten feet in height or forty feet in length. Structures not having a tight or closed surface may be erected to the height of twenty feet above the roof. A further allowance is made if a space of six feet is left be-tween the sign and the roof for the fire-men. The spaces in the structure must not be less than three feet wide or more than three feet apart.

not be less than three feet wide or more than three feet apart. No "structure" of the sort referred to may be erected on the roof of any tene-ment house, hotel or other dwelling, except upon a wholly detached private dwelling, or except that a hotel shall be permitted to have such a structure upon its roof when the same is used to ident-ify or advertise the hotel itself only. No sign, billboard, bulletin or ad-vertisement of any description may be

BIILBOARDS ON UPPER FIFTH AVENUE. OPPOSITE CENTRAL PARK.

hereafter erected within 350 feet of any land within the jurisdiction of the Park Department, and by the same law no billboard will be permitted on or near any parkway or drive within the juris-diction of the department, or on any street where the board will be opposite any schoolhouse, church or public build-ing. And nowhere without the consent of all property owners within two hun-dred feet and a permit from the Building Bureau. Bureau.

Income from Billboards.

Large sums are in some cases derived from the sale of billboard privileges by real estate owners. High competition among the bill-posting and advertising companies for prominent locations at which to erect billboards or skysigns has served to raise the toll. Not so many years ago tickets to the "show" was all the owner asked, if the bill-poster would keep his walk clear of snow and ice in winter, but nowadays the billboard ad-vertising business has become so con-siderable that ten thousand dollars a year

ting about one thousand dollars a year

ting about one thousand dollars a year from the advertising company, which helps considerably to pay his taxes. But for that he would give some architect a commission to build him a private resi-dence on the site, or else an apartment house as an income producer. The billboard companies intend to op-orse to the utmost the enactment of the ordinance, and have already consulted ex-Chief Croker in respect to the alleged fire-danger from billboards. At the pres-ent time they have a case in court against they must comply with his order to build fireproof boards in certain cases.

Citations from the Ordinance.

The ordinance specifies that no fence exceeding seven feet in height shall be built without open sections in its surface sufficient to give a view of the premises. If within the fire-limits, it must be con-structed of slats or other open-work, or else constructed entirely of incombus-tible material, except that paper posters may be pasted over the "solid surface",

maintained across any doorway, window or opening in the wall of any building. No structure subject to regulation may be maintained upon the roof of any building other than a fireproof building. No structure subject to regulation shall at any point exceed seven feet in height above the ground, if erected upon the ground, and no "such structure" shall be erected upon a roof unless capable of sustaining a wind pressure of forty pounds a square foot. The restrictions in the ordinance do not apply to walls of masonry, as stone, brick, marble, terra cotta and concrete. Must Keep Inside of Building Lines.

brick, marble, terra cotta and concrete. Must Keep Inside of Building Lines. No structure for advertising purposes shall be erected outside of the building lines of any street or public place, except signs required by law or lawfully erected for public purposes. Exceptions are also made for shop signs, and for signs re-lating directly and solely to the premises, for contractors' signs in building opera-tions, and for the signs of transit lines. Within sixty days after the adoption of the ordinance every owner of a structure

subject to regulation by the ordinance (except backyard fences not exceeding seven feet in height, and fences of open seven feet in height, and fences of open trellis-work, and except other fences not exceeding seven feet in height) shall re-gister the same with the Bureau of Buildings, or shall either take down or remove them or so alter them as to bring them within the excepted classes as aforesaid. Any existing structure as aforesaid. Any existing structure which is required to be registered will be illegal if not registered; but otherwise the ordinance will not be retroactive. The Building Bureau will issue a cer-tificate of registration for every regis-tered billboard or sign and collect a fee

of two dollars. After the adoption of the ordinance no new structure shall be erected except in accordance therewith, and plans and specifications must be filed with and a permit obtained from the Building Superintendent. Violators of this proposed law would face a pen-alty of imprisonment. be .

DISTRICTS IN GERMAN CITIES RESTRICTED

Observations of An American Traveler-Effect of Districting on Land Values An Open Question-But Districting Does Protect Good Neighborhoods.*

By FRANK BACKUS WILLIAMS.

T O the thoughtful person there is a satisfaction absolutely unique in the method and order of a formal garden from a perspective which shows its design as a whole, revealing its unity and determining purpose.

The same pervasive satisfaction comes to us at the sight of many a German city. From the vantage of a good view-point we see below us a nucleus of structures of all sorts built uniformly high and close, surrounded by belts or zones of buildings progressively decreasing in height and extent as compared with the lots they stand on, with a re-sulting progressive increase of green grass and trees to the city's very out-skirts, almost rural in character.

Frankfort.

skirts, almost rural in character. Frankfort. In the German city of to-day, as a result of the application of the principle of progressive gradation, the industrial district exists in many degrees of in-industrial districts, its mixed districts and its chief traffic streets, which are really a district by themselves; as well as its residential districts and the orig-inal or inner city where are still found the industrial districts all industries are not only allowed, but favored in so many ways that by far the most of them are exceptions, such as rooms for caretak-ers and watchmen, are forbidden. In the mixed districts both manufactures On the chief traffic streets business and the district is both manufactures on the chief traffic streets business and the district, for instance, con-the mixed district, for instance, con-tand residences and manufactures. The purpose of this, both in Frankfort and elsewhere, is to house the workman near his work. Desirable as this is, the results of the mixed district in other ways, both for housing and for manu-facturing, have been back; for living con-distruming, have been back; for living con-distruming, have been back; for living con-distruming, have been back; for living con-districtions are injured by the industries and the factories are crowded and hampered. A better solution would seem to be to create separate residentiand industrial streets, making the street he unit of the district. In this way both residences and industries are segre-ated, and yet form part of the same. No Beparate Business District.

neighborhood.

No Separate Business District.

The phenomenon of residences in the upper stories of buildings occupied on their lower floors by shops and offices occurs not only on chief traffic streets but everywhere, in cities, where shops and offices are to be found. This is true not only throughout Germany but everywhere in Europe, except on the continent to find the most expensive and fashionable of apartments over stores. fashionable of apartments over stores. There are in the large cities buildings occupied solely for business purposes; but they are rare. In none of the con-tinental cities is there an actual busi-

•From a paper delivered before the National Housing Congress, evening of December 4, 1913, at Cincinnati, Obio.

ness district. Even on the principal business streets of cities like Berlin— the Leipsiger or Friedrichstrasse, for instance—there is only here and there an isolated building in which there are

This lack of that most useful differen-tiation, the business district, is a great disadvantage. Unlike residences, busi-iness districts as far as condi-

disadvantage. Unlike residences, busi-iness districts as far as condi-tions allow, should be centralized and concentrated, to the advantage of both business and housing. It is difficult to keep from feeling an un-Christian joy that Germany, which is ahead of us in so many phases of city construction, is at least behind us in this one. Next, the application of the principle of progressive graduation, which is the principle introduced by the zoning sys-tem, was reapplied to the differentiation of the residential district and produced further developments in it. This was brought about in some cities by making the districts, elsewhere called zones, smaller, and, while still regulating them progressively, doing so without any con-stant or precise relation to any one stant or precise relation to any center. one

Dresden.

Dresden. Dresden is an example of such regu-lation. Its district map is kaleidoscopic; and often the same districting appears in ten or twelve parts of the city. In this way, it is thought, regulation may more closely conform to, and more ad-vantageously guide, development. In other cities this same tendency toward smaller districts has produced results of a slightly different form. The rules for chief traffic streets within zones or districts have already been mentioned. The same development has occurred rather generally in all German centers. This is really only another method of splitting up the more primi-tive zones or larger district into smaller ones.

Dusseldorf.

Classification along this line has in Dusseldorf taken an essentially similar

Classification along this line has in Dusseldorf taken an essentially similar direction, although again slightly differ-ent in form. There, in addition to five zones covering the whole city, and rules for special streets, in many cases run-ning through several zones, there are eleven classes of streets, also within the zones. These classes are in most cases created for various types of housing. The distinctions are often very minute. There are, for instance, two classes of rules for one and two-family houses in blocks, the one with, and the other with-out, rear buildings; two classes similar in all respects to these, except that three-family houses are also allowed; two classes, alike in all respects to those first mentioned, except that in each case the houses must be detached, the re-quired open spaces between the houses and the side lines of the house varying, however, in breadth; a class for the bet-ter sort of tenement houses, in blocks, with not more than two families in each story; a class for tenement houses sim-ilar in all respects to the class last mentioned, except that they are to be of ilar in all respects to the class last mentioned, except that they are to be of cheaper and simpler construction and suitable for not more than three families on any one floor, etc.

When we remember that the lots on When we remember that the lots on which these class restrictions are im-posed are widely scattered throughout the zones and subject not only to class but to the various zone restrictions as well, we may come to the conclusion that in Dusseldorf differentiation has reached its uttermost limit.

Districting by Streets.

The system of regulation by streets is applicable universally. Broader dis-tricts are, it is true, at times necessary. Certainly the offensive industries should

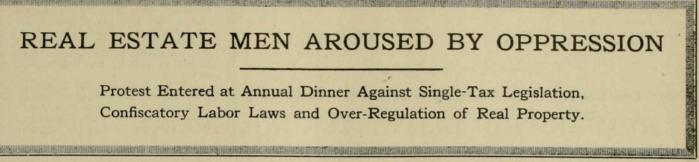

Certainly the offensive industries should have a considerable tract quite to them-selves. But even in this case the dis-trict will consist of a certain number of streets with the lots on them; and streets may, therefore, be used as con-venient units for the district. Munich was the pioneer in this system of districting by streets, adopting it in 1904. In 1912 Karlsruhe followed. In-stead of any of the older forms or dis-tricts she now has sixteen classes of streets. According to present limita-tions it would seem that this system is destined to become the prevailing one in Germany. Germany

In Germany. Apparently the German himself is, on the whole, satisfied with districting as a system. A large and increasing major-ity of German cities have adopted it, and none of them has made any attempt to abolish it later, though in some cases an effort has been made to do away with a particular district or change its part an effort has been made to do away with a particular district or change its posi-tion altogether. In Frankfort the loca-tion of one of the old manufacturing districts is felt to be a disadvantage to the city as a whole; and, partly for this reason, a new one was created. The old district has not been abolished; but the natural extension of it is not al-lowed, and the new district is made as advantageous as possible, in the hope of attracting the industries located in the old. old.

old. The boundaries of districts, too, are often changed. Usually it is the busi-ness district which encroaches upon a residence district. This means a dis-turbance of living conditions; but as there are invariably more concentration and higher land values in the business than in the residence district the change produces higher prices for land, and there is little or no complaint.

Conclusion.

As a rule, districting does preserve the character of neighborhoods. This is an advantage in every way. It saves the waste of destruction, reconstruction an advantage in every way. It saves the waste of destruction, reconstruction and readjustment, inevitably attendant upon a change of character; and by mak-ing such a change impossible it steadies values. It prevents the conflict of alien activities to their mutual disadvantage. It raises land value in the only way possible without injury to anyone; for it increases the usefulness of the land at least as much as it does its price. The effect of districting upon the gen-eral level of land values is an open one in Germany; the controversy on the sub-iect heated and bitter; and the mass of literature with regard to it, already in existence, more than any one person can even read. Its effect on housing and on the health and vigor of the Ger-man people is quite another question.

LOSE to one thousand men were seated at the one hundred and ten tables that filled the main floor of the Waldorf-Astoria banquet hall and overflowed into the boxes on the occasion of the annual dinner of the Real Estate Board of Brokers last Saturday evening. It was the biggest turnout in the history of Waldorf banquets, and the brokers themselves voted it the most enjoyable and significant to them, in that there was a definite theme for the speakers, and because a very emphatic protest was raised by the president in behalf of the board against the wrongs that are being committed against property owners committed against property through over-regulation and owners over-taxation.

By order of the Industrial and Build-ig Codes Committee (Charles F. By order of the Industrial and Build-ing. Codes Committee (Charles F. Noyes, chairman), reprints of articles that had appeared that morning in the Record and Guide, entitled "The Real Estate Board's New Activities," and "The Confiscatory Fire-Prevention Laws," had been distributed through the hall, and every one was therefore pre-pared for the pointed remarks which came from the toastmaster, President McGuire. Prof. Seligman's exposure of the Single Tax measure now in the Legislature was in line with the board's own exposure of the injustice done to property owners through the factory and fire-prevention laws. The guests of the evening included J.

property owners an one fire-prevention laws. The guests of the evening included J. Romaine Brown, Edwin A. Cruikshank, Geo. R. Read, Robert E. Dowling, Tax Commissioner Lawson Purdy, Borough Presidents Marks and Mathewson, Pub-lie Service Commissioner Williams, lic Service Commissioner Williams, Persident Marble of the Merchants' As-sociation, Allan Robinson, Captain Rey-nolds K. Townsend, Elbridge Gerry Snow, Charles H. Strong, Franklin Pettit,

Snow, Charles H. Strong, Franklin Pettit, Michael Friedsam, Lewis L. Clarke, Abram I. Elkus, Frederick H. Ecker and Thomas Shall cross. Neither the Governor nor the Mayor was present, but the Governor sent a long letter and the Mayor a good sub-stitute in his young City Chamberlain. As wide publication has already been given to remarks made on the occasion, general public attention has been drawn to the pronounced stand which the Real Estate Board has taken against the stream of regulatory laws which the up-State legislators have permitted city politicians to put through—laws which many now suspect are mainly intended many now suspect are mainly intended to make salaried places on the public payrolls for as many persons as the tax-payers can afford to maintain. Should Rally for Self-Defense.

In his introductory remarks President McGuire said: "Never has there been greater need for

"Never has there been greater need for organized effort to protect the interests we represent. The real property owner has become the victim of theorists and faddists ready and willing to try any and all schemes, some new, others long since repudiated but now revived and mas-querading under misleading titles. We have the Society for the Reduction of Rents and Taxes on Homes advocating the halving of the tax on buildings. Of the many questions confronting us this. the many questions confronting us this, perhaps, is the most serious, in that it is the most dangerous. It is the forerun-ner of the single tax. The revival of this legislation must now as when originally advocated be opposed by organized forease forces.

Existing Unjust Laws.

"The existing labor laws are unneces-sary, burdensome, unjust, impracticable and grossly detrimental to property

rights. The many conflicting violations placed upon property by the various derights. The many connecting the various de-placed upon property by the various de-partments are putting owners in many instances to wholly unnecessary expense. The board proposes to lend its best efforts in an endeavor to straighten out the unholy muddle caused by the con-flict of authority in the State and mu-nicipal departments. That the fundamental values of property have withstood these many assaults is a proof that the real property value is secure. Neverthe-less every effort should be made to amend the laws in such a way as to make them fair, just and reasonable." them fair, just and reasonable."

Prof. Seligman Against a Popular Referendum.

Referendum. Professor Seligman, of Columbia, di-rected his remarks against the proposed referendum on the question of reducing the tax rate on buildings and increasing the tax rate on land. He said in part: "The agitation has been ingeniously managed so as to identify it in the popu-lar mind with the project of lowering rents. This change in taxation, however, far from being a simple matter, is in far from being a simple matter, is in reality one that calls for the most care-ful analysis and the most accurate knowledge of economic law. "In the first place, will rents be low-ered? So far as the tax on land is con-

ered? So far as the tax on land is con-cerned, it must be remembered that in many parts of New York not a little cap-ital must be invested in order to blast away the hills or to make the rock ex-cavations. To the extent that these im-provements are made in the land (not on the land) the tax will be shifted to the tenant; so that a part, at least, of the increased tax on land will go to increase rents. rents

'How about the tax on the house? It is said that taxes are like anything else-reduce the price and you increase the consumption. It is forgotten, however, that the demand for houses is strictly limited by the population. After the slack has been taken up, that is, after a certain fringe of the population who are now boarders and lodgers will oc-cupy apartments of their own, the new equilibrium between housing and popu-lation will have been reached and there will be no further demand for new houses except that which comes from the noris said that taxes are like anything elsewhile ho further demand for new houses except that which comes from the nor-mal growth of population. The only ef-fect of a sudden exemption of houses from taxation will mean a building boom, to be followed by a collapse.

More Congestion Instead of Less.

More Congestion Instead of Less. "But what will be the social conse-quences of the change? It is claimed that it will lead to less congestion. We must distinguish between congestion per room and the greater congestion per acre. If the buildings are exempted there will be higher buildings in the slums and a greater congestion per acre. Even a building law will not remedy this, for if all buildings were built up to the maximum height there would be far more congestion that at present. But what is much worse is, that in all the other boroughs we would have a com-pact city as in Manhattan. There will be no open spaces, no gardens around the houses, no vacant lots. The evils of the slums will be spread throughout the entire metropolis. We shall have a worse congestion than at present. Small Land-Owners Would Suffer.

Small Land-Owners Would Suffer.

"Furthermore, the real people who would benefit would be the rich and not the poor. The rich man who builds a mansion on Fifth avenue, the rich cor-poration that inhabits the Woolworth Building, on what theory of tax-ation should these be exempted? Again, all the modest house owners,

where the land has come to be worth where the land has come to be worth more than the house, will be forced out of their homes, and New York will be-come a city of lofty apartments. Above all the modest land owner will suffer. All land is not owned by speculators. Why should the small man who has in-vested his property in land have a part of that property confiscated? I do not object to the taking away of a part of the future increment of land values, be-cause everyone will be warned in ad-fiscation of actual property. "We see, therefore, the essential com-

"We see, therefore, the essential com-plexity of the problem. It can be solved by no mere shibboleth such as that of lower rents. It is a matter for careful, unbiased and unprejudiced discussion. It involves considerations that the ordinary man in the street utterly fails to grasp. It is therefore of all questions the one least suited to a popular referendum."

Mr. Brisbane's Experiment.

Mr. Brisbane's Experiment. Arthur Brisbane spoke on the merits of a single tax, but told of how foolish it would be to attempt to apply such methods in this country. The chief rea-son for this was that Americans want to own their lands and not hold them merely under a lease. He gave as an illustration his personal experience in a large tract of land in New Jersey. He is erecting twenty houses there which he has offered to workers practically rent free, but is meeting with difficulty chiefly through the fact that even the foreigners who want to work the land want to buy who want to work the land want to buy

who want to work the land want to buy it outright. Frederic T. Murphy, son of Patrick Francis Murphy, enlivened the proceed-ings with a humorous talk. Joseph P. Day read a dispatch from J. Clarence Davies at Palm Beach, and City Cham-berlain Henry Bruere said a few words. Mr. Bruere, speaking for Mayor Mitchel, said he thought that the Mayor would carry out his pre-election promise would carry out his pre-election promise to sign any bill that might be presented to him providing for a referendum on the question of reducing the taxation on buildings.

The Governor's Letter.

Governor Glynn in his letter said: "I have pointed out to the public and to the Legislature that unless the State reduces Legislature that unless the State reduces its expenditures or increases its revenues from indirect sources New York will be compelled to raise millions each year by direct taxation. It is one thing to preach economy. It is another to practice it. After my appeal to the various State de-partments asking them to reduce ex-penditures I find that their requests for this year are \$4,000,000 in excess of the appropriations made last year. I have called the attention of the State depart-ments to this fact and have explained to them that I meant what I said. I have requested them to revise their requests for appropriations and explained that it is better for them to use a pruning knife for appropriations and explained that it is better for them to use a pruning knife on their budgets now than compel me

on their budgets now than compel me later to resort to an axe." As a souvenir of the occasion the Title Guarantee gave copies of Bromley's pocket and desk atlas of the Borough of Manhattan. As it contains a map of every block in the city, with every piece of real estate plotted thereon, the gift was a most exceptional and useful one. The Lawyers Title Insurance and Trust Company gave silver pencils each in a separate box. The Home Insurance Com-pany presented every one with a leather wallet. The dinner committee was composed

The dinner committee was composed of Messrs. Elisha Sniffin, chairman; Jos-eph P. Day, Edward L. King, Robert T. McGusty and Donald W. Brown.

BILLS IN THE CITY'S INTEREST

One Measure Would Exempt Dams and Other Water Supply Structures from Taxation-New City Departments.

ROM the bills already introduced in F the Legislature at Albany, it is apparent that proposed amendments to the Greater New York Charter, the Tax Law, the Lien Law and the Tenement House Law will be prominent among House Law will be prominent among the subjects to be discussed during the present session. Most of the notable bills affecting the Greater New York Charter are administration measures and will probably be enacted. Among these may be mentioned Senator Griffith's bill creating a central department for the purchase of supplies for the entire city and Senator Herrick's, establishing a department of licenses, which is to have the exclusive exercise of powers now distributed among a number of licensing authorities. Bills of special interest to the real estate and building profession are the following:

following:

In the Senate.

following: In the Senate. Int. No. 343. Whitney.—Amending the Housing Law (Chapter 774, Laws of 1913; new subdivision 17-a in section 2, and amending section 63) by providing that semi-fireproof dwellings may be built with an area not exceeding 1,250 square feet within the outside walls, not over three stories high above basement or cellar, with first story walls not less than 12 inches thick and second and third story walls not less than 5 inches thick. A semi-fireproof dwelling is de-fined as one in which the external and party walls are of brick, stone, iron, steel, concrete, reinforced concrete or other equally substantial and fireproof material. Semi-fireproof dwellings may be built with an area not exceeding 2,-400 feet within the outside walls not ver 3 stories high with walls not less than 12 inches thick. Such a dwelling may be built 4 stories if certain mate-rial is used. The bill makes detail spec-ifications as to the kinds of material the stretures. To Cities Committee. **Drivate Pavements.**

Private Pavements.

Private Pavements. Int. No. 358. Patten.—Amending the Greater New York Charter (section 948) by providing that pavements laid at pri-vate expense and accepted by the city prior to June 20, 1910, shall be deemed permanent pavements; that such pave-ments laid and accepted since June 20, 1910, shall be deemed permanent pave-ments if so classified subsequent to April 18, 1912; and that all other pave-ments laid at private expense and ac-cepted since June 20, 1910, shall be deemed preliminary pavements. When-ever any pavement is laid to replace a preliminary pavement, if the cost of re-placing the pavement exceeds the cost of the replaced preliminary pavement, the excess must be assessed upon the property deemed benefited, and the bal-ance of the cost paid by the city. Same as Senator Patten's bill of last year (S. Int. 1742, Pr. 2259, of 1913). To Cities Committee. Int No. 359. Duhamel—Amending

as Senator Fatten's bill of fast year (S. Int. 1742, Pr. 2259, of 1913). To Cities Committee. Int. No. 359. Duhamel.—Amending the New York City eighty-cent gas act Cchapter 125, Laws of 1906; amendment to section 1) by fixing eighty cents as the maximum charge for gas in the Thir-tieth and Thirty-first Wards of Brook-lyn. Same as Senator Duhamel's bill of last year (S. Int. 78, Pr. 79, of 1913). To Miscellaneous Corporations Committee. Int. No. 361. McClelland.—Amending the Tax Law (sections 220, 211, 221a and 243) relative to the transfer tax. It abolishes the distinction between tangi-ble and intangible property for pur-poses of the transfer tax. All transfers less than \$500 are exempt from the

transfer tax and all transfers to a fatransfer tax and all transfers to a fa-ther, mother, widow or minor child of the decedent are exempt to the extent of \$5,000. The bill substitutes an en-tirely new schedule of rates of taxa-tion on transfers of property as fol-lows: Transfers to a father, mother, widow or minor child in excess of \$5,-000: 1 per cent on amounts to and in widow or minor child in excess of \$5,-000; 1 per cent. on amounts to and in-cluding \$25,000; 2 per cent. on the next \$75,000; 3 per cent. on the next \$200,-000; 4 per cent. on the balance. Upon transfers to a brother, sister, wife or widow of a son, or the husband of a daughter of the decedent: 2 per cent. on any amount up to \$25,000; 3 per cent. on the next \$75,000; 4 per cent. on the next \$200,000 and 5 per cent. on the balance. Upon transfers to other persons the \$200,000 and 5 per cent. on the balance. Upon transfers to other persons the tax is to be 5 per cent. on amounts up to \$25,000; 6 per cent. on the next \$75,-000; 7 per cent. on the next \$200,000; and 8 per cent. on the balance. There are also other provisions. To Taxation and Retrenchment Committee.

New Franchise Tax Schedules.

New Franchise Tax Schedules. Int. No. 362. McClelland.—Amending the Tax Law (sections 181, 182, 185, 193 and 197) relative to the franchise tax on corporations. It substitutes an entirely new schedule of rates as follows: 34 of a mill on each \$1.00 of the par value of the capital stock if no dividend is de-clared; 114 mills on any portion of capia mill on each \$1.00 of the par value of the capital stock if no dividend is de-clared; 1½ mills on any portion of capi-tal stock on which a dividend of less than 6 per cent. is declared or made. The stock is to be assessed at not less than its actual value and not less than the average price at which it is sold during the year. But if this would produce a less-amount than a tax of ¼ of a mill on the par value of all the stock issued then the tax is to be at the latter rate. Where a dividend of 6 per cent. or more is de-clared on any stock, the tax is to be at the rate of ¼ of a mill for each one per cent. of dividends on each dollar of the par value of such stock. A minimum tax of \$2.00 is provided. There are also other provisions regulating the time of filing of required reports. The bill also makes the tax applicable to every for-eign corporation doing business in the state except banking corporations, fire, marine, casualty, and life insurance com-panies, co-operative fraternal insurance companies and building and loan asso-ciations. To Taxation and Retrench-ment Committee. ment Committee.

"Improvements" Defined.

"Improvements" Defined. Int. No. 370. McClelland.—Inserting in the Poor Law a new section (31) authorizing the Common Council or board of Aldermen in each city of the first or second class to establish munici-pal lodging houses. Such a lodging house in a city of the first class must have an aggregate capacity of at least one per cent. of the population of the city; if in a city of the second class, a capacity of at least one-fourth of one per cent. of the population of the city. The mecessary money for the support of municipal lodging houses is to be raised by taxation in the city, but the state is to reimburse each municipality at the ate of 5 cents per night for each person ordered. Lodging houses are to be in charge of the overseer of the poor, or ike officer in each of the municipalities. To Cities Committee.

In the Assembly.

In the Assembly. Int. No. 441. McGrath.—Amending the Greater New York Charter (sections 1027 and 1035) by directing the collector of assessments and arrears, within 60 days of the time set for the sale of any tax lien, to give notice to all interested parties of such sale, providing they have filed in the office of the comptroller a

memorandum definitely describing the property and giving their names and property and giving their names and addresses. The bill also provides that no foreclosure action shall be brought by the holder of any transfer tax lien, without giving printed notice to the last owner of record, and other parties in interest interest.

owner of record, and other parties in interest. Int. No. 442. Murray.—Amending the Lien Law generally (sections 2, 4, 7, 10, 13 and 17). Among other changes, it provides that the term "improvement," when used in the lien law, shall include the drawing of any plans or specifica-tions by an architect or engineer, and the making of any surveys for the proposed erection, alteration or repair of any struc-ture. Structures erected on land and temporarily attached, so as to be remov-able from place to place, are included within the provisions of the law. The time within which notices of liens are to be filed is extended from ninety days to four months after the completion of the contract, or the final performance of the work, or the final furnishing of ma-terials. When a lienor, who has filed a lien after the commencement of an action and before trial, makes application to the court to be made a party, the court must direct him to be brought in by proper amendment.

and before trial, makes application to the court to be made a party, the court must direct him to be brought in by proper amendment. Int. No. 476. Knight.—Amending the Lien Law (sections 201 and 202) by re-ducing from ten days to one week the time, after service of notice of lien, with-in which the lien must be paid. It also permits the sale of personal property to satisfy a lien after ten days from the publication of notice of sale. The pres-ent provision is that fifteen days shall elapse after the first publication of such notice.

elapse after the first publication of such notice. Int. No. 490. Garbe.—Amending the Real Property Law (section 450) by pro-viding that cemetery lands are to be sub-ject to special assessments for street openings and street improvements, in-cluding the laying of sewers, except in the case of cemeteries not over three acres in extent owned and used by religious associations. They are also to be liable for their share of the expense of the condemnation proceedings in opening the streets when this expense is assessed on adjoining property to be benefited. benefited.

benefited. Int. No. 491. Goldberg.—Amending the Greater New York Charter (section 837) by directing the commissioner of docks to set aside a recreation pier at the foot of East 70th street on the East River.

Would Hurt Borrowing Capacity.

Allan Robinson, in a talk before the Prospect Heights Citizens' Associations in Brooklyn, on the question of the single-tax and the Herrick-Schaap bill, said

"This is how the scheme will work out. On an investment of \$100,000 one natur-ally expects an income of about \$5,000. If this is reduced by taxes to \$2,500 it fol-lows that the property becomes worth only \$50,000 as an investment. In other words its assessed valuation is reduced. The single tax would reduce the assessed valuation of property in New York City by \$400,000,000 and this means that our borrowing capacity would be reduced, be-cause the debt limit is thereby lowered 1- per cent., or \$40,000,000. This will stop our subways, our docks and all our other civic improvements.

our subways, our docks and all our other civic improvements. "Vancouver is usually cited as a proof of the success of the single tax. Yet in-stead of lowering rents, stopping specu-lation and relieving congestion we find that rents are higher, speculation in-creased 200 or 300 per cent., congestion become so great that a limit had to be set on skyscrapers, and the acutal amount of building fallen off during last year.

amount of building fallen off during last year. "The single taxers are becoming So-cialists. They deny it now, but men who have gone so far will go farther. Joseph Fels is spending \$100,000 a year in their campaign. It is possible that the" might get the bill through and that Mitchel would sign it, but I do not believe that he knows what it is. Bruere admitted, af-ter hearing Arthur Brisbane and Profes-sor Seligman riddle it, that perhaps Mitchel had been carried away by the enthusiasm of youth."

TO BRING ORDER OUT OF CONFUSION

And Eliminate Conflicting Orders. This Will Be the Principal Work of the New American Society for Fire-Prevention.

THE American Society for Fire Prevention having been organized to do things which the National Fire Protection Association never has done, and does not consider within its province, there is no reason, in the view of ex-Alderman A. W. Herbst, founder of the first-named society, why the utmost harmony should not exist between the two. In a letter which Mr. Herbst has written to President Kohn of the National association he says there are many tional association he says there are many organizations in existence throughout the United States aiming at the reduction of the fire hazard, but that the field of endeavor is so large there is room for all. Each can do its good work, and each should be encouraged by every other organization. He says the very fact that the National has been in ex-istence for many years should be all the more reason why it ought to welcome new blood and new energy into the field:

"We here have not been at all ignor-ant of the monumental character of the work ahead, but we at least have realized that every agency working to-day for the common cause has ample opportunity for beneficent effort for a generation to come without any good reason to be con-sidered as treading on the toes of anyone else.

What the New Society Is Doing.

"Allow me to enumerate a few things "Allow me to enumerate a few things that we are doing and which seem to be within our own special province. In the first place, we are working energetically with real estate owners, constructors, architects and financiers who are en-gaged in the erection of large buildings, to the end that when specifications are prepared they shall require all that can be specified to be of fireproof construc-tion. Your organization, on the other hand, as I understand it, devotes its en-ergies to the preparation of standards,

hand, as 1 understand it, devotes its en-ergies to the preparation of standards, and the education of the people to the observance of these standards. "I found, and your personal observance will bear me out, that in addition to making such standards, militant and ag-gressive work must be done to overcome perversive standards is an income powerful, selfish interests and the manip-ulations of partisan political coalitions, in order to receive official recognition of standards in the form of absolute legislation.

Its Greatest Work.

"Another work largely occupying our attention, possibly the greatest work we have on for some time to come, is through an educational campaign and through an educational campaign and general newspaper publicity to reduce, and possibly to eliminate absolutely, the conflict of authority, with resultant con-flict of orders and rulings, between vari-ous city and State departments through-out the country concerning building construction and fire prevention. As our little booklet outlines, this conflict of authority has worked vast hardship on property owners and has done more than any other one thing to create resentment property owners and has done more than any other one thing to create resentment on the part of the general public to the subject of practical fire prevention. Your organization, I believe, has done little or nothing to cope with such con-ditions. Our organization, I believe, is making it a prime reason for existence. "Furthermore, the enactment of rea-sonable and honest building codes, not only for New York City but for other municipalities throughout the country, is another field of activity in which we not only can be extremely useful but are proving every day now that we are use-

ful. My own connection with building code work in this city has given me an experience that is valuable in this direction, and this experience should be wel-comed by all interests favoring a reduc-tion of the fire hazard. This is a field in which your organization is not active, and this field readily can be extended, as we now are extending it, from the local governing bodies of various cities to the legislatures of the various States.

Safe Housing of Records.

"The extension of the Public Records laws of a few of our Eastern States, notably New York, so that other States can benefit by the experience of New York, Massachusetts, Connecticut, Rhode Island and New Jersey and provide for Island and New Jersey, and provide for the adequate and safe housing of their the adequate and safe housing of their important documents, such as wills, deeds, vital statistics and other records kept by county, town and village clerks, to other States of the Union, is still an-other field in which we properly can be active. It alone would justify our pres-ence in the field as an organization for fire prevention, without properly incur-ring the disapproval of the National Fire Protection Association. Protection Association.

"In view of the courtesy that you showed me in writing so exhaustively on the subject, and in view also of the fact that you stated that you would use your letter as an answer to certain of your correspondents who had inquired of your correspondents who had inquired of you regarding our organization, I also am writing to you in extenso. Should you, upon careful reflection and study of the above details, find that the good work of this society might benefit the public in the great work in which both organizations are engaged, and might supplement substantially the efforts of your society, although in some slight de-tails we might appear for a moment or two to be encroaching. I would suggest tails we might appear for a moment or two to be encroaching, I would suggest that in such an event a conference be-tween you, as president of your organi-zation, and myself, as one of the officials of this society, might be of advantage. "Our feeling is that the field is broad enough for all, that each has its function to perform and that any organization

to perform, and that each has its function to perform, and that any organization, no matter how long standing, can be aided by co-operation from other sources. Any organization that desires to welcome co-operation and is not actu-ated by an inclination to stifle co-ordin-ate offect will find us reached and the structure. ate effort, will find us ready and willing to do our share toward pulling the load."

Held in Abeyance.

Seven thousand new firms opened of-fices in New York last year, most of them settling south of Chambers street, according to the Real Estate Board's Bulletin. The number that moved away is not given, but in the natural course of events there will come in due time a very complete tenancy of the usable offices in the district. The only question concerns time and fitness. An usable offices in the district. The only question concerns time and fitness. An immense amount of new space is being put on the market, too much to be ab-sorbed readily, and some of the old buildings will rent less easily because of having their light dimmed by the new skyscrapers and of being over-shadowed in other ways. But sooner or later met-ropolitan demand evens up fairly well

in other ways. But sooner or later met-ropolitan demand evens up fairly well with supply, and there are important economic and commercial changes com-ing which will accelerate the demand. One big building project that has been held in abeyance since the summer of 1912 is still in an uncertain stage. Plans for the erection of the new Western Union Building, on Broadway, twenty stories in height and to cost \$8,000,000,

have not yet been circulated for contractors' bids, notwithstanding that the annex at 14 to 18 Dey street is practically completed.

The delay is attributed to complica-tions in the government action in the tions in the government action in the case of the American Telegraph & Telephone Co. and its relations with the Western Union Telegraph Co. Dow, Jones & Co. announced about two months ago that the Western Union Co. had asked permission to withdraw the property of the company at 195 Broadway from the mortgage given as security for an issue of $$20,000,000 4\frac{1}{2}$ per cent. 50-year refunding and real estate mortgage bonds, all of the issue being now outstanding.

all of the issue being now outstanding. The Western Union building has a frontage of 75 feet on Broadway and 275 feet on Dey street with an L to Fulton street. The value of the present 275 feet on Dey street with an L to Fulton street. The value of the present land and building is estimated at about \$3,000,000. If the arrangements of ad-justment with the government do not interfere finally with the project, this property will be sold to a syndicate which will organize a company in which the Western Union Co, will have an in-terest. terest.

FIREPROOF TENEMENTS.

The Schneiderman Bill Would Add to Construction Costs and Raise Rents.

The amendment to the Tenement House Law as proposed by Assemblyman Schneiderman in his bill No. 243, just introduced in the Legislature, that all Tenement Houses hereafter erected

all Tenement Houses hereafter erected over four stories in height be fireproot, is certain to meet with great opposition on the part of builders and real estate operators. Mr. G. Richard Davis, of the 'hrm of A. L. Mordecai & Son, who is chairman of the Allied Keal Estate In-terests' building committee, said: "For the past five years we have been adding to our laws governing building construction so many and varied regula-tions that the cost of construction has been increased from ten to twenty per cent. It is undoubtedly true that many of the new laws were necessary changes, and those which added to the saiety of the tenants by requiring additional means of exits and fireproofing, and by protecting the requirements for light and air, are such as we all must agree to. "It encentheless in a fire the ten the saiety of

protecting the requirements for light and air, are such as we all must agree to. "It nevertheless is a fact that it is al-most impossible today to erect tenement houses and comply with the new laws governing their erection and still keep the cost low enough to enable us to rent finished apartments at anything like a reasonable rent. This is true even in the most remote parts of the Bronx where lots can be purchased at from \$1,000 to \$3,000. The tenement house cannot be built cheaply enough to permit the own-ers to rent rooms at the old-time prices, such as four to five dollars a room.

ers to rent rooms at the old-time prices, such as four to five dollars a room. "The result is that the old tenement houses, which are unsanitary but cheap in rent, are overcrowded, and the con-gestion of population, about which there is so much complaint, is due largely to the very conditions which such a law as Assemblyman Schneiderman seeks to create." create.

Steel Works to Tidewater.

Official denial is given to reports that the Bethlehem Steel Company is nego-tiating for a tract of land at Bayonne and no confirmation can be obtained for an earlier report that inquiries have been made at South Brooklyn in behalf of other steal interests desiring to purchase made at South Brooklyn in behalf of other steel interests desiring to purchase either a terminal or a manufacturing location. Nevertheless the very general belief in real estate circles that there is something hatching is supported by the logic of national and economic events. Ore is not going to be railed from the seaboard here to Pennsylvania from South America and back again in the form of steel products for long, without there being a very careful consideration by steel interests of the advantages of having export plants on tidewater.

-The population of White Plains has doubled in ten years, being now 22,000.

Two Wise Decisions.

The Public Service Commissioners have finally adopted two wise decisions. They have decided to connect the Lexington avenue subway with the Park avenue subway by means of a diagonal tunnel under the Grand Union Hotel, and they have decided to place the express station of the Broadway subway press station of the Broadway subway at 42d street instead of at 47th street. To one who is not an official the com-missioners seem to have taken an un-necessarily long time to reach two deci-sions the need of which has from the beginning been fairly obvious; but they have decided right in the end—which is the important thing. The location of

beginning been fairly obvious; but they have decided right in the end—which is the important thing. The location of the express station of the Broadway subway at 42d street will in particular confer large and lasting benefits upon the travelling public of New York City. Long Acre Square is the most important meeting point of the two systems, as well as one of the most important cen-ters of traffic in Manhattan. The location of two express stations at 42d street will enable Brooklyn pas-sengers to reach the west side of Man-hattan and the Bronx with the smallest amount of inconvenience; and it will perform a corresponding service in respect to Brooklyn for the inhabitants of the West Side and the Bronx. It will give passengers on the Brooklyn Rapid Transit an easier connection with the Grand Central Station and an easier way of reaching the places of amuse-ment and the shops on and near 42d street. It will also give the lower West Side of Manhattan better access to cer-tain parts of Queens than they could otherwise obtain. The result will untain parts of Queens than they could otherwise obtain. The result will unotherwise obtain. The result will un-doubtedly be the conferring on the Long Acre Square station of the primacy among all the stations on both branches of the dual subway. In the course of time more passengers will embark, dis-embark and transfer at that point than at any other point in the whole city, and, of course, correspondingly extensive arrangements will have to be made for the accommodation of this traffic. It will mean the construction of a capawill mean the construction of a capa-cious concourse, leading to and from the several subway platforms, and along this

several subway platforms, and along this concourse more people will pass than along any other footway in the city. It will enable a passenger both to transfer from any one subway to any other sub-way and to return to the surface at any part of Long Acre Square as far north as 43d street. The two express stations will stretch down Broadway and Seventh avenue as far south as 40th street and ought to make the property in that immediate neighborhood peculiarly available for theatres. In reaching this decision the commission has deserved well of the people of New York, but the way to deserve better of them will be to avoid further delays and to concentrate all their energies on accelerating the confurther delays and to concentrate all their energies on accelerating the con-struction of the new system. The addi-tional delay of every month is enor-mously costly to the property owners and people of New York City. The most troublesome technical questions have now been decided, and the knotty engineering or financial problems which remain should be quickly disposed of. Every section of the new system should, if possible, be placed under contract dur-ing the next few months.

Confiscation Through the Single-Tax.

The president of the Manhattan Single-Tax Club published in the last issue of the Record and Guide a defence of the single-tax which is worth a little consideration. Mr. Mason is a very liberal advocate of the single-tax. He does not wish to confiscate existing land values. He says: "While I believe that land values are created by the commun-ity and should have gone to the com-munity from the beginning, I also believe that having made land a subject of sale and purchase for centuries we are morally estopped from taking from the land owners their present posses-sions." He seeks, consequently, to apply the single-tax without confiscation, and this he believes can be done by the grad-ual appropriation by the city of the \$150,000,000 which, according to him, represents the annual increase in land

\$150,000,000 which, according to him, represents the annual increase in land values. Without admitting Mr. Mason's pre-mises, we may none the less dissent from his conclusion. If, as he says, the community is "morally estopped from taking from the land owners their present possessions," he has assuredly pronounced a moral condemnation on the single-tax, for the single-tax would most assuredly result in confiscating a certain part of existing urban land values. The result of carrying out the plan which Mr. Mason proposes, of low-ering the tax on buildings by \$10,500,000 every year for five years, would be to deprive a large number of real estate owners of their property. Mr. Mason's calculation is based upon an average annual increase of land value in New York City, amounting to \$150.000,000; but he overlooks the fact that of late years there has been no such increase in land values. The constant augmenta-tion of taxes has resulted in the appro-priation by the city of a large part of any increase which may have taken place. The additions which have been made of late years to the assessed valu-ation of real estate have been due to an attempt to level up these values for purposes of taxation. They do not for the most part represent an increase in the price at which real estate can be sold. Under conditions now prevailing in the New York real estate market the increased taxation of ground values would simply mean the confiscation of existing ground values and in many cases the partial wiping out of the se-curity for the mostrage

increased taxation of ground values would simply mean the confiscation of existing ground values and in many cases the partial wiping out of the se-curity for the mortgage. Even if, however, the annual increase of land values should amount, as Mr. Mason says, to \$150,000,000 a year, his plan to impose the single-tax would still result in confiscation. He must know that the increase in ground values is not spread evenly throughout the city. Some property would have increased consid-erably in price. Some property would have been only moderately affected; and, finally, some property would have either diminished in price or remained unaf-fected. In the case of the last two classes of real estate the transfer of the building tax to the land would certainly result in the confiscation of part or all of the value of the land. Thus any method of imposing a single-tax such as method of imposing a single-tax such as that proposed by Mr. Mason would re-sult in a gross discrimination. The in-creased land tax might be carried with creased land tax might be carried with ease by some taxpayers, whereas in the case of others it would mean severe and probably irremediable loss. The only way in which the city government could appropriate some of the increment in real estate values without injustice is by means of the increment tax.

Cannot Afford to Bridge the Hudson.

The people who favor a Hudson River bridge have been getting very active of late and intend to make an effort to secure the legislation which is necessary for the construction of such a connection between New York and New Jersey. The terms of the bill divide the cost, which is estimated at between \$40,000,-000 and \$50,000,000, between the city of New York and the neighboring coun-ties in New Jersey. It is safe to say that any such legislation will meet with that any such legislation will meet with vigorous opposition on this side of the river. New York is not in any position to spend \$20,000,000 or \$25,000,000 on a Hudson River bridge. The city cannot afford the expenditure, and its inhabi-tants would not derive any benefit from its construction commensurate with the expense. When the first Brooklyn Bridge was built. Brooklyn paid twoits construction commensurate with the expense. When the first Brooklyn Bridge was built, Brooklyn paid two-thirds of the cost, while Manhattan paid only one-third, a division which fairly represents the proportionate benefit which the two sides of the Hudson River would derive from a similar con-nection. But even if New Jersey were willing to pay two-thirds of the cost New York would not be interested

Inspectors for the Public Service Commission have verified the statement of com-plainants before the commission that the car service on the Sixth avenue and Eighth avenue surface lines is infrequent and in-sufficient. The commission, it is under-stood, will order more cars to be put on.

Rentals in the old wholesale section have not on the whole noticeably imhave not on the whole noticeably im-proved since the great migration to up-town centers, but vacancies made with-in a year have been more than made up by the incoming of new trades, and some local benefit is expected from the operations of the new occupancy law relating to factories.

The improvement of the East River and Hell Gate in New York harbor, a project that calls for an ultimate expenditure of \$13,400,000, was approved this week by the House Committee on Rivers and Harbors. House Committee on Rivers and Harbors. An initial appropriation of \$500,000 will be made to begin work. Municipal and State authorities and the Engineer Corps of the War Department have indorsed the project.

According to the Automobile Chamber of Commerce, the increase in fatalities caused by motor vehicles is due not to greater number of cars in use. The mortality rate per 1,000 automobiles registered is said to have remained stationary. Yet the increase in fatalities from 274 in 1911 to 451 in 1913, throughout the State, is unquestionably larger than might have been expected in view of the more stringent traffic regula-tions of the last year or two.

Since Lloyd George's land taxes went into effect a number of realty holdings in England and Scotland have been put upon the market. The latest to find a buyer is the freehold estate in the barony of Assynt, Sutherlandshire, belonging to the Duke of Sutherland. The purchaser is John William Stewart, a railroad contractor of Vancouver, who is to pay \$300,000 for it, if the deal is sanctioned by the courts. The property is entailed, which accounts for the necessity of submitting the transac-tion to a judicial review.

RECORD AND GUIDE

enough to contribute the remainder. One or two traffic tunnels are all that is needed to accommodate the vehicles which need to cross under or over the Hudson River. The taxpayers have spent enough money on bridges. They are a luxury—in which not even New York is rich enough to indulge.

Untaxing Buildings Would Make Realty Investments Uncertain.

Editor of the RECORD AND GUIDE :

It seems from the article, "In Defense of the Single Tax," by Mr. Alfred Bishop Mason, president of the Manhattan Single Tax Club, in your issue of February 7, that both Prof. Joseph French Johnson and I were mistaken in our opposition to the single tax. I can be-lieve this of myself, but not of Pro-

Johnson and I were mistaken in our opposition to the single tax. I can be-lieve this of myself, but not of Pro-fessor Johnson. I had an idea (and possibly Prof. Johnson had it also) from what Henry George and other single taxers have written scores of times that the single tax advocates proposed to levy a tax on land which would equal its income and destroy its selling value. Now comes Mr. Mason, describing himself as a single taxer, who proposes a perfectly obvious increment tax, which is not a single tax at all. To call it a "single tax, limited" is no more likely to make it pleasing to land owners than the high-wayman who promises not to take your watch if you give him your purse. From the tax assessors we have the statement that the annual increase in the value of land in New York City amounts to \$150,000,000. If that is true, it amounts to only 3 per cent. on the as-sessed valuation of land in the city, which is in round numbers \$5,000,000,000. This is less than if the money invested had been loaned on mortgage. This increase of \$150,000,000 is made up of several items, among them one of \$15,000,000 in assessments, which is a contribution to capital account from earnings of labor and is not an unearned increment, but belongs to the owners. Another item is an increase in the value of land by reason of the erection of buildings on it. This is not an un-earned increment, but also belongs to the owners of the buildings. On the other hand, the assessed value of build-ings and improvements is \$3,000,000,000 in round numbers. Buildings decrease in land, including the contribution from as-sessments. Wour investments in land have been based on the theory that where there is

sessments.

sessments. Our investments in land have been based on the theory that where there is a decrease in the value of buildings it is made up by an increase in the value of the land. This makes for steadiness of values and accounts in large part for the confidence investors all over the world have in New York City real estate. Who would be benefited by making real estate investments uncertain, as would be the case if the buildings were the only security? Is it to be supposed that cheaper rents would result? CYRUS C. MILLER.

CYRUS C. MILLER. New York, Feb. 10.

Overlapping Municipal Departments. Editor of the RECORD AND GUIDE :

I have read with considerable interest in the Record and Guide the article on overlapping of department orders and the resulting confusion. This matter is nothing new to the architects practicing in this city who have complained for many years of this ridiculous condition; in fact, ever since the enactment of the present Tenement House Law, which was made ridiculous in its enforcement by former commissioners, we have endeav-ored to have this department consoli-dated with the Building Department, where it properly belongs. The public at large is being hood-winked in the enactment of the various new laws in the interest of the working or industrial community, who derive but little real benefit from such enactments; but they, as well as the taxpayer, must bear the burden of having these laws in this city who have complained for

carried into effect by an army of inspectors, etc. Whenever a new department has been

created it must be headed by a high-sal-aried commissioner, with his staff of assistants, suitable headquarters, etc.; otherwise the department would be of little value; and this, of course, costs money

If the entire work as now done by the If the entire work as now done by the various separate departments where con-solidated under one head, and that the Building Bureau, the work as now re-quired to be done would be accomplished in a systematic manner without the pres-ent annoyance and conflict of the vari-ous departments and at a cost of but little more money than now required by the Building Bureaus of the city. Without going into details, the appro-priation for three of the city departments are as follows:

are as follows:

What sums are used by the Water, Sewer, Health, and Industrial Depart-ments to keep the inspectors busy I am unable to say. ADAM E. FISCHER. 373 Fulton Street, Brooklyn.

Local Assessments for Playgrounds. Editor of the RECORD AND GUIDE :

In view of the movement of the Old South Brooklyn Civic League, the application of the Harlem Chamber of Commerce, and the bill introduced in the Assembly by Assemblyman August Flamman of Kings County, for the acquisition and condemnation of property in various sections of the Boroughs of Manhattan and Brooklyn for playground purposes, the Brooklyn Board of Real Estate Brokers has adopted the follow-ing: ing

Estate Brokers has adopted the follow-ing: Be it resolved, that we, the Brooklyn Board of Real Estate Brokers, desire re-spectfully to protest against any such further expenditure of the public moneys for the purpose outlined, particularly in view of the number of small parks scat-tered throughout the city, portions of which are and should be made available for playground purposes without detri-ment to the park or the neighboring property. And we recommend that the policy established by the Board of Esti-mate and Apportionment in the fall of last year whereby the cost of the acqui-sition of the Brownsville playground is to be assessed upon a certain local area be strictly adhered to in all such applica-tions for local playground sites, such being the most fair and equitable to the taxpayers at large. And be it resolved, that there is abso-lutely nothing whatever in this resolution that could be construed that this board is opposed to playgrounds. On the con-trary, we are very much in favor of play-grounds under the above conditions.

that could be construed that this board is opposed to playgrounds. On the con-trary, we are very much in favor of play-grounds under the above conditions. And, further be it resolved, that a copy of this resolution be forwarded to His Honor, the Mayor, the Comptroller, the Board of Estimate and Apportionment, the chairman of the Sinking Fund Com-mission, the presidents of all the bor-oughs, and the President of the Board of Aldermen. Aldermen.

BROOKLYN BOARD OF REAL ESTATE BROKERS, C. C. Mollenhauer, President.

Keep the Public Service Commission Out of Politics.

Editor of the RECORD AND GUIDE:

Those of the RECORD AND GUIDE: Those of us who have been actively identified with the plans for rapid tran-sit improvement in New York during the last three years, are now vitally in-terested with the public at large regard-ing the appointment of a commissioner to succeed Commissioner Eustis in the Public Service Commission. There is evidence of a growing tendency to reevidence of a growing tendency to re-gard the appointments to the Public Ser-vice Commission on the basis of political expediency rather than on the basis of public welfare. There is also evidence of a disregard of the geographical di-visions of the city.

The commissioners' oath of office, of course, covers the entire city, but it has always been felt that there should not be a preponderance of commissioners from one locality. Commissioner Eustis has been regarded as especially qualified to maintain the interests of the Bronx in the general development of plans for the city at large. In the consideration of his successor, however, many names have been advocated which have no identification with this section of the city, or even with transit improvement, although there are at least three or four Bronx men who have made a careful study of municipal transit, and who are also familiar with the other departments of work coming under the jurisdiction of the commission. The commissioners' oath of office, of

of work coming under the jurisdiction of the commission. Anyone who has studied rapid transit in New York and has studied the meth-ods of European cities, including transit and other branches of municipal utilities, and especially those in German cities, cannot fail to realize the importance of a Public Service commissionership as it bears upon the daily convenience and the annual tax assessment of the people of New York. If the public itself re-garded the work of the Public Service Commission at its full value to the city, there would be an emphatic protest against even the suspicion that appoint-ments to the commission were made against even the suspicion that appoint-ments to the commission were made with any other consideration than the important work for which the commis-sion was designed, and which it will be able to carry out, if the public's concep-tion of its scope and importance does not become so blurred as to permit deviation from the original standards. It would be well for the city if the scope and purpose of the Public Service Commission, and the character and vol-ume of the transactions with which it is concerned, were frequently forced upon the attention of taxpayers and of those who depend upon public utilities in their daily life.

daily life.

W. R. MESSENGER.

Praiseworthy Public Service.

Editor of the RECORD AND GUIDE :

As a reader of your publication, and believing that where praise is due it should be given, I want to pay a tribute

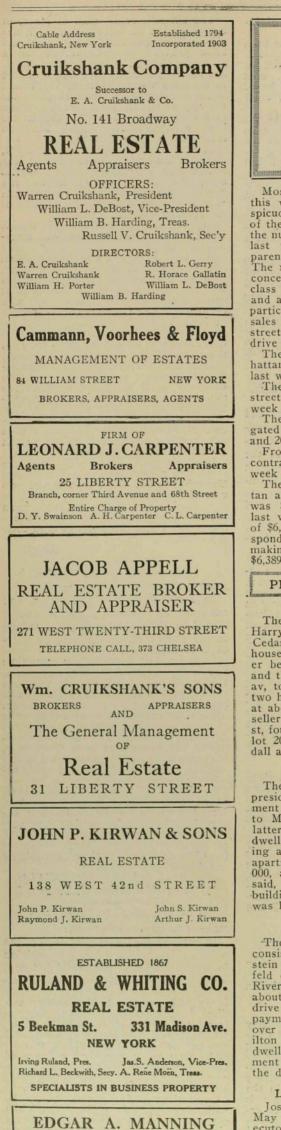

to the Bureau of Buildings in the Bor-ough of Richmond. I had occasion to visit there some time ago to fill out certain blanks, with which I was unfamiliar, and the courtesy and consideration by the clerk in charge and his assistants was certainly praiseworthy. While I was present I noticed that many of those who called wished to file plans of those who called wished to file plans for small dwellings, and they were evi-dently not conversant with the details, but these were fully explained in a kindly manner, suggestions made, and every as-

manner, suggestions made, and sistance given. In these days when criticism is ram-pant of city employes, I hold it is equally just that praise be rendered where de-served, and that other readers, and pos-sibly your own representatives, will bear me out concerning the bureau above re-ferred to, as regards patience, tactfulness and kindly consideration. JOHN McDONALD.

A Get-Together Force Wanted.

Editor of the RECORD AND GUIDE :

It may seem presumptuous for the writer, a layman, to express an opinion in commendation of your lucid and con-vincing thesis on the real estate fra-ternity's need of a get-together force. If the polls prove to be the deciding me-dium for treatment, why not some at-tempt to coalesce more with the voters (the tenants)? The landlords are a small quantity in comparison. If it is pos-sible, why not arrange an alliance of the Merchants' Association, the Econ-omy League and the Realty Board, com-bining also with financial and labor organizations and reform movements, with a give-and-take policy to seek the common end of the supremacy of our city in order that peace and harmony may prevail over antipathy and chaos. It should not prove impossible to ar-range. A NEW YORKER. New York, Feb. 2. in commendation of your lucid and con-

THE WEEK'S REAL ESTATE NEWS

Brokerage Sales, Auctions, Foreclosure Suits, Building Loans, etc., Together With Brief Personal Items.

The Bulk of the Trading Affected Properties on the Upper West Side.

Most of the transactions consummated this week concerned small and incon-spicuous properties. Nearly all sections of the city contributed to an increase in the number of sales and aided in doubling last week's record. The holiday ap-parently had no effect on the business. The more important deals of the week concerned West Side holdings. A high-class West End avenue apartment house and another on St. Nicholas place were particularly noticeable. Other interesting sales involved a loft building on 26th street and vacant plots on Riverside drive acquired by operators. The total number of sales in Man-

drive acquired by operators. The total number of sales in Man-hattan this week was 45 against 22 for last week and 35 a year ago. The number of sales south of 59th street was 7, compared with 7 last week and 15 a year ago. The sales north of 59th street aggre-gated 38, compared with 15 last week and 20 a year ago. From the Bronx—16 safes at private contract were reported, against 11 last week and 14 a year ago. The amount involved in the Manhat-tan and Bronx auction sales this week

The amount involved in the Manhat-tan and Bronx auction sales this week was \$295,079, compared with \$640,294 last week, making a total since Jan. 1 of \$6,238,594. The figure for the corre-sponding week last year was \$1,199,391, making a total since Jan. 1, 1913, of \$6,389,250.

PRIVATE REALTY SALES.

Apartments in Trade.

Apartments in Trade. The Strathcona Construction Co., Harry Falk, president, has sold the 6-sty Cedarcliff and Somerset apartment houses, each on plot 99.1x100, the form-er being located at 48 St. Nicholas pl and the latter abutting at 385 Edgecomb av, to the Brown-Weiss Realties. The two houses are said to have been valued at about \$400,000. In part payment the seller took 632, 634, 644 and 650 Coster st, four 2-sty two-family houses, each on lot 20x100, between Spofford and Ran-dall avs. dall avs.

West End Avenue Deal.

West End Avenue Deal. The Aeon Realty Co., Sumner Gerard, president, has sold 12-sty elevator apart-ment house at 562 to 568 West End av to M. Kroenke. In part payment the latter gives some cash and four old dwellings at 40 to 46 East 31st st, form-ing a plot 75x98.9. The West End av apartment figured in the trade at \$550,-000, and the 31st st plot, which, it is said, will be improved with a 16-sty loft building from plans by Walter Haefeli, was held at \$225,000.

Riverside Drive Transaction.

Riverside Drive Transaction. The George Backer Construction Co., consisting of George Backer and Arn-stein & Levy, purchased from Lowen-feld & Prager the northeast corner of Riverside Drive and 144th st, a plot of about five lots, fronting 100 ft. on the drive and 128.8 ft. on 144th st. In part payment for the plot the buyers took over Mr. Backer's residence at 51 Ham-ilton Terrace, a 3-sty and basement dwelling, on lot 25x98.3. No improve-ment is contemplated for the present for the drive corner. the drive corner.

Loft Building Changes Hands.

Joseph P. Day has sold for Charles May and George V. N. Baldwin, Jr, ex-ecutors of the estate of George V. N. Baldwin, the 7-sty store and loft build-ing on plot 41.6x98.9, at 110 and 112 West 26th st to the Landmap Realty Corporation.

Altman Realty Sold. The estate of Benjamin Altman has sold the plot of ten lots at the north-east corner of Riverside Drive and 88th street, size 103x241, to Klein & Jackson, who will erect a nine-story apartment house. The brokers were George R. Read & Co.

Manhattan-South of 59th Street.

Maintatian—South of Syth Siteet, BEEKMAN ST, 33, 5-sty building, for 238 X102, sold by Francis D. Bowne to the Public Service Commission. This lot together with the adjoining southwest corner of William and Beek-man sts, will be used to provide a twin for the new 7th av subway. CHARLES ST, 53, 3-sty dwelling on lot 16.8 X74, near the 7th av extension, resold for Mrs. Margaret Trail to Jules Lavanaux for specula-tion, by the Duross Co.

COMMERCE ST, 9, 3-sty dwelling on lot 21x 40, sold by John J. Bogart to a Mr. Van Velen. The property is partly along the line of the 7th av extension.

The property is partly along the line of the 7th av extension. 24TH ST, 26 West, 4-sty building on lot 19x 80, sold for the estate of Alfred L. Manierre to the estate of William S. Schermerhorn, by the firm of L. J. Carpenter. Twenty years ago when the Schermerhorn estate erected the 8-sity building lately occupied by the Flint furni-ture firm, an effort was made to buy this 24th st parcel, but the owners would only part with it on a ground lease. The Flint furniture build-ing was then erected. J. Hardenbergh, archi-tect, who designed the building, is preparing plans to build an 8-sty structure on the recently acquired plot and combine it with the larger structure, which will virtually be rebuilt. 31ST ST, 31-37 East, three 3-sty dwellings and one 4-sty dwelling, on plot 85.8x98.6, re-ported sold by Thomas Williams and C. W. Cooley to a builder, who will improve with a commercial building.

Manhattan-North of 59th Street.

Mannattan-North of 59th Street. 65TH ST, 10 West, 5-sty, flat on plot 30x100.5, sold for the Astor Trust Co, executors of the estate of Annie F. Shardlow, to William H. Gentzlinger, by M. M. Hayward & Co. 77TH ST, 307-309 East, 6-sty tenement, on plot 50x100, sold by Lowenfeld & Prager to Bernard Heinrich, who gave in exchange the 3-sty dwelling at 378 6th av, Erooklyn. 80TH ST, 123 East, 31/2-sty residence on lot 18.9x102.2 sold for Guy Warren Walker to Wal-ter E. Hope for occupancy, by William B. May & Co.

SIST ST, n w c Av A, 5-sty triple flat, on plot 26x80, sold by Mrs. M. Richmond to Morris Gluck, for investment.
S3D ST, 166 West, 5-sty double flat, on lot 25x109.3, sold by Ennis & Sinnott to Charles Largels

25x100.5, solut by Lance 2 Jagels. 84TH ST, 120 East, 3-sty garage, on plot 27x102.2, sold for Charles Golden to Samuel A. Herzog, by Douglas L. Elliman & Co. The buyer bought adjoining property last week and now holds a frontage of 87 ft., on which will be erected a 9-sty apartment house.

erected a 9-sty apartment house. S4TH ST, 129 East, 3-sty and basement dwell-ing, on lot 20.5x102.2, west of Lexington av, sold by the Lewengood estate to Lina Well. S4TH ST, 355 West, 4½-sty dwelling, on lot 16x100, sold for Mrs. F. H. Wildes to Joseph F. Geraghty for occupancy, by Pease & Elliman. 95TH ST, 149 West, 3-sty and basement pri-vate dwelling, on lot 18x100, sold for Joseph F. A. O'Donnell to M. I. Sheehan, by John R. Davidson. 69TH ST, 108 West, 4-str. brownstore dwell

69TH ST, 108 West, 4-sty, brownstone dwell-ing, on lot 20x100.5, sold for Wilbert Garrison to a physician for occupancy, by Frederick Zittel & Sons.

to a physician for occupancy, by Frederick Zittel & Sons.
90TH ST, 114 West, 5-sty flat, on lot 26.6x
100.8, sold for Cardinal John M. Farley and the Roman Catholic Church of St. Gregory to K. Weisslederer, by the Herman Arms Co. The new broker has placed a loan of \$20,000 at 5 per cent. on the property, for the new owners.
97TH ST, 116 East, 5-sty apartment house, on lot 25x100, sold for Pattorn & Van Sandt to a client for investment by the Nicholls-Ritter-Goodnow Realty Co.
106TH ST, 119 East, 3-sty and basement dwelling, on lot 16.8x100.11, sold by Charles Wynn to Wm. H. Gallinger.
107TH ST, 5 and 7 West, two 5-sty flats, on plot 50x100, sold for John J. Harlow to Martha Seessner, by the Herman Arms Co. The house was later resold to Charles Jagels through the same broker.

same broker. 124TH ST, 505 West, 6-sty apartment house, "the Royal Palm," on plot 50x100.11, sold for Magdalen Briner to Edward G. Schroeder, by J. C. Hough & Co. 125TH ST, n w c St. Nicholas av, 6-sty apart-ment house, the Oneonta, on plot 99.11x100, sold by John O'Brien to Solon Berrick, who gave in part payment the 6-sty flat, on plot 40x100, at the northeast corner of 3d av and St. Paul's pl. The Manhattan property has been held at \$265,000 and the Bronx parcel at \$70,000.

129TH ST, 22 East, 3-sty dwelling, on lot 17.10x90.11, sold for the Benenson Reaity Co. to a chent, by D. H. Scully & Co. 129TH ST, 209 West, 3-sty dwelling, on lot 18.9x99.11, sold by the Gramercy Investment Co. to the Calvary M. E. Church, which occupies the northwest corner of 7th av and 129th st. 133D ST, 9 West, 5-sty flat, on lot 25x99.11, re-sold for Louis Block to Della White, by L. J. Greenberger. 135TH ST, 505 West 5-sty apartment the

Greenberger. 135TH ST, 505 West, 5-sty apartment house on plot 50x99.11, reported sold by Philip Simon. 138TH ST, 629-631, 5-sty apartment house, on plot 50x99.11 sold by Mary F. Martin to Eaward J. Farreil, who gave in part payment the 3-sty and basement dwelling at 732 St Nicholas av, on plot 30x100. The brokers were Arnold, Byrne & Baumann plot 30x10 Baumann.

Baumann. 140TH ST, 510-514, 5-sty apartment house, on plot 75x99,11, sold for the W. H. Moore Construc-tion Co. to Franz J. Michel, by Moore, Schutte &Co., as attorneys. The buyer gave in part payment 2266 Amsterdam av, a 5-sty flat, on plot 37.6x100.

146TH ST, 420 West, 5-sty apartment house, on plot 37.6x99.11, east of Convent av, reported sold by Eva Heymann.

170TH ST, 609 East, 5-sty flat, on plot 44x95, uwc Franklin av, sold by Lizzie J. Waugh to Carl Jorn, the tenor of the Metropolitan Opera

Co.
FORT WASHINGTON AV, s w c 162d st, plot 100x150, resold by H. & M. Mandelbaum to the Friedman Construction Co., which will erect a 6-sty apartment house.

REAL ESTATE NOTES.

SPEAR & CO. have been appointed agents of 123 Prince st and 83 Spring st.

JOHN PALMER has moved from 156 Broad-way to 18-20 East 41st st.

way to 18-20 East 41st st. N. A. BERWIN & CO, have moved to 18-20 East 41st st. SIDNEY D. RIPLEY, who has been con-nected with Worthington Whitehouse, is now associated with Cocks and Willets. HENRY BRADY has been appointed agent of the loft building at 624-626 West 24th st and 156-158 13th av. WILLIAM F. COSTELLO, for ten years with Charles Field Griffen & Co., is now connected with the firm of Fish & Marvin. DUFF & CONGER have been appointed agents

with the firm of Fish & Marvin. DUFF & CONGER have been appointed agents of the property on the southwest corner of Madison av and 82d st. LIONEL N. KOHLER, formerly connected with the firm of Frederick Fox & Co., is now associated with the firm of L. Tanenbaum, Strauss & Co., Inc. GOODALE, PERRY & DWIGHT negotiated the sale of 609 West 49th st for Robert Weber to Lyon Davis. The same firm also negotiated the sale of 448 Broome st and 500 East 138th st.

the sale of 448 Broome st and 500 East 13818 st. BENJAMIN I. SHIVERTS, attorney for John P. Magner, owner of 11 West 95th st, states that recent negotiations for a sale of that prop-erty were not consummated, and that the prop-erty is still in the market. GEORGE F. JOHNSON has appointed the following apartment houses: 871, 879, 883, 911, 913 and 917 Longwood av, 814 Hewitt pl and 811 Dawson st.

Dawson st.

TITLE passed on Monday from the 303 Flifth Ave Co. to the Philipse Manor Co., on the 20-sty commercial building on the northeast corner of 5th av and 31st st, subject to mortgages of \$1,450,000.

TITLE to the El Dorado Apartments, occu-pying the block front on the west side of Cen-tral Park West, between 90th and 91st sts, was transferred Monday by the Aurley Realty Co.

WILLIAM B. READ, as agent for William H. Falconer, states that there is no foundation for the recent report to the effect that the apartment house at 12-14 Charles street had been sold. According to Mr. Read, the house is not even on the market.

DOUGLAS L. ELLIMAN & CO. have been ap-pointed agents for the new 12-sty apartment house being erected on the site of the old Freundschaft Club at the southeast corner of Park av and 72d st. by the E. A. L. Construc-tion Co., Edgar A. Levy, president.

<text><text><text><text>

193 meetings, that 37,000 signatures in favor of a referendum on the gradual reduction of the tax rate on buildings have been secured, and that twenty-four Assemblymen, elected from Greater New York, are pledged to favor and work for this referendum.

REAL ESTATE APPRAISALS.

The following valuations were placed on real estate properties this week by the State ap-praisers in transfer tax proceedings. The amount specified does not in every case indicate the equity of the decedent. It simply quotes the estimated market value of the realty, regardless of mortgages or other liens:

of mortgages or other liens: ESTATE OF JOSEPHINE MACMILLEN, prem-ises at 74 Greenwich st, valued at \$41,000; and 512 East 89th st, valued at \$7,500. FANNY BACHRACH, 2277 3d av, \$37,500; 163 East 125th st, \$43,500; 162 East 126th st, \$13,500, and 3762 3d av, \$9,000. JENNIE McCABE, 78 Washington pl, \$20,000. WILLIAM M. MORAN, 1983 Madison av, \$19,000; 19-23 Lawrence st, \$38,5500; 502-508 West 125th st, \$75,000; and 366-372 West 126th st, \$64,000. FRANCUZSKA ROHMANN, 223-231 East 110th

FRANCIZSKA ROHMANN, 223-231 East 110th , \$85,000. st, LOUISE VARET, 147 West 11th st, \$21,000.

ABRAHAM UNTERBERG, 239 East 28th st, \$28,500; and 174 Eldridge st, \$30,000. MOSES PECHTER, 60-62 East 98th st, \$47,000; 304 East 101st st, \$40,000; 637 and 641 East 13th st, \$57,500; and 68 Pitt st, \$40,000.

LOUIS STIENES, 522 6th av, \$11,500.

Loans in Queens Borough.

If any one doubts the growing importance of Queens borough as a community of development a glance at the bulletin of the Chamber of Commerce of the Borough of Queens will

merce of the Borough of Queens will quickly correct their incredulity. During the fiscal year ending July 31, financing of real estate and construction in that borough involved \$332,936,782, of which \$309,168,000 represented trust mortgages. This money was distributed as follows: Title Guarrantee & Trust Company, \$3,458,575; United States Title Guaranty Company, \$932,400: Oueens Couty Mort-gage Company, \$757,550: First Mortgage Guarantee Company, \$689,500; Nassau-Suffolk Bond & Mortgage Company, \$676,600: Home Title Insurance Com-pany, \$533,390; Long Island Bond & Mortgage Company, \$364,000; The Thrift, \$194,250; Lawyers Title Insur-ance and Trust Company, \$15,000; Title Insurance Company of New York, \$14,-250; Realty Construction and Investment Company, \$722,860; Bond & Mortgage and Surety Company, \$117,325; Life in-surance companies, \$112,000; banks, trust companies and building and loan associ-ations, \$4,741,591, and miscellaneous sources, \$722,005. sources, \$722,005.

UNITED OWNERS' BALL.

A Numerous Attendance at Their Annual Reception at Terrace Garden—Fea-tures of the Evening's Entertainment.

Reception at Terrace Garden-Features of the Evening's Entertainment. A large and representative gathering of real estate holders assembled at the divided of the set of the set

RECORD AND GUIDE

House Commissioner Murphy, Deputy Commissioner Abbott, Cyrus C. Miller, Magistrate Levy and a number of As-semblymen, Aldermen and other public officials. Handsome souvenirs were dis-tributed in the form of the official year book, which featured special articles by Cyrus C. Miller, William A. Prender-gast and William H. Abbott, Jr. The reception and ball were managed by the arrangement committee, of which Charles H. Schnelle was chairman; Charles J. F. Bohlen, treasurer, and Isaac Hyman, secretary. The chairmen of other committees for the occasion were Isaac Hyman, Harry Bierhoff, Henry Bloch, William H. Mehlich and Edward Engel.

-Manufacturers of hand-made hats have commenced to settle in the Thirties east of Broadway.

NEW HOMES ON LONG ISLAND. Total of 6,300 Residential Structures Erected During 1913.

RALPH PETERS, President of the Long Island Railroad, has just issued a compilation of building statistics covering the territory which his railway serves which answers to some extent the question raised by builders as to why multi tenanted structures were not in better demand. Outside of Long Island City and Brooklyn, the railroad reports a total of 7,600 buildings were

erected, of which 6,300 were dwellings. One of the interesting details shown in the reports was that during the last nine years 63,000 buildings have been erected outside of Brooklyn and Long

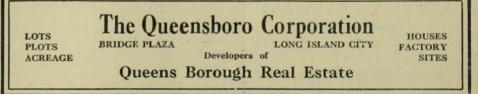

Borrowers

having desirable property on which loans are wanted can be accommodated in 'any amount at prevailing rates of interest. Submit your loans and we can take care of them promptly.

Connecting the Subway Lines.

It has been definitely decided that the junction between the existing subway and the new Lexington avenue subway shall be made at 42d street. The Public Service Commission has instructed its Chief Engineer to prepare plans for the construction of what is known as the diagonal station plan for this junction. The existing subway running down Park avenue will be connected with the Lex-ington avenue subway north of 42d street by a diagonal branch running from the existing subway, under the Grand Union Hotel, diagonally across 42d street and under the property of the New York Central on the corner of Lexington ave-nue and 42d street, into the Lexington avenue line. The express station will be located on this diagonal line, and will ex-tend under the greater part of the con-necting line. It will connect with the Grand Central Station, with the existing subway, the Hudson' and Manhattan Railroad and the Steinway Tunnel. The Commission has decided to condemn the property of the Grand Union Hotel, which will be needed for the purpose. An easement under the property of the New York Central, on the north side of the street, will be acquired either by purchase or by condemnation. A change has also been authorized in the route of the 162d street and Eighth avenue con-nection, which will connect the existing Ninth avenue elevated railroad on the Je-rome avenue branch of the Lexington avenue subway. As originally planned, this route curved to the south after leav-ing Anderson avenue and continued east-Service Commission has instructed its Chief Engineer to prepare plans for the

rebruary 14, 1914 erly across Jerome avenue and through lóźd street to River avenue and a con-nection with the Jerome avenue line. The change involves the continuation of the route from Anderson avenue ele-vated on River avenue, thus eliminating two curves. By this change the stretch of 162d street east of Jerome avenue will be relieved of the elevated structure, which will run through the interior of agreement to modify the certificate granted to the Interborough Rapid Transit Company for this purpose has been approved by the commission and sen to the company for its acceptance. There will be an express station for the Broadway subway in Manhattan at 42d street. This is the subway which is being built for operation by the New NThe plans of the First District provided for a local station at 42d street, but prop-erty owners at Times Square objected and demanded an express station. After onsidering the matter for several moth the commission decided to grant the request for an express station, but to locate the station in Broadway south of 42d street. The property owners wished it located north of 42d street, but there were too many engineering difficulties in the way. but there were too many engineering difficulties in the way.

Most Difficult Subway Work First.

Chief Engineer Alfred Craven of the Public Service Commission had adopted the plan of placing under contract first

the plan of placing under contract hist the most difficult work, which would take the longest time to build, and to follow this with contracts for the less difficult work. Preference is also given to the lines which will be necessary to enable both the Interborough Rapid Transit Company and the New York Municipal Railway Corporation to begin operation by January 1, 1917, as contem-plated by the Dual System agreements. As far as Brooklyn is cencerned, Engi-neer Craven says the New Utrecht ave-nue elevated railroad has been placed under contract; that the Gravesend ave-nue elevated line would have been placed under contract; but for the failure of the commission to get the necessary consents of property owners and the necessity for applying to the Appellate Division for legalization of the route. The plans for the Canal street subway, to connect the Manhattan Bridge with the Broadway subway in Manhattan, will be ready for advertising within two or three weeks. The Broadway subway in Manhattan is under contract as far north as 26th street, and the remainder, between 26th street, and the remainder, between 26th street and Seventh avenue, would be under contract except for the controversy which has arisen in regard to the Times Square station. Plans for the extension of the Broadway subway through 59th and 60th streets to the Queensboro Bridge will be ready for advertising by March 1. Plans for the Whitehall-Montagues street and Old Slip-Clark street tunnels will be ready for advertising about the middle of February 1, and the plans for the street street on the Eastern Park-way subway will be ready by July 1, and those for the Livonia avenue exten-sion by August 1. The chief engineer also stated that contracts for the Erook-lvn system had already been let for the Broadway-Myrtle avenue connection, the Lutheran Cemetery extension and the Sea Beach line. The commission is now in communication with the Federal government with the view of getting its consent to the construction of the White-hall-Montague street

AUCTION SALES OF WEEK.

Except where otherwise stated, the proper-ties offered were in foreclosure. Adjourn-ments of legal sales to next week are noted under Advertised Legal Sales.

* Indicates that the property described was bid in for the plaintiff's account.

The Auction Market.

There were 21 offerings at the Manhattan and Bronx salesrooms this week, and 12 were bought by parties in interand 12 were bought by parties in inter-est, 4 were withdrawn or adjourned, and 5 went to outside bidders. These were Joseph P. Ryan, who secured a big plot on Bathgate avenue corner of Fordham road for \$13,525; Jacob J. Ta-bolt, who bid \$9,075 for the tenement at 414 West 41st street; Mrs. William Bat-tenfield, who bought the dwelling at 412 East 137th street for \$7,550; Caroline A. Wheeler, who paid \$5,500 for a similar structure at 1273 Stebbins avenue, and John M. Susser, who obtained the two-story frame building at 2130 Hughes avenue for \$4,500. avenue for \$4,500.

For the coming week most of the offer-ings will be tenements. Joseph P. Day will sell a number of vacant lots on South Oak Drive and Valentine avenue, as the result of a foreclosure brought against the Warwick Realty & Construc-tion Co. tion Co.

Manhattan.

The following is the complete list of property sold, withdrawn or .ad-journed during the week ending Feb. 13, 1914, at New York Real Estate Salesroom, 14 and 16 Vesey st.

Light Your Halls

Twenty inspectors have recently been detailed by the Tenement House Department to see that hallways of apartment and tenement houses are lighted at night in accordance with the law.

The law reads that there shall be a light at night in the lower hall and one in the hall on the second floor. Many owners and occupants of tenement buildings unconsciously violate these provisions because of an inadequate method of controlling the light.

If you feel that the hallways of the buildings you own or occupy are inadequately lighted or the lighting improperly controlled we shall be pleased to render you any assistance in our power.

Write us and one of our lighting experts will show you how electric light will not only protect you against law-violation, but he will prove to you that it's the most economical form of lighting for hallways.

A Reorganization of the Brooklyn Transfer System.

February 14, 1914

Transfer System. A general reorganization of the trans-fer system among the surface car lines of Brooklyn is foreshadowed in a state-ment made during the week by counsel to the Public Service Commission in a case involving transfers on certain lines of the Nassau Electric Railroad Com-pany. This statement was to the effect that a committee, composed of repre-sentatives of the Brooklyn Rapid Transit Company, had been making a study of the transfer situation and had about agreed upon a plan for a general reor-ganization, by which transfers upon transfers will be eliminated, and yet the opportunity to transfer between any two transfers will be eliminated, and yet the opportunity to transfer between any two points on a journey in the same general direction for a single fare will be pre-served. The proposed arrangement will include the lines of the Coney Island and Brooklyn Company, now owned by the Brooklyn Rapid Transit system, as well as all the surface lines of that sys-tem. The report in detail, with maps showing the transfer points, will be on public exhibition at the offices of the commission, 154 Nassau street, Man-hattan, for a week, beginning February 10, and on February 17 the commission will hold a public hearing thereon. will hold a public hearing thereon.

Revised Crosstown Line For Brooklyn.

A new map has just been prepared by Chief Engineer Cravan of the Public Chief Engineer Cravan of the Public Service Commission showing the pro-posed route of the Crosstown Subway which is to connect the Eastern District with the Bedford section and intersect the principal lines of transit up and downtown in this borough. While the route in the main follows that tenta-tively talked of when the scheme took shape some important changes have shape, some important changes have been made.

been made. As laid out on the new map the route begins at the Queensboro Bridge plaza and extends through Jackson and East avenues to Newtown Creek, which it is proposed to cross by a bridge, the tracks on the Queens side to be on an elevated structure. On the Greenpoint side of the creek the route will cut diag-onally across two blocks between Oak-land street and Manhattan avenue and then proceed under the latter to and then proceed under the latter to an under McCarren or Greenpoint Park. and

under McCarren or Greenpoint Park. Provision is made for its connection with the East River tunnel for Four-teenth street, Manhattan, at Greenpoint avenue, if the tunnel route is changed from North Seventh street. From Mc-Carren Park the Crosstown line will proceed under Roebling street to and under the Williamsburg Bridge plaza, where connection will be made with the bridge, and then under the widened Roebling street and Taylor street to Kent avenue. Kent avenue.

There a right-angled turn is made into the latter, which is followed to Flush-ing avenue, where a diagonal connection under private property is made to Franklin avenue, under which the route extends to the Brighton Beach Railroad tracks at Fulton street.

Influence of Architects in Fire Prevention.

In the report of the special committee appointed to represent the American appointed to represent the American Institute of Architects at the seventeenth annual meeting of the National Fire Protection Association in New York, May 13-15, 1913, the growing influence of the N. F. P. A. was emphasized, also the desirability of active co-operation of the architectural profession in the work of the accordation of the association.

of the association. The recognition by the association of the powerful influence of the architect in fire prevention in the election of Rob-ert D. Kohn, a prominent New York architect, as president, was remarked by the committee, also the work accom-plished by certain of the association's committees of which architects are en-thusiastic members thusiastic members. The special committee, the members of which are Julius Franke, William L. Plack and J. Foster Warner, declared in its report that the "existing constitu-tional prerogative of the property ownFebruary 14, 1914

er" is a serious obstacle in the campaign for fire prevention, and in concluding the report, said: "The architects of America can and should take the initiative responsibility to the limit of their influence with clients by advising that reasonable fire resisting methods of construction be ob-served, not alone upon their merits, but because of the ultimate economy that must result by anticipating a tidal wave in the form of a sudden popular demand for stringent laws that will fix the stand-ard so high as to require costly alterator stringent laws that will fix the stand-ard so high as to require costly altera-tion in the best, and prohibit the occu-pancy of all buildings under the ban of condemnation issued by duly constituted authorities. The process of evolution is ever active, and it is only a matter of time when landlords will be obliged to submit to humanitarian equalization. Only justice is desired, but do not force it. Let us advise ways and means Only justice is desired, but do not force it. Let us advise ways and means whereby a composite perspective may be voluntarily accepted by the owner as an inevitable matter of course." Architects shoulder a grave responsi-bility in this matter of fire prevention. How many of them realize it?

Ventilating the Broadway Subway.

Ventilating the Broadway Subway. In order to relieve certain adverse conditions on the Broadway subway now under construction, other condi-tions are being created that are not beneficial to the general public. A spe-cial committee of the Real Estate Board, of which committee ex-President Tred-well is president, has made a report to the board, saying that while the commit-tee can offer no scheme of relief, it feels that the present proposed method of ventilation and pressure relief by means of gratings will not be to the best in-treests of Broadway. There is urgent necessity, the report says, for the en-gineers of the Broadway subway to dis-cover a method that will not be a serious detriment to all concerned, and perhaps to the subway itself. to the subway itself.

Limit of Occupancy in Factories.

Limit of Occupancy in Factories. Under the new Occupancy Law, for factory buildings, the authorities have figured out that in a room containing 9,000 square feet of floor space, assum-ing all conditions to be of the best, 135 persons may be employed. If such a building were divided in the middle by a fire wall properly erected and fitted with fire doors, it would contain two areas approximating 4,500 square feet. Assum-ing that one-half of such space were oc-cupied by machinery, tables and stock, there would still remain 2,250 square feet of free floor space. And under this law such free floor space would permit the employment of 450 persons upon the en-tire floor. tire floor.

Zone System in Chicago.

Chicago is considering the creation of Chicago is considering the creation of exclusive residential districts, according to a letter from Mr. A. W. Beil-fuss, Chairman of the Special Park Commission of Chicago. A committee of the City Council has prepared a bill amending the general municipal act so as to give all the cities and villages in the State of Illinois the power to estab-lish exclusive residential and industrial districts. In new residential districts this will prohibit the erection of build-ings other than residences and the usual ings other than residences and the usual outbuildings appurtenant to residences. No business can be maintained in a No business can be maintained in a residential district except by the consent of all or a specific majority of the real estate owners in such district measured by the street frontage. The city council is also empowered to prescribe the gen-eral character of the residences that may be constructed in residential districts. In order that districts now primarily residential might in time become exclu-sively residential, the bill makes certain provisions with reference to the future location and regulation of commercial and industrial establishments in such dis-tricts. This power authorizes the coun-

cil to direct the location of and to regu-late the construction and maintenance of all factories, stores and other busi-nesses in those parts of the city where

a majority of the street frontage is now

used exclusively for residential purposes. In the creation of exclusive industrial In the creation of exclusive industrial districts, the council is empowered to direct the location of, and to regulate the use and management of more than thirty enumerated types of commercial and industrial establishments, and of such other commercial and industrial es-tablishments as emit offensive and nox-ious fumes, odors or noises. The council is also empowered to di-rect the location of all material piles or stores on vacant property.

A Time Clock Question.

A Time Clock Question. The first case to pass upon the right of a master to withhold the wages of a servant who has failed to punch a time clock or otherwise to record his time, seems to be Matthews v. Industrial Lum-ber Co., 45 L.R.A. (N.S.) 644, which holds that the pay of an employee cannot be withheld for his refusal to obey a rule of the employer requiring him to register his time on a time clock, if he has not assented to such rule.

BUILDING MANAGEMENT TRAFFIC CONGESTION IN TALL BUILDINGS CAN BE OBVIATED BY DOUBLE-DECKED ELEVATORS.

By HERMAN GUMPEL, Structural and Mechanical Engineer, of Chicago

Conducted by Raymond P. Roberts, Building Manager for the American Real Estate Co.

'HE principles governing elevator traffic form a subject of great interest to those responsible for the returns on the capital invested in tall buildings. It is obvious that the elevator installations in many office, mercantile and factory buildings, not to mention department stores, are seriously lacking in capacity. The present standard of sufficiency is the satisfaction of the tenants merely. The possibility of fire or panic in a building where the occupants of the upper floors are de-pending on the elevators for relief, is nowhere taken into account. Since buildings are built for profit merely, their operation is a competitive business, and only legislation, dictating the minimum amount of equipment from the view-point of emergency accommodation, will

point of emergency accommodation, will bring a change. But even with an abundance of eleva-tors an otherwise fireproof building is not fire safe. To effect this, all elevator shafts and stairway wells, as well as the respective doors, should be fireproof. A still better solu-tion is shown in the accompany illustra-

accompany illustra-tion. Here not only elevator and stair-way wells, but also the elevator landings, are surrounded by a fireproof par-tition. Any combus-tible material would have to be kept out from this part of the building. This would building. This would make obsolete a re-cent suggestion to bisect a factory building from cellar to roof into two iso-lated sections by to roof into two iso-lated sections by means of a fire wall, allowing the occu-pants in case of fire in one section to take refuge in the other, however ren-dering stairways and elevators in a secdering starways and elevators in a sec-tion useless, where there is a conflagra-tion. A building, ac-cording to the illus-tration would be d i v i d e d into as many horizontal fire

many normalization into the solution of the so ties.

The Efficiency Limit.

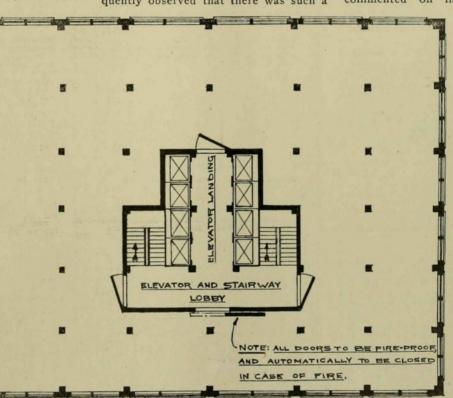

Mr. Bolton in his recent article sug-gests that the following advice should be given to elevator operators in busi-ness buildings generally: "After your car is half-filled, the more passengers you admit per trip, the fewer you carry per hour." In other words, Mr. Bolton is placing an efficiency limit of loading for elevators at fifty per cent. of the full floor capacity, and is claiming that any passenger carried above this limit will lower the number of passengers carried per hour. Mr. Bolton in his recent article

per hour. Elevator traffic conditions in buildings governed by such an efficiency limit of loading vary greatly. Much depends on the class of buildings, on the arrange-ment of the elevator plant, on the length of time required by the stops and on the number of passengers entering or leaving the car at each stop. These lat-ter two totals are not constant. If there

ter two totals are not constant. If there are only a few stops, the car does not exceed its normal round-trip time, and still it may leave the main floor densely crowded. Moreover, the amount of inter-story traffic, even if the car leaves the main floor only half-filled, can lengthen the round-trip time considerably. "Down" stops, where the passengers are stepping merely in front of each other and leaving the car at the main floor in one unit, are decidedly shorter than up stops, where passengers are fre-quently disturbing each other in their movements. In office buildings the maximum traffic is only one way, either "up" early in the morning and after lunch time, or "down" late in the after-noon or before lunch time. **Results of Observation.**

Results of Observation.

All these complications of conditions influence the efficiency limit of loading. During rush time "up," I have fre-quently observed that there was such a

will ascend to a certain floor without stop, accept there as many passengers as possible and descend to the main floor, where it will discharge its human load. On account of the absence of a multitude of stops, the observance of any efficiency limit of loading will not relieve the situation in the least, but would decidedly be a disadvantage. The Double-Deck Elevator. Mr. Bolton advises as the only remedy for traffic congestion to increase the cus-

Mr. Bolton advises as the only remedy for traffic congestion to increase the cus-tomary number of elevators. But we all know that the income derived from the capital invested in tall buildings is limited and on an average not more than $5\frac{1}{2}$ per cent. Any tendency towards more elevators than heretofore, which would reduce the usable floor space and consequently the returns on the invest-ment, would meet with disfavor from the realty operators. Taking into con-sideration the interests of both owner and tenant, the only logical solution is the double-deck elevator. These have been frequently described and favorably commented on in current literature (Record and Guide of Dec. 4, 1912), Ele-vators of this type accommodate t w o floors at one single

accommodate two floors at one single stop simultaneously, thus reducing the stop simultaneously, thus reducing the number of possible stops to one-half. A great number of stops during rush time are at adjacent floors, and stops in the same direction and under similar conditions are re-quiring about the same length of time. and under similar conditions are re-quiring about the same length of time. This will explain the simultaneous and therefore time saving action of a dou-ble - deck elevator, while serving two floors at one single stop.

Old Premises Made

Old Premises Made Over. An interesting ob-ject lesson in estates management is pre-sented by the group of old dwellings which Vincent As-tor is making over in 43d and 44th streets, opposite the Hotel Astor. Here were ten houses, five ad each having four ory extensions in the

as TYPICAL FLOOR PLAN OF FACTORY LOFT BUILDING; ELEVATORS, STAIRWAYS, fre LANDINGS AND LOBBIES FIREPROOF ENCLOSED.

proportion between round-trip time and number of passengers carried as to sug-gest an efficiency limit of seventy per cent. However, the same car when carry-ing a full load of passengers but making fewer stops was arriving within schedule time. It readily will be seen that in this case half-filled elevators would not con-tribute to the betterment of the service. Besides, in real practice, the public would most energetically object against any tendency of elevator operators to dis-regard stopping signals at the enclosure doors with only half-filled cars. I venture to say that an hour's test dur-ing rush time with half-filled cars and in a fairly rented building would dis-prove this rule. proportion between round-trip time and prove this rule.

In any event I fully agree with Mr. Bolton that elevators in many buildings are seriously lacking in capacity, a most objectionable feature, especially in view of the important part elevators play in an emergency. In this case, an elevator

on each street, and each having four stories with two-story extensions in the rear. The revenue from them was less than the land should produce, so Mr. Astor determined on a change.

Astor determined on a change. First, the fences between the yards were removed and one large central court, which will have grass plots, seats and flowers next Spring, has been laid out. In the buildings the first floors have been fitted out as stores, while on the floors above the doorways, halls and stairs have been rearranged so as to altogether transform the old layout into exceptionally cozy bachelor apartments.

⁻Of \$135,625,710 expended during the year 1913 for the operation and adminis-tration of the city government, accord-ing to Comptroller Prendergast, the modest sum of \$101,369,113 was paid in salaries alone. No wonder taxes and rents are high.

BUYING BUILDING MATERIALS.

Some Timely Tips for the Building Manager and Owner's Representative.

A T some time or another the build-ing manager or owner must enter the building material market for supplies. Those supplies may be for new buildings or for alterations. Frequently the contractor is employed to make the purchases, but in this department the building manager or owner's representative has an important part in making sure that the quality of materials he is paying for is brought to the job. Team work between the building manager and the contractor is essential, and some of the leading contracting houses of the day have systematized this work so that the building manager in figuring on that the building manager in igning on the completion of the structure may know exactly when he can promise his tenants occupancy. This is the way L. C. Wason, in "Problems of the Con-tractor," describes how one contracting firm caters to the building manager. "In the purchase of manufactured ar-ticles cuch as doors and windows and

ticles such as doors and windows, and in letting subcontracts, hundreds of dol-lars can be saved and better results oblars can be saved and better results ob-tained if handled by a person who by long experience has become familiar with all the details of the materials themselves, the dealers and manufac-turers in various localities, and who is also familiar with the relationship of all these materials to one another, as well as with the estimate and contract.

Paying For Sash Priming Twice.

Paying For Sash Priming Twice. "To illustrate one little point where a subdivision has caused expense. In order to save time, window-frames have been bought by the job superintendent from a local mill. These are sometimes primed with paint by the manufacturer and sometimes are not. If the painting contract is let by another person with-out knowing what has been done with window-frames, it has happened that priming has been paid for twice. "Similarly, all changes, either addi-tions or deductions, from the original design, should be handled by one per-son in order to see that no mistakes are made.

made.

'The purchasing department

is almost always ordered planed four sides. A correct ordering schedule for lumber cannot be made, of course, until the work of detailing forms is nearly completed in the drafting-room. It is possible, however, to make an approxi-mate schedule for canvassing for prices. By referring to standards it is often mate schedule for canvassing for prices. By referring to standards it is often possible to tell in advance what sizes are wanted, and in this way to be ready to order material forward immediately whenever centering details are com-pleted. As lumber arrives, the material of different dimensions, qualities and finishes is filed by a prearranged plan worked out in the office, handy to the woodworking shop, and given a number or letter obtained from the key plan.

Cutting Down Steel Cost.

Cutting Down Steel Cost. "The steel is taken off the plans by one man and checked independently by another. This schedule is then studied in regard to reducing the variety of lengths, and frequently these can be re-duced to one-fifth of the number shown on plan. It is usual to order a schedule of bars three-quarter inch and larger in multiples of six inches, and to buy steel five-eighths inch and under in the longest lengths that can be put on a single flat car, and cut it up on the job. "The largest size recommended, in the square, is one and one-quarter inch, and one and three-eighths inch in the round; the smallest, one-quarter inch; all sizes to be multiples of one-eighth inch.

inch.

"On one large job there were over 400 different lengths of bars shown on plans, and by scheduling large bars in multi-ples of six inches and ordering small bars in long lengths, as above described, the mill order was reduced to 46 differ-ent lengths. This method increased the weight of order so as to cost only eigh ent lengths. This method increased the weight of order so as to cost only eigh-teen dollars in excess of the exact sched-ule taken from plans. This amount was saved many times over in the greater convenience of sorting to deliver the small bars in bundles weighing from 125 to 145 lbs. This insures the men getting a load of proper weight for greatest efficiency. They are also easier to handle, with no picking up of one bar at a time and the trouble of unraveling that is found with small sizes."

BOILER SPECIFICATIONS.

Uniformity Desirable in the Interest of Both Manufacturers and Owners.

The large number of local laws regulating the construction of boilers in force throughout the United States has made it imperative that a man who is engaged in the manufacture of boilers for distribution throughout the entire country should seek to have uniform specifications enacted, so that he need not carry stocks of materials and stocks

not carry stocks of materials and stocks of boilers on hand to meet the require-ments of various localities. This opinion was expressed by Thomas E. Durban, of the Erie City Iron Works, of Erie, Pa., before the American Boiler Manu-facturers' Association at Cleveland. "The multiplicity of laws, differing one from another, make a needless waste," said Mr. Durban, "and as the cry of the country now is for conservation and economy we think that this argument can well be used with the lawmakers of all the States who will take the subject up. The waste comes from the fact that a manufacturer is now almost compelled to build each boiler to meet the require-ments of each law, necessitating slow ments of each law, necessitating slow progress through the shop and enorm-ous investment in material. The further

ous investment in material. The further fact that different manufacturers put different interpretations on the laws brings about a great conflict in the price of boilers. "With a uniform law and the co-oper-ation of all manufacturers these differ-ences would be largely overcome, so that the boiler would reach the consumer not only a better boiler, but for less money. Not only would the manufac-ture be able to produce the goods and sell them for less money, and be more certain of his profit, but he would elim-

inate the probability of a large loss in case his foreman or designing engineer should get confused in the various laws. There is no concern manufacturing boilers that has not suffered from the lack of uniformity in the laws. All this can be eliminated; the public can be protected, both as to its life and its investment; the manufacturer can make more money in getting concurrent legislation, or ap-proximately concurrent legislation, in various States.

Concurrent Legislation Needed.

"We are fully alive to the fact that no problem that has ever faced the American people has been more dis-cussed than concurrent legislation. The different laws in different States tre-mendously embarrass manufacturers do-ing interstate trade, and they affect our social relations. We know the action that has been put forth to have uniform that has been put forth to have uniform laws for crime and on credit, and on other matters too numerous to mention; but we believe no subject for concurrent legislation has been broached by people who have been so unitedly combined as to what is required as this problem that we have. And there is no doubt in the writer's mind that a conscientious effort on a specification upon which we have all united will influence the law-makers in a great number of States who have not yet passed a law and in turn will influence the laws already on the statute books to such an extent that cor-rections will be made in them to make them conform to a standard which we them conform to a standard which we can and will ultimately adopt.

The Present Diversity of Boiler Laws.

"Boiler laws are coming out from the East, West, North and South—in every direction. Not only are the laws them-selves different, but a different inter-pretation has been put upon the same law by different inspectors and different law by different inspectors and different builders. I presume without exaggera-tion that there are at least one hundred laws and changes to laws in the United States alone governing the manufacture of our product, and this can be multi-plied by a thousand times as many in-spectors as there are laws. "For instance: We have asked a de-

"For instance: We have asked a de-cision of one point—the butt strapping of drums. It is our interpretation of the law as it is written, in several of the States, that it is necessary to make all butt strapped seams to a minimum length of 12 feet. We have been in-formed by some inspectors that this does not apply to water-tube boilers, and by other inspectors that it applies to all boilers. We conformed our specifica-tions to meet the letter of the law; that is, to have no butt strapped seams over 12 feet long, whereas we have found out since we put this order into effect in our works that many boilers or drums of boilers are being made and passed with

boilers are being made and passed with butt srtapped seams as long as 20 feet. "In spite of all this, we are thorough-ly impressed that the boiler inspection laws have been and will be beneficial to us all—all the boiler manufacturers and all the users—and that out of it will come the ideal boiler in design, work-manship and material."

Income Tax Uncertainties.

Many points in the income tax law still remain in dispute among lawyers. Even the Government officers are sometimes at variance. The Deputy Commissioner of Internal Revenue has stated that he does not think that the clause of the act relating to indebtedness secured by collateral applies to mortgage indebtedness

lateral applies to mortgage indebtedness of real estate companies, and, moreover, the Department is not following the rul-ing of Attorney General Wickersham. In this connection Walter Lindner, of the law committee of the Allied Real Estate Interests, says that real estate owners should be cautioned to this effect and advised mat, notwithstanding these rulings, the items of interest in question should be included under the head of expense in the return on the ground that the language of the act clearly justifies it, whatever may be the opinion of the Department. Department.

February 14, 1914

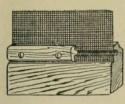

RECORD AND GUIDE

USEFUL APPLIANCES

Novelties, New Applications of Familiar Devices and the Trend of Invention, Designed to Aid the Architect, Builder and Building Manager, Described Without Regard to Advertising Consideration.

A New Type of Window Screen.

THE difficulty experienced in procuring window screens that are so constructed that small night insects cannot crawl through the space between the screen binder and the screen sash seems to have been removed by the introduc-tion on the market of the system of screen sash illus-trated. It will be noted that there is a groove placed in

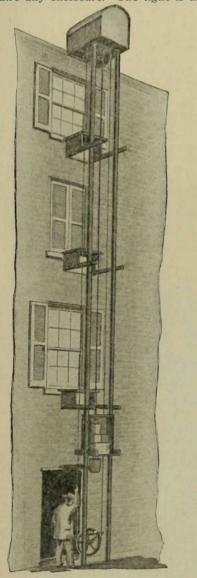

noted that there is a groove placed in the sash over which the binding veneer is nailed. This gives an even also prevents insects from crawling into the room through tiny crawling into

the room through tiny crevices opened up by reason of the old method of nail-ing screens fast to the sash by small nails at intervals.

An Out-door Dumbwaiter.

ONSIDERABLE attention is being given by architects and builders to the out-door steel tube dumbwaiter that the out-door steel tube dumbwater that is being manufactured by the Standard Electric & Elevator Co., of 123 South Calvert street, Baltimore. The advan-tage of this device is that it provides an inexpensive and space-saving conveni-ence for apartment houses and does not require any enclosure. The light is not

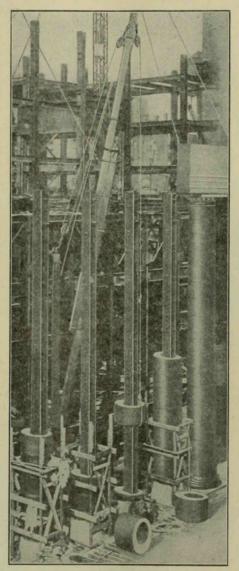

obstructed and neither is the swing of the window shutters interfered with. One reason for the interest centered in this appliance is that considerable money can be saved by eliminating the expense of making a shaft through the center of the building. No floors have

to be cut, no plaster or partitions marred to be cut, no plaster or partitions marred no window-trim is scratched, nor the furnishing of rooms disturbed. It con-sists of two-inch hollow tube guides, one of which contains the center of weight. These guides are adjusted by patented clamps on brackets, approximately 8 to 12 feet apart, which are secured to the building by expansion bolts. The ma-chines are protected from the weather by a hood, as shown in the illustration. The ropes cannot kink or twist as a re-sult of weather conditions, as they are held at uniform tension whether wet or dry. They are adaptable to buildings of any height. any height.

Granite Rings on Steel Cores.

N the construction of the Continental Commercial National Bank and building in Chicago several novel construction features are being introduced. We illustrate herewith the unique method of setting the mammoth granmethod of setting the mammoth gran-ite pillars at the entrance of this build-ing that will represent in Chicago what the Equitable building will represent here in New York. After the granite columns have been first laithed from the solid square block into cylindrical forms they are then

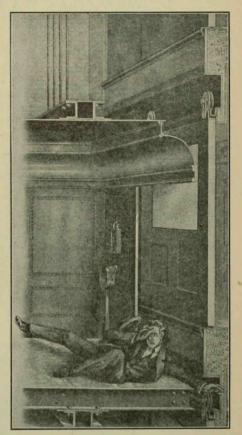

segmented into approximately two foot

segmented into approximately two foot sections by huge diamond saws. Be-fore the cap stones on these pillars are set these segments are lowered down are fabricated steel I's and are mented into place. The erection of this great building has faused more comment than any recent onstruction in Chicago since the early days when the Masonic Temple was the marvel of western city skyscrapers, and it is the peculiar application of building practice such as the placing of this system is said to reduce consider-ably liability to damage in transit of solid pillars. They are cheaper to pro-duce, cheaper to transport and with steel core they have greater weight sus-taining power. In case of fire calcina-tion with consequent collapse is not so

liable to occur because the weight of the superstructure is borne upon the steel

Elevator Shaft Safety.

NEWSPAPER articles told the story the other day of a preoccupied man who stepped into an elevator car and, while the door was being closed, sud-denly decided to get off again. The car had started upward. He was thrown to the floor and his arm scraped the front wall of the shaft. The operator lost his head and turned the controller full on instead of full off. In the next in-

stant the car had shot up to the next floor where an overhanging floor-lip pro-jected a half inch into the shaft. The man's arm was caught by this projection and was cut off at the shoulder. Arms are worth from \$5,000 to \$100,000, depending upon owners. The accompanying drawing

The accompanying drawing shows what may happen in any elevator shaft at any time if the shaft has projections that are capable of catching and holding any object or person losing his balance in a car. It merely emphasizes in graphic detail, one way that accidents and subse-quent damage suits may be avoided. Architects, owners, office building and apartment house managers knowing of dangerous conditions such as described to be existant in their buildings will find specialty houses in this city who, for comparatively little cost, will remove these danger spots without seriously in-terfering with the regular traffic in the shaft. The illustration is published by courtesy of the Burdette-Rountree Com-pany, 119 West 40th street. shows

Coating Iron with Aluminum.

NTERESTING experiments have been conducted at the Franklin Institute in making iron rustproof by coating it with aluminum. The iron article to be coated is first galvanized or tinned and then immersed in molten aluminum at about 700 degrees or 800 degrees C. During the immersion the surface is swept by steel brushes. The tin or zinc swept by steel brushes. The tin or zinc passes into the molten aluminum, and aluminum replaces it on the iron sur-face. The article is treated in this man-ner in two or more of such baths; the greater part of the tin or zinc is left in the first bath. It is claimed that this process causes the aluminum to adhere to the surface of the iron so well that it will not come off, tarnish, or corrode under the action of air, water or heat, and cannot be stripped off by mechanical means. means.

CURRENT BUILDING OPERATIONS

Including Contemplated Construction, Bids Wanted, Contracts Awarded, Plans Filed and Government, State and Municipal Work

A MODEL CITY AT ARCHITECTS' EXHIBITION

A Unique Collection of Colonial Designs - Suburban Domestic and Landscape Work Predominate This Year - Few City Skyscrapers.

S TRIKINGLY different in its general aspect is this year's exhibition of architectural works at the Fine Arts Times not long ago are re-Building.

most numerous, and some say this is the department which evinces the most pronounced advancement and certainty of purpose. The tendency is plainly toward the American Colonial first of

VIEW OF EANKING ROOM GUARANTLE TRUST CO. BUILDING Designed by York & Sawyer, Architects, Winners of Medal of Honor for Architecture

called when commercial buildings, particularly city skyscrapers, were the paramount objects of interest and the most numerously represented of any class in the exhibitions. And then there was an era during which the modern city apartment house claimed an extraordinary amount of interest. Neither class has been prolific of late, or else has been dressing with so much sameness that the spotlight of professional interest has been directed elsewhere.

been directed elsewhere. New York City work certainly does not dominate the architectural section this year. Always the city has something of monumental quality under way to be elegantly figured and prominently hung at the annual show; and, naturally, there are renderings of Mr. Cram's new design for the Cathedral of St. John's, Mr. Brunner's Riverside Drive extension, Carrere & Hastings' plan and plaster model of the Manhattan Plaza of the Manhattan Bridge and York & Sawyer's large panels depicting the Guaranty Trust Company's Building, besides some other city work.

Suburban Work.

But a fair inference from the collec-tion of pictures is that our city architects are busy with commissions for pub-lic and institutional buildings in other cities, and with domestic and landscape work in the suburban towns of Long Island, New Jersey and the Hudson Riv-er counties, as the departments named er counties, as the departments named are very strongly represented. Of all the architectural renderings, those of country houses and grounds are the

all, and then in a lesser, but still in a marked degree, toward the English do-

Thus in the "model city" alcove, the prevailing style is our Colonial. This is

Aty Skyscrapers. a collection of designs that have actually been translated into buildings. There is first a panorama of the dream city which shows the situation of every house, church, office building, house, store and factory, besides the school, bank, post office, court house, country club and public library. The residence of Prof. Lyon Phelps at New Haven, for which Murphy & Dana were the architects, the Weeks' house at Englewood by Hays & Hoadley, and the workmen's cottages at Jamaica, which Electus D. Litchfield planned, havé been chosen by the com-mittee to represent the model residences. The Groton School by Peabody & Stearns, the Mason Library at Great Barrington by Blanchard & Barnes, the Piping Rock Clubhouse by Guy Lowell, a church at Andover by McKim, Mead & White, a bank at Danbury by Parker Morse Hopper, and the post office at Beverly, Mass., by James Knox Taylor, have been selected as typical buildings by the committee. by the committee.

by the committee. The gallery devoted to architecture is not very large and no doubt many in-teresting designs have been turned away this year as in the past, and of course the members of the committee who made the selections for the model city re-frained from introducing any of their own work. Hence there is nothing in the alcove from Goodhue, Lindeberg, Embury, Hardenburgh, Gmelin, Tomp-kins, Kiessling, Cass Gilbert, Hewlett, Brunner or Bacon. It is said that the committee collected eight or nine hun-dred photographs of buildings from which to make selections. The medal of honor for architecture

which to make selections. The medal of honor for architecture was awarded this year to York & Saw-yer, the medal of honor for sculpture to Karl Bitter and the medal of honor for mural painting to Barry Faulkner.

Designed by Electus D. Litchfield, Selected as Typical Workingmen's Houses for Model City.

The collaborative prize of \$300, for a doorway to a museum of science, was won by Aymar Embury 2d, architect; Arthur Crisp, painter, and Salvatore Bi-lotte, sculptor. F. Tolles Chamberlin took the Avory prize of \$50 for sculpture.

The Annual Dinner.

The Annual Dinner. The awards of prizes made at the an-nual exhibition of the Architectural League were announced at the dinner on Saturday evening by President Cass Gil-bert. Speeches were delivered by Ed-ward Robinson, director of the American Museum of Art; J. Hopkinson Smith, the author; Dr. R. Clifton Sturges of Boston, president of the American Institute of Architects; John W. Alexander, presi-dent of the American Academy of De-sign, and Jesse Benedict Carter, director of the American Academy in Rome. Dr. Sturges urged the league to make a greater effort to win the public's sup-port by interesting the man in the street in its work.

in

its work. In the course of an interesting talk Mr. Smith advised the architects to adopt the method of coloring their plan drawings to make them appear as near as possible like pictures, so as to be better under-stood by boards of directors.

A Congregational Home at Flatbush.

A new building for the New York Congregational Home for the Aged will be erected during the year on the property

recently purchased by the board of man-agers of the society. The plot is in one of the best secplot is in one of the best sec-tions of Flatbush, on Linden avenue, between Bedford and Rogers avenues, and is large enough to afford a pictures-que setting for the building, with ample space for land-scape effect and recreation space for the guests of the home home. The building will be built

The building will be built according to plans and speci-fications prepared by Parfitt Bros., architects, 26 Court street, Brooklyn. The plans call for a three-story and basement building, of brick and Indiana limestone, fire-proof throughout. The build-ing will measure on the ground about 56x120 feet. In design the home will be pure Colonial of a simple treat-ment, with lines that should blend beautifully with its park-like surroundings.

blend beautifully with its Flatt park-like surroundings. P The project will represent an outlay of nearly \$500,000, including the price of the site. The funds are well in hand, and it is expected that active building operations will be started during the coming summer. Asa A. Spear, 79 Wall street, New York City, is treasurer of the home, and it is through his interest and leadership the new building is made and leadership the new building is made possible.

Astor Apartments to Cost \$1,500,000.

Astor Apartments to Cost \$1,500,000. Charles A. Platt, 11 East 24th street, was appointed architect this week for the new \$1,500,000 elevator apartment house which Vincent Astor, 23 West 26th street, is to erect on the east side of Broadway, between 89th and 90th streets, covering the plot 200x150 feet. Esti-mates will be called for by the architect from general contractors. The exterior materials will include light brick, terra cotta and limestone. As announced about a year ago, it is the intention of Mr. Astor to construct modern buildings on all of the Astor estate holdings which are poorly improved or vacant.

Reynolds Estates to Build Apartments.

Reynolds Estates to Build Apartments. W. Myron Reynolds, investment broker, and manager of the Reynolds Estates, 31 Nassau street, is having de-signs prepared for a twelve-story high-class fireproof apartment house, to occupy the block bounded by Bridge street, High street and Mack place, fronting on the plaza of the Brooklyn approach to the Manhattan Bridge. The plot is 100 feet front by 100 feet deep,

and the first story will contain a photo-play theatre and stores, with arcade, the eleven upper stories being laid out in commodious one and two-room suites, being so planned as to do away with the usual multiplicity of partitions, pas-sages and stuffy little rooms. The liv-ing-rooms will be provided with built-in bookcases, carefully-studied wall spaces for pianos, furniture, and in their in bookcases, carefully-studied wall spaces for pianos, furniture, and in their finish and decoration will especially ap-peal to individuals and families of culture and refinement. The block will be known as "The Plaza." The architect, Horace Greeley Knapp, of 111 Broadway, Man-hattan, estimates the cost at \$260,000.

New Building for Park & Tilford.

New Building for Park & Tilford. Negotiations were completed Friday morning by Paul M. Herzog for improv-ing the northeast corner of Madison avenue and 58th street with a three-story stucco building, 50x150 feet, which he has just leased to Park & Tilford for a term of fifteen years. CATALOGS, samples and products manufac-tured by the Allied Arts and Crafts are desired by Marshall J. Smith, architect, who has re-located his offices in the Colorado Building, Washington, D. C.

PERFECT SAFETY SCAFFOLDING CO., 620 West 25th st, N. Y. C., has opened offices in the Empire Life Building, Atlanta, Ga., and also a warehouse in Atlanta, in order to meet the in-creasing demand for their equipment in the southern Atlantic States.

southern Atlantic States. GEORGE H. MILLER, who for twenty-five years has represented in the metropolitan dis-trict the A. C. Dutton Lumber Company, of Springfield, Mass., has resigned to engage in the retail lumber business on his own account, with retail yard at S71-881 Lexington av, Brook-lyn.

with retail yard at S11-001 transport lyn. H. E. PORTER, who for seven years was with the Manchester Lumber Company, Manchester, Conn., will represent the Old Oregon Lumber Company, of Seattle, Wash. The Old Oregon Lumber Company handles Western spruce, fir and hemlock products, etc., doors, flooring, mold-ings and red cedar shingles. THE MORGAN COMPANY, lumber, doors,

ings and red cedar shingles. THE MORGAN COMPANY, lumber, doors, sash, blinds, moldings, interior finish, etc., with plants at Oshkosh, Wis., Baltimore, Foster City, Mich., and Chicago, has removed its New York sales 'office from 55 John st to the Craftsmen's Building, 6 East 39th st, N. Y. C. Five floors of this building are devoted to the exhibition of building materials, home furnishings and deco-rations.

Building, 6 East 39th st. N. Y. C. Five hours of this building are devoted to the exhibition of building materials, home furnishings and deco-rations. THE CERESIT WATERPROOFING CO., of flags, was awarded signal honors at the Ghent-Leipsig Exposition on the merits of their water-proofing products. This company has perfected a waterproofing system after many years of ex-periment and research, and the recognition given by the directors of this exposition is a mat-ter of great pride on the part of the company. STATE ARCHITECT LEWIS F. PILCHER was the guest of honor at a dinner Thursday. February 5, at Stanwix Hall, Albany. The dinner was a testimonial to the State Architect's office. A L. Brockway, of Syracuse, acted as toast-master. The committee of arrangements com-prised A. O. Van Seutendael, C. A. Sussdorff and Harold J. Hichman. McKIM, MEAD & WHITE in a letter sent to the Sinking Fund Commissioners, saying that certain comments by members of the Sinking Fund Commission Jan. 21 have given rise to and a failure. The letter reminds the board that the site of the building was acquired, "not for the purpose of recting an office building, but to permit of the construction of a system of and a failure. The letter reminds the board that the site of the building was acquired, "not for the purpose of recting an office building, but to permit of the construction of a system of arand a failure. The letter building is ex-travagantly planned, ill-suited to its purpose, and a failure. The letter sent to the stand first floor is used for the Brooklyn Bridge sta-tion, taking up twenty per cent, of its cubic contents. The plan was chosen by a jury of architects as presenting the best solution. It is further stated that the building in New York."

TRADE AND TECHNICAL SOCIETY EVENTS.

NATIONAL WHOLESALE LUMBER I ERS' Association will meet at Buffalo Mg and 5.

Eks' Association will meet at Bullaio March 4 and 5. CEMENT USERS.—The tenth annual conven-tion of the National Association of Cement Users will be held at Chicago, Ill., Feb. 16-20. STATE RETAIL HARDWARE ASSOCIA-TION will hold its annual convention at Roches-ter, N. Y., Feb. 17-20. THE NEW YORK LUMEER TRADE ASSO-CIATION will hold its annual dinner at the Biltmore Hotel, N. Y. C., Feb. 19. AMERICAN SOCIETY OF ENGINEER DRAFTSMEN.—Regular meeting third Thurs-day of each month. Walter L, Smyth, secre-tary, 74 Cortlandt st, New York City. AMERICAN SOCIETY OF CIVIL ENGI-NEERS.—Secretary, Charles Warren Hunt, 220 West 57th st, New York. Meets first and third Wednesday, except in July and August.

<text><text><text><text><text><text><text><text>

THE NINTH EXHIBITION of the Brooklyn Chapter of the American Institute of Archi-tects will be held at 131 Remsen st, Brooklyn, from Sunday, March 15th, to Saturday, March 28th, inclusive, without charge to the public. The public exhibition will be preceded by the private view, reception and annual dinner of the society, Saturday, March 14th. The exhibition committee, John P. Slee, chairman. H. Lincoln Rogers, Carroll H. Pratt, William P. Bannister and John P. L. Voelker, have spared no effort to make this year's exhibition the best in the history of the society.

OBITUARY

JOSEPH CAREY, a retired general contractor, died at his home, G15 Vanderbilt av, Brokklyn, N. Y. Monday, February 9th aged seventy-two vear

GEORGE M. CADMUS, aged seventy-five years, died at his home, 36 Washington st, Bloomfield, N. J., Sunday, February 8th, after an illness of several months. Mr. Cadmus had been Building Inspector of Bloomfield for over seven years.

RECENT INCORPORATIONS.

THE KESNER REALTY CORP. has been chartered with \$20,000 capital stock to do a realty and construction business with offices in Manhattan. The directors are Arthur J. Albert, 1026 Park av, Hoboken, N. J., John T. Duane, 333 Bleecker st, Brooklyn, and Robert L. Red-field, 341 West 85th st, N. Y. C. Hill, Lock-wood & Redfield, 35 Nassau st, N. Y. C., are the attorneys.

THE INTERSTATE REAL ESTATE & BROK-ERAGE CO. is a \$100,000 corporation chartered to do a realty construction. brokerage and build-ing material business with offices in New York City. Sol. Zarck, 2732 Broadway, Roscoe E. Blanchard, and Lydia L. Blanchard, 230 West 105th st, are the directors. Karl W. Buck. Esq., 230 West 105th st, is the company's attorney.

THE HAYFORD REALTY CORP. has file papers with a capitalization of \$25,000 to do a realty, contracting, brokerage and construction material business with offices in Manhattan. The incorporators are Raymond E. Maben, 174 Monroe st, Brooklyn, Chas. P. Kramer, 218 East 11th st. N. Y. C., and Josephine A. Lane, 512 West 135th st. N. Y. C. Roe & Hayes, 44 Pine st, are the attorneys.

CORNELIUS VANDEREILT GENERAL CON-TRACTING CO, has been incorporated to do a general contracting, construction and realty business with a capital stock of \$10,000, with offices in Richmond. The directors are Cornelius Vanderbilt, Cornelius Vanderbilt, Jr. and Francis F. Leman, all of West New Brighton, Francis F. Lehman, West New Brighton, is the attorney for the company.

JORAL REALTY CO. has been chartered with offices in Manhattan to do a realty and con-struction business with \$10,000 capital stock. The incorporators are Jos. Rosenzweig, 135 West 123d st: Raphael Lyons. Woodmere, L. L., and William Rosenbloom, 214 West 92d st. Jos. Rosenzweig, 99 Nassau st, is the attorney.

Rosenzweig, 99 Nassau st, is the attorney. SPARKILL REALTY CORP. has filed incor-poration papers with \$30.000 capital stock to do a realty and construction business with offices in Manhattan. John Otto, 542 5th av. N. Y. C., Fred W. Kolb, 765 Ocean av, Brooklyn, Con-rad Gaschott, Corona, L. I., and two others. Stover & Hall, 60 Wall st, N. Y. C., are the attorneys for the company.

JAMES MITCHELL has filed incorporation papers with a capitalization of \$40,000 to do a realty, contracting, construction and dealing in building material supply business with offices in Manhattan. The directors are Jas, Mitchell, 1440 Broadway, Martha L. Berliner, 160 Broad-way, and Clinton N. Hernandez, 515 West 184th st. Emanuel S. Cahn, 160 Broadway, is the attorney. attorney.

GROWING THE VARNISH TREE.

Department of Agriculture Is Urging the Cultivation of Chinese Importation.

After several years of experimenting in the South the Department of Agriculture at Washington is ready to advise farmers in the warmer parts of the United States to grow varnish trees and will help start the new crop, which, with care, should bring good profits, even on ordinary land.

land. Last year the United States imported 5,000,000 gallons of tung oil, expressed from the seeds of the Chinese tung or wood-oil tree, an oil which in recent years has had a revolutionary effect on the varnish industry. It makes a high-grade, quick-drying varnish with only slight tendency to crack. The tree which produces this varnish is a native of the Yangtze River region. In some re-spects it resembles the catalpa; in the Spring it is covered with large flower clusters before the leaves appear. The tree begins to bear fruit when four or five years old. The fruit is the size of small apples, each containing four or five large oil seeds. The yield of these seeds in China is thirty to seventy-five pounds to the tree. The oil from the seeds constitutes nearly 25 per cent. of their substance. The apple-like fruit would be worth 25 to 40 cents a bushel, and when the grees are planted twenty feet apart the gross yield from an acre would be, at these prices, \$50 o \$85 an acre. One eight-year-old tree near Tallahassee, Fla., bore last year two bushels of fruit.

asso an acte. One eight-year-old tree hear Tallahassee, Fla., bore last year two bushels of fruit.
 The cultivation and marketing of the fruit and the manufacture of the oil from the tung tree is said to be a simple process. The distri-bution of several thousand trees in the South in formation as to the behavior of the trees in the United States. It has proved a rapid grower and withstands a temperature approaching zero. It drops its leaves in the Winter and does not start again until early Spring. Therefore its crop is not likely to be injured by late frosts.
 Tung trees have grown and fruited well in South Carolina, Georgia. Alabama, Mississippi, Louisiana. Texas, Florida, and California, and the Government specialists see no reason why the experiments should not result in a profitable industry, particularly where land is of little value for other crops.
 The present consumption of tung oll in the United States would require about 40,000 acres of orchards, and the Department of Agriculture points out that the consumption is likely to prow. The department has on hand for dis-tribution to experimenters a limited number of one-year-old trees. What is now wanted to de-velop the industry, officials say, is the creation of acre plantations in the hands of private in-dividuals.

Smokeless Combustion of Coal in Boiler Furnaces.

The Bureau of Mines has just issued Bulletin 40, which is a reprint of U. S. Geological Sur-vey Bulletin 373, revised by Henry Kreisinger. The authors of the original bulletin were D. T. Randall and H. W. Weeks. The Bureau of Mines Randall and H. W. Weeks. The Bureau of Mines has made extended tests to determine the con-ditions necessary for the smokeless combus-tions of bituminous coal in boller furnaces. In the investigations of industrial establishments a study was made of the conditions in 13 of the particular of bituminous coal in boller furnaces. In the investigations of industrial establishments a study was made of the conditions in 13 of the particular of the study of the stablishments a study was made of the conditions in 13 of the particular of the study of the conditions in 13 of the particular of the state of the conditions in 13 of the particular of the state of the conditions are col-lected to make the data from 284 plants of a dout of the State so that although ning states were visited, the facts ascentained apply to coal from a greater number. The main pur-pose of the inspection was to obtain a better knowledge of the influence of furnace design, and of the conditions under which combustion takes place, on the production of smoke. The numary of conclusions as given in the Bulleth with different coals, depending on their chemi-tal composition. If more than this amount is burned, the efficiency will decrease and smoke will be made, owing to the lack of furnace tow capacity. When the furnace was forced a low capacity. When the furnace was forced to we capacity. When the furnace was forced to be furned furnace the best results to we capacity. When the furnace was forced to all sizes of coal burned with less smokes and developed the rated capacity with prac-cultion in the two of tile-roofed furnace used and developed the rated capacity with prac-culty in the smollest charge. The shark exists, but developed former capacities. The state and sub-bituminous coal burned reading in the two of tile-roofed furnace sizes of the developed the rated capacity with prac-culty in the two of the coals burned with the smoke. has made extended tests to determine the con-

The January Building Slump.

As shown by the preliminary report to Bradstreet's journal last week, there was no gain in building expenditures during

Bradstreet's journal last week, there was no gain in building expenditures during January, but rather a heavy shrinkage alike from January, 1913, and from De-cember of last year. The decrease from December was especially marked, and at New York City the falling off was very heavy because of the large total re-corded in December in Manhattan Bor-ough. Taking the country as a whole, the decreases outnumber the increases considerably, but the decrease at New York appears relatively more pro-nounced because of the December total having been so large, the heaviest of any month for nearly two years, in fact. The total aggregate expenditures at 125 cities for January was \$42,976,618, as against \$50,349,048 in January, 1912, and \$63,766,048 in December, 1913. There is here shown a decrease of 32.6 per cent. from January last year. As partially ex-plaining this slump, it might be noted that the total building expenditures at New York in January (four boroughs re-porting) was \$9,168,026, as against \$10,-376,880 in January last year and \$21,-017,173 in December, 1913. Here, it will be seen, the decrease was 56 per cent. from December and 11.6 per cent. from January, 1913. January, 1913.

The Graduate College Group of Princeton University.

(From the Builder, London, England.) One of the weak points of the American architect was considered to be their can architect was considered to be their inability to understand and carry out Gothic—a failing readily understood when it is remembered that the archi-tectural record of the United States covers little more than two centuries, and that, apart from the indigenous re-mains of Mexico, Peru and Yucatan, nothing remains in the two Americas of an earlier date than the Spanish Renais-sance buildings of Mexico and South-ern America. sance buildin ern America.

an earlier date than the Spanish Renais-sance buildings of Mexico and South-ern America. In these circumstances design of a Classic or Renaissance character is more natural to the American than the Euro-pean, and this is also emphasized because of the climatic conditions of the United States, as over the greater part of its territory the summers possess a heat and intensity which we only find in Southern Europe. Excepting for the round-arched Rom-anesque type of architecture, which we may almost say was "invented" by Richardson, and which, after a series of years, was swept away by the general endeavor to follow classical lines, the buildings of every other type have been few and far between. We see in New York and many of the older towns de-liberate attempts to copy certain periods, usually with a greater and more pain-staking attempt at accuracy than we find here. But the so-called Gothic of the United States is usually a hard and life-less imitation of corresponding work carried out here. We have now in Eng-land a number of designers who can carry out churches and other buildings which combine considerable freedom of design with much of the spirit which has rendered mediaeval work so interesting. The building which we illustrate here, the Graduate College of Princeton Uni-versity, shows that one firm of architects in America understand the spirit and

The building which we finistrate here, the Graduate College of Princeton Uni-versity, shows that one firm of architects in America understand the spirit and nature of Gothic design, and we think the accompanying illustrations will be of general interest to our readers. We do not remember a finer instance of modern Gothic design in this country, and it is doubly interesting as showing what can be accomplished by education, knowledge, and skill in a land without mediaeval traditions. Mr. Cram believes' that the exponents of Classic traditions are working on wrong lines, and, though we are not with him on this point, we think the Prince-ton College shows the absolute mastery of the style which he believes in. Messrs. Cram, Goodhue & Ferguson are also the architects of the Military College at West Point—a fine example of semi-military design.

FIRMNESS MARKS PRICE MOVEMENT, BUT INQUIRY RATHER THAN BOOKING OF ORDERS, AT PRESENT, IS RESPONSIBLE.

> Cement Stocks Pile Up-Hardware Firm-Lumber More Freely Ordered.

P RICES in most departments continue firm, which is perhaps the most reassuring factor in the construction outlook, as far as the metropolitan district is concerned. It shows that the character of the inquiry for second quarter and later deliveries is born of available money that will be turned into contracts as soon as the building season arrives. Steel and its allied products, such as

as soon as the building season arrives. Steel and its allied products, such as reinforcement and nails, are the leaders in this particular. It is also significant that sand, crushed stone and cement, all closely associated in construction work, are being firmly held. In gravel, prices actually have advanced. The change for the better in steel-making pigiron shows that steel com-panies are preparing for better con-struction conditions later on. Lumber is also moving more freely and hardware is in a good position, both on inquiry and current demand. There is still some tendency to at-tribute the hesitancy in releasing funds for building purposes to the currency legislation recently enacted and now being made operative, but men who keep a close finger on the building money pulse believe that the measure will equalize working capital through the various regional centers, insuring a more equitable distribution to meet the needs of legitimate manufacturing and mercantile requirements. Under the new law, also, considerable sums of cash reserves will be released, which, under the old statutes, were ly-ing idle in bank vaults. For instance, where the Government in the larger re-serve financial centers required a cash reserve of 25 per cent. by banks, only 18 per cent. is demanded under the fixed law, while in less important territories, where the cash reserve was fixed at 15 per cent, it will now be only 12 per cent. This should result in considerable financial expansion. Such being the case, it is reasonable

cent. This should result in considerable financial expansion. Such being the case, it is reasonable to suppose that part of this former re-serve fund will find its way into building and real estate investment; and it is be-lieved that the large building material interests, like the steel, sand, cement and brick interests foresee this and are thus encouraged to hold their prices and stocks in such positions and in such quantities as to encourage new building projects and at the same time insure a profit. profit.

STRUCTURAL STEEL TONNAGE. A Comparison Between That Used in Buildings and Railroads. T HE inquiry is frequently made by readers of the Record and Guide as to what propor-tion of the steel tonnage reported may be figured as going into building construction and the following statistics show not only the relation-ship between the volume of steel that goes into building construction and that used in rallroad and other lines, but also shows the proportion-ate distribution of steel into other avenues of consumption.

consumption.
Rails, 3,300,000; structural shapes, 2,800,000; wire rods, 2,700,000; plates and sheets, 5,900,000; merchant bars, 3,700,000; total of all finished rolled forms in 1892, 6,200,000 tons, in 1902, 13,-900,000 tons; in 1912, 24,700,000 tons.
It will thus be seen that the structural shapes, which, with a portion of plates, constitute the material in structures, are a very small portion of the total steel used.
Commenting upon the foregoing figures Henry V. Hodge, writing in the Engineering Record makes the following interesting observation regarding the future of structural steel, particularly in its application to building construction: "I'will further be seen, that we are doubling our total production every ten years. Our engineers and manufacturers have recently awakened

to the great foreign market which has hereto-fore been practically monopolized by Europeans, and we are now designing a large portion of the bridges and structures of other countries, espe-cially of South America. This is evidenced by our report in 1912 of manufacturers of iron and steel to the value of \$289,000,000, as against imports of the same materials of \$29,000,000, of this total of \$289,000,000 of exports \$120,000,000 was in various classes of machinery and only \$13,000,000 structural steel. Our total exports of manufacturers of iron and steel are being tripled every ten years, as shown by the follow-ing figures. Value of exports, 1892, \$27,000,000; 4902, \$97,000,000; 1912, \$288,100,000. We are now exporting ten times as much as we import, and this field has only commenced to develop, so that we need have no fear for the continued development of the steel industry in the future.

WEATHER STOPS BRICKLAYING. Lowest Unloading Record for Week in Several Years.

Several Years. Less brick was unloaded this week than in any week since the prolonged cold snap of fanuary, 1912. The total was only 513,250, the hore Hudson brick will be covered this winter, the being a total of eighteen covered barges total and wholesale docks, which is more than ample to take care of the require mainder of the season. Prices quoted are still minal and wholesale demand is spott. The wholesale market, with comparisons for the wholesale market, with comparisons of the wholesale marke

OFFICIAL SUMMARY.

THE HARDWARE OUTLOOK.

Window Glass Quiet—Nails Easy—Rope Firmer,

Firmer. C URRENT hardware business in New York and vicinity for the period since January 1 last, according to some, is a little in advance of the corresponding weeks in 1912. Trade in window glass is still exceedingly quiet, yet prices are quite well maintained, and there is, it is said, little if any further going

out of blast by glass factories. People in the business seem to be on the whole optimistic, but there is criticism of the long continued and others in an uncertain frame of mind. Buyers are specifying generally for current wants only and are not accumulating stocks. The metropolitan district wire nails are not looking ahead to any extent. The late of weather has served to check consumption, although there is a fairly good business doing, onsidering the customary dull season. Wire aithough there is a fairly good business doing, onsidering the customary dull season. Wire although there is a fairly good business doing, on to fore are based on \$1.90 per keg with some concessions obtainable. Cut nail and deliveries from mills are two weeks be bud. Cut nails, out of store, are on the basis of the year, but consumers have concluded that he actual conditions did not justify the in-france are booked for before long, how ever. Copper sheets are still on the basis of the trans are looked for before long, how ever. Be the eartiment there is a some-hemp, and especially for wire rope. The recent hemp, and especially for wire rope. The recent hemp espections, with the result that the buy is movement in this department has shown by strides since the first of the year.
